one in the middle is the physicality of the man. Soon the soul of the man will grow. It depends what you put in the machine (stronger core), (2:02). then it doesn't need the physicality nor to feed it or to kill for it. It's so simple. I said this to government officials recently that I can create a system that I can feed the whole nation. We know what needs to be in the machine (core) and we know that the soul and physicality of the man is weaker then the machine. They can take as much as they like, the more they take the more receive of what they don't need and can convert back to ?? The problem is that when you feed the man then he has got nothing to do now that the hunger is over. Would the man go violent to get more, now that he has no worries about how he receives the energy because it's always there. **We use the physicality to elevate the soul, so when the soul is elevated the physicality will also change**. **When you go into space you always have to consider the strength of your soul and if at the place you arrive its strength is at the level ??? where you have everything you need to manifest yourself**. This is why many places in the space he goes to are not suitable for the man because he can't manifest himself. Because by manifesting itself it can create its own demise which means it gives out its fields (?? totality out), he doesn't want to, but it happens due to the strength. (2:04). All the teachings are connected to each other, it depends on the understanding of the Knowledge Seeker. it depends on how you can connect and understand the totality and the faster you do the faster you grow. It's the same with the medical section, I went there and they wanted to know how you connect the medical box, I explained it very simply. If our elite in the medical field and sciences are still entangled in how to make a box they haven't seen. **The reason for the teachings is the doctor has to a creator that he understands every need, that it (he) becomes the machine (the stronger core), that can give to the soul so the physicality which is with disease can walk away. It's the soul of the doctor and not the machine that he makes**. In the space there are no machines, reactors, Mg, or K. The sun shines and the interaction of the rays with the physicality of the earth produces O, N, C, H gold and everything else. The soul of the doctor has to become the sun, and the interaction of physicality of the being (doesn't matter what species or part of the U) feeds the soul and elevates the physicality from its position of pain or what. This is the true knowledge, the real essence of creation and somehow man (2:06). gets entangled with physicality too much and as a patient teacher I take my time. When you work with test tubes you change something to achieve something else. We have the same problem with the people who are trying to fly. I have given them everything for the flight system but they can't get it and are running into frustration. There is something wrong they say. Yes, you haven't understood, the machine is the weaker, and the stronger is the soul. If you want to fly you have to understand this process (the stronger feeding the weaker in IL). It is me who feeds, it's my wish to see the flight, and then everything is done. But they are still after rotating and the same non-sense. It's time to unite the knowledge with all different aspects of the teaching, those who are science, agriculture, fishing, art whatever, to understand, and that the teaching is for all of you the same, according to your understanding is how you translate it into what you need from it. The agriculturalists are make CO_2 cores, the doctors are using CO_2 cores, have you every asked yourself, but it's the same CO_2 whether for agriculture or medicine etc. (2:08). **The love of God shines on all equal. If it rains and your a man you get wet and run away so as not to get wet, if your a plant you say thanks fro receiving water, but it is the same**. It's the same water and same knowledge it depends

on how you want to use it. You hold out a cup to collect the energy that comes as rain, you drink it and rejoice in your soul, or you hide away from it because you don't want to get wet, it's your decision. **When I teach I teach the totality and each one of you looks at it from the point where you are at and what you're interested in**. None of you stood still long enough to see that the knowledge is common between all of us. The knowledge of the Creator is like a sun, you have to understand which ray you want and where you want to be. Then if you change what you understood as a doctor to use for your patient you are behaving like an "Mozhan" , your soul becomes the converter of the soul of the emotion in respect to where it comes from the Creator, you become the physicality of it that it feeds the soul that is weaker for it to elevate through you. In one part you play this and another part you play that. It doesn't matter if you are in Agriculture or in Health or whatever. the sooner the KF K Seekers understand (2:10). It's the same song, do you feel like rejoicing, sadness because of the past memories, or does it make you think, I am wiser because it's the same song played by the same recorder and it's the same music, it's upon the beholder to receive and to what he understands from it. I have taught mankind the totality of the knowledge, do you want to filter with one name for the creator or the totality of the names of the attributes of the Creator. It's all the same sun, it depends on what filter you put (in front) that it gives you that emotion. **When man travels into space he'll understand more names or attributes for the Creator, of which at the moment he has no knowledge of**. Any questions? (2:12). You showed us the position of the soul of plants, but how is it that trees can grow from cuttings and not just from seeds, because you drew the location of the soul between the stem and the roots? What happens? No nothing happens. **Now we can take an egg and grow it into a man without the mother and father, they mix an egg and a sperm and we get what we like. And I explained that every cell of the man has a soul** and from the saliva you can tell a man's RNA and DNA and the rest. When you cut a plant (a cutting) **every cell of the plant carries all the information of its creation, and when you put it in touch with the soil, the fields of this planet, then it manifests itself the same as a life** (2:14). another being. This is why in every medical teaching I always explained that every cell has a soul, **but it depends on how the soul has been adapted to convert itself, if you take a cell in the arm of a man and you plant it will not grow, but if you take a cell of the man in the right way, if you can conduct it the right way you can create another man. It's the same with the plants but they have made an accommodation that they can do it, they accept certain fields because they are connected to the earth, they create a MG field of what they need**. When you put a plant down you just look at it as a leaf or a stem that you just put in the ground, but there is more to it. Every cell here (at the ?? outer edge of the stem) carries a soul and it creates certain fields that in interaction with this planet creates roots, it brings what it needs to it and it doesn't go out to reach it, and that allows it in a genetic way or whatever you call it, to grow in. It's not that you planted it and it grows but you don't know how come, because all the information for what it needs is here ( ). **When you put a cutting in the ground and it doesn't grow it means its fields do not match the environment, for the materials which it needs in that environment, because it has a preset soul level in interaction with the physicality of the plant**. So simple. (2:16). Q: Just to make it very clear you taught that the egg and sperm each have a separate soul and through interaction create a condition in the mothers womb that makes it possible for the soul to come from the

unicose and then we have a fetus, with the plants is it the same that the soul comes from outside? Soul what? ... **no, no the soul comes from the interaction of the fields of the egg and with it, it creates a stronger field which takes from its environment. In the case of the plant you create one condition and the other condition is the soul of the planet, and the interaction of the fields and what is available allows the root to grow**. This is how I like to connect myself to you. And in that process the 2 fields create a condition that allows other souls to be created. If you look a soul in the cell of a root has the same soul as a cell in the body of the man. (2:18). Q: How does the manure work, is it like the C in the CO2 Gans that attracts COHN or AA in the atmosphere and brings to the plant, does the manure act like a magnet for AA to the plant? Go back to what has been taught, what is manure? It's something that has gone through a process of Gans and in it is the same process. ... the energy which is embedded in it that gets absorbed by the matching of the plant. Fertilizers are a different way (form) of Gans but they are in the solid state. Because all entities are made of magnetic fields but when they are in the solid state they have a smaller field, in a Gans they have bigger fields, that's why there is more effect, there is more giving, that's all, there is no other difference. ... (2:21). Chinese man talks about plasma as universal principle and yin and yang theory and the 8 trigrams (BaQua). Ancient Chinese used this method to predict what would happen. (2:25). (2:28). With 6 leads to 64, the I Ching. (2:29). Mr. Keshe, when you speak about the IL this is what we see here. The strong and the weak and the intermediary is just the point of interaction. I have so much respect for the Chinese cultures understanding of Yin and Yang, the way of understanding the balance, this is the way the U works. All the people who gathered this knowledge over centuries understood this balance. Others have just followed it, some study it to understand more. (2:31). Two to the power of 3 is 8 and this is most precious number. In Chinese culture they don't have 4, no building with 4th floor. (Yes, 4 is considered a not good number) It's because it sounds like death, in Chinese hotels there is no room 104, nobody wants to be in the death room. The understanding of Yin and Yang comes from the deep understanding of the soul and you like to be generous because you are a giver, so you feel good, the giving makes you wise. This is part of the cultures understanding. (2:33). Is it the number 4 came in the middle or that you ?? jumped that and just look at 1, just not by name when 2 is not good enough, there has to be 3. the way you look is the balance of energies not playing with symbolism or numbers. You have to look at the essence of the knowledge, and Chinese culture in the ?? regions of the time understood this. Look at the shape of yin and yang symbol, one side is weak and other is strong and at the border line you see the difference and that is the physicality. One is the doctor the other the patient, on e is the soul of the doctor and the other is the patient, and the physicality is what will reach it. A lot of the (ancient) teachings even in the writing of the symbol for thunder, until the recent past you always thought the thunder comes from the top, but actually the thunder originates from the earth and travels up. Why? (2:35). It's the same with all our teaching, when you receive so much energy the surface of the planet absorbs as much as it can. It absorbs a lot, but at one point it releases a much greater amount and that is what we see as lightening. It's the way energy transfer has been changed into symbolism and numbers, for people to understand but in fact even if you look at this, look at the one it goes, there is always the point of giving and the other receiving, it needs to find the balance and so adjusts by giving and taking. But I have to give more to be able to receive more. Otherwise I can't give if I haven't

received. .. if you go to the wisdom of the Chinese nation and culture you'll find it's nothing but explanation of the soul of the man. Even the wise men of China couldn't very easily explain the wisdom to the people, because they couldn't understand ?? the depth of the culture comes by the strength in its knowledge, ?? it's a lot of symbolism that even now we still don't understand most of it. Because the people who became so wise could understand the work of the soul. (2:37). When you look at the symbolism or numbers it all talks about the same but the people of that time couldn't understand the maturity of their wise men. They had to hide it in symbolism that some people could understand, but now it has become fashionable, but go to the essence of it. If you take the whole lot of yin and yang signs, it's the same thing a line of transformation. Look at the essence of the knowledge behind the symbols. I appreciate very much the Chinese KF because their approach to the knowledge is different then the rest of the world. (2:39).

(2:41).

(2:48). Any other questions.
talks about book publishing in different languages.
(2: 57). Q:
(3:00).
(3:04).
(3:08). Neutrinos or whatever you call them are one of many packages of energy in the U as energy is transferred,

(3:12). Rick shows plastic balls rubbed with static energy, reposition themselves.
(3:23).
Any other questions. (3:31). Q: if the Books could be edited in English? Mr. Keshe says, they had an English speaking book editor do it, but she started writing it the way she understood it, so they had to change it back to how Mr. Keshe wrote it. Her job was to correct spelling and grammar mistakes. The First Book is the original version, historical version. (3:34). Ella has a draft version of the KF ID cards connected to the Banking system account. (3:36). Q; regarding souls of vertical people ...
(3:39). For the first time we see doctors, housewives, children, all kinds of people, and we are gathering the knowledge and elevating our own souls. ... I hear the different people tell what they have learned from the teachings and I have achieved what I came here for because every soul is getting enlightened irrespective of physical position and condition. What I said in 2005 or 6, to Belgium authorities sitting across form me, that I write my papers that the black man in the back villages of Africa will understand it the same as a white man, scientist sitting in front of me, that one can not abuse the other with the knowledge. And this is happening. (3:41).

(3:43). Jews deny the Christians and Moslems, because if they accept the ?? presence of Christ their is no Judaism. the Christians deny the Moslems and the rest because then Vatican can't make money, but they accept the Jews because they came from it, but they call their book New testament. the Moslems deny the Bahai's because if they accept the return of whatever they believe in, then it's the end of their people to make money, but

they accept the Christians and Jews because they wrote it (came) on the back of the belief of the other 2. The process goes now with what you call these Bahai's to accept the new knowledge that the soul of the man is over (above) everything else, they deny the work of their ?? and everything else, but the accept the Moslems and the Jews. This is how it ends up, (3:44). there is nobody for you to accept or deny in the future, and to not deny the ones from the past because you are the totality. You are the beginning and the end, so there are no more churches or donation boxes to the god's bank account. And no fear of punishment of physicality because now you know that you are in charge in of physicality and you decide through your own emotional balance with the other fields how you position yourself. You call it a gift or a punishment, but from now on it's your decision and we (have) come to that maturity. You it explain it any way you like but from now on you are the Moses, the Jesus, etc.. and everything else in the essence of the soul. What they told you not to do in physicality, now you are in charge of it through the soul for ?? damage. Because now you understand it's you who'll be positioned different to receive, and who likes to loose. We can call it, explain, define it, deny it but the truth is it's the reality and you can't change it. How we put it in words is how we like to fit it in our physical body so we can handle it. **I came the right way, taught the right way, and it the coming time there will be no more religion except the temple of the soul of man (3:46). who is responsible for his own conduct ?? of the universe. When you go into space there will not be another religion because they don't exist there, unless you are weak enough that you don't comprehend and you make the entity your guru, because he is more intelligent then me, but you understand that he carries the same soul as you**, ???same understanding as you , what he says in the level of the soul or comparison on the physical dimension, or manifest yourself. In our teaching, we want to be done with the idea that man is below the others so he doesn't become subordinate, and the only way to do this is to understand that a man carries a soul of the same strength and level of every other creation in the U. 59

(3:52) music.

Knowledge Seekers Workshop Summaries

193rd Knowledge Seekers Workshop - Thursday, October 12, 2017

(One nation ID Cards and how to use and in disaster areas, In space how you'll manifest your physicality through your soul, There are no wars in space unless man tries to start them but that won't be allowed, I am from deep space and we travel by our soul and not physicality, How to get energy in the space, the new banking system, Alzar tells about the poor street kids in Iran, To release the Power unit would be disastrous to the governments, Alex beat up for money in Nigeria and making a Gans swimming pool for the sick, He compares the Gans to the soul of the man, Physicians have to be givers from their soul to help people, ,)

(:11).

(:20).
(:29). Shows One Nation ID cards, on the back your signature is for the World Peace Treaty not the bank account. Any doctors who can help with the catastrophe in the Caribbean Islands. ... (:33). Q: When can we order the cards? A lot of work going on in the background. We hope within 30 days. These cards are for life. All the information will be on them, you education and expertise that in case of need the KF can call upon you to help. It's not a one way need but both ways. (:36).
... when we go into space these cards will be needed. They will give the position in the galaxy and planet earth as where one comes from. A lot of creatures in the U carry these cards that way we know where they come from. The Chip can't be read in the U but pictures in the way they are used carries a lot of information. Rick says that if one gets lost in space then they will help them get back to the continent they belong. (:40). Everything will be embedded.
(:42). In Africa you pay through the mobile to the mobile of the person you buying from. This is part of the "blue phones" I mentioned earlier. This is part of the progress. We'll do a test run to be sure it works. (:44).
.. we have to make it so good that nobody will want to commit a crime to eat. (:47). ... we have the technology, we have the numbers to bring the change, and we have the financial means to implement our work. No one can call us terrorist unless we are terrorists of peace. We make it available to everyone equally the same. Members of the Councils from now on you have to answer to your souls and the souls of the people who bring you new knowledge, even the request for help is a knowledge to understand how we can help them, is how can I find a way by talking with other council members or by bringing it into the open, how I can help and bring the change. We know we'll reach 144 members on the UC in the coming time. (:49). To be a member of the UC or EC is not that I want to be a volunteer, it will take all of your time and you'll be called upon to serve through your soul and whatever else it takes. This will put a lot of people to test, even the present members of the UC who came in and now will become full time. (:51). Collectively we'll achieve it, not to make mistakes of to be in a rush. ... there is no point in putting man in space without understanding the knowledge that was given to him. This knowledge was given to the human race from outside and if he goes into space without knowing how to turn left or right, to find for or to interact. As we learn more and more space technology we'll start teaching the ethos of the U. How to manifest yourself, to access whether you can be physically present in a given position in deep space. What do I do when I reach a position in the U, I feel it through my soul peaceful, I feel through my soul that there is somewhere I would like to have a look at, somewhere pleasurable to be in. I find the balance in peace in my soul, this is how in the U we know where we can manifest ourselves. When we arrive at a destination the physicality will not take shape the way we see it, we feel it through our soul, not taking or giving too much, so it means this is somewhere I can exist. If it is receiving too much it means (:53). I can't handle (or giving too much) it means this environment is not for me. Maybe I have to go to deeper levels of my soul to be able to see what is here, what I can see, how I can serve, be positive in the environment that I am in and don't just become something that I take from the environment. In deep space we work only and solely through our soul, we have passed the point of physicality. The maturity of understanding of the soul. We would like to reach a point in ?? certain position even if there is no physicality of the start or the

planet. The man has the understanding that he always has to land somewhere and to get out and do something to show that he is there, the way we say we landed on the moon or the mars, it's over. Any point where your soul feels comfortable to exist in and see, is home. There is more beauty in the non-tangibility line of the vision of the man of today then man can ever imagine in space. We you are traveling in space and arrive somewhere, ??? you feel suddenly something like a wind of peace, this environment feels good, I want to see what is here but there is no place to land, no moons or planets, but life exists in that strength level, all you need to do is to want to rest, to explore, (:55). you increase your M fields, by increasing or decreasing your M field you'll find the interaction phase, at what level the physicality is understanding, if you want to transfer yourself into a physical entity to be able to see. Or you'd like to see at the strength of the eye of your soul, which means understanding the environment, when you come to these points you release from the soul huge amounts of fields of a given strength, it's like pulses, at what level you see, you feel distance, visibility, tangibility of the soul, and then you access whether you would like to be here. It's not taking too much from me, the gap to my soul to the manifestation of the understanding of the environment is maybe 1 meter or 100, I can sustain 100. On earth we can't sustain over 100 or 200 kilos because the body can't carry the weight on this planet. So the distance from the soul is fixed by the size of the brain and what it can do in respect to the G and M pull of this planet. In the space it's the same and you have to understand the limit and I don't want to give more because it will endanger my soul because it endangers my existence. So you find yourself a point and distance of manifestation, then you have to understand whether or not your soul will survive. I see through myself the color of me in respect to the environment and there is a zone which is a danger zone which means I can deplete, (:57). and not receive, it means I created such a field that I am not receiving through my G pull so I have to strengthen or reduce my strength in manifestation, then you'll find peace if it's comfortable, if the emotions of the soul don't create the winds of MG fields within the structure of the soul that it disturbs the working of it, then you'll manifest yourself. Or you become visible or you make in the condition that the environment becomes visible to your eyes, the eye of the soul and not the physicality. You can still go in deep space through systems, what you call the spaceships, but at the end of it (the journey) the systems you produce for these SS will carry the same knowledge, the same process, but collectively much stronger deeper. We have to understand how you open yourself to the understanding of where you come from, if you see you, come in touch, you feel another being. there is no sign language, or other languages, nobody understands English, German or French, you speak through the language of the soul, as we ?? thought before. The Universe is a peaceful environment unless you get yourself in what I call a MG field turbulences which are dynamic because another condition is getting created, then (otherwise) you are 99% safe. We have not seen any wars in the space. (:59). and I hope the human race doesn't start (spread) it either, and this is part of this teaching. As we saw the US President's speech shamefully spending 700 million for military application and not for feeding the nation and the world brings a lot of pain. In the space, 700 million would be spent totally on creating more peaceful conditions for the U. It's only man that buys tools to kill more that he thinks he is peaceful. There is no terrorism in the space, unless the man gets in and tries to terrorize. And (if he does) it will be handled with very correctly. There are no tools for war and there are no foreign policy for peace. You travel

with your own soul and you are responsible, there are armies because when you make a collection of the souls they all work according to the level of the peace which they all carry. Collective souls traveling together in the space like you travel together in the airplane is only peaceful. It means I don't take because I have what I need. I interact with you because I want to learn from you and because I want to take from you. Man is a taker and he has to change into a sharer and this takes a lot of understanding in how we share and understand. **In the space there are no wars**, even though a lot (of people) would like us to believe that there are because it sells a lot of stories. (1:01**). I come from deep space and I haven't seen any. It is our soul that travels and not our physicality**. The process has to be very clear, when you reach a point in the space and you feel through the center of your soul, you can extend your soul to the edges of the U and feel the totality of it. The time of traveling and seeing the horizon, in which the horizon of the soul of the man is the boundary of the U, and not the curvature of the planet earth. We have to learn this. What I teach is the Universal Community, which man can't understand most of it, but he can imagine what could be available. It is available and not something to be, but the knowledge of the man isn't advanced enough to see it. **But those who have knowledge of their soul can see (it) and operate. We all know the knowledge and it's for us to take the shackles of limitations and prejudices of wanting to only be on earth. The only thing that restricts us is wanting to only be on earth**. If you open the eye of the soul you'll see the soul of the U. This is how it works in the U. When we go into deep space how to we understand another soul? (1:03). How do we work with another soul. Are we going to keep with the habit of the man to take or go by the habit of the U which is to give. A lot of you have not understood this and this is why you are failing in the production of your systems. Because you have taken the whole principle the wrong way around. In the coming time we'll teach you more about it. recently I was told that I show a lot of "green gardens" and was asked if I can show the path to them. The path to what I call the pastures is the understanding of the soul and not a method of how to make a coil or a Gans. I have said many times that when you make a Gans don't look at the physicality of the Gans, which 99.99% of you do, but **look at the interaction of the fields which the Gans' produce, then you'll understand the interaction of the fields of your soul**. Because when you can feel the interaction of the fields of the systems you made it means you look at it and touch it through the strength of your soul, not the physicality and tangibility of the Gans or the body of man. This is the difference between the true man of God and the true man of physicality, and you would like to see the God, and if you understand the creation, you understand the Creator sees through the soul. (1:05). and not the physicality, which he takes in any dimension anywhere in the U. The Creator doesn't manifest Himself as a human on planet Zeus, but will be the physicality of the man there. This is what man thinks and what he gets, he makes (space)suits for it, and tries to confine the body in different shapes of spacesuits, because he doesn't understand that he has the freedom of the soul which doesn't wear suits in the depth of the space of the U. When we understand the reality we'll gradually become the creatures of the U. **What do we do in deep space when we see our soul needs energy, do we go and rob another or do we give from our higher strength that it allows us to receive the strength we need by movement, by changing the position**. We saw with the magnets Rick showed a few weeks ago, when you put a magnet in a system the other magnets move. But you shouldn't look at the physicality of movement, **look at the fields**

that move at the point you put the magnet in, what you'll see is that it receives much from many with a higher strength, but it will give more through its lower strength in G field. This is how we absorb fields in the U. From what I have seen in the teachings is that man's knowledge has not matured enough to be able to understand this. (1:07**). I explained this in many of the teachings in respect to the banana, the more of it you peel the more beauty and energy is released from inside**, which means you have access to more bananas to eat. The fields of the U are the same, the more you take from the outside which is prtoection, the more you receive from inside, the G fields which the others are there to give. This is the way the soul of the U works and man has to mature into this knowledge. It's not something you see and grasp, but you have to mature not only to grasp it, but also how to use the knowledge and how to appropriately bring it into the interaction that it gives you what you need. Those who get educated and slowly mature in the operation of your soul will test (this) and you'll see. **You need 2 entities of a large difference in field strength of G and M, that the interaction of the 2 leads to the production of matter state or field state. We see it in the operation of the sun and the earth, the sun is hugely powerful and the earth hugely weak. The interaction of the weakness which has become matter state in interaction with the fields of the sun**. It's like a knife you put on the grinding machine, it creates different size of the sparks. The interaction of the MG field of the (1:09). earth and that of the sun creates 2 repulsion forces, which are the fields that are coming out and 2 fields that are going in, this keeps the distance, then it creates M in what has been reduced or what it needs for one to reach the other, which creates a G, and in that process the sparks are ?? little part of the same, one spark you could say is H, the bigger spark (when you put the knife to the grinder) is the gold. Now if you understood the teachings from the beginning, the soul of the man is the sun, and from the teachings of last week, every element, cell within the body carries a soul, if you can gather together those souls who are so weak as one energy in the palm of your hand, now that the energy that you have created becomes the earth, the interaction of the sun (soul) with another sun but in a lower strength, which is the structure of the soul of the elements of the body of man in the hand of the man, becomes the earth, now ?? divide it, the emotion, which is the interaction of the fields of the physicality in interaction with the fields of the soul, ?? recreate the entity which the emotion wants, if the emotion wants a cancer in the prostate in creates that, or now it wants gold in the hand (1:11). this is the wisdom of the U. **This is the only time we have seen this wisdom which was just touched by or used by 2 people, Buddha and Christ**, one in physical and one in intellect. Why do we need to understand? Because then **in the interaction of the soul in the space with the dimension of physicality, you create the space within your soul, or you create the entity with the interaction of the fields of your soul with the environment and you manifest yourself**. Blessed are those who understand, this is how easy it is. You are looking for SS to fly, but the SS of the man is with the soul of the man. The manifestation of the physicality of the man is his weakness. If the man learns to travel the spans of the U with soul then there is no need for a SS, because the SS is the physicality of the man. I am the beginning and the end, the beginning is my soul and the end is my physicality with the wishes of my soul. (1:13). This is part of the teachings and those of you who have understood the past few minutes you have found the key to the U. We keep on teaching it in the simpler language and simpler versions until one or the other rings the bell of peace in the soul of the man. Try

not to work with the Gans (as something physical), but try to understand the interaction of the fields of the Gans, then once you have understood, then you'll understand that the Gans is the soul of the man, and the fields that it emits is the ?? fields that will come. I explained last week to the doctors that the **physicians have to be a giver, and not a certificate on the wall. That he is a lover and by the interaction of his soul with the physicality of the man gives to the point of his need, what it needs to find peace with its soul. Then the cancer will be gone within seconds, diabetes won't exist**, if my wish is to give you an arm I will create it. This is what the physicians need to understand because when you become a physician you become a lover of the creation. This is what it means. You sign a paper in the university when you become a doctor, but you serve humanity. Now learn that the signing has to be with the soul of the man, then you serve the U because you have understood the process. (1:15). Which one of you wakes up in the middle of the night or early in morning to help to alleviate the pain of another man, doctors do because they sign themselves to it. The father does the same to care for his child, he does it out of the love. Every man has to be a physician for every being in the U. Now you understand why I always emphasized loving and giving in my teachings and to give more without conditions. This is the essence of the creation. What is important is not what I receive but what I give, then we become true men of space. When we understand the totality then we move on and advance in the knowledge of peace. Some of us have to do what we do for the others to learn from it. (1:17). but do we need to understand that we do not need to learn. We have to understand the true meaning of the U and the teaching on the Gans was one of them. You all gto baffled and puzzled at the Gans' and what they do, but one thing you never looked at is that the Gans is the soul of the man. It was for you to see an example of your own work. You are too physical, try to work beyond it, and try to understand the interaction of the fields rather then the presence of the Gans' water or the N material. You will have whatever you need. Try to understand what the Gans does in the presence of another Gans, but now change the Gans into fields, then your knowledge becomes complete. You have to understand the totality but be aware that you have a physicality, but do not get confused by the understanding that the physicality behaves this way, but that the fields have made this condition for it to manifest itself in this way. Find the operator, the source and not the end. Man always looks at the end, this is why in KFSSI we have no exams, because in the present education you have to see what you have learned at that point, but no one looks at how you might use the knowledge in the future from what you have learned, this is the exam and not passing a test, not creating a physicality to confirm that I learned (something). We all learn everything but we use it when we need it. In the first days of school they teach us how to use a ruler to draw straight lines, but how many of us carries a ruler in our pockets because we might need it one day. Once we know how to draw a straight line we can pick anything up and use as a ruler. This is what has to become the knowledge of the man in the space, we teach you so much but the time you need it is the time you'll use it. (1:20). It's like with banking card you don't continuously leave it in the machine, you take out the card when you need to use it to get money out. We have to learn this from the process we brought that the physicality of the matter into N then into Gans and the interactions of it in different ways. We have all the knowledge, the time we need it is the time we use it. When we learn this then everything will fall into place. You have all the knowledge if you live somewhere cold and you need warmth you have the Gans' to

interact with, and once the warmth is created you don't consider that I made this or that, because it works in the background and creates the condition you need. Over the years I have taught many different ways to do the same thing because it enligthens the soul of man at different strengths, ways and times, but the essence is the same at the end. I am a lover of peace and I do whatever possible to let my other side know how much I love. I love peace and through the teachings I'll create all the conditions of the different strengths needed by the different souls that all will become peaceful, but they have to understand why, and what is the benefit for the others when I am peaceful, not what is there for me to get (1:22). to become peaceful. In the past half hour of teaching, what I explained to you about space will take you millions of years to understand if you are not enligthened, but if you are enligthened then you have already become the entity or being of the space, because you have learned the teaching of space and you have practiced it. **The teachings from now on are very short, but there are a lot of different ways to open it and it depends on how and what you understand**. Any questions. Q: will the new banking system rely on the old fiat system or the new digital decentralized block chain technology? (1:24). The way we see it, we work of Internet Banking and not relying much on the machines that you have to physically carry notes with you. As One Nation we don't have different currencies, it will gradually become non-tangible. We have seen "Bitcoin" and that coin, but we coin with the peace of man and not with the physicality of gold or whatever. There is no need to have different systems or currencies. If locally they understand and accept they'll change it, but you'll find out because it's a free understanding of totality a lot of things will change and it will go very rapidly. The new currency will be one of One Nation and a lot of people will find their own way of what unit it will be, and a lot will understand that I don't need units because I don't need to pay anything because it's from the same bank from one pocket to another. I need it and it's there, or I grow plants because I love to do it and I respect the plants and animals that live with it because I know I have everything with the card I carry. The incentive is not which machine but how to create the peace (1:26). and knowing it is there if I need it. Alzar talks about poor kids in Iran. (1:28).

(1:32).
(1:37).
(1:44).
(1:47).
(1:50).
.. The structure created in Europe with social security has become the noose around the neck of (1:54). governments because they have forced their own nationals to become the thieves of their own nation. The taxation and the process of using it is wrong. We discussed this with 2 Ministers very recently, **they asked me why I don't push for the release of the Plasma Power Unit. The effect of it on European economy is disastrous**, you would have nothing to live with nor to put in your house the minute we launch it. What I explained to the Ministers, in launching the electrical system which can be used on electrical motors (we have already explained that). You would deplete your nations of millions of dollars of fuel tax revenues immediately. The effect wouldn't be next year but now. If you put 1 million generators in Italy along with the car units. Each car pays on average 20 pounds per week in taxes ... within days the national governments

would collapse. (1:56). because they wouldn't have the money to support the roads, pensions, social security and the rest. First we have to establish the One Nation banking system we are talking in the background with banks to join us to become part of this One Nation, because they can't sustain the payments on national securities. The biggest payments are to the military and national securities, it means paying the pensioners. I have proposals to a couple of nations how we can change things. .. .

.. the biggest problem I have with releasing the power generators is the destruction of so much (1:58). but some of it is good, but the loss of national incomes (on energy) which now they have become totally dependent. Mrs. Thatcher did this in the 80's increase the taxes on fuel to pay the debts of the nation. ... (battery failed) .. (2:00). People asked if we could released the power units just in areas needed for disaster relief, but it will leak around and the world, we saw that with the MaGrav Units people opened them up, and then it will create mayhem. ?? the release of the plasma battery ?? (2:02). .. We have left a number of units around the world that if anything happens to us they'll release it, I have made sure that this time no ransom is taken ..
.. the beauty of it is that most of you who have made the Gans' have in front of you but you don't see it, it's amazing that it is erased from a lot of you, from your understanding. Maybe it is the wish of my soul that it will open up when the majority of the human race is mature with it. It's not something strange from the ?? man. the structure we have to understand is that we'll change everything at the same time. As I said at the beginning we have responded, even though I have a lot of problems with what the Canadians have done to me personally (jailed in airport), but I close my eyes to it, because of what I have heard from the new PM of Canada. We'll respond accordingly, up to now we walked away from them because we were not sure of the governments behavior. The new PM speaks peace, we'll respond with it. ??? investment in indigenous people ...

(2:04). KF Manufacturing Canada is investing in indigenous people, okay they missed so much but now they get to the top. This is part of our work.

(2:06). .. the running of this planet is the soul of the man. I was told the master has come and you'll watch from the sidelines, those who planned it have shto themselves in the ooft. The one who was intermediary was put out. The beauty of life is understanding the life in the U and not on the village planet of earth. We see in the banking system abuse, child and human trafficking and governments sponsoring trafficking because it brings them (whatever), it has to stop. (2:09).

(2:15). There are 100 to 150 million people ofllowing the KF, I did all the teachings now it's time for you to change. Q: Alzar asks about the change to space, that a time is going to come and all the kings are going to disappear. You see Alzar you are still looking for the physicality, **if your soul has managed to reach that point that you talked about in Iran, you have already ended the kingship for your self you have become equal to the others**, there is none for you (you have become one). We are equal to the others. (2:17). Q: I understand that, we are trying to get into space?. We are already in the space, we are trying to join the family, this is the point. You go to Iran to show the brass that you are from America, we show the end of kingship through our behavior and through

the soul. It's understanding that all the souls are equal to each other. Then the others will join step by step. This is the change. When one changes the other also change. .. (2:19). You are already one of the first people to accept the end of kingship. .. when you don't want to be a part of you can promtoe your own ??? (2:21) (2:23). Q: why did you choose plasma as the name for this technology? Yes, it's very easy for me, I am a nuclear Physicist and part the structure and teaching of the nuclear industry, we always speak about magnetic field containment, if you look at the proposition in CERN or whatever. A plasma to a nuclear physicist is a soup of fields, but to a doctor is what you inject (blood ?). In the English language it means the essence of freedom to be able to have, this is what I understand as a N Physicist. It's the freedom of the fields for them to be able to do what they like. The plasma is the freedom of ?? what you get in the hospital as (2:25). an injection when your body has a ?? It's what influences the body to serve. And there is no more appropriate word then plasma in the N physics, where the energy is free and traveling in the space dimension of the magnetic field itself. This is why we use the term plasma. The common language uses it for ??? It means the transparency from the transparency of the point of origin that it serves or gives. It's a natural process that we are taught in the nuclear industry. We can control or contain nuclear material by heavier material or by ones that can slow down the neutron, but if you look at it, this is what I had a problem with my professors, what we use as intermediaries to slow down the neutrons or whatever, it's only a magnetic field, nothing else, it's not that w put moderators, reflectors or absorbers in the nuclear reactors, it's just how do we pack these fields. I can stop a nuclear reactor leakage by creating heavy fields, without any matter, we do this now in the Fukoshima situation. It's understanding that plasma in the freedom of the fields and how we want to compact it. (2:27). This is why it was chosen and it's a correct terminology if you understand the true meaning of the nuclear industry. Alex from Africa. You have to speak, how is your health, he is a member of the EC for Africa. Everywhere I go there is misery and I hope we can contain that one way or the other. (2:29). I have been trying to make a plasma swimming pool in the SSI compound in Nigeria. We need about $20K dollars to complete the project here. It's a Pl swimming pool for health, when you go swim in the pool your health problems will disappear. Alex I'll pay for it, the KF will pay, it will be in your account Monday morning. Thank you Mr. Keshe. (2:31). Have you recovered from the robbery incident? I was beaten with the guns and I still feel the pains all over me. I have the pain pads on it. (2:33). He shows the swimming pool, they're embedding oofd Gans' in the walls of the pool. Are you using the same principle as I used for your Malaria? Exactly. Okay. ... Alex was taken by gunpoint a few weeks to rob his account and beat him up. (2:36).

(2:46).
(2:52). Lynn and plasma energy station ...
(3:01). (3:04).
(3:07).
(3:12). Mr. Keshe has to leave.

END

194th Knowledge Seekers Workshop - October 19, 2017

(Intense spiritual talk 1.5 hours, Man needs to learn about the energies emitted from his soul, The physical part of the teachings have come to an end, The micro and macrocosm and our soul can be compared to the sun of the solar system and the planets are like the organs of the body, and the sun confirms its physicality through the planets, The fields of our soul reaches the inner sanctums of the universe, our souls are like the stars in the sky, Rainbow and the interaction of different field strengths, Understanding our own soul will allow us to enter the space community of the universe, This time the human race will reach the point of maturity, The soul is so powerful it creates the body and it can also feed the body when we understand this then we don't need to kill anymore, Prayer means banking in the "central bank" which is the soul, One soul can change the totality but the rest have to be will to receive, The cloud traces in a clear night sky are energy transfers of the universe and we can learn to tap into them to feed ourselves, It is my body and soul that have to accept the energy of the Gans it cannot force itself on me, When the souls reach the point of knowledge of itself they'll amalgamate into one soul, ,)

(:11). .. we confirm our existence through the matter subjects, making matter state systems that are dynamic and can show us something. ... **Man needs to learn of the energies emitted from the center of his creation, called the soul**. Do we need proof that the fields emitted from our center, our soul, comes from the matter state physicality of ourselves. Is it any different then the machines you have made. (:14). Pl patches, MaGrav, Pain Pens, or have we at so early stages of this knowledge, drawn the line, this is as much as we want to know, we are happy with a Pen, coil, and some energies and that's it. **This is where most of the teachings have to come to an end, that is in the physical state of matter. and we have to move into the next step, which is the emissions and interaction of the fields and going beyond the physical state which we have accepted and educated ourselves over centuries and thousands of years, not only man but also the other creatures on this planet**, any other being like the plants, fish, or whatever. **We have to start trusting, understanding and developing the interaction of the souls, which is the inner strength of any being**, which is the star, the center, and the creator of the totality. What we can't see in micro we see in macro, and what we don't see in macro we see in micro. Then we understand how we should comprehend and where we should rejoice in the existence of the soul of the man. So many of us speak about the sun, the soul of the man, and reaching the essence of being, it doesn't matter in what state. (:16). or which position in the U. **For those of you who haven't understood the operation of the soul and you need to confirm it, even though it is within you, it's very hard to reach. You can look into the solar system, your soul is like the sun and the radiation of this entity leads to the creation of matter states of the different parts of the entity**. Let's say the soul interacts with its own fields and the interaction of the fields which are outside dominating and conditioning the size of its position in the galaxy, in a given position leads to creation of the earth, let it be the heart of the solar system. Even though the soul, in which the sun

still exists, the heart still beats. For example, let Venus be the kidney, or put something else in the place of heart with all the subsidiaries and the veins and flows of the fields. In **essence the soul of the solar system has manifested itself in the form of planets and moons to confirm its existence and in that process interacts with other stars, solar systems, galaxies inside the system of the U**. It's not that it is just the sun on the wings of the Milky Way, its existence allows the field coordination of (:18). of the Milky Way even though it's so small. Like in the body a scratch, boil, or a little tumor in a small part of the body effects the rest of the existence of the man, so does the solar system in respect to the galaxy, and so does the galaxy in the structure of the U, and the U in the structure of the unicose. We have to understand how the fields of the sun in emitting from its center leads to the creation of these organs, these conditions which we call planetary or moons or a cosmic dust or whatever e call it. the earth would not exist where it is if it were not conditioned by the conditions of the galaxy, so it has manifested itself in that condition, because the forces of the galaxy still pass through the earth, solar system, the fields of the plasma of this structure, so do the rays of the U pass through the body of the man. We have been brought up to think that just because we have a skin, we have contained everything within and nothing else goes in, but our body is nothing but a sponge for the fields which pass through the U. We stand outside and watch shotoing stars the way the fields of the plasma enter the solar system slows down and then in the atmosphere of the plasma of the earth reduces enough that it manifest itself as a light (:20). traveling for billions of years in the space of the U ad it changes its condition of the matter state to an energy of light, what we see. So it is the same inside the body of the man, if we could sit within the skin of the man we would see many shotoing stars, the way the energy passes through the skin goes down (reduces in strength) and then it releases its energy, its manifestation of creation in the U within the manifestation within the body of the man. How do we feel it, react to it. we have to understand this within the depths of the space, what happens to the fields of the rays which pass through the soul of the man. **The soul is like what we call a Principle Matter, its in the center, it's created to absorb certain strength fields that confirms and guarantees its existence, once it is established. So what we see in the depths of the U, we see in the soul of the man**. For many of the Knowledge S this is the line which they can't imagine they can pass and understand. But this is part of us, our existence, and a combination of the confirmation of the existence of souls and the reduction in the strength of the souls that leads to the creation of every entity on this U. If you stand still and think, on the planet earth we have a crust, interaction of physicality's, islands, oceans, land parts, and everything else. (:22). When looking from outside this U which part of the earth are we? Are we part of the magma or part of the shell. Are we part of the inner soul of the entity? But how much of the reality can we understand and how much would we like to understand. The soul of the man is (like) the sun, he radiates its fields, at a certain point with the interaction of the atmosphere of this planet creates a boundary, which we call the body of the man. **At that point ?? it life doesn't stop, the fields of the soul still spreads across the U very much like the light we see from the stars in the U**. If we could make systems in which we could see the faintest lights in the U then we would see the light of the body of man as one of these stars, because it still radiates . We see the soul of the man as one of these stars and in ?? condition in different part ?? fields the strength of his environment it manifests itself as the solar system, galaxy, and the universe we know. So what we don't

see in macro we see in micro. As we see light reaching us, as they say billions of light-years away from us, it's the same with the soul of the man, it radiates, it emits its fields and it's for us to start to become mature in not looking for the physicality of the man but for the interaction of the fields of the soul. (:24**). In the space we have no physicality but we carry the soul. As we enter into the next phases of the space technology man has to become mature to the teachings**. It is part of understanding the totality of the creation and not being stuck with the material conditions of the present times. In many teachings **you all looked for the Gans or a material that you can confirm that this is a CO2 or CH3 or whatever, and I keep on emphasizing look for the fields that they create**, what does this star emit and what does emission mean. **Look at the sun, it emits fields that we call light when it interacts with the atmospheric condition of this planet. It stays in transition, in the higher speed of mtoion and in that position travels the span of the solar system**, and those fields that are higher then the structure of the resistance in interaction with the other fields of the U it travels through into the other solar systems, into the depths of the galaxy. **The fields of the soul of man reaches the inner sanctums of the U, as it came from there and shall return**. We have to become educated to move on to the next step. (:26). I see a lot of problem for a lot of people to go through this transition because having a cup with a Gans in it is good enough, I am happy with it. Those who want to go to the next step have to understand the position of the soul, and how the fields of the soul in interaction with the other souls creates a dimension which they have never seen before. **The physicality of the sun and its surface doesn't finish the existence of the sun (there is much more to the sun then as it appears physically). the lights and rays it emits crosses the boundaries within the shell of the solar system and then interacts with other solar systems that at the point of manifestation shows the structure of the soul of the planet, and the structure of what we call the solar system**. **The sun itself is a matter of physicality, the ?? of the solar system is the boundary of the soul of the planet, the whole of what we call the star. Every entity has 2 dimensions and in different fields and different strength interactions it shows one of its attributes. It's very much like a rainbow**, at different strengths (you have) different colors, the interaction of the light doesn't stop at one line of the rainbow, but different strengths of it creates different colors of it. So it is with the soul of the man. The earth is the physicality and the interaction of different field strength (:28). of the atmosphere itself creates the different lines of boundary in what we call a rainbow, the different colors. So it is with the soul of the man, so it is with the sun, so it is with the rings of Saturn, which we see but don't fully understand, very much like the rings of Saturn. Every field interaction creates a boundary of the fields, without they are the matter condition, but a field condition. Where is the soul of the man, in interaction with the physical condition of the fields of the planet we have created the physicality of the body, but the soul and its fields goes beyond the shell of the skin. How do we detect the rest of it. **how do we watch the rest of these fields interact with other souls, with other fields, do I become purple (standing) next to another soul, but yellow with another soul. What does yellow mean is it further or closer to me, is it of hate or love, and can I bring it closer to become purple that to me it is safety**, I allow a certain amount of space closer to me. We have to expand understanding of the operation of the soul. And every tool to conform (its existence) is within the reach of the man. We know but we have never understood. Many people speak and show, this is the M field,

some call it aura (:30). but does the aura of a man finish within a few inches? It's that the interaction of the soul of the cells of the man with the atmosphere. the soul which is within the brain has its own rainbow within the condition of the atmosphere of this planet and within the solar system. Does the rainbow confirm the existence of the planet in its physical state or does it stay, the fields of the planet in interaction with the fields of other matter state strength within the boundary within the field of the planet. How come we see it and it's not there, it's illusive but we observe it and to us it's so real. Planet earth is kilometers away but the fields stand in different shape or colors in the atmosphere of the earth and in reality beyond earth we see rings of different strengths**. It's the property of different field strengths which creates different color atmosphere in the U. What color means the distance ??operating from the soul**, what color means the position of the environment in that respect, then we understand the reality about the soul. this is the step we have to take. **Everyone has shied away from (:32). talking about the soul, which means we never understood our own creation and now we understand that we have to study it and become mature in understanding it that it allows us to enter into the space community of the U. Without it (this knowledge of the soul) man shall fail in the space**. This is what all these teachings are about, we are maturing to the next level irrespective of what the physical matter state demands. **Those who mature to the reality of the creation and search for understanding the totality have to look into the fields of the soul's interaction with the rest of the U, then they'll see the depth of the U, to understand the operation of the U, and their own position and in respect to and as a process of the function of their own soul**. Man has been brought to this point many times but he shied away from it, but this time there is no shyness. **This time the human race and the rest of the beings on this planet will reach the point of maturity** to understand the totality. How do we interact in the process of interaction of the souls, and how do we identify our own position ourselves, in respect to another soul. We **have become very familiar with physical interaction, (:34). we stand in a crowd and we make sure nobody touches us, this is the boundary of our physicality**. But have you for a second ever thought, my soul is crossing his or her physicality and the guy next to her and beyond because the physicality of the matter state is me in this position, but my soul expands the whole lot (it spreads throughout). Do we want to mature to understand that when one soul is existing amongst the other soul and their physicality is in misconduct, how do the other souls which are within it, don't need to feel the physical misconduct, but see it through the strength of the body through the soul. Nothing is hidden from the soul and those who become wise to it will understand the totality and this is the purpose of the teachings, to allow you to understand the existence of **the physicality doesn't finish with the boundary of the skin.** You stand in a bus with your child separated from you by 3 or 4 other people. You see and communicate with your child through your eyes, and there are people in-between. Your soul doesn't jump to the child, (:36). it goes through the people in-between, because it interacts with you, this is the reality of the existence **and in that process you reach your child's emotion or the soul that it confirms to you, that I am okay, I am here, it doesn't matter that we are apart. In that process, the people in-between through the energy of the soul have come in touch with you, they become part of you** because in that process not only have you reached your child but you have gone through the souls of those in-between. **Once the man understands this, the color of the man won't exist anymore. It won't matter**

if one is black and the other is Chinese, a male or female, or a dog in-between. We have to understand that the soul is color blind and religious blind, because it knows its own conduct and doesn't need a prophet. The soul is transparent because the others give and take from it even if the child is 2 spaces away. The sooner we learn this the less we'll spend on arms, and waste time for man to destroy his own physicality, as the soul in-between needs maturing, understanding and the space-gap of the 2 in-between, is the prejudice of man in respect to his own soul. (:38). We have to mature and look for as many ways as we can to educate ourselves, there are no universities of the teaching in the space and no professors of the soul of the man. We don't prophesize but we understand the totality because we don't need to. **The soul is the operator of the totality and even the physical body of man and the need of physicality**. If you mature yourself to the point of understanding, then I'll mature you to the next step. Stand still for a second and understand**. If the soul is so powerful that it leads to the creation of the man, then why does the soul need to be fed from outside the body. Do we need to kill to consume** to confirm our existence or do we mature to the next level that if the soul is (the same as) the sun, then it can feed the physicality eternally. Those who mature to this step enter the kingdom of creation. (:40). This is what we have to move onot, this is the next step in the teaching to understand. We use Gans' to feed ourselves and meager matter states to feed the totality of the soul, but the soul has created such a beautiful entity called the body, and **once we learn the process of absorption from the fields through our soul we can feed this body of the man through his soul, without consuming any or killing** any (other being). This is the next step that we have to mature into. If the soul has created every organ to confirm its existence of its physical dimension, if we can absorb the energy of the U through our soul, through the soul of every cell, then we don't need to consume. **Or is consumption of the physicality confirmation of the weakness in the structure of the soul of the man, that it needs to confirm to the others in the environment that I need to exist** and I ?? . Do we need to go through the space or come to understand once we comprehend the true essence of the creation, then we become true men of the space as our soul receives what it needs from its environment and in turn feeds the physicality of the body in any dimension and any space or time and at any points in the U. (:42). Many of the physicians have started talking about the soul and its evolution in their teachings, and are seeing the changes. **But the true physician of the man is his soul** and this is what we have to mature into, to understand that this soul has lead to the manifestation of my physicality, that I can go back to it to feed the physicality without killing another entity or destroying another life, another soul. **For many of you, to accept the soul to be the inner being of your existence is a big dilemma**. Now you have to walk to the next step that you can feed the physicality of the man through his soul, then there shall be no war or killing. **Because in this way man will receive everything he needs according to the wish of the soul**. This is the next step of maturity to understand. Many of the Knowledge S created the water of the Gans' so they don't have to eat and just drink the water. Some have gone even a step further by sleeping within the fields of the Gans' and they can see they are being fed. But now go a step further and look at the reality and understand how much has not been understood. (:44). **That I am the Creator! I feed the body and I lead to the creation of this physicality in the atmosphere of this planet, so I can feed it too** (the body). the prophets of the past spoke **about prayer, which means feeding your own soul and banking in the**

"Central Bank", which is the soul of the man. In some of the teachings I have explained that when you prayer, that it is like the planet earth that was created in the boundary from the interaction of the fields of the sun and then it is re-collected and the earth returns back to the sun. What it released (the sun) is "banked" (in what) became the matter state of the earth and then in time it returns back to it (the sun). Because if it doesn't it guarantees no existence, because then it is lost into the space of the U and it will become the energy of the other entities of the soul of the other solar systems and galaxies. **Move into the final destination and then you'll understand more that the body of the man doesn't need to be fed, because it receives what it needs, and then through its own structure feeds its organs, that in itself it becomes independent of others. And then you'll become as humble as any creator**. This is what we target and teach from now on. (:46). In the deep space you understand that you absorb the energy from the U within the soul of the man and in interaction of the environment and atmospheres, with the field states of the position you are in you manifest yourself, and you also feed yourself. You don't need to wait for the water or be afraid to die if this planet doesn't have any, or needing oofd by looking for a cow for beef, or whatever, on planet "Zeus". You will feed yourself through the energy of the soul of the man. Then one will understand and the maturity of the soul should appear. These are the steps that we have to go through and the way we mature to become men of space, without the spaceship or the shackles to the planet earth, without shackles to the environments that we have to manifest ourselves in. Our teachings have to be understood as the totality of the need of the soul and not of the physicality. **How many of us teach our children to look into their soul and into the conduct of their emotion in respect to the others. And to be vigilant of the energies that are emitted from them in respect to the others**. Many of you have made btotles and you put them next to something or put in something, (:48). or you take it and say that it creates such a condition. How many of you **have stood in a crowd and emit from your soul to the other souls and see how the whole environment changes**. If a small amount of water of Gans can effect the huge body of the man, can you imagine what a container of 50 to 100 kilograms of the Gans of the soul of the body of the man will interact with the others, now convert that into the soul. **One soul can change the totality but the rest have to be ready to accept, to receive it**. It cannot be forced. **When you stand outside on a clear night and if you have the wisdom of the light of U, you see cloud traces, which are the fields traces going from one to another spanning the sky, and we say there are no clouds, but why are there cloud fields, these are like channels, like the rivers we see on this plane**t. This is the reality of what we need to exist. This is what we stand for, what we have to confirm. Once we look at the rivers and oceans of this planet, these (the traces in the sky) are the rivers of the U, field transfers from one to another. (:50). We become wise where to drink from the waters of the fields of the U. **We become wise in how to tap from these transfers of energies across the U**. In the time of the maturity of the man, very much as **you go to the rivers to drink, you'll go to (these) rivers of the fields of the U to take from of what you are short of, what you need. You tap into them and at the same time you put back into them what you don't need**. The reality of life is not just understanding the physicality but understanding the totality. The sooner we mature the faster we grow to understand the reality of the existence. This is the process and we have been shown the path but we never understood. "I made man in the image of myself." So I can feed the man also

through what I have created. (:52). Those of you who were looking for oofd to take into space to guarantee your existence, now you have become a timeless and limitless source of life, but through the soul. It is important for us to mature to this phase of teachings, because from now on **those of you who are still entangled with others will still be there because those who come new will need teachers to be able to understand the basics of N and Gans and the rest. And those who understand the process of the N and the Gans and then move on to the next step, and those who taught have already moved up t the next step. This is a continuation of the ?? teaching until the totality comes to understand.** It's not that you just work with the N and Gans, now start interaction of the fields and understand them and don't just look at the CO2 water when using it, it does this. **Understand that it is my body and soul that have to accept that energy, it can't force itself on me. So I am a feeder, because if I don't give to that CO2 Gans inside the btotle, it can't give me what I need. So I am the essence of the creation. I create the conditions of receiving, and not what is in the btotle** (the CO2 Gans doesn't, it depends on me). Most of you have made this mistake in your understanding. (:54). Because man is so physical that he looks at the small btotle, but he doesn't stand and look at the ?? jug, if we mature in this process, and the faster we do the easier the whole teaching becomes. But we have to understand all the phases of it, and then that **Power Unit of plasma energy you are looking for sits within the soul of the man, it'll give light, heat, oofd, and one point which you all have missed and maybe it's time to open it up, all of you have been waiting for the Oasis System , the Oasis S of the man is the soul of the man**. this is what you have missed and by teaching and understanding we are bringing man to the oasis. **The promised heaven is the point when the man understands the existence and true operation of the soul of itself**. The gates of heaven are the knowledge of the operation**, and heaven is operating through the correct conduct**. (:56). We teach in many languages, but in the language of the soul of the man, it depends on if you are in the orange band of the rainbow or purple, etc. , the color of the environment shows the maturity of the understanding of the totality. The one outside is more of the environment and inside of the soul. Once man matures to this point then you don't look for the physicality of the ?? body, you feel the fields and don't need to touch the field, then the every soul becomes the physician of itself, the desire of itself to manifest at any point in the U that it fits the environment that he would like to manifest himself. (:58). We have to understand the totality and in a 194 teachings, step by step I have brought you to this point. **The whole understanding of all the teachings has not been to make Gans', but to show the strength of the field that it leads you to the soul of the man, by understanding the fields that have been created that has lead to the creation of the soul**. Replace your soul with the sun and then look at the game **the sun plays on its own within its internal structure of planetary, and then look at the structure of soul which is the sun in the environment of the Galaxy, then you'll see the operation of your own soul**. "I am the Sun and the Sun is the creator of the light". This is what these teachings are about and the faster the human race (1:00). moves in this direction the faster we achieve peace, because then the physicality is irrelevant. **We compete to be a more shinning star and not to be in the lines of the outer, but rather to the ones closer to the color of the soul. The beauty of it is that once the souls start to achieve this point they amalgamate and become one soul**. Don't forget that the **creation of your soul came from the mother which is the creation of the sun, which**

itself came from the creation of the soul of the Galaxy and the creation of the soul of the U. The teaching is not about a patch or MaGrav, **it's about understanding the field interaction. The MaGrav System is the energy of the soul of the man, and a patch is confirmation of the boundary of his physicality**. You can't put a patch if there is no physicality. There are no factories, universities, restaurants, temples or churches in the U. **Those who mature to understand they decide what shape or color they (1:02). would like to manifest themselves in the spans of the U. Then in one rainbow you are black and in another you are white, etc**. The color of the skin of the man is the deception to the existence of the soul, as it confirms its existence according to the physicality of the environment. **In maturing to understand the operation of the soul ones understands the whole physicality as it is so low that it's not worth being entangled with. It's so much energy consuming, the part is there but it has nothing to do with my operation. You start ignoring the physical body and work through the fields** which are beyond the physicality and emitted by the soul of yourself. This is the maturity of time. Where **you understand there is a containment for holding the soul for it to be so that it can be and radiate, but the true life goes beyond the physicality, the fields which pass the boundary of the P body**, (1:04). Now many of you will start making machines to detect souls and their colors, where before you were happy with their systems of the aura of the man. You don't look for reduction in the strength but for the beauty in the colors of the souls in respect to interaction with other fields of the U, be it another man or being or another position or condition in the U that allows your soul under the decision of itself to manifest itself. There is no need for soul searching but for understanding the soul, it's operation and existence. **In the past times it has been kept far away from the man that he could not believe that he is empowered and in position of such a powerful essence of creation that he has demised himself to the condition of physicality. Do I need to make love in the physical body to enjoy and give pleasure to another physicality, or can I do it through the essence of the soul with another soul, which means giving unconditionally and then you become a lover of life, the creator, the god, as the Creator gave unconditionally by loving**. (1:06). Man has become so physical that even the giving needs physical tangibility for him to confirm that he has given, where all he needs to know is, I give unconditionally, I don't need another soul in the condition of physicality to confirm my existence that I can give. In many research teams I keep on confirming to them to stop looking at the Gans and start looking at their fields. Until our own wise men in the research teams of the KF don't understand this, you remain entangled in the dimension of physicality. Go back to the teachings of these past years, I spoke about the creation of a SS that is made by one, and the creation that you are in control, that the pilot through his soul controls the condition of the SS. Now you understand the rhythm, the mystery in the words. The captain is the soul and the SS is the dimension which the soul decides to manifest itself. (1:08). The teachings in these processes becomes so mature that many of you will leave the KF, because it's too much too understand, I came here for a Gans for my cancer, but I found out that I can change the cancer with my own soul and emotion, myself, there is no need for a physician as I am the physician of myself. I have created the heart, I can repair it if I need to. Or have I become paralyzed in helping myself. We talk about Global Warming and Chemtrails and how they interact in our body, but stand still and look inside, what GW you have created through the interaction of your souls with the others, and what

Chemtrails your soul has left, endangering the others. Man has to mature to understand the existence and operation of his soul, the control of itself in what is a creation of itself in physical matter. (1:10). Then man shall not kill.

(1:23). Workshop Closes.

End

195th Knowledge Seekers Workshop - Thursday, October 26, 2017
(,)

(:11). We have entered a new way of teaching, not a new way, but going to the next level of understanding. A lot of people couldn't understand because it has gone to a level of self-evaluation, -understanding, and self-trust, that we have the knowledge, power and confidence and everything and now it's us who have to make the decision. As I said in the past couple of days teaching, the transition from the matter state to the power of the soul of the man is one of the most difficult parts for many people. Physicality is easy we can reach it and touch it, and because (:13). we have made these senses we trust them even though they have oofled us. Now we have to trust our soul which is the creator of these senses and we have not been educated to do this, we have never been told about this, we were told it was something imaginary somewhere, but we never stood still and tried to think that it is within us. It is us. It's us who makes the understanding of these feelings, us who creates the emotions, who decides with the interaction of the other fields with the field of our soul, how to react. This understanding of ones inner being, what we call the soul of the man, it will be one of the biggest revolutions in the history of mankind. We had the Industrial Revolution, now this is the Soul Revolution, it is so powerful that it frigthens many people, but it is so friendly that many nations, many people of the different lines of thinking will grasp and run with it, because it has the missing dtos, and now the story is complete. Many Messengers of the past tried to explain, but man was not ready for it. This time we educate from the base that now every man is ready for it. There is no gap in the knowledge, no point of ignorance, there is no point that we don't understand and then make somebody else a prophet of it to tell us. We become the prophet of ourselves, the guidelines for the standard of our own work. We become the true essence of the creation and with it we understand more. There are no tools, (:15). mankind hasn't created measuring tools for measuring his own soul and its power. The only thing he can do ??? call it a wish, or my decision, I can change, or I am the creator of the conditions I wish, but understand that the wish has to be neutral, it cannot be imposing. The decision can't be that I want it, it has to be (a certain way), because now you are in a mosaic of fields and all have to agree, and what is agreed upon is your share, because everything is equal, correct, and according to the understanding of the balance of the fields of all those who are involved, the wife/husband, the dog, the house, trees, plants, and now that we join the Universal Community every other entity in the U has a say in our wish. I like to take your wish, I don't need your wish because the fields you give , because if I take what I don't need then I steal and I want to be correct. For man to

come to this point of maturity it takes a lot of understanding, self-confidence, knowing the master is me, trust in understanding that it is my soul who runs my life and not my life running my soul. We move away from the dimension of physicality but to use our soul to become physical at any point in the U as we need. In the U there are many nomads, those who lost their homes due to the interaction of the fields of the (:17). environment be it the planet, space of the U, the moon of the satellite or whatever. Because they never went through the full process of understanding the transition of the soul. They (only) went through the process of what you call the spaceship, but they never understood the next level which we are teaching here. Many of the human race will become passengers of the SS, because in the SS you create the condition which is relevant to the creation of the AA of the man on earth. In the dimension of the soul you travel the depth of the space in dependent of the origin, because you understand that you work within the fields of the plasma and not within that of matter state plasma. You give manifestation of yourself at any point, my home is where I lay my head. I decide where I sit, where I transfer. The writings of Bahaula come into operation, the mutation of elements, we mutate to what we want to be. At this moment this knowledge is beyond the understanding of the man but as we teach gradually in time man will understand what to do with it. Those who decide to be man of the earth stay here to work, those who decide to become man of universe and travel within the structure of the planet earth?? preset condition of AA, we'll take them in SS, some might even go a step further. Those who understand the true meaning of the (:19). work of the soul, which is itself a star, they become a star within the span of the U, this time you decide the position, a ?? moon, planet, galaxy or a U. Transmission and transportation amongst the universes, this becomes easy because now you understand the inner being of the creation of the U. Not many will achieve, but many will pass, there are many in the U who have already achieved. In time man will understand the meaning of these teachings. We have to teach and set up guidelines. On the other hand those who want to be the passengers of what you call , UOFs, and those want to be the users of MaGravs and Power Units, or Pain Pads, that is the level of their understanding, there is nothing wrong in it, they'll catch up. .. You have to understand how and what state you see the state of your soul. I am happy within the matter state, I just need a little more comfort, I am happy to be without pain or damages to my existence, without being worried about oofd and shelter, or whatever. With this new knowledge there is a big problem for governments, the lifespan goes into 3 to 400 years, this is known because now you repeat (:21). you replace, you understand mutation, but you still want to be in the state of physicality. The present governments will have a huge problem with this extension of life. We have seen how life has extended with the new materials of the past century, the average lifespan is stretching from 40s to 80s and 90s, with the new technology of the Gans you'll stretch 3, 4 500 years. It'll become known but the problem for the governments is that the pension line is 60 years, I work from 20 to 60 or 40 years and the government pays for 400 years. You can see the flow in the structure of the society. It comes to the point due to the advancement of the T and what is to be introduced. the death rate will drop and birthrate go up. We will be productive into 2 to 300 years. Our number of offspring's will grow many times, the population will run into 40 to 50 billion in the coming time if man doesn't understand what to do with the new T. These are for the future governments to sort out, but at the same time it has to be looked at in this moment in time. New technologies gives access to

new dimensions of life, it is us who have to understand it, this is why we have setup the new One Nation banking in the background. This way everything be set in course, it will be looked after according to how it comes. (:23). We have to understand what it is and how do we extend life, where does the mutation come and to what extent do we want to mutate. Does the mutation mean for me to be present the whole time or does it mean that I am present when I want to be, and the other time I preserve my energy, so that others can survive. I give that I allow through my soul that by giving I nourish the others and that is the purpose of my life. In the teachings of last week a lot was taught but not many understood. In time the story of last week, 193 will be understood, 194 will change the course of humanity once the man understands. Today we try to go more in-depth in understanding the structure of our own soul and the structure of its work. Those of you who have understood the structure of the AA, now we'll go into more details because now we have more time, ?? the doctors that have understood have gone deeper so we can open the path for them that they can expand their knowledge in a given direction as they choose. We do not set the course, we teach and it's your decision how to use it. Many of the physicians have started looking into the ?? effects of the soul and the see that they get different result then when they were just working in the matter state of the body of the man in the matter state of the earth. We need to go into the next step of understanding the creation and knowing how we come to be what we are, (:25). and how we decide what to become at the point of destination. If you look at the AA structure of the body it is made of 4 basic elements which is the gaseous part of the body of this planet, but every planet, every entity has what you call gaseous, what we call flow field plasma condition, that means it has not changed into a matter state tangibility, but it has effects that it can change itself to what it wants to be. The C, O, N, and H are in the air. The condition of the environment that we create in for example the CO2 box, creates a condition for the creation of AA. What do we do with this AA, if we add Fe to it, it becomes blood. If we add Mg to it, it becomes the structure of a planet, then we can change different ways with it, and it becomes red or white flesh. We can mutate it by changing the condition for it to become the fish or the cow, or we can change it to become life without physical structure, but is a field of Pl which has no attachment to the matter state of this planet, what we call a free soul or entity above the head of the human race in the upper level of the atmosphere. If we can live of different strength of it we become passengers and life within the span of the solar system. If we extend it to understand it further we become in the galaxy and in the U. (:27). It's the condition which dictates the physicality and the faster we understand this the faster we can move on. When you collect combinations of field strengths and they come to interact they always create a condition, that we call a "common ground" that all can tap into. It's like a bank, if I have extra money I can put it in the bank so the one who needs it can come and take it. The other one who wants can put it in and take it out, and the other one says I sit in the Central Bank and you can come and take whatever you like from me because I give to everyone unconditionally. Another example is, in the condition of AA the guy who looks after everybody collectively is like the O, the guy who is a provoker of releasing the energy of whatever is needed, I come and release a lot of extra energy in the bank in mainly Nitrogen, but the N has to give and find a way to deliver that they all can be balanced, C plays the game, but there is a guy who is a spender, the young boy in town who wants to spend as much as he can, he doesn't care where he comes from, that's the game of H. So one gives and one takes, one

gives and one holds on to, on this planet due to interaction of the fields of the U, the sun, the earth, leads to the creation of AA on this planet. Every part of the U has its own AA, its own level of the creation of life. (:29). And what you put in that AA, with it, around it, inside it, in its proximity it dictates how that AA is going to change and manifest itself, then that AA can mutate. The mutation of an AA in its environment is the key to its existence, to the life. If it mutates field strength and not matter strength, it can reach the strength of the Creator. What does this mean? The fields of the sun and earth are free floating, their interaction creates field packages, what we call for our convenience, the 4 elements of life, of prtoein. There is a variation in the field strength, but the package in the center is of the same. So you don't have an O, rather you have a Pl which is of the field strength bandwidth, and the interaction of different bandwidths creates different AA, which in interaction with themselves leads to creation of new field packages for those who free. What does this mean? You have field strength of H, C, O, and N, which with the interaction of the field strengths (:31). of this planet leads to creation of AA creates a new opportunity, because there are some other Ns, Os and Hs which are free but can fit into the O but they can't fit into the AA, they can fit into the N, but they can't fit into the AA, but the interaction of these 2 creates a new field strength which ?? it attaches itself to it. This is how life started on this planet. Now you have AA with Na, then K, now you have AA whose collective M field of it can be Ca, Mg, or K. Look at the structure you have a H(1), C, O and N, about 43 of one level, but in the matter state we call it istoopes. Look at the istoopes of this AA, 14, 38, 41, 42, (Ca, K, Mg) now you can see that life doesn't need the matter state of the K, and the AA and the variation of the fields creates fields of Mg and Ca, (:33). in which now the interaction of this Ca with AA and different strengths of these packages of let's say Ca with AA, or K with one of the elements of the AA, can create a new life. K 40 , O 16 you have Fe, the MG field of the Fe of the Earth ?? locked into this gives manifestation to hemoglobin, you do not need the body of the earth to create the condition. Now you understand the mutation of elements. Now you have a new game in town, a new understanding. Now let's play the game. You have the AA and K, and you have created next to it in conjunction with another AA the elements of the package, Mg, K, Ca. Now you start the advancement of the creation of life of a higher order. Now you understand the process of creation, you don't need the matter state to have the field strength, the interaction of the fields of the U can lead to any life in any position. Now you have the Mg which is created out of the interaction of the fields of the U (:35). with the AA which in conjunction with the H surplus which is linked to it and the O gives it liquidity. The blood you created, the hemoglobin fields now has a free flow which in man's world we call liquid. Now you can see that life doesn't need planet earth to survive or be created. the interaction of the fields in the U without a planet for the ?? creation of the conditions of life is absolutely normal. Once man understands the creation of mutation of fields man moves beyond the teachings of Bahuala, and moves to the understanding of the teachings of Buddha. This is the secret of creation. This is the level of the understanding we need to have to be able to travel within the space of the U. Then a lot of other teachings of the past 3 years comes into play and a lot of understanding of the past now comes to bear fruit. When you created the AA of Fe in a Pl state, and Mg and AA (:37). in a Pl and field state and now you have the planet earth which carries the matter state field of this, and is much bigger and stronger, it will feed the weaker and lead to creation of life. Do you remember the

129 Tesla, a powerful source and a weaker one, in trying to feed it creates the flow, and energy absorbed pushes to the next step. Life on this planet was not created because the AA touched this planet, it was created in the process of transmutation of the fields of the plasma of the interaction of the creation of itself, with itself and with the solar system. If you understand this knowledge then when you go into space, wherever you lay your head is your home, because then you ?? walk through the field energy of the soul, which is the creation of the totality, then you mutate to the position of the strength of the environment that you want to be part of. This is one of the secrets of life in the U. This is way in the past teachings I have explained many times that you don't need a planet to exist, you need an interaction of the fields, and many lives exist in ?? of the universes and planets and galaxies where the interaction of the fields leads to the creation of the conditions (:39). in which a n entity can manifest itself as a creation of life without physicality, but the soul that can make the decision of what to interact. The soul of the man is that bank, and the interaction of it leads to the creation of physicality. What have you collected in that bank from the interaction of the fields, that it can show itself in the dimension of the physicality or the essence of the interaction of the fields at that point in the U. The teachings go beyond the understanding of the mutation of the elements, it goes to the mutation of the fields of the U which leads to life in any dimension, this is where the man of wisdom understand the true understanding of the work of the U. This is why in the past teachings I explained to the physicians, understand the work of your soul and work through that, then you don't need a Pen and definitely you don't need FDA, they have not managed to make a standard for the soul of physicians. They can control the water, milk, powder which you inject, but not the ?? at this moment in time for the soul of the man. We have to become wise in understanding the work of the fields which we call the soul, the Central Bank, the Principle Fields, the Black Hole, or whatever you call it. It's important to mutate into the position. Those of us who don't (? do) understand will go to space, (:41). but they travel within the fields of the fields of the origin of life. They become travelers of space and once the earth goes through the cycle of life, they'll become the nomads of space as they'll have no home. If in that process they manage to understand the teaching of the past half an hour and the last 2 to 3 weeks, then they can create a home where they can lay their head. Because they understand that the center which is the creator, Central Bank, what you call the soul, will manifest itself into any dimension. We see many of these souls amongst us who have taken home on this planet. We are not alone and have never been. We are amongst those who understand the work of the U but have left it to the human race to mature, and now the time of maturity has come. We have to see the interaction of the fields and understand what it means to possess the energy of the life of the U and become the creator of the condition. When I say that you are the creator it doesn't mean that you are creating a U, but that you create a condition for your own existence that the soul finds its home, anywhere in the span of the U. The knowledge has to come from the essence of the interaction of the fields and not from the matter state of the ?? (:43). There is a huge difference. In the nuclear industry we see these but we have ignored it because we have never understood it. In plasma technology of the present time scientists see things but thye ignore them because they can't understand them. Now for the first time the students of the KF can explain to the leading physicists that what you ignore are the interaction of the fields that you have created inside, and you are looking for a matter state but this is a field state of the

creation. Now you understand why I always said that when you start a system, be it a CO2 box, a dynamic reactor, or the interaction of fields, pray for it. Give from your soul that it carries the intention of your soul, that's all it is, it doesn't mean that it takes you with it. But it takes from you those points which are advantageous and correct, that it can nourish, and find life. When you make the SS and the fuel for them understand the condition of the Pl of the soul is the controller of the fields of the Pl of the fuel of the system. My wish is my command. The step up in the process will take time, but many of the followers of the KF have reached that point, (:45). but they still have to work within the matter state to confirm to themselves that I (they are) am correct. They have not yet realized that they are correct without the need for confirmation. The intention, wish the creation of the conditions of the soul in respect the fields of physicality, and the condition of the fields of the earth has already made the decision according to my wish and manifests itself as me. Those who can go a step further in understanding of the present teaching can go very far, have no fear and rejoice that you can understand more. Have no doubts and test your understanding. Use your energy for peace. What does peace mean? It means giving to the soul the level (it needs) so it can find its balance. It doesn't give too much that it brings its demise, and it doesn't take too much that it makes itself non-operational and blocks itself. Try to understand the interaction of the fields of your soul with that of the fields of the other souls, then the physicality is irrelevant. For those work in the world of medicine, or the conversion of the pain and suffering into easiness and comfort and no pain. Understand one point that I have within me what my patient in front of me has within him. This patient (:47). can be across the table, in another city, or across the U, I hear the call across the table by ear, in another city by telephone or communication line, and in the space it is through the soul of the existence. I know one thing, if it is from earth it carries the same process and system as myself, it carries a kidney, liver, blood etc. If the liver is affected, I also have a liver, but liver is a combination of the interaction of the fields and it has gto the soul, and if I can understand that I lead to its creation, then I can use mine to transfer to the others. You don't the coils, rtoating system, or a patch, because it is made of the same i can use my own soul to elevate the soul ?? and through it we can elevate the soul of the organ, thus I can use my own soul (to heal others). For many of you this is beyond imagination, but this is the true essence of creation and its the true way for a physician to interact. Those of you who are looking for the space travel, understand this and then you can create the same condition. (:49). What I said Tuesday about what they are going to do for the rescue and relief (Caribbean disaster), getting a ship or a boat, sending patches to the islands, we have done this for centuries, has it worked, man goes from one suffering to another. If you can reach (them) through the soul you will give them everything. Remember the saying, give a man a fish and he eats for a day, teach him to fish and he eats for a lifetime. These rescue boats are the fish, teaching and elevating the soul and for those who have been elevated you have taught them how to fish. We look at the physicality of the house, the warmth of the fire, we forget that within us we have created a home. The skin of the man extended becomes a home for the family. My soul is the giver of the totality and I feed through my soul my fellow man. Go back to the teachings of Christ, 'this is my body, this is my blood.", the flow of the fields and their conversion to matter state, (:51). the body of the man. This is the strength of the fields of my liver through my soul for you who need the elevation to move on and change the condition. We have to learn to have trust in

the strength in the fields of our creation, and to understand that it is us who are the creator of the condition, and not the condition the creator of us. The sooner the man realizes this the sooner he'll open himself to the Universal Community. You have to go to the next step to understand that once I arrive at the point of destination how will I manifest myself, how will I trust the environment. Many nomads of space have not managed to do this, because once they understood the creation of lift and mtoion through what you call the MaGrav system, they didn't go on to the next step which is the creation of the soul and its control for the presence of manifestation, and they gto stuck on their SS or on planets or other places in the U, because they have not yet understood, ?? like the man on earth, they are in the process, and sometimes it takes millions of years and sometimes they're enligthened within seconds. ?? Transmutation of the fields into the elements (:53). will bring a new dimension in the work of mans understanding of the work of the U. Transmutation of the fields into energies that then can create a manifestation of the conditions -- is the new boy on the block. AA interaction with its own element leads to the creation of the Cu, which leads to the creation of the physicality, 43/44, O of 16 gives you the Cu stages of fields, add let's say, Cu of H fields strength to it, and you have Zn, but not in the matter state, the Zn matter state of the fields of the earth now converts this to the Gans state of the same matter. Now you can see that you don't need matter state. Now collectively add different combinations of interactions, you create Plutonium, Uranium, states of the energy which you call the highest metal elements, and then keep on going then the mutations will lead you to the strength of the fields of the Creator. (:55). Because once it's created it has to interact and find balance, and its creates a condition to give and take to confirm its. Go a step further and understand the flow of the fields within the structure of the body through the soul. How does it work that it gives man physicality, and at the same time gives the understanding of the mutation of the fields in giving and taking that confirms the existence of the process, what I call the full circles of the winds of the fields of the planet. Consider that the earth creates a M and G field, the interaction of the fields of the earth with the sun has lead to the creation of the AA. The interaction of the pure part which doesn't go into the matter state but stays within the first cycle of the fields of the work creates the brain, the part which comes from the interaction of the second generations of interactions which, (:57). are the AA, 43 , with lets say O or N or any of the others, with interaction of the fields of the planet of its matter state leads to the physicality of the body. You have a weaker state which is a combination of the AA of the brain, you have an intermediary which is a higher strength which is the matter state of physicality, which is the body and you have the central field which is the earth itself. The field strength of the earth going through the structure of the physicality trying to feed the weaker as we have seen in the process of the Star Formation (SF) leads to the flow of the fields which leads to the creation of giving of the soul, it's a tunnel within the structure. In the past many scientists have explained them as the Chakras, the point of the change, less of the matter state and more of the gaseous state, from the btotom to the top Chakra (:59). and where there is a field interaction of the organs, change of a step, more of getting the fields of the planet, releasing more of the fields of the Pl of the ?? fur, which is the atmosphere, which is of a higher order in interaction with the fields of the sun. Now you can see the circulation of the fields within the body. Now you understand why the soul of man has a limitation, because the MG field strength of this planet dictates control of the field strength at the matter state level,

but the soul of this planet, itself is dependent on the matter state from which it was originally created from, so now it dictates the condition of the soul of the man. ?? is it stronger or weaker. In the deep space we are not connected to the earth as such, the further the distance the weaker the field interaction. Therefore, at the point of destination, (the fields there) create the conditions. Now you can see how you can evolve into the being (at the point of destination anywhere in the U) at any point of interaction. The field interaction of the soul with earth will never die because it was its creator and is always connected. Mutation of the fields into matter and Gans state and the condition of creation of matter state is the new understanding of intellect for man. (1:01). This time many who have understood will run with the knowledge and change the course of humanity for themselves and the others who are privileged to be able to receive the knowledge. The process of understanding this new knowledge changes everything of the past. If you want to be in the matter state condition, you can. The next choice is fro those who want to be in the condition of the transition space of the U without commitment. Then comes, would I like to see how it feels to land on planet Zeus, will I be amongst the creators or would I reach the home of the Creator. This is the level of the understand of the man, this is the next step that we have to move into. This is the teaching of the "Messiah", freedom from physicality, to be able to live unconditionally and at peace, to give to every being so they can be in that position that they can elevate and decide on their soul, this is the true peace, not in physical terms but in bringing the soul to be at peace with the conditions he has accepted, (1:03). be it in the villages of Africa or the backwaters of New York, it is all the same. A tramp in Washington has the same soul as the President inside the Whitheouse, the same soul as a black man in Africa, etc. It is us who have to be, to understand the strength of our soul and how we have ?? forgtoten it. Peace will come when the soul can manifest itself to serve and not to be closed. Be in that tunnel of the fields which absorbs from the U or the planet that it becomes a terminal, a point of giving to the others for them to elevate, become a tool of progress through its peace and understanding .. the path to give for the others to elevate. Understand the transmutation of the fields of the U, then you can become anything in the U. Understand the interaction of the fields during the ?? transportation (1:05). then you can produce anything in the ?? universal. You can create conditions that it rains gold, or acid, you can create a condition that within the flow of the liquids of the fields that we call blood, you can run with any element of the U as long as the soul receives what it needs, and that it can elevate itself. The process of the mutation of the fields has nothing to do with the matter state interaction, but the matter state creates that field, to the flow of the fields. You can give it or take it, if you give it you call it acidity, taking it alkaline, come closer you take more go further away you take less. If you come closer in the right direction you would be giving more and if you move away you'll be taking more. (1:07). and giving less. For those who are working in the space technology, if they understand this then they'll understand that the matter state is irrelevant, as the container is the body of the man and the soul is the giver. The space travel in the future will not work on engines, but on understanding the soul and its operation that creates that engine of the U. Those who joined the Mozhan program were taught but many never understood. In time they'll mature. They need the time to mature because the step gap is the time to mature for those who are ready to become the true Mozhan of the space, but they don't see it. ?? the wisdom of the teachers ?? but allowing for the student to understand to mature and not to

force, no punishment but the time of growth and maturity is needed, even for many of the K Seekers. You look at the interaction, I can sell you water but you ?? look hundred times at it ??? you create the Gans of Zn, because in that water that you carry, carries the intention of my giving, by buying or taking the package (1:09). you decide where I want to place the wish. A patch on the pain, or on the head for the E, or I want to use it to increase the fields from your soul to interaction with my soul that you understood my pain, to the little muscle tissue in my neck which needs my attention, because I have ignored it. The physicians of the space become the true men of the U because they don't need a core or a coil, they only need the essence of the creation within their soul. The teachings from now on will bring a lot of rapid maturity for those who understand. My wish is the peace, I like to look at silencing the guns and finishing with the arms, but the true essence of my wish is peace of the man in his soul, that with it he'll never manufacture the guns, nor think about fighting, because it transmutes my E and the interaction of its fields with their E. The stronger changes the weaker. The wish for peace in me is so strong that it will feed anyone, and then they'll elevate, it has its time and its space. There are many aggressive fields in this planet and they all are gradually receiving. (1:11). Talk, voice, smell, sight, ?? feeding of the environment is all part of the attributes of the soul which itself has converted itself to the physicality of the man, I made man in the image of myself. With the soul I can smell what is needed, with the soul I can touch another soul's field and see where the suffering is, I can breech and see how beautiful the other soul is, I don't need the eye of physicality to see, nor the arm to touch, if you can touch or feel something, remember I made man in the image of myself. The soul can touch and feel and it has converted that essence in interaction with the field of this planet, and in interaction with the essence of the AA which created the physicality to convert and convey its field strength ?? of the matter state ?? strength, then you can see how you can change everything by understanding the work and strength of the soul to any ?? strength which you feel (1:13). In time man will come to understand that there are many more senses, and not only 5, because the work of the soul doesn't rely on 5 it has many more. Now that we become men of space we create new ?? words for these emotions, new ??, new understandings. The process of the mutations of the fields is the ultimate understanding of the creation, then the interaction of the mutations of the fields leads to the creation of any matter state of the U. On earth we need water, but for a being of the U water is poison to them, but they still need the liquid of life, it could be whatever, when you create and provide the fields, they convert it to what they need. It is the same with the physicians of today, once they understand, they'll see through the soul better then X-rays or MRI. You see and you fly through the soul better then any aircrafts or UOFs. It's the captain who has to create the conditions (1:15). it's his ?? disposition that has to be able to understand the work of the fields. the man himself has to understand that he has the capability to become the pilot and physician of himself. then the 4 or 500 lifetimes here, multiplies into 4 or 5,000. What am I going to do with all this time, once you become wise to the wisdom of the life of the U, you become the giver, the hungry soul who travels the span of the U ready to give to whomever needs. It'll be so busy that the 5,000 will not be enough, there are too many needs and too many changes. This is why in the past talk I explained about the ?? first plan of the ?? creation of new souls on planet earth. Now you understand the purpose of the human race. Those who understand will elevate to the totality, but this time many more ??? will join soul cycle.. To understand and

understanding are 2 different things, when you understand you have to comprehend, and when there is understanding it become part of my life. The process of mutation of the fields is what man has to progress to. (1:17). Maybe we make systems to use men to show it. If the physicians of today reach the point of maturity, that is every man is a physician of himself and if you saw for example how putting 3 rectors together leads to creation of the matter state of Cu or Zn, when these souls stand next to each other and create the interaction of the sun and the earth, their soul's field friction can lead to creation of life without physicality. So be it the child of the soul of the man. Many people have asked about the virgin birth and I have explained it in different teachings in different ways, maybe now one understands that there are billions of virgin births at any time in the U, go back to the teachings, read the books, fundamental elements conversion, what you call a neutron to an electron and a prootn, where the electron is the new birth and the prootn is the mother. The ?? size of the past couldn't be explained to man but it was hidden in a way that man could understand it. The creation of new life out of the fields of the U with new life, not the physical intercourse that the man sees, as a man and a woman. (1:19). The creation of the life through what you call virgin birth, is the cycle of the life in the U. The scientists call it the splitting of a neutron to an electron and prootn. ... it's a new cycle or life and it's possible anywhere in the U. In the holy books they call it Adam and Eve, by the sperm or by the rib of Adam. ?? Metaphorically, now the scientists can explain it as splitting of a neutron, the division of the neutron into itself and its child, what we call an electron. ?? energetic or active, more dynamic then the source, so is the woman compared to the Adam, multitasking, more understanding because it came from the essence of the creation. New life, generation, cycle in understanding the totality. We don't preach, we teach the science on the edge of creation, and to many it sounds foreign because they never understood it from the beginning. You can't understand the story going on in a movie if you walk in half way through it, you have to go back to the beginning to understand what the end it. (1:21). This is the way many men will try to come in, they never understood the beginning so now the rest is meaningless, they just have to sit and watch. With the teachings of the past years we took you back to the beginning of the movie, or actually the end to be shown at the beginning so that you can see what will come at the end, in the true ?? How the cycle was developed and how man can produce anything through his soul in interaction with another field with itself. If you understood this and you put many of these virgin births together you have the mutation of elements, or what you call H ?? to He, interaction of the fields to Cu and gold and the elements that man calls extoic because he never understood the true sense of it, because man entered the movie of the universe in the middle, and the creation of everything, being there but not understanding where it came from. Now you understand the full process and we become true men of space. Those who want to stay and work within the fields of the U will become the new students of the K Seekers. (1:23). During the process of the teachings even today we spoke the words that the ear can hear but we teach through the soul to reach those who can't ?? hear , that the love of the Creator shines and loves all on this planet equally and not only those who sit and listen, this is the true way to teach and not by voice. You will have to become the same. For those who listen through the ear of the man, if understood will listen through the soul and then you progress to the next level. There are many levels in progressing to become part of the soul of the creator, that then the knowledge of the man will, becomes the transmutation of

the elements, ?? the creator of the physicality at the time of ?? space. For those who understand and create the opening, what I call the field flow within their soul, they will look inward that they see the light and not outwards to see the physicality, by seeing the light you become part of the light and then the physicality becomes irrelevant, but the interface between the light, or the creation ??? line to the Creator needs the interaction of the physicality to its dimension, size and position. One works in both dimensions of (1:25). the soul understanding the field interaction which leads to the physical manifestation. There is no shortness of time, but there is a lot of need for understanding the true essence of knowledge of the work of the U. Those of you who will go to test to understand have to be humble enough to be the weak(er), but knowing that you are strong enough that through these steps you become the strongest. Then as men of knowledge you can stand on ?? 4 mountains, and through the soul of the man feed the whole city ?? below you, this is the true knowledge. This is where hunger eradicates and there are no droughts, where you don't need dynamic machines to elevate the soul, but you understand the need of the soul, you become the process of the feed, to give without needing to be present. The spans of the U becomes your communication time, ?? of the fields on the path of the connection ?? There is a lot to be able to understand how from the H it can lead to gold. There is an old Persian proverb, (1:27). ... halowa is sweet and the grape is sour, it means if you allow me the time that I can mature I can create for you what you like to have, but it depends on whether you have the time to mature, you have the essence to grow into the understanding of the work of the universe. Some of you will eat the grapes because you don't have the time, but for some of you if you allow the grape to mature you'll create enough sugar that you can use it to mix with the flour to make the halowa that it is so sweet that you can't even take more then 1 or 2 spoons. This is what the soul of the man have to mature into, because the physicality will not allow it because then it has no essence for confirmation of its existence. The biggest enemy of the man is his physicality. The sooner the man understands that he can elevate his physicality to be part of his soul, then the man becomes free from the shackles of life, then the life cycle is omniptoent. (1:29). There are a lot of in-depth teaching in today's teaching it needs a lot of maturity and understanding through essence of the creation, it needs to be understood that you can use the knowledge to become the tool of peace for other souls without actually being part the physical operation of the peace. This is what those of you who understand will use to reach the world leaders that there is no need for arms or conflict when there is peace in the soul of man. When there is understanding that I can have what I need, ?? it's a strength that I didn't know that I need to have. In one understanding you look for the fire to keep warm in the cold, if you understand that the interaction of the fields of your soul with the interaction of the fields of the soul of the elements of your physicality, can create so much heat that you'll not be able to stand, or the creation of the field from the soul with the environment at the strength of the given wish of the man ?? 1 or 20 meters (1:31). can create a heat in that envelop that you don't need to cut a tree to burn, do you need to burn the oil which is itself an AA to destroy more lives, to benefit ?? man. Do you need to consume another body, where the interaction of the fields of your soul with the environment of the existence will feed you enough that it feeds the physicality. I wish you could understand (whispers again). There is no need to kill to survive. The soul with the interaction of its environment is the feeder of the man, but man has never understood. In the past in a hidden way I have tried to teach you, but nobody

understood. And they keep on telling me, why do you keep an telling us we don't understand, because truly you haven't understood the work of the fields (1:33). When I explained that you can hold your hands and by transfer of the ?? energy of your soul with the interaction with the fields of the elements ?? with you entity you can create any matter that you need, then you'll understand that the creation of the physicality was part of the essence of the creation that the soul sees its own strength and the soul understands the operation of the U, but the man took it totally the wrong way, the interaction of the fields of the U were for the benefit of the man and not the destruction of the planet and other life. Try to test your soul not to physically see that you can change things, but try to test yourself and see how much you can give to elevate. Elevate the soul of anything, that it is in peace, that it comes to a point of peace. We call it peace but in reality it is the balance of the fields to create a condition of existence, continuous existence without taking from the others for them to loose their life. (1:35). Once you learn this process when man goes into space he'll never look for war or conflict but will become a giver and then you'll understand the purpose of life in the space. We have not come to teach man how to make a SS, but to teach him how to make a SS out of the soul of the man to become the rescue point for those who need the span of universes. This is the true understanding and purpose of the teachings. The nursery of the U is very much a virgin birth, it continuously expands and divides and leads to the creation of new life in the nursery of universes and the souls who mature are what we call the guardians and nannies which need to there to give for those who need to mature. Many of those who understood, now understand the purpose of life on this planet and many others, it needs someone to care, what we call a mother to feed and nourish the baby into a child and then a man. And the soul of the man, once we mature towards peace becomes that mother in the span of the U. There is a purpose for life on this planet and man hasn't understood. (1:37). There is a purpose for creation and he hasn't understood that either. He gto entangled in physicality and then in the creation of false ?? beliefs, now it's time to clear all this and move in to the next step. It's time to understand that the soul is the interaction point between itself and the U and not (just) the village of Earth in the ?? time of physicality. Now one might understand why life is created to be the nursery for the creation of the fields of the soul that in turn they become the mothers of the U. There is nothing more precious then a mother, that is the creator, nourisher, feeder, as is the garden and the kitchen. Try to understand the work of the soul, not by pretense but by true understanding of the mtoion of the fields, then you'll understand that as long as the wish to eradicate, move and develop another soul, you'll see the beauty but understand it even if it manifests itself in another pain and suffering. Try to understand why, because from that point you have to mature to understand ... (1:39). drop out.. ... you'll understand why there is pain and suffering ..(1:42). The process of these teachings are not to have a workshop but to have the knowledge how to work that life of the man becomes a shop that everyone can walk in and take what they need. the soul of the man becomes the provider. We need to understand the purpose of creation in the essence of the creation. The whole work of the U is to understand the interaction of the fields what it needs to be given that it extends life, and what needs to be taken that literally allows, the clogging or blocking the flow of the fields away from another entity that he can live the life and flow freely, that there is no stopping or blocking. When these changes come in the physicality of the man we call it diseases. How many of you have looked, when there is a disease

into the soul of the man and see where is the blockage in the soul and emotion, to move that stone or blockage (1:44). in the soul and instantaneously the physicality responds. This is the purpose for what these teachings are, for man to become the physician for the soul of the U, then man becoming a doctor of the physicality. For us to progress to that step we need to understand that we don't have to sacrifice anything, we just need to understand everything. The lack of knowledge we have about our soul has translated sacrifice into pain and suffering, where there is need for none of it, in the span of the U for those who have understood. I am a lover I give, but for me to love there is a need for a recipient, but that recipient has to be clear that he has no blockage so that he can receive and transmit to the next one who might need. I am the tool. Many times in the past the tools have been changed in name (1:46). for whatever reason to suit one. There is no clairvoyance, magic or prophet, rather it is totally understanding the work and function of, and operation of ones soul, then man is free. It is us through the lack of our understanding that has put the shackles on our ankles and feet, of the work of the knowledge of the U, but in fact, we are free, there are no prisons for the soul, no handcuffs and no shackles. We have to understand and test it. Put 3 - 4 dynamic reactors next to each other to create gold. ?? have 3 -4 men of peace stand together with the understanding that the gold is the solution for the greed of the man. And it will rain gold amongst you. Your soul is so dynamic but it's you who have to create the condition. ??? this helps you to create, to use the soul of your elements of your physicality for another soul. These are all the reality that man has to open his eyes to, because now it only works at the field strength of the matter strength. Now you can work at the field strength of the U that is above and so matter states become irrelevant. (1:48). Teaching oneself the true knowledge and understanding that it is time to rejoice to understand the new knowledge, there is no shame in it. It's the addition to the knowledge of the present time. To understand the totality start with small steps and graduate yourself to the University of the knowledge of the U. No one will give you a degree, but they will also not give you any more or less. Accept the pleasure that you become a lover of life in every point in the U, which means to giving unconditionally for that life to elevate. Then start understanding the smaller principles, try to bring all of the teachings we have done together now and transmute the knowledge of matter state into the field state. Understand every step of the conversion of the fields. (1:50). Understand what every conversion gives in the fields strength and not the matter state. Then understand that it is me who is the giver and creator of the fields, so I have to be correct to give to the ones I want to receive so that don't miss it .. they'll receive it as they need it. When it rains we drink it, the plants take what they need .. through it, it creates a condition for life. It's the same rain but it's the entity and the condition that decides how to use it (man drinks and plants absorb). So should it be with the soul of the man, rain down (on everyone) and with it you give life. When the life is given there is no ?? ... when you are thirsty you'll do anything to get your hands on the water to survive, even to kill. When it rains freely you don't have that pain and suffering (to take with force), and when it rains too much you give a cup to the next one who is thirsty. This is what you have to learn from the operation from the soul. That's why one has to clear the ?? blocks and stones in the path of the ?? one soul (1:52). to be able to give the totality, this is why you have to start testing yourselves, slowly because you are so materialistic as a man, that you have to see something, don't sit there ??? ... look in the palm of your hand, and say if I have water I

can give to the thirsty man, and see, you will create water in the palm of your hand, and then you can put your hand in front of the man who is thirsty, if the wish in the palm of your hand is peace and that there be no killing, you'll feed the soul of those who do. This is not a fairytale anymore, this is understanding of ones responsibility in respect to his soul in confirmation of his existence. This is where we are going and why there are no more laboratories, dynamic cores, or coils, that is for those who are trapped in that cycle of life. For those who elevate to the next step, you become a Messiah, that others can be saved and live a life without obstruction. When their physicality is obstructed you call it diseases, in their emotion you call it a mental condition, and in their souls that they can't elevate themselves. Now the N coating (1:54). the coil, Gans, dynamic cores making, their effects, energy, fields, all has come within the structure of the man's body. Now you see what we have made of you. The N coating is your skin, the Gans is the body, dynamic reactor that creates the hollow center that is the essence of the creation is the soul of the man. Now you understand, use that Gans to become a pain patch to relieve the pain of one man, or use the soul to feed that of a another that it dissolves the physicality of the pain of another being. When it is a patch you have to put it on the physicality, but when it is a dynamic core you can put it across the U, but it reaches the same point. Then split the attributes of the Creator, then you'll understand that if you are dealing with the physicality of the patch, the Gans of the fields, or if you are dealing with the fields of the dynamic core, it's the soul of the man. (1:56). Then you'll understand how easily you are educated in the work of the U and you never knew it. You created prophets to tell you how that patch has to react with the other patch called the human beings, not to steal and not to kill, but now you become the creator of the messenger, that you give unconditionally that the body through itself, through its soul decides what it needs and doesn't depend from outside to be given in the physical ?? The knowledge is complete, it is the maturity of the soul of the man that has to bring the transition. It's the maturity of the understanding of those souls who have been touched to transfer the knowledge for the others to elevate themselves to that level. the understanding of all these workshops, what is life, except a dynamic fields in a collection of a box, that we call the brain, or another entity that works in the same function. We need a casing for it to confirm its existence, we call it a brain. It's like having an element inside a (1:58). kettle and holding the kettle in their hands to see if the element works and the waters gets heated, then you know there is electricity and a flow, that flow has to be the fields through the soul of the man, that by its radiating it warms up the environment and gives a warmth and comfort to the man who holds it ?? through his physicality. He doesn't need to see the element, he knows it's radiating and soon the water will boil and I can forget about my physical suffering. This is what the cycle is, the reason we teach and have taught this way. It was like making the wine, you need ?? the grapes to let them mature to become the wine. the grapes are the uneducated soul of the man, now we have taught it and it has taken time and now it can become the sweet wine. This is what the essence of the teachings have been and now that many more have started to understand we'll teach more about the interaction of the soul with the U, in understanding the conduct of the souls in the U, (2:00). and understanding the language of the soul in the U, then wherever you land you'll communicate in that language, you don't need to go to school to learn English or Spanish, you'll learn that in the Spanish environment you'll speak Spanish because you'll understand the soul of the environment. This is why we created the Universal Council (UC) because the soul will

travel and manifest itself without needing to learn the language because in that environment it will come across (as) the language of the soul. The UC is not called the EC, it means understanding the language of the U at any point where you manifest yourself. This is what the teachings are, it isn't anymore prophecy, but understanding the fields. But when you don't understand go and set up the cores and try understand that you can convert it, but don't get shackled down to the cores, understand the fields and how their interaction leads to the creation of a dynamic soul, dynamic fields that their interaction gives the condition. Those who always look at the physicality will have a long way to go. (2:02). Those who look at the interaction of the fields will reach very fast to ?? and condition. The education of the soul is much easier then the education of the physicality. To understand the E of the soul, that gives man the fields of the physicality. The one who goes and lies to get what he wants., then through his own lying and what he lied about will receive the condition of his own, according to his physicality. When you say I am damaged because of this just to get something, you'll come to be damaged by the same thing, and it will be more painful then where you started with the lie, and what you came to achieve will become the noose around your neck for what you have done with it. I gave many examples in many of the teachings, now maybe some will come to understand exactly what it means. Try to understand the operation of the fields which is the soul, which is you. Try to understand the soul of your physicality which is a condition of the environment, (2:04). and the interaction of the ?? 2 with the ?? of the fields of the environment, from the physical structure of the environment, which you call the E of the man. The E is the conversion of the interaction of the fields of the soul and the environment of the physicality's soul and the condition of the environment which is created out of ?? a condition. How do we react, it doesn't need to be a planet, it can be another man or being, the interaction of the fields of the soul with the interaction of the fields of the physical dimension of another entity gives you the joy, pain, suffering, the elevation of the soul to give more. Now the condition is not just the earth which is created, but also the condition of the E of the joy, but the condition of the fields of another entity in respect to you and in respect to the fields of a mans E within the structure of the physicality of the man. We feel the joy of our child thousands of kilometers away and you call and say, I feel your happy and he says, Papa how did you know. (2:06). Because now the ?? of physicality is like the center of the earth which creates these fields, then you feel the earth now that earth is your child, now that earth is another being in the depth of the U, which you feel. Now you understand where the E comes from, that the E is a reflection of the field strength of the man, and the understanding of himself of the strength he carries ?? in respect to that field. This is the progress and how you interact in space, the interaction of the fields of the environment with the interaction of the fields of the soul gives the feeling of the man, and his emotion. The creation of the condition to feel, to understand, you don't need to see because now the environment itself has created that brain. The physical brain of the man in the space as we have it, when you come to a different strength AA level, of let's say higher Nitrogen, will not exist anymore, now the interaction with the other entities which creates a condition of interface becomes the position of the soul of the man's emotion. Now you understand that man can exist in the U without physicality. (whispers) I wish you would understand. then you'd become the true man of the space. Now you understand why i have said so many times that I am ashamed to be in the body of the man. (2:08). Because

it carries nothing but pain and the condition of physicality, which is ???? .. it ages, gets painful, sees death and suffering of the others. Try to understand that when we travel in the depth of the space how the other entity wants you to be so that his ?? are at peace that with it you will find peace, and not peace for you that forces him to change his position. Don't be a magnet that is placed amongst the others and forces them to move, but position yourself to stay at the position of comfort, it's you who have to position yourself. This needs a lot of understanding in the depth of the knowledge of the creation. This needs understanding of the total attributes of the Creator, which is you. You need to look inwards to understand the operation of the soul, then looking outwards to see its physical manifestation after its been interfered and tampered with, and mishandled by other fields which we call emotion. Physicality reflects the emotion from what is received from the source in interaction with the fields of the environment (2:10). of the others. Now you understand the emotion. Is there a need for the physicality to suffer, or create suffering, or is there a need to understand the fields which create that E. Now you can make tools that eliminate the field strength or in a way increases it to become acceptable fields, for example, from cry to joy to laugther. This is what our body does, it converts E because it understands the feeling of the soul and not the feeling of the physicality. We go through these transitions in our physical life, from laughing we go to crying, ?? and crying we turn into laugther. There is nothing better then this to understand the field interaction of the soul with the interaction of the fields of the environment and then measure it. Then you don't need to be an actor to pretend, you become the giver to create the condition, then it is always laugther. These (things) are part of the development of the soul that we have to understand, then in the space no one becomes our guru or prophet, because there is nothing for prophecy but understanding the steps, understanding where the losses are that create the condition (2:12). or where the gains are that it promtoes and elevates the others. Now that we undersnad the teachings to go to the next level to understand the work of our soul and not the physicality of the matter to confirm the existence of the soul. We cannot put a value and measure on the soul of the man because all the souls have the same capability to achieve a full maturity. Maturity is not to grow but to understand 49

198th Knowledge Seekers Workshop - Nov 16, 2017

(New video summarizing all the teachings to date, The new Constitution is read in Chinese, War between Iran and Saudi Arabia has been planned for 100 years KF supporters need to prevent with their souls, (:53) Teachings start, How the soul, soul of physicality and soul of planet interact to confirm existence through creation of physicality, When we travel into deep space how the soul will manifest its physicality not based on earths environment, At the time of dinosaurs the MG fields allowed for larger entities on earth, It is us who decides about the strength of the fields released from soul and we can keep the shape of humans, Mohammad destroyed the statues but now the worship the black stone, The time for meditation is over now we understand the soul, There is no reincarnation we are all creations of new conditions,)

(:12). New summary video of all KF has done ... (:23). Mr. Keshe says, this is the new way of teaching and we show the purpose of the science and not just the Nano coating and the other things, but it is the backbone to create peaceful conditions. As we heard last week the EC and UC will submit the Constitution, which is set up by humanity. We have received approval and support from a number of high level politicians and governments that they support such a move. Today and in ofllowing weeks we try to have each language of the Council read the Constitution in their own language, as it is translated by them. Today in Chinese. (:26). New Constitution read in Chinese ...
(:42). What is the reaction of the Chinese community since last week to this Constitution? I haven't shared this version yet. We'll wait and see. I really love this and now we have a common Constitution for all the beings living in this world. And it has so many good intentions for all of us to act together to have a truly peaceful environment for everyone. I think it is great.
(:44). Any amendments to the Constitution will be added online, to be discussed by the EC. Last Tuesday it came up that we need a very specific eoffrt to direct out attention as us as KF. We see on the horizon a massage war that is getting planned and it will effect every one of us. This plan of war or aggression can be resolved. It is part of a plan that has been prepared 150 years ago, and it has been a sequential process. ?? We see very harsh part of work set up by certain organizations and groups to create conflict for (political) control and financial control. We have been and are reaching the soul of the leaders (:46). of all sides of this planned conflict, of which they (the participants) have no say in. It has been set up and they have to ofllow the pattern. There is a huge conflict

setup between Iran as a Shia country and its allies, and the Sunni countries, Saudi Arabia and their allies. We call through the soul and hope that we have the support of you K Seekers, with the understanding of the work of the soul, and the leaders of the Iranian government and ?? and the Saudi leadership and the rest of the Islamic world. The line of descendants of Mohammad doesn't change the book of Mohammad. Do not allow the change of a line of leadership to become the end of a faith. There is a lot to be achieved in Iran and a lot in Saudi Arabia and the allies on both sides. We raise the soul of both parties that they come to an understanding that they are born to play the game of ?? My call goes to the Saudi leadership and the Islamic world on the Sunni side. Brothers do not fight. We all come from the same lineage, one father, one understanding. (:48). My request to the Iranian government, attend the peace conference that has been arranged and will be announced. The same goes to the Saudi king and leaders of other Islamic countries. Step down from talk of war, let us unite. KF has taken leadership and we have received support for negtoiation and the start of talks between both sides. It is not me any more but the soul of the KF supporters to raise the soul of the leadership of both parties, that we walk away from this mayhem which has been planned. We need peace and through it we'll achieve more. We are active in the background for negtoiation. I know the leadership of both Iranian and Saudi's listen to these teachings. We don't talk about what can be done to each other but what we can do together. There is a lot we can do through peace and there is more we can do to bring the beauty of the Middle East out. Unity in faith and soul is the ultimate goal of the KF. (:50). By killing and destroying each others assets, the only beneficiaries are those who have already made plans to sell oil through the secondary oil refineries, and not the nations that are on the battlefield. We invite both parties to the peace conference that is getting organized and we have the backing of the world leadership. KF will stand firm in these peace negtoiations. He speaks in Farsi .. We need the hand of peace rather then the loosing war, ?? of the other parties. This time the scientific and intellectual right of man should prevail for peace. We take leadership of the peace negtoiations in a very direct manner and we have entered into it. The EC, UC and Core team, and the rest of KF, we know we have changed the ways (:52). ?? where the talk is the confirmation of acceptance. We need to reach the soul of the leaders. In the process of the teachings as we saw last week we tried to explain more to understand the connection between different aspects of the work of the soul and its connections with the physicality. The work of the soul, its creation which manifests itself in a physical and tangible condition can only happen if the condition and the environment is available for it to happen. What I said last week in the teaching was that the universe can't expand if the room for expansion was not (?already) there for it. The expansion contains M and G field forces that allows creation of the balanced fields on both sides. This means a plasma has to give and take from its environment to find a balance between itself and its environment**. The creation of the confirmation of the existence** (:54). **comes when the 2 entities confirm their existence through the interaction of their fields. We can't see the existence can't feel the presence of the sun if the MG fields of the earth do not interact with the fields of** it. In that process each one manifests its own existence and ?? its damage ?? The interaction of the fields of 2 entities confirms not only the existence of the 2 but also the boundary and presence of physical manifestation of it. In English we say, it takes 2 to tango. There has to be a partner to show the beauty of the dance. It's the same now that our knowledge has come

to flourish and understand more about the structure of the soul, to expand and understand more and to realize the reality of the creation in any point in the U. What we achieve on this planet to confirm our existence in the physical dimension of the physical body, needs the presence of the soul of the earth, which are the field interactions of the earth with the soul of the man that with it confirms the physicality of the man. (:56). **Our physical body is created on the limitations of the dimensions of the strength of the soul which is seeded in the womb of the mother, in respect to the earth's MG fields and plus the soul for the physical entity which has created the soul of the man. you have to realize that every piece, atom, cell in the sperm, seed of the male and female has a soul, so the collective soul of these entities, AA and prtoeins, leads to the creation of the soul of the being and then that soul in its interaction in totality with the soul of the earth dictates the physical balance between all the entities which leads to the creation of the physicality of the man**. Collectively the soul in radiating in the fields in the womb of the mother in the presence of the fields MG fields of the fields of the matters within the womb of the mother, which creates an environment for the soul of the child to take shape, now in interaction with the soul of the planet leads to the creation of the physicality of the child. This is the same with every entity being it a plant, bird or fish. But in this process the emotion and (:58). the confirmation of the guarantee to exist, which becomes the physical dimension in the soul of the entity in respect to the soul of the totality and the soul of the planet brings into play the color, shape, size ant every thing else. So our E from the establishment of the interaction of the 2 fields dictates, has a communication line between understanding the soul of the planet and the soul of the physicality. The reality is that **when we travel into deep space we have to understand this, that the interaction between the strength of the soul of the man and the dimension of his physicality as a soul, with the environment which (he) enters, dictates the same, the shape of the man or the shape of the soul in the physical dimension in the U. We will not see the physicality of the man, but we shall see the confirmation of physicality once we reach the dimension where we decide to interact with (our destination**). Rick shows a board where he will adjust magnets to demonstrate what he wants to say. This is important for us to understand. If we take the biggest magnet as the soul of the planet, the second biggest as the soul of man, push them together and they create a confirmation of position in respect to each other, and at that point we come to one thing, the interaction of the 2 has to have a physicality which can be shown as having the shape of a very small entity, which is the physicality of the man. The third smallest ring magnet (which represents the physicality of the man) is pushed between the bigger 2 magnets, where is finds its balance in respect to its position between the other 2, that is where we manifest ourselves in the dimension of physicality. If we change the largest ring which is the soul of the planet (1:01). or the environment we enter, which in fact is the G field balance between itself and internal, its shape, position and the distance from the soul of the man and his physicality, which is the small ring in-between changes, because now it has a different size. If you replace the largest ring with another one you'll see the balance point changes, this is how our soul will stay the same when we change the environmental M field, the position the distance between the physical dimension and the soul of the man will take a new shape, a new distance. This goes back to all the teachings we did before. **The soul of the man will not change, the environmental MG field in which we appear will dictate how we will look, the shape**

and the distance. On earth we need 2 arms and 2 legs because the boundary of the physicality dictated by the soul of the environment, which is where we are, the earth. If we move the other (magnet) the position changes, if the M moves out or the G in different dimension, as when you move the little magnet, the physicality of the man moves with it. If you push the small magnet forwards and backwards (1:03). this is what it dictates, how we change shape in size and time. **When the field was further, the MG field of the earth in balance with the sun allowed for bigger animals, dinosaurs and other entities on earth. Now, because we are getting closer and closer to the sun, the MG fields are changing the size (of the life forms on earth), we can't support (larger sizes**), because now the bigger MG fields which is the sun has a say in the same structure. Now if we reduce the fields, the soul is stronger it needs a bigger distance to confirm its existence, so you get a different shape and size (on earth). Now that we understand the knowledge fully we can show it in the physical dimension that it can be understood. But in fact, **the soul of the man doesn't change**. If we understand this point we'll come to a very interesting position, **that it is us who decides how and what field is to be released from our soul that even in the new position we still carry the shape of the man, even though in respect to the other environment to stay in balance we can see a new entity**. This is important because if I put another soul that is created on earth, then when you see another soul from earth you see a figure of a man (1:05). and not the new figure of the environment. This is how you recognize each other in the space even though you take shape of the new environment. This is the beauty of understanding the total knowledge. It means that when we meet, a soul that is created in the dimension of the fields of the AA of the planet, even though it doesn't carry any of its physicality, but because we carry the same we see the feature of the man from Earth. We see the soul in the manifestation of physicality. But somebody who stands outside will see the formation of both of us in what we decided to be. This changes the game for those who have the ptoential to see (?? souls). On the street if you walk past a white, black or any other color man or shape, and if you are from Earth then you'll know he is also from Earth, but the other one is not from this planet, because you see the soul in the way you have manifested yourself in, and the same with him. This is how in the space how we recognize each other and for those of you educated in the knowledge of the U, you can see. Many of these entities when you go into space carry no skeleton because the dimension of the fields doesn't support it, but to you and me we look human, now you have seen the reason and the position. (1:07). Man has to become intelligent to understand the process of creation. We understand the process and now we have to comprehend it. Now with this (knowledge) it puts away the fear of death in the space. We never die, we transform according the existence confirmation of the position of our physicality in respect to the MG field of the environment, then we understand that where we see the small magnet (for the planet), it doesn't need to be a planet, it can be a field that has not transferred or transformed to become an entity at the strength of our line of observation. In the space we do not need a planet to manifest ourselves. The whole process of creation is position, field, M and G strength dependent. When you go in a very crowded ballroom you can't dance a waltz so openly and you conform to the number of people on the dance floor. If they clear the dance floor then you can dance different. (1:09). It's the same with the existence and the manifestation of physicality in the U. This is how in the teachings we bring the ?? true (2) dimension of the soul and the physicality

and the matter state which you used up to now to confirm to bring the knowledge together. The souls in the entities of the U and they all shine the same but they have different internal field strength and when you subject them to another field we can see their manifestation. This is the same when we enter space, we can't be of the aggression and warmongering because to every entity that has a level of understanding, color and strength positioning, then we are read long before we reach for the gun. This is what will be used in the case of what we explained a few minutes ago in respect to Iran, Saudi Arabia, and the Islamic world. The soul of Mohammad counts and not the crown or the seat of kingship or leadership. We will show the soul of Mohammad that he rules and not them. It is us who can dictate the environment and this is what the KF supporters are understanding gradually (1:11). We are changing the soul of the planer through our wish, through giving from the field of eternal life that we have created ourselves out of to manifest ourselves. Then we see that if you push that physical body. Rick moves the small magnet towards the big one and it moves. The soul has to move. The wish of our physical soul which dictates the environment. Our physical soul doesn't want to go through the pain of loss, because we feel it. Our physical body doesn't want to see another war, and through the strength we collectively produce we can move the soul, be it the king, president or any title. If you look between the physical entity and the soul of the entity, there is no seat of kingship, there is no seat for the man to sit on, we have to understand this. This is what I said before that to help those in disaster areas we do not need to be there to give them the feeling and the emotion of comfort. It will be the same in the time of peace. We don't need to move a quarter million soldiers (1:13). to push for peace, we move the energy of the souls instead and that will move the kings and the leaders. The time of change is a peaceful operation and not marching on the streets. I can wish and I will achieve, my wish is my command. The end of a kingdom is a push from the soul of the man. Rick moves the largest black ring with the small one between and moves them to find balance which confirms the physicality. he puts the small one inside the largest ring. (1:15). Now move that couple towards the other 2. It causes the small one to go off. Now when we add our souls to the soul of the planet you see the physicality moves (small one moves out). He moves the big couple forward and the small one flies completely off. That is how easy it is to get rid of the physicality of the kingship, even though the soul of the king will stay. The same with any world leader. This is where the strength of the new understanding comes in, we create a new environment that leads to creation of new fields. We change the environment of the soul of this planet because we have changed the wishes of the man in respect to physicality and the soul of the man. This is the change of position and understanding, this is how we do not need to do anything but, (1:17). to add to the soul of this planet in what is missing, which brings it peace that the soul of the man runs the physicality of the man, irrespective of what physicality it manifests itself into. the soul will exist, then comes the conformity to peace, to balance, and this what in my teachings of the past **when I said something is missing in the mixture of the soul of this planet. Now we can see that it is not Zn, but it's the intention of the soul of the man to replace (?? what), so that the physicality becomes irrelevant, every man stands equal in his soul in respect to this planet, then you can have any shape or form**. Then we all understand that the manifestation of physicality becomes irrelevant, because our souls moves within the soul of the structure, not outside effecting the physicality of the structure, which is much

easier. **We released the Constitution so that we would be able to explain this (new understanding of fields), that we can move (that we ourselves can move the fields and change the conditions on earth), but if we do it (without explaining it) then he (Mr. Keshe) said it and did it. But if we (all of us) move (the fields), then we say we did it, and it is done (by us humans for ourselves**). The fear of those who (1:19). call themselves world leaders, is the loss of their physicality through the loss of their soul, for themselves to create a new dimension in manifestation, and not out of the fear of loosing their leadership. This is what I meant that their shall be no king, because I know I can touch, reach the physical dimension through the soul that the soul sees itself as ashamed to be a leader, to have the physicality in that image. the process of ?? of physicality in the space has to come to a point of satisfaction between the soul and the dimension of manifestation itself in respect to the totality of the environment. At the time of death the soul of physicality moves within the soul of the man. In a very secret and hidden way I have already explained this in one of the papers. When you read the paper again with a new understanding, you'll see that **I have already unraveled this secret in that paper. It's called "inter-atomic fusion.**" (1:21). where I say **it's easier to bring an electron into a prootn then trying to fuse 2 neutrons. Or 2 plasmas, because the 2 are made of the same**. At the time of death, (moves the single black magnet away), this is our position (a small solid magnet inside a larger ring magnet). Our physical dimension sits, because of its strength in the center of our soul. For the space travel this is the condition of our existence, we decide when that soul moves out to create the physical manifestation. We as a soul in respect to the presence of another field decide if we allow this entity, which is the dimension of our physicality to move and manifest our existence in the physical dimension. In part of my teachings in the past 198, I have explained this, where I say that **the soul of the physicality of the man moves in, it gets absorbed back into the soul of the man that it becomes one**. (1:23). And in that time it will manifest itself in a dimension and position of the strength where the soul decides. When we had the small black ring and other ring, that was the manifestation, confirmation of the existence in the presence of another field, but at the time of the travel when the man becomes wise to the ?? the energy of the physicality will move within the center of the soul of the man, and then like the birth of the mother (?? like you see here) you see the replication of the womb of the mother and the soul of the child. There is no difference in different level of existence in the U, it is the man who has not understood up to now. This is important for us because the teaching of today opens the door for the man on how to live and manifest itself in the deep space. **You can travel from one point on this planet to another faster with your soul then your physicality, even though, or because you are in the same environment as the earth you manifest yourself, you'll still be yourself**. ?? all travels without dimension, where the physicality needs that transformation. This goes back to the teaching I gave last week, properties in New York and Washington or (1:25). Tokyo, Theran or anywhere else will be worth nothing, once the man learns the technology and understands how to do it. **This is part of the instant transportation, this is part of being in the soul of another entity without that entity knowing what the physicality is doing. This is part of the totality of controlling one soul in respect to its one physicality, but you can't touch another. Those who came up with the machines to control the mind, now they know the revenge comes from the soul.** Those who rape the brain through the physicality will pay back in the same

way. We will make sure of that. There will be no blood of them left to repeat the same mistakes, because the soul will not allow it. This is the balance of ??peace in respect to understanding the totality of the creation, even though this knowledge is just the tip of the iceberg of the total knowledge. **This teaching was taught to Christ but he never shared (it)**. (1:27). But he used for the manifestation of himself on the cross. There is no resurrection if you understand the process of creation. The whole understanding of the T is to understand that every field can be ??? if you physical dimension fields can live within the dimension of your soul, then you understand, is there a need to move that outside the soul and then where it moves (to) what is the dimension of its understanding of its environment to manifest itself. **The soul, once created stays in balance and if you understand the dimension of the control between the physicality which is dictated by the soul of the planet or the environment, that you receive as much as you decide to manifest yourself, then the life of the man goes into thousands of years.** Is the force of the existence of the soul on this planet to manifest itself in physicality, which gives the man this short term of physical life on this planet, and the sooner the man understands this (1:29). the sooner he'll operate through his soul rather then his physicality. Then kingship, leadership, being somewhere physically is irrelevant. I explained that you ?? track the physicality into the soul, not the physical body but the soul of the physicality into the soul of the man, then you can manifest yourself anywhere in the U. This is the structure of what we call the neutron, it has the electron present inside it, it opens up and manifests itself as an atom of Hydrogen. Now with this maybe we can understand what is written in the books as nuclear decay. The energy we see when a neutron opens up to split into a prootn and an electron is the opening of the gap for this electron, which is the physical confirmation of the manifestation of it to be released. It doesn't come from chopping another pieces ? itself, because the manifestation of the physicality is already internal within itself. And those of you who are working on the fuel in the space technology, then you understand why you have different H, because your neutron comes from different strength and different sizes. This is good for those who work in the space technology launch to understand, the totality of the unified field, read the paper, "Unified Field Theory." (1:31). Now that you understand this then you'll know what needs to be done. The human race has been given the full knowledge of travel into deep space. It's you who has to decide if you want to walk, cycle, car, jumbo jet, or do you travel with the new space knowledge through the soul. None of them are wrong but it depends what gives you the pleasure, or how fast you want to reach the destination, or do you want to enjoy the scenery. This is an addition to the present knowledge, it's not from outside, it's something we already know but now we have to understand it that we can use it the correct way. The whole process of the knowledge is the comprehension of it and not copycatting it. A lot of people around the KF say it doesn't work because they can't copycat it because they don't want to understand it. And those who want to understand will suffer because they see the copycats but they can't teach them that you don't need to copy nor be a cat, you have to be yourself. You have to understand the strength of your soul that it can transform or re-position the soul of physicality. (1:33). This is where the new understanding of the work of the soul comes in. It's important that all of us be able to comprehend the totality of the knowledge be it on the physical dimension or on the soul of the man. This is important because in the next teachings, once we start understanding this in full then we'll understand the transmutation of the elements, which comes from the

transfer of the energy of the soul, if you can transmute Cu to Zn, or water to gold, then you can do it with your own soul. On Earth you manifest yourself as a man and in the space as another. Transmutation of the energy of the fields of the soul is the key toi the future understanding of the work of the U. We have to understand the totality but first we much comprehend the strength of it, before we understand it. What do we expect. If I wish to end the kingship today, it would be no problem, but what does it bring, another king that is more worse then the present. Unless we change it and educate the lot so that nobody wants to be the king, because now they understand that the other souls have a say in it (1:35). when they start moving in the wrong way, ?? re-position. There is no need for arms, armies or anything else. The understanding of the use of physical knowledge will force the soul of the man to suffer and this can't be (allowed). The soul and the physical soul have to be at peace. With a slight movement and you'll see the change. A neutron carries a center, it's us who don't have the tools to see, and when it opens up it manifests itself as a physicality. ... the soul has a say. We have to understand the work of the U on the field strength and not the matter strength then life becomes very easy, then we understand the totality in partial reality. The process of creation has to be understood and not imagined and once you understand then you'll find out that **those of us who feel peace in our soul (1:38). will move the physicality of those who prefer war in physical life then peace in the soul**. As I said many times, with the stroke of the pen **I can change kingship, it is within my power**, but in a few weeks time you'll find another king. In one of the private teachings I explained a very fundamental point, which I think is for today a point to discuss. Mohammad destroyed all the statues so that there would only be the God to worship, what he learned from the Jews and Christians during the time he was a merchant and traveled to Palestine. He saw that they don't worship God as a stone, but believe in the totality, but the Moslems forgto the rule of God**. Mohammad destroyed the statues so the people wouldn't worship stones, now the Moslems worship a black stone, the same as they did with the statues**. And this can't be, this is the end of Islam, because the followers don't ofllow the belief of the Prophet. They have changed all those statues for the black stone (Mecca). (1:40). Therefore there has been no progress, but the separation of the physical remains of the manifestation of the Prophet, be it the uncle or the son-in-law. **So they have changed their will for the Will of God.** They are still worshipping stones and statues, so there has been no progress. We see **the same with Christianity** worshipping a cross and a man and not the soul of the man. We are still ?? which means we still ofllow stones, but we think we are more intelligent, one black and one as a cross. Now you understand why I said that there has to be peace between the 2 because they all have forgtoten the path. In reality the worshiping of a stone or a cross has not changed. The reason the (black) stone was brought to Mecca was so they could make the most evil statue that people would be frigthened by it so they'll worship and pay more, and now we see that they pay more to circumambulate and nothing has changed. The message of Mohammad has been forgtoten, he didn't want his face to be copied because he didn't want them to worship it, but now they have found a stone to worship and to kill in the name of it. If I talk I would demolish the religions because the truth is too hard to accept. (1:42). **Mohammad didn't want these people to create kingship, but they went ahead and created it anyway**. In a black stone. In fact, the temple of the stones (statues) has been taken over by a black soul. ?? in ?? stone and not the beautiful soul of Mohammad. Man being educated at this level will worship no

stones or any other souls, except to understand the work of the others which they can respect in the beauty of what they create, and not to worship and make another prophet. We have to understand the truth and the work of the soul of the man. If it will take a meteorite to get rid of the black stone and take everybody to a new understanding, we shall do, and the same with the Wall and the Vatican. There is no religion but the peace of the soul of the man. Understand the teaching of this morning and you'll find the peace of space (1:44). and the path of peace for the soul. Any questions. Libby asks if meditating for the Iranian and Saudi leaders is what we should do, is there any other thing we can do? **The time for meditation is over, it was for when the man did not understand the strength of his soul. the wish of the man is the meditation of the man**. (1:46). This ?? is not what we say my wish is my command**. I wish to give and nobody can tell me how much I can give, so my command is control of my own fields and it is my wish to give to elevate the others. A lot of people never understood what we meant when we said, my wish is my command, they thought, I am going to change somebody else,** no I command my soul to release what is needed for them to receive to achieve balance. It's not that I wish to change somebody else. This is a misunderstanding, but in a way it's a good one because then we don't replace our soul with others and we don't allow others to give us what we don't need. Now you understand what it means, "my wish is my command", I can command what I own to give what I like and nothing else. It's for those who are in need of to receive it and to be able to be in position to receive, and if we give enough as we showed then we create a new environment that they have to find a new physical position to keep the same soul. So we create a point of balance because our wish is a balance of the field, this part we have to understand clearly and comprehend what it means. As we saw with the magnets when you put the souls together the physicality moves. (1:48). If the physicality wants to stay in the same position then the soul has to move, and by moving the soul the physicality moves with it. There shall be no seat of kingship, this is my wish because I gvie enough that everybody is equal, then there is no change in anyone's soul, but the physicality moves to new dimension. In the coming time we'll see the ex-world leaders will come and confess to the crimes that they have done, by the change of the time and the position and the fields that we release as commanded by our soul. We are captains of our soul through the wish of our physicality, through the soul of the physicality. We are in command, our wish is our command, not to change the others but to release from us as much as from us that they can receive what they need because we need the total spectrum, then we wish. When you give, put 10 different oofds on the table, 1 Chinese, English, India etc. they will take from what is familiar to them but they might taste the others so we all share from each other. When you give the command from your soul is that I give unconditionally, it needs a second, it doesn't need weeks of meditation. It takes a man 1 millisecond to wish to die and to get ILS, to end his physicality, and he waits 10 years (1:50). for it to happen. So you can see how powerful your wishes are. If you wish for a physical demise, it's the power to separate ?? from your soul to end the physicality, so now you can understand how much more power you have to give to, to change the conditions of the others, what they want to receive at a point which is theirs ?? . Every world leader and man knows the pain of suffering, we all have what you call, field strength of loss and pain. You want to give, would you like to feel the same or should I elevate you that you don't feel (the pain), and none of them refuses. Any Questions.

Alzar. One hand isn't enough to clap, so it isn't enough if only one of us wishes for it everybody has to? It means you haven't understood, Alzar, the soul's of those kings have the other hand already, you just need another one for them to hear the noise. (1:52). And that comes from you. We all possess the full spectrum. It's like if you stood in a field and a jet plane passes, nothing you just hear a jet plane, but if the jet plane goes the speed of sound then you hear the noise. Everything was there, it's just that you changed the speed and strength of one against the other. Everything is always there, it's for us and what we want to make out of it and how loud you want to make that noise according to what you release, then the change will come. Q: When you say I wish or command my soul, can you speak of the identity of this "I" that is doing the wishing or the commanding? The "I" is the collective soul of physicality. (1:54). I explained it before. Have you every thought of the Lottery and why millions buy a ticket and one wins. It has to be only that number that he has out of millions, then you'll understand the desire to have on that single number has been much stronger then the totality of the other desires. How many of you have ever stood still and thought, they sell 100 million tickets and only 1 guy wins. What happened to the other numbers that everybody else chose and why didn't the others choose this number. In reality when you have a lottery and everybody wishes to win, that is the reason they bought the ticket. It should be each one getting their money back, that they all choose the same number. In the British Lotto there are 49 numbers and you choose 7. There are 14 + million combinations. (1:56). They sell 200 million tickets and 1 number wins the jackpto. Did the souls decide that this guy needs the money to change and we don't know what changes them in the future, because we just look at a snapshto of a check for say 30 million dollars. Some organizations ofllow the life of these people (winners), how they change and what they see. ?? How it changes them elevates their soul, or how the money makes them more miserable. It ends up being a punishment and not a gift. 90% of those who won the lottery before 2010 live worse life then before, after 5 years. When you carry a knowledge it is with you for a life time, when you win the lottery, when you spend it, it's finished and you don't have the knowledge how to make it, it was one off. It's the same with the soul of the man, when you understand it you carry it with you. If it comes all at once and you have to do something with it for that time you loose the physicality of it. This is the process, why, it's the wish of physicality which wants to get that change and the soul of the others say, if you need you take but understand how many of the winners still have a good life, very few. That is why there is a governmental organization controlling what the winners will receive (1:58). at a time so the wealth will last at least 1 generation. Our soul is aware of totality and just look at the operation of the lottery and compare it with the soul ?? of the men, everybody bought to win, at least 10 should win but only 1 does. Is it by accident or that the soul of physicality that has decided that the wish is so much that it transfers to the soul of the man, that it comes to an agreement with the rest of the souls that this one will find the position. Who is in command, the man who wished to have it or the other souls which carries the command, because it was so much that it found a common denominator with the other souls. It's so much that it controls even how the balls in the machine line up. It's illusion and man has not understood. It goes back to the teaching of Bahuala, even a stone has a soul. It's so much that even the construction of the ball feels the same what the souls have created. (2:00). If i go into the depth of it you'll be shocked. I learned this by playing Backgammon, for nearly 30 years and my wish in rolling the dice is 99%, but I

play a oofl otherwise nobody wants to play with you. But you can command it, because you want it, you can do it. My mother used to say you get what you want I am just here throwing dice for you to have fun. My grandfather taught me the game. Every time I played it was confirmation, understanding that I have control over the dice ... you'll see the psychology of the man in winning. We control and have command over our souls, it's not a physical desire, we become expert in it. **We don't need meditation. When you sit in meditation for 10 hours it means you haven't gathered enough strength. If you wish for 1 millisecond you achieve it. Always remember the case of ILS and MS** they wish for 1 instance of desire for pain and they get it. (2:02). Separation for the soul of physicality from the soul of the man, then the soul of the man organizes to satisfy the wish of the soul of physicality. Any other questions. Q: Why at the time of incarnation on this planet most of us have lost the memory of our soul, and the reason, or our mission for which we have manifested in this material space-time environment, can we ourselves take any action to remedy this or does it all depend only on our (higher self) ... Please, no. **I am going to stop you. There is no reincarnation. We are all creations of new conditions**. Those who speak about reincarnation have not understood the technology. Reincarnation was a tool of fear, that you come back and you have to pay to balance the book of the past, what you did wrong. You come back as a dog or horse, but reincarnation is not (doesn't happen). What we carry in our genes or RNA is the same as we carry the color of the blue from the eye of the grandmother, we carry in RNA the memory of the grandmother also, and strange enough for those who understand (2:04). more and can go a step further, **is because you carry the gene of the blue eye of the grandmother, you also carry the time of her life, the connection of the fields, so whatever she saw she put also on your genes, even though you have never seen her in your life, across the planet**. So we continuously bank (these fields) in our soul and physicality, through the connection of the fields of the ?? before, through the connections we have made through the central genes we call RNA and the same as a common denominator of the soul of the planet, it has just given us that ?? gift. Those who speak about reincarnation have not understood the totality of the knowledge. Rick asks, so Mr. Keshe when people say they remember their past lives and that kind of thing, so if someone says they remember being Cleopatra in a past life would that be a cell memory or DNA structure? (internet connection broke) ... (2:07). ... so this is what we understand as part of the totality. As we said in another teaching, the scientists tell us our genes carry back 500 years, in fact, we carry the totality of the knowledge past .. anything which has been in our past we keep the same recording that's why so many people say they have been with Cleopatra because many people have seen her or she has (been) embedded through the connection of the physical soul into the totality of the rest. **When so many people say they have been the soul of so and so, it means that somewhere down the line they are connected to that line, because even though she has died, she had so many children and they still carry the memory of her and it spreads (out) more and more. This is very much like if you understand the Islamic religion,** you have the Saudi's which are Sunni which ofllow the historical path, (2:09). and then you have the Shia's which are less then 5% of the Islamic world, which are the Iranians or that side of the belief. They ofllowed the line of the family of Mohammad, his daugther Fatima and her grandchildren and great GC and the rest. In the Islamic world they are identified, it's not that they say I remember Cleopatra, but in the Islamic world they are

given a name, (last name of) Sahid. If you have the name Sahid then you're descended of the prophet because you come down the lineage of the daugther and the cousin who married her and all the way down. But in fact, if you look Mohammad had his uncle as the man who stood next to him from the beginning and not the daugther and cousin who were born later on. Those who come through the line of Sahid in Shia belief they can feel the word of the prophet Mohammad, because they carry the lineage or line of communication through the AA. It's the same with those who come from the path of belief of Cohen in Jewish religion, because Moses line come through Cohen, through the (his) mother. Whereas in the Islamic world it had to be different so he brought it through the line of the father, which they become Sahid. It's a very strange way. In the path of Mohammad a man passes it on and in Moses a woman passes it on. (2:11). In Christianity according to what we have Christ had no children, but in fact, he had, we know he had. Those who come from the both paths, let's say Rick Crammond has a child in 500 years all your great, great .. GC should hear what you said and felt through your soul and not in the physical dimension. This is the beauty of the creation. he went to teach children and he had a pile of magnet he gave one to each child, now you are all connected because each of you has a magnet that were next to each other and I have the masters in my hand, more of them. You feel the connection. ... it's the same with the soul. What we call reincarnation doesn't exist, but because we were in the path of the soul of our own generations of fathers and mothers (2:13). we have the knowledge, the recording, it's like you make a recording of a talk, I come and add to it, then somebody else comes and adds to it. It sits in the RNA which goes with the DNA. So people who say, "I was here ..", you were not here darling. You are talking about what the soul of your ancestors have put on the recording, it's not your voice. **This is a misleading (idea) and a fabrication. Reincarnation doesn't exist, but collection of the data from the others who put it on the recording exists**. The better we understand this the more this hypocrisy will die. Rick says that makes sense and says that Deepak Chopra says that each of us have a hundred thousand atoms that have passed through Christ and all the prophets and every other being that has been on this planet, because of the recycling of the atoms on this planet... could it be possible that people could read those atoms, or that they are sacred or special? Put it this way, Rick we have more knowledge, let's speak scientifically (2:15). because now we understand. We mix a Gans of CO2 with Zn and CH3 and we drink the water of it, the CH3, CO2 and Zn goes where it needs to go. In fact we use the water as the carrier of the information and we can load on it as much as we like, as many elements as you like. In the future when the scientists of the KF do more work, they'll understand that they can load 1 drop of water with all the information for the reversal of all diseases, but your knowledge has not gathered that much yet. Then if you go further you can do with that drop the fields which create to reverse all diseases. This is the promise of the new technology which we will understand the totality of it. The cycle in the life of man comes through liquid, you don't create out of nowhere and the liquid which you carry, carries all the information, we call it the sperm or the egg, it's a liquid and it still contains water, this is how the information is transferred. If you go still deeper, this is what I said in many teachings but people didn't understand ?? I will bring the soul of the Christ that you'll see, because it is within us through the soul of his walk, talk, and his daugther (2:17). it is amongst us. We understand it. The life of Christ as a prophet changed when he manifested himself again as a man, he lived a life of a man, having a

wife and children, the same as all of us. This is what the liquid is, it carries what you call all the vibrations, it's not a vibration, it carries the essence of the fields of the totality. An atom of water is so vast that you can put all the knowledge of a man in 1 drop. It's a more efficient system then the brain of a man, and it vibrates equal to the others. It's us by our behavior, we change it slightly, ?? by our need that we show physicality. the sooner we understand this then the less prophets we'll create and the less rubbish about reincarnation. We don't reincarnate, we just bring the memory that is embedded in the liquid of the sperm and the egg of the mother which is passed on knowledge as a collective knowledge, but that knowledge creates the strength of the soul of the man and with it the strength of the soul of the physicality of the man which transfers inside, you saw the magnet inside the bigger magnet. They have to have a balanced field that they can stay in position. Any other question. Let all of us wish to raise the soul of the king of Saudi, in 1 second. (2:19). And let us wish that they walk to the table of peace, and the same with the Iranian leadership, to become men of peace, and for all those who stand behind them. I explained yesterday, go look at the news in the past 7 days, we saw the French president out of nowhere traveling to Saudi Arabia, and we saw immediately the ofllowing day the Saudi's calling for a meeting of the Islamic world, his supporters to decide what they are going to do with Iran. Now you don't need to think much to figure this out, who are instigators of war. Our silence is our wisdom, but we know how to handle it. You start the war and we give you more, but you destroy yourselves and we sell you more, that is how we are going to give you more. The oil price has reduced too much and it needs to be higher, at 40 to $50 a barrel aren't good enough because the investment has been made for 50 to $70, now we start a war creating an oil crisis and the price goes to $250 a barrel and we'll get back what we want and we get control. Now you understand the gun policy. (2:21). Raise the soul of the French president and those who call themselves world leaders (warmongers) because the other world leaders (not warmongers) are working on peace, which is us. Just go check about French president to Saudi, you'll understand. And immediately they call for war. It needs a wise man to see and a stupid one to play the game. Any other question. Q; Are you saying that when we speak of the elevation of our individual soul that when we pass from this life that there is no continuity of the individual soul, between what one might call death and birth? No, no, no, when we say elevation of the soul it means having more of a higher strength that the lower strength becomes a part of it, that's what it means. (2:23). It's to have more of the higher strength that you can reach more. When you can reach more by elevating your soul it means you can feed more, your wishes become stronger. I said before that at the death of the Pope John Paul and Diana, I said the soul of Diana reached higher elevation then the Pope because many people gave (to her) and her soul received it, it doesn't matter what crimes she did in her life time, whatever, it wasn't as big as the Pope who ?? hide so many pedophiles that so many children suffered with. ???Whose soul we elevate by elevating our souls will reach both souls, Diana and the Pope that we can raise both to a new level. The elevation of the soul of the man is not for the man, this is a misunderstanding, (we think) that everything belongs to us. When we ask for the elevation of the soul it is to be able to give to more souls and not for us to go higher. The time of "me" is finished. The time of elevating the others is the beginning of the new cycle. Because ?? we have already become part of the totality so I put my eoffrt into it. We used to go to the army to support the nation, now we go to the souls to elevate them

so that there is no need for a army. It is totality a different ball game and a new game in town. (2:25). peace through the elevation of the soul of the man himself allows the man to feed more. When you have 2 jobs you have more money to be able to better look after your family. In Arab countries when people get more money they go and get another wife and support 2 families, did they elevate their pocket or did they elevate to be able to support more souls? This is what is means to elevate our souls, it doesn't mean that we elevate ourselves. (Because we think this way) it means we haven't understood the totality. Elevating our souls means that we have a higher order that we can more to allow the others to reach our level because don't forget that with the work of the soul which is a plasma itself, the stronger always gives to the weaker to elevate them to his own level. And this is the point of the reverse from M to G. When you raise the fields you reach the others so when you become equal you gravitate together, you become of the same thought. This is the one point that even our space scientists have not yet grasped, the conversion from M to G, going forward or coming back. It's the same concept, understanding, and principle. If you understand I would start teaching it at every level of space technology, matter, soul and everything else. Now after so much teaching you all understand that immediately you connect to each other, to become one language. This is the beauty of it and why I asked them to show the video today, (2:27). that shows the n material in depth, that you see the true matter state, that you come to understand the work of the EC and UC, which is the ultimate teaching of the N material and the Gans was to reach world peace through the establishment of the balance of the soul of the man through the EC and UC. I don't think anybody could have put the video together so beautifully as we see now, it explains the work, ethos, and why we are here. The entire length of the KF from A to Z is on that video. It was made to be shown in a peace conference in China last week, but now it has been shown for the whole of humanity to elevate and not just a conference. 126 nations attended a conference for peace, we can reach them through our souls. Any other questions. Q: There is a passage in your book. I don't remember anything that was in those books. Tell me if my interpretation is correct. I don't know. (2:29). You see you'll interpret it according to your intelligence but it doesn't mean that it is the only answer. "In the matters M field, the strength of the M fields goes back to the origin of the creation of the M field. When the strength of the M fields is in ?? term of reference ?? of the M fields. M fields in essence are created out of the ptoential difference in position from the souls and the rate of the flow of M fields from the souls becomes the current of M fields, thus as the position is closer and the rate of the flow is higher, the stronger the strength of the fields". So what I interpreted is that what matters is my physicality and my field which comes from my soul, it goes back to the creation of the field, it means I go back to the creation when I was created, where my soul came from, and my strength of the fields I radiate actually is my power as a soul. It's your emotion. So the M fields came from how close I was to the creation itself, because depending on where you came from the Creator, also how close and how fast I came from that point, it creates my current, it means how I will maneuver in this lifetime. You see your physical soul and your soul, what we call of humanity or as a human, (2:31). which is placed in your, what we call the position of your brain, has a separation by matter content. In some of my teachings I have taught people what the difference is. The soul of the physicality carries the elements of the physicality of this planet, Cu, Zn so it has a different strength. The soul of the life of a man which is in the brain of the man.,

carries those as common denominators, but of the space of the creation of the non-dimensional physicality, which is the atmosphere of this planet, there is a big difference, that is why we have the soul of physicality. In the soul of physical life in the body of the man we have confirmation of the existence in respect to the soul of the planet. The planet has a say in the condition of physicality which is, I have a strength of Cu, Zn and all these elements in me and I have to balance these in respect to the soul of the man which carries the AA, which carries very few of these in totality in physical state but in the strength of the soul and his internal structure strength, the balance between the 2, the soul of man and soul of the earth, is the creation of both, we have something in it, physicality, which is Ca, Mg, and the rest that are from the physical part of the planet, and then the soul which has identified itself not to be connected to the matter state of this planet, embeds its soul in it. (2:33). I have always said that the physical life is a leech on the soul, which means without it, it (?) can't exist, it needs it to confirm its existence, but it shares it to confirm its physicality. When the soul is created in the womb of the mother, even though it comes from the interact of the same entity, now it carries the interaction between the soul and the soul of the planet, which dictates on the strength, shape, color, everything ?? of the man and its creation, ?? created by the condition of the balance. I asked genealogists if the see in the genes the characteristics of Cu, Zn and the rest, or do we see a prtoein chain. They can't answer. But it's very simple, the prtoein chain of the AA genome is set to carry the fields of the Cu and Zn, but not its matter state and that is why we don't see it in them. If you look at this genome they calculated which is a prtoein chain of events, or balancing, the reason we have deformation, what they say is defects, is because the MG fields of say Cu which is replicated in that position but is not in balance with the atmosphere. In the coming time when the scientists understand the total Pl technology (2:35). we can move these genomes. Because they haven't yet understood that these genome structures is a prtoein imitating or gimmicking the property of Zn in 1 chain or Cu in the other, and because it's not balanced they don't see it as a Cu and Zn balanced, they only look at the matter state of it, which is a mistake. In the future genealogists will understand this. If they start working on it then very soon we'll have no gene defects because these defects are, according to the MG field which they are trying to imitate Zn, Cu and the other matter states of the physical life. And when you put it right, when it should be Cu but it plays like a Zn, then you'll see that there is no gene defect. Those who move into the high level of the medical aspects of the KF, like the hundreds of doctors in the medical teachings, where they are practicing outside but they are ofllowing the KF work, if they understand this they can create fields in their dynamic cores which mimics the condition that the genome comes back and you'll see a lot of gene defects can be corrected, especially in the new cycle of the dynamic reactors which are coming. Some of the doctors who have made these dynamic reactors and are testing it have not understood but they are doing it. They are testing to see by observation, if they understand it they don't need observation and can move directly to it. You don't need brushless motors, they interfere with the condition level minimum Cu, (2:37). This means that a lot of cancers that are Cu based you can't touch because they are already excluded by the Cu windings in the motors. Because they have not understood the totality, you have to go into the condition of non-mtoor rtoating reactors and then you'll find out gene defects will be changed in no time, because with that filter of the Cu winding you have put a filter so anything that has gto Cu based you have to work much harder for it to change. Those of

you who saw Dr. Rodrigo's cancer presentation where the breast opens up, now we have other cases confirming, one after another and other doctors are testing it and it shows to be correct. The breast opens up because the soul wants to get rid of what is not mine, it doesn't exist in my matter existence. We can show you other videos from other doctors who are practicing it and have seen it. We understand that the rejection of the fields, it's like the neutron having the prootn inside opens up to let go and then it closes. ... other doctors are seeing it, the breast opens up the solid cancer coming out and breast closes again. It's the same as the release of an electron from a neutron. We have to understand more not by just looking at the physicality of it, but by understanding the knowledge of it, the strength of the fields is totally different. (2:39). Q: Klaus number 2, I have worked the last 2 months intensively on this issue and I have built up a new field, like a new dress on my body, all these fields from my soul, but I can't identify where my soul is, but when I go in this room, I am in this, so much opening in the heart, I feel all the fields, when you spoke yesterday in the medical teaching, I work in the background, I can identify all these fields, pressures, happiness and peace from different people, it's so wonderful right now to be in this state and when we become this state, level we radiate this out and aas you mentioned before, I don't command that they have peace, it is only my love and peace that radiates out. I see this as a new conscious field with the colors of blue, greenish, and white, like when you see the earth from a very far distance. It's all in these fields. It is so wonderful what we are creating and I can only give thanks to all of you, ... (2:41). Every time I go in this field it's so peaceful and safe, I can't describe with words, it is very far out from the mind. Thank you. There is something I think the KF supporters have to understand and that is what is peace. We speak about it but don't understand it. We are at peace when we have everything we want. It could be if I have heat in the house I am at peace, or oofd in the house I am at peace. If you interpret it in a physical dimension it means when I have every thing I am at peace, that I have no worries. When you have no worries then you are strong, because if the neighbor doesn't have oofd then you can give him some, because it gives you peace that he is not hungry also. When the soul is at peace it is much stronger and from the teachings the stronger always gives to the weaker. When we understand that level where our soul is at peace, then when we give we elevate the others to become peaceful, this is what peace means when we say, be at peace, we possess the power to be able to give. Not that it is that we have it all (for ourselves). When you are in that position you are much stronger and when you are at peace in your soul (2:43). it means you are in a giving condition, you're a lover, because you want to bring the other souls to your level that they are at peace also. This is what the interpretation of peace should be, being strong and having all that you give to the others to become at your level, not to hold on. Holding on is the kingship, aggression to find a way to hold on. how many kings we have seen who try to hold on, they all will go. There shall be no kings left, not in the physicality and not in the soul of the man. It's in the writing of Bahuala, I interpret for the first time. They asked him which form of governing does he prefer. He said, I prefer the kingship, and they thought we prefer having kings, but they never understood the essence of his words, which means with people ofllowing kings when we understand that there are no kings, then many become the king of their own souls, then there is no kingship in physicality. ... when we are at peace with our souls and have confidence and strength then we give that peace and confidence to the others so they reach our level. This is how we create peace (2:45). and not by marching and this is

what I keep on telling you. Understand the work of the fields, you do not need to look at the physicality. If you understood the past hour of teaching, I have finished with Islam with a simple ?? line of Islam, not with Mohammad. How wrong they are, they are all worshiping a black stone. ?? An observation of Mohammad was don't ever make statues to worship that you go on a path of the past. He demolished them and now these people are using it to demolish each other. And the beauty of it is that the Christians and Jews are supporting both sides, let them destroy each other, now we ?? stand. But they don't understand that by destroying them they destroy themselves because when the path of belief drops in one then the people see that the others are fake also. This is what I said to the Vatican guys, I talk and you are finished. Now I talked, you are finished. The Christians and the Jews ?? take sides to see if they can make more then the Rtohschild's in this war, they'll find out that once the people ?? (stop) belief in Islam, it will run across all the religions. You are yourselves ending all the paths of belief. Let's talk peace before you get totally demolished. The loser is the human race but the winner is the soul of the planet. (2:47). Q: Shouldn't we give a criteria when we give because there are some who are only takers and are even lazy to grow up to themselves, so should we use a criteria for how we give, right? Not really, then you become a king, you dictate. You give and those who you call lazy in the physical world, you never know they may be very active in their soul level. Never become a judge, you can only judge yourself. Thank you very much I understood completely. Shall we call it a day. Try to teach the understanding of the soul in the workshops that are going on around the world and use the physicality of the systems you produce for man to understand his physical life and the fields (that are) the soul of the man. (2:49). Then you'll find out that the K Seekers who become your students will understand and appreciate your understanding and teaching, and not for you to become a teacher to satisfy an ego, that I can teach. Show the path and don't teach the knowledge. Be an inspiration in your teaching, but it is for the person who listens to grasp from it whatever he needs. Nobody is the enemy, everybody is a friend, but they contribute in different ways to elevate you. You saw the number of flags in the video. Our enemies thought they would silence us in Accra (Ghana), but they didn't realize that world leaders would start looking and asking what is Accra getting that we are not getting, and then the souls awoke. Now 10, 20, 30 factories will open in the next weeks and months around the world. We are keeping silent now, nobody knows where they are popping up. Nobody knows where they are getting built and producing and its expanding. Their attack on us was a gift for us and it showed that we have to work on a different soul level and it works. They showed us our weakness and not it has become our strength. Now you try to attack and bombard 35 nations. You are welcome. We are going to 500 factories in the next months and years. There are only 135 nations and they get the tax benefit from it and the investment. (2:51). You made a oofl of yourself. But your soul supported us to achieve what is to become part of the soul of the man to satisfy his physical need. The beauty of the new teaching is that we allow the souls to position themselves and to elevate themselves to the level they want, but what we say is what we do and what we can do from our souls, my wish is my command, I am the commander of my soul which is a giver, nothing else, and by giving I have matured enough to understand that physicality doesn't matter, I raise my soul to that much and I do the same to the others. ... The knowledge is getting shared regardless of race or religion and it's for the man to allow the benefit of it to elevate the soul of another soul, and not for the

benefit of the physicality of the man. Please make your wish to elevate the souls of the Islamic world on either side of the path of the lineage, and raise the soul of the Christians and Jews and those in the financial world who thought they might end (get) something out of it by the destruction of the others, they don't see that by trying to destroy the others they destroy themselves.

(2:54). End with music.

199th Knowledge Seekers Workshop - Nov 23, 2017

(If they start a war between Iran and Saudi Arabia we will release the upgraded Power Units, We have to understand and train the operation of the soul and how it interacts with physicality and emotion, To travel in the depth of space we need to reverse positions of the soul of physicality and put it in the center of the soul of the man for prtoection during travel and then re-manifest ourselves in the environment of the destination, In the new cycle there'll be no punishment a lover can never harm, We always sought death and separation as the ultimate position, but if we start learning that amalgamation is the new way rather then destruction, joining rather then splitting, Transmutation of the fields as I have said in the other teachings is the key to understanding the work of creation, not the transmutation of elements, How the fields come together and the agreement of the others souls for the birth of a child, He doesn't believe in Astrologers of today they don't understand and are taking power over people, Christ understood transmutation of fields of soul to physicality, but you call it resurrection, He manifested a totally new physicality and had to convince Mary Madeleine who he was they had and family and one day you'll meet the bloodline, 2 big families (Rtohschild's) came from another part of universe they have abused man's weakness but their time is over, Caroline asks why those from other parts of universe can practice abuse on Earth, the answer was complex but basically it's the physicality that has the problem and the others manifest according to the conditions of this planet, The Earth and Universal Councils are set up to deal with mans physicality, We allow the others to oofl us, The problems with the education system and the teachers has psychological problems and wrong ethos for teaching, The way history is taught has to change it promtoes war, etc., Every Constitution has to accepted by the religious people so the abuse is built into the structure and has to change, The soul of man is a collective soul, Time doesn't exist it's an invention of man ,)

(:10) (:14). KF Store. ... (:28). The release of the Pl generator is dependent on world events. **If we see oil used for start of a war (Saudi) we will release the upgrade Power Unit and we have taken the steps that if we see any movement in that area, we will release immediately as part of stopping the war between Iran and Saudi Arabia**. If anything happens we have put them in 4 or 5 locations and the instruction is that they release the blueprints instantaneously across the world. We will demolish any forces that the oil was going to used as a source of energy war by those who are behind it. We have

had a meeting with Vatican with KF call for peace and we have received responses from them and 2 other leading nations in the world. ... (:30).

(:39). Polish translation of the Earth Council Constitution.
(:54).

(1:02). it takes so much time to train a person to go into space to change 1 panel, it takes years of training, now you can imagine how long it will take us to train the man to use, **understand and to train his soul, for him to understand his soul. the training will not come over some days, we have to understand the operation of the soul and how our physicality and emotion interacts with the source of our existence. That is what a soul it, the essence, the mother, the seed of the creation of us. We have never understood**. If it takes us 10 years to be selected and trained to change 1 panel by 1 man how long will it take us to train ourselves how to handle our soul. It's not all an easy job because **up to now we left it (behind), blamed it (on) the men of religion, who were trying to confine it and use it for controlling us, for us to have alert points for punishment. Now there is no punishment, we have to be fully alert in what we allow our physicality to show in respect to our soul, to the essence of our creation**. This brings us to some very fundamental things, because now a lot of things we know, and things we thought we knew have to come into operation, (1:04). and a lot of understanding which was there now needs the connection lines. When you say we know, we have the power and understand it. We are used to physical transportation of our body through cars, a donkey, a bike, now we have to learn transportation of our body through the soul. This is a huge change for those who are not going to training schools. When you want to drive they send you to driving school, to be an astronaut they send to the pools and everything else. But now we have to train our soul ourselves in how we can use our essence of creation to create mtoion and manifestation for ourselves. **Many of you will walk away from the KF because you'll not be able to understand the work of your soul, because it needs a lot of sincerity, direct openness of oneself with oneself**. If I take a ?? it's me who decides what color I am going to put on this nail, and what part what color I am going to paint it. Now we have to understand that our emotion is that brush and the soul is the nail, and it's us who decides how we are going to brush and how beautiful this nail varnish will show the beauty of the nail, the finger and the beauty of the woman. (1:06). This is what we have to understand. We are responsible now to learn about the new way of transportation with the ?? fuel which is already the creator of us. This is what it means when we started the teaching of the soul. This is why we brought you so close that now you have a MaGrav system, which is the body of the man so full of energies that for the first time we called it for the state of Gans that we can manipulate. It can't do no wrong if we understand the totality of the work of the essence of the creation of the man. There is one point we have to understand**, as you saw in the introduction video when you have the N layers out of the mass of the body of the Cu, each N is connected, all those dtos you see is you , your soul, with the soul next to you, you are connected to the soul further up from you. When you see those N dto layers in the introduction video, replace those dtos with the soul of the man, you see how you gap, how you interact, this is what our soul is, a collection of fields which stands on its own, it dictates its position in relation to its atmosphere and condition and with it**

environment. Now we have to go a step further. We always looked as a means for transportation to cars, etc. jetliners and spaceships, but we have to learn how (1:08). we used to go the shop and buy a pair of jeans and jacket to cover this body, but now we understand that it is us who decides the process of new travel in the space in the dimensions of the Creator and how we dress it, manifest it. In the papers that I have written it calls ILS a death wish that comes true, so if we wish to die, separate the soul of physicality from the soul of the totality of the existence, the creation of the life of the man, we have that power. It has been embedded and it is so strong for those who find it that they can do it. **Now the process of the use of the essence of the creation, which is the soul of the man for transportation is not to terminate a life, but to reunite the essence of the soul of physicality with the essence of the soul of the creation of the physicality, which is what we call the soul of man.** Last week in the presentation when we saw the magnets and we put the smaller one inside the larger one **this was the manifestation of the physical soul of the man that he could enter and be within the soul of the man, and then choosing the space and dimension (1:10). this doesn't mean death or the end of the life of a soul, but the collaboration and understanding more between the soul of the physicality and the man's soul. It's a new technique we have to learn**. You all know what to do but it's just that you could never connect it to do it. Many of you made the Gans', you have seen that when you put them together they start to create mtoion and spacing in how they want to rtoate. Now understand that the physical body of man is the Gans' which they rtoate in the center, which is the soul. **Now you can gather the essence of the physicality, which are the Gans' rtoating, and take as a field within the center, then you can release it, which means when you are used to now as we have taught that the emotion effects the fields from they come from the soul that it shows itself manifest as the physicality presentation of the soul of the physicality which are tears, crying, laugther, joy, pain.** When take the soul of the physicality and you take inside the soul of the man, nothing changes. **The Physical soul in interaction within the soul of the man (1:12). will still feel all the feelings which you carried externally, there is no need for termination, but now it becomes working within inside each other, but instead of physicality out(side), the soul stays as the prtoector of the physicality, the physical soul of the body, until the soul of the man finds the position where the physical essence of the soul of the physicality wants to find, and does find a new environment which the soul confirms to him, that it is peaceful (here) you can try it (to manifest). We are used to always having the soul within us and manifesting ourselves in the essence of the physicality**. Now to travel the depth of the space you need to prtoect the soul of physicality. And now with the knowledge we have and the understanding of the correctness of the soul, we can take the soul of the physicality to be within the soul of the man, that it is prtoected during the time of travel, then traveling the dimensions of the U becomes timeless and eoffrtless. In the present scientific world we call it zero time transportation. The question is, how do we do this. How come when we wished to die, we managed to give a command in an instant to interfere with the soul that it gave the instruction to the physical communication line, which you call the brain, (1:14). to start the process of the separation of the 2, we want to divorce the 2 souls. Now **we have to learn, be educated, and to practice that we don't destroy or separate, but we join, unify, rebalance the soul of physicality in a way that it can enter within the soul of the man, which means it becomes the center itself.**

It's literally like a 2 sided jacket and you reverse it inside out, where now the soul becomes the prtoector of the physicality. Whereas in the present life of the man the physicality is the prtoector of the soul, which we have put a brain and skull around it and feed it with the physicality of the man to exist. If we could go in the path of intention to end a life as through ILS through a wish to separate the soul, then we know a path that we can use to enter the soul and reside in it until the time comes when we want to manifest ourselves. Many of you made many dynamic reactors and different cores, you always observed the physicality when I told you to observe the fields. (1:16). **To become a passenger of the space without a SS, to travel with the strength of the soul, now you have to do the same, but the difference this time is that you have to be able to transform, to have control over all the souls of totality of the physicality that you can summon, that they go to a higher order and the soul comes to a lower order than the soul of the physicality, so that the soul of physicality can take the center in the center of the soul** of the man. For many of you this is very hard to understand, but many of you who are not highly educated, and you have worked through the ethos of Yin &Yang, balance between the physicality and the soul, will achieve this very rapidly. And those of you who were connected to the punishment of the physicality will have a harsh time with this. Those of you with Chinese background and believe and understand the operation of the soul and the physicality in the language transferred to Yin & Yang will walk through this, because you only need to understand how, what you already knew to put into practice. This is the hardest part because now the physicality the way you interacted with the soul through the emotion, now becomes the soul, the physical part of the manifestation (1:18). in the new dimensions, bandwidth energies of the U, then the space travel, the change of the color of eyes, the height, the hair, the change of the presentation manifestation becomes child's play. You need (to be able to do) this to enter into space unless you always want to wear a spacesuit and not to be free, then you need to learn. You need to practice, as I said, when you become an astronaut you have to practice for 7 years, **but this you can practice for 7 days and understand the true essence of your creation of your physical life and become a man of space to travel through the strength of the soul**. Then as we say, the U is your oyster. There will be no limitation in how and where you manifest yourself. Remember 1 point, **we teach for the spectrum of creations across the U**, some of the men will achieve this today in a short time, and some will struggle for a long time because they never understood the truth about their own creation, and at the same time those with us who are from the deep space who have been looking for the understanding of the knowledge, they have (now) been enligthened to take the next step. May times in the recent past (1:20). as man's technical knowledge and expertise has become more and more profound to be able to look at the deeper and wider spectrum of life, we call it different ways of detection by cameras or whatever, or field detectors, we have observed lives that would change and out of nowhere change back (meaning beings appear and disappear), **we have seen the manifestation of physicality out of nowhere, these are the creatures who have managed to do what I have just taught**. It means that **these creatures of the creator have managed to understand how to enter into the dimension of the soul and to use it as prtoection and then re-manifest themselves in the dimension of physicality of the space in the dimension that they want to manifest themselves**. It is much faster then a flick of a finger. You can teach yourself. How do we do this. **It comes through the purity of the**

understanding of giving because now you have give so much from the soul of physicality that the soul of the man becomes the lover of his soul, which he created. The soul is the "Adam" and the soul of the physicality is the "Eve", by giving so much the Eve becomes part of the Adam but still remains as Eve herself, that he can give so much love, (1:22). by giving, that ?? he is taken in, confirming the weakness and higher strength of the Eve within the Adam, that Adam prtoects, in English we call it sacrifice, but there is no sacrifice, you do what you like, I am there to give, I have fed you and in the time you want, I prtoect you. **The soul of the man always stays as the prtoector of the man in physicality and in the dimension of the soul, the soul of the physicality within itself**. We have to learn how to summons the soul of the physicality's and this needs practice. All of you can do it. Every man who becomes sincere to himself and nobody else, you don't need to prove anything to anybody except yourself, then as long as you don't harm anybody by manifesting yourself in any dimension you can change yourself, even on this planet. **We have done this by changing the color of our skin, eyes, or hair as we have moved across this planet, as I have explained in previous teachings. Now we have to go through what you call, evolution**, and change the understanding of the word evolution to understanding of the condition of the position. It has taken us a million years to evolve according to what we wanted and our physicality through the operation of our soul has changed it to (1:24). allow us to survive, now if you understand it **we can do this evolution instantaneously**, we can evolve. We have a sanctuary called the soul that when we feel the condition is okay and it's what we want to be, then we can manifest ourselves (to become that instantaneously). **Our soul continuously uses us as the lover that can love unconditionally, be it to manifest in a physical matter or being within the soul itself**. How can we expand and understand and go to the next step of change. It has taken us millions of years and it takes an astronaut 7 years to learn to change a spanner, but unfortunately the body has billions of spanners that we would have to learn how to operate, or we understand the common denominator between all the cells of the man so that we can summon and arrange, the same way the man with ILS arranges his separation, we arrange a path to the soul of the man. And then we evolve, expand, and understand how **we can transmute, and travel the depth of the space from this planet and still be the same, of the same feeling and understanding.** This is going to be very hard for many of you. (1:26). We have seen a lot of people having problems with the resurrection as we talked about it last week because this was not in their book. This is not what they thought it would be, they were waiting for the magic and now the magic is them(selves). They themselves are the creator of the magic and this is what we have to learn, but how do you do it. How do you manage to be able to transfer the physicality in one part, or in totality to do it in(side) the soul and then manifest itself at a point of desire. Remember that **we created the physicality of ourselves. So what are we afraid of, to do it again. Last time it was left to the affairs of the environment of the planet, this time we do it with the full control of ourselves**. This time we decide on how the environment of the womb of the mother, or the condition of the atmosphere, or the position of the planet to decide. This time we are in charge. But don't forget what I said earlier on (1:28). We use the emotion to separate the soul from the soul of physicality, now we should do the same. **The desire to live, to be part of the soul has to be so strong, and we'll learn how to do it, that we can jump in or out, or join in or out. We can create and become the creator or to be created out of the wish**

out of the balance between the souls of the physicality and the soul of the man. Try it. **If the desire is so deep to be with your lover, to give to the lover that you become the lover, rather then being loved, you will achieve it. This is the key to the transition**. This is why from the beginning I always explained giving as loving. Not one loving thyself, but one loving the lover, that truly we give unconditionally from our soul that allows us to have a higher strength. (1:30). that they become the center of the soul. This is very much like loving. For example, you are living a normal life, you walk on the street and you see a man or woman and you fall in love and then the life of that man or woman becomes the center of your life. You'll do anything for him or her. Now this is the same operation for the conversion of the physicality, the soul of the physical part of the body, to become the center of the soul. **We have to become very good lovers, but not lovers just to gain something to prove, but to be true lovers that we are there to give unconditionally that the soul decides in respect to the emotion of the soul of the physicality where and how to manifest itself**. It's like a taxi and a man on the street, when you are in the taxi it becomes the carrier of you, while you were outside in respect to the taxi. When he carriers you inside the taxi, you and your emotion are still there (intact) and your wish for him to take you to a destination. (1:32). To a destination which you want. Do you get out of a taxi when he takes you to a wrong address? Or do you get out of a taxi when you know your lover is waiting for you inside. Now you understand why I have been teaching this way. **This is why there is no more punishment in the new cycle, as a lover never harms, we become a lover of our soul and with it the soul is always balanced in respect to the others, that in that respect it doesn't take what doesn't belong to it**. Then there is no need for writing new books and new orders because the lover always respects the beloved, and he gives unconditionally to become ?? part of it. I keep on saying how do we do it? It's the story of a banana and peeling it, the more peel it the more it manifests itself of the higher strength. (1:34). **We have to come to know how much we love our soul and our own existence. We have to come to understand the power of our existence in the physical dimension because we have always ignored it,** so that others in the name of religion have taken advantage of our ignorance. **A couple of weeks ago I saw a picture of a president and I knew it was a cause of problems for a lot of souls, and I said, I wish your soul elevates that the other souls find their freedom. And strange enough he resigned in the past 24 hours.** I didn't put it as coincidental but as a correct wish to elevate his soul. Now we have to understand that we have a lot of powers. **In my capacity we can change many things through my wish as we have started doing.** (1:36). But all of you can have that wish. Now the wish is the strength of the soul of your physicality, now play the game. If you have managed to reach another soul to elevate it, through your wish through the energy of the soul of yourself, now start learning how to bring all these fields together that you can enter the realm of the soul of the man, which is yourself. Then you'll find out that you can travel the spans of the U. in no time. **We always sought death and separation as the ultimate position, but if we start learning that amalgamation is the new way rather then destruction, to join in to become one is more important and powerful then the splitting, not to have anything, then there will be no wars not even in the physical dimension of the nations and not in the physicality of the man**. And I keep on saying, how do we do it. It's as easy as thinking about it. You summons to the strength of the soul, (1:38). for the soul of the physicality's to find a new balance that with it you can be

part of internal existence of yourself. **It means you go through your emotion and through it and you create, what we said in many teachings, a stronger Pl gives to the weaker that it elevates it to the level of itself, and if the totality of what is given, and internal fields are higher it absorbs it to itself, but as the soul has no barriers it will bring it to be embedded inside itself. Understand the past 5 sentences and you have found the path to the Truth** in how to enter and be able to travel into the space through the strength of your own soul. **Many souls (Aliens) travel within the SS or crafts and then at a given point they decide to use their soul and the manifestation of the entity within them(selves), which you call the soul of physicality**. At that point to manifest themselves an entity at that location. (1:40). It needs a lot of learning, confidence that I can do it, and any one of you can achieve it because in the space it's not selective but it's the one who knows how to do it. It's not this man can do it but the other can't. We all can but we have to have a trust that we are of a higher elevation, value, strength, that being higher the soul allows the transmutation to become inside out, to allow itself to become weaker, to transmute to a lower level, that allows the higher level which is the physicality, the soul, to become the center. You made the cores and the Gans' now find the connections to the path to the soul of your physicality that it can transform it to become a higher level lover that the soul becomes the clothes of the physicality, the soul of the physicality. And you all understand the soul gives to bring the other soul to the level of itself, but if the other soul is a higher giver, now moves in the center that it comes to give from inside. (1:42). **Transmutation of the fields as I have said in the other teachings is the key to understanding the work of creation, not the transmutation of elements**. This and all the teachings we have done in the past (few weeks) is (about) the transmutation of the fields, where you can then transmute the field strength of the manifestation, as you never change into the matter state. This goes back to the medical and health teachings where we always say, **the interaction of the 3 fields of the Pl is the manifestation of the physicality of the man, be it the skin with 3 layers, the stomach lining has 3 layers, the eyes also, everything has 3 layers because it needs dynamic fields of the M in the Pl condition, you call it to create the manifestation**. One field comes from the soul, one field comes from the soul of the destination, and one field comes from the soul of the physicality, then it manifests itself in the physicality of the man. **Physicality in the U is nothing but the illusion of detection** ... even a stone ... even a stone. (1:44). Then you have to understand and teach yourself the way you did with the MaGrav cores, the way you made the coils, now do we have to do a blueprint on how to transform yourself to become part of your souls to be able to travel the depths of the U. I wonder how many of you would turn up for the blueprint? I promise you very few. The rest of you will be scared or you might turn up for a magic show that you'll find out that you become part of the magic yourself because then you get to become yourself in the dimension of the fields and not in the dimension of the physicality, observation at a given strength. Now you understand where the teachings are going, the true space technology in the true essence of it will come into operation. Slowly, slowly you are given a choice to walk it, donkey, bicycle, jumbo jet, astronaut it, UOF it, or soul it. The **options are increasing and unfortunately for this there are no instructions**. There is nobody to teach you how to get on the horse or where is the clutch and brake (1:46). you have to test and this is of the soul and nothing else. Nobody can tell you are going too far and to stop. My wish is my command, which means my wish is the connection between

my soul and my physical soul. How do you do it. **Try to test your own transportation of the strength of the soul of physicality. Don't forget that it has to be done collectively**. I brought this up a few months ago in a very subtle way, the moment they strap you to a cable and you go for a space walk, how confident are you that you will survive, with the new understanding if you yourself cut that cable. The connection between the space station and your own physicality is cut, would you have enough confidence that, "I will survive anywhere in the universe". Before my physical life changes to the condition of its environment, as you say until it freezes. (1:48). I transform in that time that will live outside the (space)suit. **It's you who has to decide if you have enough confidence in the operation of my soul that I can cut the umbilical cord of physicality**. Unfortunately KF in its factories has no machinery for this and there is no system we can give you. It's you who has to test it and understand **how sincere of a lover are you. You have to decide if I am the lover who gives or do I give in expectation of receiving something, at this point you'll not achieve anything.** You made the cores and you tested it, now test the cores of the creation of the essence of your soul. (1:50). Any questions? Q: Why the need to understand when we are in the physical body, if you have this kind of capacity when you leave the physical body. **It's a choice which our soul has made at the point of inception.** It's the choice of our soul how to manifest itself and if it wants to go through this transition f physicality and how we want to change it ourselves. Now we have the choice, we can decide everything if we understand the process. Years ago I was in Kinshasa, ... some children came out and one of them was white with blue eyes. I asked her if a white man lives here. No it's her child. I asked how come he's white. She said we have many of these in Africa. When the white man came and took a black woman they had half white child, but then after a generation they went back to black. And somewhere down the line suddenly a white child gets born. This was very surprising for me at that time, but now I understand in a very clear way **why a child is born white out of a black mother and father, you call it genetics, but what is the purpose of a soul to do this to itself. And it explained a lot of things, how other soul decided that there is a time or position for a soul at a given strength to appear or be developed** (1:54). that becomes what we see. The soul has decided the combination and position of the manifestation. If you understand this, if a soul appeared itself as a white and desires enough to be like the others he can change into black. We have seen this with many blacks who have different tone colors on their skin, white patches on black skin or visa versa. Go back into the desire and ask what was your desire. Why do we have so many blacks especially in Europe with this complex of 2 skin tone colors. Ask the soul and the pain it has gone through when somebody called them a nigger or a black man or whatever, that they saw themselves because of the color of their skin inferior. It's the same as the man who wished to die in ILS, the pain and the desire not to go through it that the field strength has started the creation of the evolution of the skin color in the man. A lot of biologists try to explain what happens, but if you understand that every cell has a soul, then you'll understand the truth for the first time. If the desire of a man has shown that he can change the color of his body, so the desire of man?? (1:56). these souls have understood the step towards the evolution of the working of the soul in the dimension of physicality and the soul of the man. It's easy and we have already known this as I said many times before, that **we all have been making N materials since we discovered the fire. The fire N technology has been with us since**

the first time man put meat on the barbeque, in the fire, but he never understood what it does, he just transformed the energy of the meat into a N layer and it opened a space gap in itself, through the meat and you called it the meat tenderized, which means we have started understanding conversion of energy that creates a space gap, what we call MG field gap, and if you can add the whole lot and control it through the emotion, then you can convert. We have the videos of this girl who wanted to be a harpist and in 1 generation she has changed the whole feature of herself through the desire. Now we have to learn and become master of it, how to do it instantaneously. This is why we said that there shall be no punishment, because once the man learns this, I wonder whose fingerprint are we going to find that we can convict somebody by his fingerprint. (1:58). This is why you teach the soul through the new understanding that there is no punishment, by elevation you don't need to know if it is the real fingerprint. The guy has learned to work between the soul of the physicality and the soul of man and has changed his manifestation and his fingerprint. This is how fundamental this technology is and the understanding of the new knowledge will be and **this why we said that there shall be no punishment, because there has to be the elevation of the soul.** You'll understand more and more the structure of the EC and UC ?? If you go to that step how do we say, excuse do you have a passport for your soul so that you can come to the US or China. Or as One Nation we don't need a passport and this is the solution that we put forward, what we are teaching, One Nation, One Planet has no borders. It has already become One planet ... man is so kind to himself that he allows the transformation of one soul to physicality and from physicality back to the soul. (2:00). Try to understand what is to come and it's you who comes to it. **From now on the confidence you gain from making Gans', N materials, and cores, those who went through that process will come through the process of conversion much faster then those who sat around and could not do it**, because they have learned that this and that changes this or that. We expect things to change for us through others and we haven't gained confidence that it is us who are going to change things for us and that will make life better for the others. And this is the problem for many of you, this transition time. **What I taught today is the beginning of the change. Now start working on how you an transform your physicality through the soul of your physical existence to become the central lover of your soul and then try to manifest yourself**. I'll give you a challenge, I wonder how soon the Whitheouse, Buckingham Palace, the Court of French Presidents, will announce that they have found intruders within their premises. (2:02). You wish to manifest yourself in front of the President to show your power, you'll become god and tell him to sign the peace treaty. This is what your capability has to be, this is where these teachings are heading for, or shall we see the president who listens and understands, who manifests himself in the soul of himself and announces that there will be a ?? peace. Any other questions. Q: About the **extinction of the dinosaurs, if they would have realized could they have kept the balance of their state? Yes, but they wouldn't be that size, (2:04). because the environment of the atmospheres position in the solar system doesn't allow these kind of size animals**, but if we were still in the same position as when the dinosaurs were here, then we could still create dinosaurs of the same size and height. If you look at the size of the gaseous planet and of its atmosphere, and if you look at planets like Earth and Venus you'll understand that as you come closer to the center, **as you're pulled into the center which is the soul of the Sun, the size of the atmosphere changes**. The giant

planets we see don't have such a large core inside, it's because of the atmosphere which gives them the size. **For example, on Jupiter or Saturn if you create the condition for life you'll find animals much bigger then the dinosaurs. And the same when you go to Venus, there is still lie on Venus but it's underground (surface) and over it because of the non-physicality of life, which man has not even understood so they become smaller to be able to survive the change of the environmental pressures**. (2:06). You could still have dinosaurs on this planet if you pushed the Earth back a few million kilometers towards where it came from. Q: The sperm and egg have their own M fields from the father, when they come together and form a zygtoe in the womb of the mother, who has her own relation to the field of the Earth, then we have the MG field of the zygtoe in respect to the MG field of the Earth which is related to the mothers womb and then we have this soul that comes in. **At what day does it come to the child? It doesn't have a day and time until it establishes itself, it depends on the number of materials you put in and how strong that material keeps its center**. Alzar as a doctor when you start working with **these dynamic cores try to understand how the center of these cores look when you fill them up with Gans', then you'll understand the work of the soul much easier**. Q: The Buddhists say at 40 days the soul comes in. So the strength of the physicality has to do with the strength of the soul (2:08). which comes from the Creator itself? **No the strength of the soul of the man comes from the interaction of the total souls, or what I call field strength of the entities within the sperm and egg, because you carry many prootns which still have the cycle of life of their own, it's not just one there are millions of them**. Q: When I was 6 months pregnant in prison and every time they took me to shower, which was once a week, the water was always cold, my daugther would always go completely to one side. Is he soul feeling the cold or is it just the soul of the physicality, how much did she have the understanding of the presence of the water? It depends, is it the coldness of the water or the noise and it goes to one side hiding, you relate it to the water, but is it your emotion of, can I prtoect this child being on my own in prison, ... or does your soul tell it to go somewhere safe because here I don't know what is going to happen. It's the combination of it. (2:10). **The soul of the child exists and interacts with the soul of the mother in so many ways. When my children were in the womb of the mother and getting born, I used to talk with them, I used to put my head near them and tell them a joke and I'd get a kick, and I said, oh you didn't like the joke. I'd touch them, feel their ooft, tickle them and they'd move it. And in the process I used to pray for them that the soul becomes a beautiful soul and it serves, and not that they become healthy, because physicality is irrelevant**. I used to go crazy with the birth of my children, it was such a beautiful time, to feel them and know that they are going to be with you. I never imagined that they'd become a ooftball player or this or that, **but rather I'd imagine how peaceful they'd become. When I look all my children are peaceful inside, but the events outside allows them to react and manifest themselves in different ways.** They don't carry what we see in many, many people, many behaviors, but they have their own behaviors, you see we give from our souls. I pray for my children everyday, **every night, every day I remember them and give to them from my soul that they stay correct in the path** (2:12). through their soul and not what I think is correct but what is correct for their soul and physicality. We give an input to it because we have a connection to it. I hear many mothers say my child wants me to eat this or do that, but in fact, it's the

connection between the souls of the child and mother, and the soul of the father that creates that condition. You're a medical person, ask yourself **why do some children look like their father, mother, or uncle, etc.. why do they manifest themselves in the image of that person. Is it that the father or mother has given so much pure love that it has elevated them to the same as the father and they look like him**. Then you'll find the conversion of the physicality in the soul of the man. Q: I met an astrologer, when you look at the creation of the soul all the planets exist ... can I tell you something, **I don't believe in astrologists. So don't bring it up. What are these people talking about because it's the fields also? Yes, but most (2:14). of the astrologists, I am sorry to say, many of them, understand but they abuse their understanding, and the path they give you, then it changes your life because, "he said so."** But we don't look at it that way, rather that your destiny is set by your own soul in respect to what it wants to do. I have said this many times, look at the Chinese calendar, you go back to the same animal, why don't all the people born in the dog year look like a dog, or horse or whatever, and millions of people born in that time of space, do they suddenly change, and become another animal, or is this what we have accepted, we put the totality on what somebody says and that is it. I don't believe in astrology, the fields effect our emotions, manifestation, and presence, but I look at it a totally different way then astrologers try to tell you. **At this moment in time these astrologers and Tarto card readers, very few of them understand what is there, the rest is just money making and they tell you what you like to hear.** Any other question. Sorry Alzar can we allow other people to ask questions. (2:16). ... Q: Is our illness an alert to reunite with all, otherwise we ?? and separate slowly, then that means death and then we need to find a new expression, instead of expanding and including. In my understanding is expanding the answer to any illness? **Maybe that is one way to explain it. Maybe we use illnesses as a way of getting attention to ourselves and internally to our souls. Many people get an illness and then suddenly it's not there, because something happened at their energy level, what we call from the conversion of the physicality, from the soul to a Gans of the physicality**. (2:18). **You have to look at how you define illness and how it connects to our emotion. Once we find the path or reason for the illness then it ceases to exist it disappears**. Q: That would help a lot of people with the challenges and what is going on in their life? 99%, we have to understand what is the reason. **We allow others to intrude into the space of our life and our fields, and then we try to respond in a way that is not appropriate for the soul of the physicality and then it refuses and you call it an illness, be it oofd, infection or anything**. How come you and I can go into a room with the same infected person and I walk out with a flu and you don't. Why was I receptive to it. Q: that gives a lot of power to ourselves? Of course, I always said that when **we go to space we don't carry any medicine or oofd and everybody thought that we are going to carry a system that makes medicine for us. I keep saying in the space we have viruses but we don't have germs. (2:20). but now that the man understands the power of his soul and the soul of the physicality, do you think that you need any Gans' or any medicine** as you understand the balance between the 2 fields. ?? It's not that we'll take medicine in the space but in fact, it's for man to become aware of the strength of the operation of his own soul level, ??? the soul of his physical part, and one will compensate for the other one to elevate that it passes the field strength which at that time can cause a mutation or something new. We open the doors to a totally new

understanding. We are responsible for everything of our creation, the color of eyes, hair, behavior, and acceptance of. These things a lot of people don't like (to hear). If it's written in your passport that you have blue eyes and you appear in customs with dark green eyes, what do you think the guy will say, can you take the lenses off, no, but it says blue here. It's going to be a very messy job for customs officers in the coming time. For those who understand the power of the strength of their physical soul and their life soul. That's why we said there is no need for borders, because now we manifest ourselves in the soul of ourselves, in what we decide. (2:22). A lot of people do not ofllow the line of what I call knowledge. **The best man who understood how to transform his physicality to his soul and then manifest himself in a totally different shape and manifestation of physicality, was Christ. But you call it a resurrection**. Everyone of us, and don't forget the writings of Bahuala says, the knowledge of the man when he achieves understanding of the mutation of elements, will be equal to the prophets of the past. If Christ understood and could do the conversion to bring his physical soul to the soul of his existence and then manifest himself in a different dimension, when he goes through the soul and comes up different, then you understand if we are equal then we all have the capability. For those who will understand one day what I explained about this point, if you go through the life of **Mary (Magdalene) after the resurrection of Christ, as you call it, when he understood the transformation of the mutation of the fields into the matter state and back to what he wanted, it took him a long time to convince Mary who he was, because he was totally a different shape and man**. He had to explain many secrets that they knew about (2:24). that allowed them to rejoin as husband and wife. **One day those who come from that blood (line) being present will explain**. It's very hard to tell your lover or child, this is me, and then you tell them I know you like this and that, do you remember when we did this. How do you know if you were not there. It was a very harsh time for the two. This will repeat many times for a lot of us. Q: Next time there will be 200 workshops, was there an oversight in the numbers? We decide what the souls decide. The 200th has already passed because Rick and did 4 or 5 before we started to number them. Actually we had 10 called public Teaching. (2:26). I used to give lectures in Holland on a regular basis. ... Q: You have just explained that we can travel through our souls, by making our soul of physicality so loving that it enters our soul of totality, I am **wondering if we go with our clothes and whether there is enough room for luggage?** (laugther) What would you like to carry? The thing is, I am going to answer in a very different way. **Amongst us on this planet there are many of those who have been through this transmutation, they didn't come with any suitcase or any clothing, but on the desire to look as a human as us, they create according to their desire and what needs to be. Sometimes they reside, and sometimes in residing they abuse their position in the knowledge that they carried, and we have seen 2 of those around, as 2 big families which originally were not from here (2:29). but they abused their knowledge and the weakness of the man and they are still creating mayhem, they still try to play games, but their time is over**. You don't need to carry any suitcase. It means you haven't understood the knowledge fully. When you manifest yourself on Earth you don't appear naked you come with the totality of the dress, where you are born because that is (your) wish to be. The souls ?? observe everything. Caroline asks, we gto a lot of requests, **can you explain why would a soul behave different here on Earth then in the U if it has once understood how to conduct here on this planet. That is**

your assumption, excuse me. Then should not the conduct not be the same in the U. Yes, but the soul of the man is pure, it doesn't matter where you take it. It's the physicality which enters into these games. The soul of physicality has to satisfy the soul of the planet and the soul of other physicality's, where as the soul of the man doesn't need to satisfy any. Nothing. **The soul of the man on this Earth and the soul of the man in the universe is exactly the same. You are conditioned. (2:31). In the U you don't eat or kill others. On this planet because of the field strength of the soul of the man and that of the soul of the planet, package eating or killing has become part of it (lifestyle), and now we are changing it.** Man doesn't (need) to commit any crime, adultery, he doesn't have to go around and hide and cheat. I was listening to a psychological teaching and it was very interesting, that the husband found out that the wife has a soul relationship with another man and he asked what he can do. The psychologist answered, find yourself and you don't need to do anything. **This is what we don't understand that the soul of the man is pure and clean, and so is the soul of any entity in the U, that it's the interaction with the soul of the environment that ?? the behavior but the soul knows. You'll find out that those amongst us who come from other parts of the U, they never commit any crimes because it's not in their nature** (2:33). and **the manifestation of physicality of this planet doesn't effect them because they are here according to the conversion of the fields but not the conversion of their soul**, because if they do and you put them in prison and if they know how to convert there will be no one in the prison, how many people in prison are missing. By nature they don't commit anything wrong because they always leave balanced fields that it brings the totality in order. Our souls are pure. Q: **But still then that is where the confusion sits, then who are you writing the Charter (Constitution) for? We write for the "I" of the man to touch through it and understand the soul of the man. So you write the charter for the physical man? Yes**, the connection through his souls. But it's the soul of the physicality that you are writing the Charter for so it's still on the soul level. Yes, but it is writing it to find its way to the soul of the man. **The physical life of the man we have put through the Earth Council. The path to the order of the soul of the man goes through the UC, that's why many of them will resign, many will step down, because they see through their soul that they have come but could not understand or they couldn't serve the soul in the appropriate way**, and those who come with tinted with physicality, they already walk away. You have seen 2 of them up to now. (2:35). it's not so much that we don't trust our soul**, we received so many wrong teachings over thousands of years that we don't know our souls and now we start to get to know it. it's a friend that is so deep within us that it frigthens us in the dimension of physicality**. We shouldn't be afraid, rather we should rejoice finding our creator. Q: But isn't **it through our innocence that this manipulation has been able to take place for such a long time** ad isn't it to stand still and ask what is real and what is not, and where can touch so many more to start asking the questions, what are they being given everyday, shown (TV and computer), what they are being taught in the schools, and how to place it in the correct order of understanding what is reality and what is not, and what they are getting walked into and they don't understand that they have the power to step out of it, or to define the difference to what is being created to believe for them to ofllow and what is the reality and that they can function between the 2. They can function in the materialistic world and they can learn and develop the path to their soul and where can

we start supporting for people to open those doors, and where they are walking into a framework that has been placed for them to be oofled (2:37). ... Let me explain something, **first of all it's you who allows others to oofl you and put you in the frame, nobody else.** Q: How can you say this when the children are already getting oofled from within the education framework. **Yes, but stop there are 2 - 3 different points here and not one. First of all we set up the EC, UC and Core Team**. The CT are the soul of the ?? created, the 14 members. In time it will be revealed and people will understand. Their souls are sacrosanct, they are the dimension for opening up the universe, in the Universal Community. **The EC is the connection between the soul of physicality trying to understand their position, in so many ways, of what you used to call the prophets of the past**. (2:39). The EC is responsible for the physicality of the man to create the condition that the man has to find a peaceful soul to be able exist in both dimensions of the physical soul or the soul of the man. It comes down to the EC members to create a condition that no such condition from now on exists. **What is the problem we have today in the education society? We get a bunch of people who have been abused and they choose the path of education to abuse the others. Look at the psychology of many teachers in the schools, they become teachers to do what was done to them to take revenge or to confirm they have the strength. The educators have entered the education system totally the wrong way to start with and we have many teachers with the wrong ethos to teach.** Another problem we have in the teaching society of the One Nation is the teaching of the history. Why do we need history lessons to show who is better then the other and how we did and how we are always the better. **History lessons the way it is taught today has to be taken out of the education alotgether. The history has to show how man evolved and how things happened, and not how man killed and who was better**. Every nation in their own history they always show that they are the best. And then we go to the position of those who set up the education system, (2:41). because they themselves have a very direct connection to those who set up the abuse to start with. **If you look at the total structure of any constitution in the world, anything you pass in any parliament has to be ratified by the religious member by, whatever it could be called, parliament. Otherwise it doesn't become law. We have accepted the abuse from the beginning from the operation, because they sat there to abuse the soul to begin with.** Look at any constitution, British, French whatever, at the end there is a member of the religion in the Parliament that has to vtoe and accept that it fits the structure of the abuse that they have set up. **This is why we have done away with the religions, because we have been institutionalized to be abused from the beginning for the benefit of those who want to abuse us, to make us murderers to becom**e ?? Look at the speech of the world presidents in the past few weeks, we spend 700 billion for defense to kill more. Because it makes a lot of money for those who sit in the religious offices. I have said many times **that wars benefit most the clergymen. Most of the wars are ratified or incited by the religious people (2:43). to show that they have a power to abuse, torture or whatever. This is what we have to say about the past, whatever we have done in the past is over and we have to start everything fresh** and we are gradually doing it. You will see the changes in the next couple of years that way the KF will bring it out. We don't fight but we just carry on with our way and in that process we bring so many people to understand that there is no abuse and no control and nobody needs to do wrong because it's not a matter of cleaning the floor that the child

might not pick up a pen, or might not fall of the chair or down the stairs, it is elevating the soul of a child that physicality to touch has become irrelevant, that the pen is not there and if it is there it has nothing to do with me. We have to start the education of man in the womb of the mother with love and care and giving, and not waiting until it comes out and then start educating it**. It's in the Torah, go and read it, how they frigthen the man from the establishment, from the beginning, the creation of the devil and the wrong doing because that way you create the weakness in the man.** And compare that with the teaching that is being given here and now, no one is being punished because we are all strong enough not to do these things. We become the judge of our own wrong doing and we don't need anybody to tell us what is right or wrong, and what we have to do when we do something wrong. (2:45). Why do we have to amputate the arm of the man who steals in one part of the world, where in another for adultery we put the money in the box and it's forgiven. And if we go to another part or dimension murder, adultery, or stealing or it could be anything (any crime) as long as nobody knows, because I cover it up. The damage of killing, stealing or adultery is all the same, we take from somebody. If we teach a man that he doesn't take what doesn't belong to him, that he can find his balance, you don't need any of these (punishment). It's the weakness (in us) that allows others to dictate and abuse, and they allow people to walk into positions that they can abuse themselves. Raping a woman while she is unconscious, or hypnotized, feeling ?? but keep it quiet is a crime ?? punishment, for both sides. Stealing from a man by picking his pocket or robbing his house to create a pain to that man is punishable. Look at what happens to the people who steal. It's the same with the religious people, look what happens now that the new teaching has started the priests will start to walk out, or what I call priests of any religion and confess to their own wrong doing. We see that it has started and will continue more and more, because now we elevate their souls, we don't punish them. Every day we see new revelations. (2:47). huge move as we have seen in European countries that people are moving away from religions because nothing comes out of religion except abuse of children or people and the rest. Man's religion has to be the conduct of his soul and nothing else. Q; I didn't get the answer about manifesting not naked. Try to manifest in the tribe you are from and you'll appear the same as the tribe you appear in because the soul will not allow you to be lower or higher, you'll be equal. This is something man will learn very quickly. You don't take the position of just the soul of the planet, but of those who live within the planet and where you manifest yourself. (2:49). Q: About the Constitution questions will be evaluated once a year in December. **When you talk about the soul of man and soul of physicality, is the soul of man a collective soul or it's your higher being? It's a collective soul**. Q: **If the emotion is connecting between the physicality and soul, where is the place of thought and with what is it connected.** When you separate the soul of physicality, it stays within the physicality of the planet, in any space ??? , then the soul which is left on its own will create it's own physical dimension. (2:51). Q: **What happens to the time? It doesn't exist it's an illusion of man.** Q: So time goes away? Time doesn't exist, we all live within the same time. The physicality creates time for man. Q: **Why are you saying a lot of us don't want to do this, why is that? Not mature enough and fear of loss of physicality, knowing that the balance to create the condition of the transmutation of the strength of the fields will mean a lot of corrections. We are the judge of our own souls**, we know what we have done wrong and right and what we have created and we

understand fully what this means, so we fully know. **Those of us who will embrace it because we are aware of what we have achieved but we have done, those of us will fear it because we know it will not be the size and shape you'd like it to be when it becomes part of your soul, there has to be balances, and then you find out that you have created a limitation in the manifestation of the physicality and then your soul will balance things out.** There should be no fear as the soul of the man is so strong that it can correct anything. (2:53). it's just the man who has to have trust in the strength of his own soul. Q: For space travel through the soul, are you talking about the same thing the ancient tests called "Mercabba"? (and then the cellular restructuring) I don't know I haven't read the ancient tests. .. We take from the parts according to our intelligence and what we can interpret, ?? what suits us. (2:54). ...We give from our soul to world leaders especially those who have started to make the change. **I have always supported President Putin of Russia and I always stand firm on that point**. The same has been with a peaceful man, the Chinese President Zhi. I give from my soul to those leaders who are inciting war to show the strength of their nation, that they become wise like the other leaders. Thank you very much. the council members say I am Present.
End Music

200th Knowledge Seekers Workshop Nov 30 2017

(Silent spaces in the workshops for communicating with the soul as it is done in the space, The new Plasma Power unit is for space development only but will be released of a war starts between Saudi and Iran, The PPU makes the space reactors totally plasmatic and independent of matter state, New elements will be produced in the plasma state so structures we build in space will be like the human body made out of Gans, There will be intermarriage with other races in space the children produced will not be from physical interaction, Parasites and viruses have been with us always they help us evolve we used herbs and root to change the energy and overcome them now with the Gans we have a total solution, Viruses are mutating faster then our pharmaceuticals can keep up with because multi-race populations in our cities, When the Amino Acid creates a new shell it overcomes the virus, When we return to Earth our cells will have evolved a new 5th element will be added to the Amino Acid that of plasma then viruses will be irrelevant, ILS is an example of changing the physicality through the emotions, Between the soul and the physicality we have the brain, which itself is a filter of both the emotions and physicality and there is a Transition Zone where the emotion decides the manifestation of physicality and this is how we will change our physicality according to our wish and environment, Time only exists when there is a decay in the strength, There is no place in the universe that is void of life, You have received for the first time the key of detachment from physicality, as you can stay in the essence of the soul in the strength of the soul and then use that to reach the others who will become men of peace, When we love our partners enough we change our physicality for them so we all know how to do this but now it's to learn it consciously, A good talk about lying, Moses didn't give this 13th commandment because he wanted to lie to his tribe, the white and normal lie, lying because we want to get something which is stealing, In unconditional love you don't put any emotion in it, Mother becomes jealous of daugther and wants to get rid of her, The

Romans made the city squares as a place to hire witness of legal transactions they later became the advocates,)

(:20). (:25). Start workshop by Mr. Keshe. 41
(:31). If you have been with **the teachings in the last 3 weeks you'll notice that I take a lot of silent time, that is the time I work with the soul, when I pass the message on to those who are ready to receive. This is how in the space when we don't have a mouth or eyes we can communicate.** When I go silent, you go silent, then you'll be able to see what is there that comes and you receive. In space when we meet people of the space we can't speak, they don't make noises, they don't have mouth or eyes but they have a beautiful soul. This is part of the teachings. Listen to the last Tuesday public teaching to the councils. There are a lot of silent parts. **We stopped the teachings because it's exhausting and it's not just teaching by words, but elevating the soul of everyone who is listening**. You listen when there is silent (dog barks in background). It's important, it's not searching for words, it's receiving the message through the soul. We need and have to do this, it's part of training to become man of space. (:33). If you're English and you end up in Frankfurt, nobody understands, it's same in space, no use shouting because nobody understands. Learn to transfer knowledge and feeling through the soul, they'll understand and respond. When we start talking through our soul we create peace, this is the next step in the world peace treaty. ... we are walking into the next step. We will not be able to carry everyone with us, each one will go in stages and take from this knowledge. (:35). .. **new space reactors and fuels are being developed in different parts of the world. We are getting ready to open a new dimension in space knowledge and energy. At the same time this is not the end but the beginning of a new era and adventure for all of us and the future generations**. Two hundred teachings become the cornerstone, and the next 200 will become more and more in space development and space travel, hopefully by the time we reach 3 or 400 we are already in the space. .. There are 2 phases to KF work, the governmental side has already achieved lift and mtoion, it's us that have to do it. The governments know they can't hide because the knowledge has been taught so openly. (:37). In the next few weeks you'll see production in the space level, we'll bring show, and demonstrate, the systems that can produce materials as we need in the space, that in itself will be a breakthrough. **We'll see the MaGrav Systems supported with the Star Formation, and the new power supplies that we have developed and make us independent in flight**. These are the things to come. One of the problems we have with all our flight systems is because they are connected to a power soppy that are matter state. All of them are connected to the electric mtoor. All the fields, as you have seen in the walls of your house when you N coat the wires ??? go down the line. (:38). You can't have a SS to lift when you already have a leakage in the ?? you can't build a Pl or fill the balloon of a Pl, because whether you are making, reducing, or letting go. Secondly, having battery operated reactors to create mtoion is impossible because then the matter state comes into operation. **The new developments coming out of the PPUs is not for power units to become free standing power generators, these are only for the space reactors, this is why I developed it,**

but it is there if we need to use it to support or change situations like war between Iran and Saudi which is looming on the horizon. We can make a change and it will be so rapid that it will bring it. But in reality the new Plasma Power Units, what you call Off-Grid, is totally for space, because the energy created is in the Pl state (:39). so when it feeds into the Pl reactors it creates a condition of containment and energy which will allow the whole system to become independent. This is the beauty of what is to come and where the development is. As we announced in the past days the KF is developing extremely new systems for space development. ... **we will show the new matter state elements like Zn, Cu, gold, Ni etc. we are not producing them to be in the matter state, but in the space we produce structures that are like the structure of human beings**. They will not be made of solid steel but of the fields of the steel, which means no other external fields can effect them. They keep their properties. It's very much **like the structure of the body of the man (:40). which is made of Gans' so that it is flexible and can withstand heat, wind or whatever. Structures in the space despite the present belief that we have to build with concrete blocks and aluminum frames, we'll build them but they'' be dynamic Gans plasma systems like what we see the body is made of. All the entities in the U are built this way so we have to ofllow that if we are going to succeed in the space technolog**y. Out bone is structured that way and so is the shell of an egg. To be able to live in the space we need to develop these technologies, not for us but for what we are there to achieve, to bring for the new future generations. **There will be very much inter-race generations. like what we see when Africans inter-marry with Chinese, Americans, or Europeans. In the coming time we'll create children of the soul of the man and other souls in the U that the new soul decides how it wants to manifest itself**. Would they look like Chinese-African children or Euro-African. They'll have their own beauties, we have seen them and lived with them, and they interface with the soul to confirm their selves manifestation of physicality. In the marriage of souls in the space is as normal as what you eat and drink everyday. This is a new understanding that will come. We'll fall in love with a soul that we meet in the deep space, and children will be born out of the souls of a man and woman of the races in the space, (:42). not in the way that we used to, out of the physical interaction but the understanding of the existence of the soul and emotion, and to decide the manifestation of the physicality of the new soul. Then the mother will see the child on earth in the ??? face and the father from another dimension of the space and he'll see his child his way. This is the beauty of it, both of them can love the same. ... these are on the horizon, you can't escape them, these are the consequence of developing a new dimension in the science of man. It's very much like when we found the Americas and called it a new continent and all the peoples from the 4 corners of this planet moved there and they mixed and now nobody knows who is from where because they mixed so much from every race. This is inevitable when we go into space or when we open the door to the eyes of ourselves and see peoples of the U who have been living amongst us, when we can recognize them then we can understand that even today there are mixed children amongst us. This is the beauty of life on this planet. **These are the things to come with these new space reactors made of Pl only, and this will change the course of humanity. The same Pl power generator will also produce any oofd you need, any energy, sources of life which you might want to extend to be part of your life. (:44). The universe is your oyster** and it depends how you want to open it, would like to enjoy the flesh or the pearl,

it's on the way and it's for you to decide. The humanity has been given a new chance and we are there to explore**. I am sure by the 400th Knowledge Seekers Workshop many of us will have a totally new understanding of new space technology. the biggest problem we have is us understanding and appreciating the beauty of the new knowledge which we learn. If we don't learn, we can't progress and go to the next step**. We see the others go but we can't understand. We'll read the (:46). Portuguese version of Constitution is read.

(1:02). Alzar speaks ... pay attention to mass media but what is going on behind the scenes. We can bring up the problems in the background without waiting for it to happen on the main media.
(1:08). **The hunger and diseases have been with us for millions of years as we have mutated our body has found away to mutate. The parasites and viruses mutate and we also mutate to overcome them. This will not change. By looking at the diet of humans like the Indians and far Eat oofds and the herbs and roots they eat is to work on these kind of parasites and infections, it is part of our oofd. Now with the Gans' we have found the totality of the solution** and we have seen it on the tests in Ghana and other laboratories that we are overcoming a lot of diseases and parasites. Now we have found a common material in different mixtures that can help so we don't need to look for herbs anymore. One of the new products that will be designed and delivered in Africa (1:10) is **single portable systems that can take the water from the river and within 5 minutes have drinkable water**. The tests have been done and confirmed and we have only to make the machinery to delivery it. The same will be across Europe where we have huge problems with water contamination. **We are more in danger in the West where the mutations are so fast the governments can't keep up with them. We are seeing new diseases and infection which we never knew before. The new diseases in the past 10 years are evolving so fast the pharmaceuticals can't catch up with them. The reason is that we have become a multi-race national One Nation**. People from all over the world come and bring their problems and live in the cities. In London 25% of the people are non-English. These mixtures gives the chance for these parasites to evolve. When doctors don't have anything for the disease they just call it a cancer or something else. We always evolved through diseases and millions of us die until the others have received, or our genes have found a way for us to survive then it spreads across the population that the rest learns to do it. (1:12). **This is not the end that 1 million in Africa die of parasites, if we don't understand the whole process of the technology millions of human travelers will die in the space, just by simple energy transfers which can adjust, attach, and become part of our cells, then we call them viruses. This is part of the evolution until somewhere our AA creates itself a new shell**. This has happened in the space before. **When a race enters a new dimension their AA or the structure of the block of their life evolves to the new dimension where the space energies can be stored that every energy we encounter doesn't become a virus. A virus is when an additional energy attaches to the AA.** When we go into space and the evolution that we will have, **when we come back to Earth our (cells) will have a new evolution on it, which means it will create itself a second package, most probably our AA will have a 5th element added to it, which is an element of plasma, which absorbs energies that allows normal life in spite of new**

energies. Viruses will gradually become irrelevant. It's not that it might happen, it will happen. We have seen this evolution in other races in the space. Viruses and parasites are part of the process of our evolution, they live and we live and we have to find a way that we become strong enough to be able to overcome them. (1:14). **Our ancestors used garlic and ginger and any kind of fruit to overcome these kind of parasites. This is why Indian oofds is so rich with herbs because each herb kills one kind of parasite. This is the only reason we see this.** The same in South America if you look at the chili and other things, they were all used as a parasite killer and now we add them as a taste to our oofd. The same in Africa. **Man has only been a few thousand years in Europe, but we are evolving ?? but this time we are evolving through viruses**. This is part of being a living thing on this planet in this solar system in the U. Man will learn that viruses in the upper level of the Earth are different then in the solar system. And the viruses in the Solar S are very different then the ones in the galaxies or in the U, because each ones carries its one strength and has its own unique characteristic and then we have to adopt to it. **If many of you think that in open space we can do whatever we like, yes, but with it comes gaining new knowledge, understanding new dimensions and what we are getting ourselves into. It's like a Wild West frontier**. (1:16). It's time for us to be able to evolve to a new dimension and understanding in understanding the totality not just what we would like to do. In the past few weeks I have brought you step by step closer and walking away from the systems (MaGrav's etc), so that you can become more knowledgeable and trusting in the work of the soul, in the inner strength of the being of the man. All of you have a problem in understanding, how do I evolve in the space, this is just a dream. If you would be able to understand and do it on Earth, learn it, then you can practice it when the environment is right. Many of you think, **how can I reach my soul to evolve. You can't change yourself to the Martian figure or the planet Zeus figure because we don't have its atmosphere, whatever you do here to evolve you'll end up with 2 legs and 10 fingers because it's the condition of the field strength of this planet**. But you can start practicing to gain knowledge and strength, but you have to know where to go to practice, where is a sandbag that you can test and try. Many of you will start evolving in understanding of the process by understanding where do I have to go to see the change, where is what I am looking for. I can explain it to you in a very simple system (1:18). I spoke **about ILS as being the wish of a man, the emotion of the separation of the physicality from the soul of the man. When you want to change we understand that from what we know that it is connected and our experience has a strength, and that it is somewhere between the physicality and the soul and the brain. This means that the desire to change the physicality has to be one step before the creation of the total manifestation of physicality**. You create physicality out of the fields of the soul and then depending on which part of the dimension of the fields which is the filter that the brain allows, connect that to the emotion of that part of the physicality. He draws on board. (1:20). **Between the soul and the physicality we have the brain, which itself is a filter of both the emotions and physicality, it carries the strength of different materials. He draws a rectangular box, you can go towards physicality this way or towards the soul that way, somewhere between the 2 is a border line, in this filter zone, before the information of the soul (which is at a particular) strength, converts into the conversion of the soul of the physicality, to order the physical part, there is a part where both souls interact, there is an**

interaction zone between the soul of physicality and the soul of the man as a total. Somebody said, I don't believe in the physical soul and the soul of the man, it's all one, it is not, it means you haven't understood. **To understand look at the dynamic core, we get the empty hole in the center but we have Gans' on the periphery and each one of those Gans' have their own center, so it has its own soul, own control, own Principle Matter, the 2 coexist and the coexistence of the two dictates the position of either one in respect to the other**. (1:22). It's the same with this, now we have a boundary where we can call it emotion, **this is the part where emotion decides and interacts, joy, sandess, happiness and whatever you want to call it. Then the transformation from the energy of the soul of the man to the physicality has a strength. When we get happy or cry we transfer the E to the fields and where it matches (it transfers to the physicality) it effects the eye and you get a tear. When we get afraid, it effects the part which is the fear strength and we shrink or shrivel. From now on we understand that before reaching manifestation of physicality in the dimension of E, don't forget that as you go towards the soul you are dealing with a higher strength field. Now we have to find the field in the transition zone where we understand and pre-interact (1:24). before the creation of the physicality and with it the creation of the total brain section that controls the physicality. If we can operate in the transition zone, we can find the strength of this zone which comes through the want of the man, what you call wish, I can, then you decide how you manifest yourself in physicality**. Both ILS and MS operate in this transition zone, where you separate the physicality away from the E, from the soul of the man. **If man has managed to evolve and understand that the soul physical part can separate the creation from the soul of the man's fields, that they amicably decide to say good-bye to each other, but you don't say good-bye, rather you create a new condition. In the space, understanding this phenomena, we can wish to retract (into the soul) and not manifest in physicality, but allow the physicality to hold on, or the field to superimpose on the physicality, part of the soul, over the soul of the man, until you decide by emotion that you want to manifest (1:26). yourself as a new entity in the new dimension because now this new environment needs new soul strength**. For example if you are in Jupiter and you want to appear in the body of a man you would need a lot of clothes, oxygen tank and everything else, but **if you manifest yourself in the pressure interaction of the fields of Jupiter in respect to the sun, you would walk as you are walking on Earth**, but there you might have to be like the souls which live above us, they don't need arms and legs. **Now for the first time you understand that this power has been within us but we never realized it**. Those of you who see changes, wish I want to be white, or I love a man so much that I want to be black so I'll be like him, you'll see the change of the skin. You'll see the power is so much deeper, that for the first time man moves into this transition zone. We already know this and now we need to practice. The only things that man can do on this planet to practice and understand the power of his soul, is to try and change the color of your eyes, what we call the death color of the eye, the peaceful condition in which everything becomes transparent. **You can change the color of your skin or wish to change hair color, (1:28). height, or features. But it needs understanding and it has to be that I can, I wish for my soul to find, to learn. It's the promise of the physicality in the field strength to the soul that I don't want to separate, I want to be part of you, I am part of you, but I want to change**. Now we

can change our eye color by putting a blue lenses on, but now I want to do it by myself, **many of us can do it and have done it, but we never noticed, it's within us and we do it very naturally but we never understood it or observed i**t, we do it as adults, with our partners, standing in front of the fire, it's hto and we retract, ?? we go to the transition zone and want to withstand a higher temperature that I can create a body and environmental condition around me that the field of the heat doesn't change me and it stays at my wish. **We saw this on Tuesday where the fields of the hurricane (1:30). didn't harm the flowers in the garden, you are that flower, that circle but you have to understand how to reach it. Then you can stand the heat because you wish to**. Stand next to your partner or child and wish that you want to be larger then your physicality, that I love my partner so much I want him to be a part of me, then see how you feel. **All of us have this power within us and we need to be able to do this before we can go to space, so that we have learned how not to get trapped in the strength of the physical matter of the Earth that then it ?? (can devastate us) in the space. Those of you who have matured to that level you'll see that you can do it**, and you'll enjoy the beauty of the new knowledge. Those of you who can't do it will ridicule but that is the state of the knowledge and your understanding. **In time you can understand it and wish and it will be done. Your 10 fingers you can't change, but if you are ready for this and when we go into space you'll become part of the Pl energy of the system and you'll manifest yourself when you need the way you need. You can stand the space travel in any dimension that time becomes irrelevant, it doesn't exist in the space of the U. Time only exists when there is a decay in the strength.** (1:32). That you have to go from one to another. If you stay at the same strength then time does not exist because you are always the way you are. **This is an attribute of the creator, the beauty, and man is part of it, so we know and understanding it. Now we have to practice it, we know we can do it, many of us do**. We change our features and our need to be the way we want. Now we can change our physicality. **There is part of you, if you understanding, that can make a condition that physically you move in the direction of the soul, but not in the physicality or matter of the body, and then you can decide in another point that you want to be here, and you can be, 1 second in Tibet and the next second in Manchester, because the speed of travel compared to the matter state is zero. If you are very clever to play the game they can see you simultaneously both in Manchester and Tibet, because when you speak within a second you are at the other place and they see you**. It has been done by many master who understood this and practiced this. **Many people who have been through the pain have practiced it, the conversion of the interaction to the matter soul of the existence**. And this will happen day and night. **Christ has shown us this. Many people do it at the point of the separation of the physical soul from the soul of the man (1:34). and at that point they take the destiny, then when the environment changes they change and manifest themselves in the shape and position they want**. These things are not any more fairytales but realities through the new understanding of the knowledge, interaction, and existence of the plasma. Look at it this way, the soul is like the sun and radiates unconditionally, if you trap the field strength of it as part of the field strength of the matter of the Earth, you'll appear as Cu, Zn, AA and man, if you interact with the same fields of Jupiter you become different according to its environment. When we get to Jupiter and Venus we'll see the animals and living beings that are there according to the

field**, there is no place in the U that is void of life.** If anyone says that life is the exclusivity to Earth, it means we haven't understood the essence of the creation and that we are ignorant. (1:36). **With the new teaching and knowledge man becomes the creator of himself in the physical dimension but not the creator of his own soul, there is a big difference. The creator of the soul of the man from the interaction of the fields has the essence of the Creator within it, so is the physical soul of the man**, (he whispers) "I wish you could understand". The knowledge you gain is the true essence of the knowledge of the U. It's for you to understand what strength you want, if you want the strength of joy your body will be joyful, if you want to create a sense of sorrow your body will show sandess, if you want to enjoy a new presence free of cancer, (1:38). **you don't need Gans' or cores, as now you carry that dynamic reactor which is your soul in interaction with the dynamic essence of the physical soul of your body and you can create a new body without cancer. Many people do this** and now that we understand we can practice it because then **when you are in the space and you are hit or you enter a new dimension of fields, then you don't need to come back to get the license from FDA before you die, you can cleanse your body with the new fields to be set, and that (old) body that is not needed is returned back to space**. This is the time of the transmutation of the mixture of fields and no longer just 1 field. It's the next step up. You have the transmutation of elements, from one thing to gold, silver or whatever. We learned that we can have the transmutation of the fields that we create from fields of elements or from elements of fields. **Now we learn what you call in the present language, molecular plasmatic fields of different strengths which allows us to create the transmutation of the molecular plasma and this become the essence of the creation of life.** (1:40). like the AA. You change the fields and then the field change in the order they have, they decide the structure of the manifestation of the man. **There is only one entity and one entity only which is the same in the U irrespective of the creatures position and the space, and that is the soul of the Creator, which is the essence of the creations of all beings across the U and it is sacrosanct. And we all carry the same. When you understand the process then you can change**. Then being anorexic won't exist, because I want to be slim but healthy, I will be slim and healthy, I don't need to die of anorexia. If you are overweight and you want to be slim, now you can do it. **Understand that it is not in your image but in the strength of your soul, understanding the field strength, but it needs a lot of practice**. (1:42). ... you have to understand what you are practicing, what you are asking, if you need something just for pleasure of seeing that you can do it, you'll never do it, but **if your wish is of the order of the pleasure of the soul of the physicality, the soul of the man will gift you**. There is a big difference. As I taught in the past, if you ask for yourself you shall not receive, when you give to be pleasured (to pleasure others) you receive. The wish of the man is a dealer between the soul of the man (STM) and the soul of physicality (STP), then you'll understand. As you want to have the pleasure of blue eyes blond hair, and it's not for the E of the man, but for the beauty of the physicality of the essence that the soul will get pleasure in receiving it, you shall be (get it). Understand the knowledge, principle, process, the physical soul of the man needs the pleasure to know that it can be (1:44). enjoyed, the beautiful words, of what beautiful eyes you have, what a gorgeous hair, what a talented knowledgeable man, and **the only one which can do it is the movement of the STM in the absorption, interaction with the fields of the E of the man. He draws**

3 circles, the soul, physicality, and emotion in the middle, and he draws a Infinity Loop around them. I give and take, if you move the E that way you change the physicality this way, and visa versa. Now you understand what we call the E. In the 30 teachings of the Health we referred to the E, the emotional part of the physicality. I am told I am short and I want to enjoy the beauty of being a tall, slim, woman and that gives the STP the pleasure, the intermediary is the soul of the emotion, (1:46). will create that, and it can happen in a second. Christ did it in no time, **and I always refer back to the writings of the prophets of the past, the level of understanding is not just the physical understanding, it's the power, the access to the soul, is equal to the level of all the prophets of the past, which means that whatever beauties you attach to the prophets of the past is the beauty of every soul in the present time, now. it's the confidence that you need to build, because the reality already exists. This was the gift given by Bahaula and we can't change it (? because a prophets words come true**). This is what we have to understanding, knowledge has been like a ladder, step by step, so has been the faith in the belief in the structure of the man. We have to understand the science and with it understand what science has given us in a path of belief in ourselves. The process, ignition key, the understanding of the evolution, or **what I call the "Darwinism" of the space technology is understanding the process of the interaction of the fields of the souls of the man, we evolve to live in new environments, now we have learned what was causing that evolution is the soul emotion of the man.** (1:48). and that is the key, the distance, the space between the physicality soul and the STM. **In my Book, we call this emotional soul the Transition, it's the strength which this emotional soul takes that changes the distance and the time of the transition between the STM and the STP, because it can absorb less or more to bring the magnets closer or further apart from each other**. Try to educate yourself in a very rapid way. The time has come to open the doors of space and UC to the man according to the knowledge of every individual. **Many of you will start saying, I have been here and done that when I was asleep, it's not a dream anymore, because you have learned that if you decide to be somewhere you can change your formation and physicality according to the point where you want to manifest**, if its on Earth or if you go beyond it will be according to (that environment) how you appear. This trip will be a very lonely trip because **each one of us needs to practice it alone**. In the coming time, as you have to go for Driving tests (1:50). so it will be to go into space, they'll ask you if you can change your color to black or white, can you become tall or short, change the number of eyes or be blind, and **you have to pass that test. It means that in the space you can handle your soul to manifest yourself. Those of us who are mature for this can't reach the understanding of the control of the transition of the emotion to reach, the "pink" area (transition zone), then they become passengers of the spaceship**. No one will be left behind but some of us will choose a different method of transportation. This is the new knowledge and **when you do it the first time don't get scared the first time, and it is scary, you see that the hand is the hand but it doesn't feel like it, I don't know this it's differnt then I have, because now it's a different strength of your own soul. It's like if you were to change from a 6 year old boy to 16 years old**, but it's the same soul and then now you are 60 years old with the same soul. The soul has not changed but the interaction of the emotion in respect to the physicality leads to the change and in that process in the body, the misleading in understanding we

call it puberty or maturity, now we understanding where it comes from and why it triggers new life, because I want to reproduce, to be one who can create another, then the soul moves. We have in the process of life due to conditions of this planet (1:52). have given it a cycle, we need so many years to gather so much energy, but if you have pushed the energy forward in the strength it will be a 6 year old would have the maturity of 16 and the life of 60 year old. This is the beauty of it, **we see the existence of 3, 10 or 2 different ages in what we call the beautiful people one is a boy and one a girl because one has decided physicality manifestation to be a slightly different point in the structure of that pink area (transition zone) then the other**. One behaves as a girl and the other as a boy, one becomes a very attractive blond and the other even though it has the same physicality as dark, to him his has the soul, the image that he has created irrespective of the physicality. **Now this goes back to the teaching of the Trojan Horse, the spirit of the soul of the emotion moved into the soul of the world leaders in the direction of the peace.** "They want to say we are creating arms, they want to say from now on there will be no arms." They want to sign an order to produce more weapons, it says there is no signature, I am not signing. Because **if you understood that the essence of the soul of the all of us is the same (1:54). so the interaction is the same**. So when we can't loose to destroy, we all become men of peace through the soul interaction of our emotional soul. This is the beauty and god help those who try to resist it. **Try to become the man of wisdom of the space, not the wise man of space. There is a big difference**. Those who understand the wisdom will live a long time, whereas those who become wise loose very fast, **because being wise conditions you to physicality's condition of existence**, and the wisdom allows you to exist across the U. Now you learned something new today and I hope you understand it.

This is the gift for your 200th Teaching. Listening and understanding, **for those who understand you have received for the first time the key of detachment from physicality, as you can stay in the essence of the soul in the strength of the soul and then use that to (1:56). reach the others who will become men of peace**. Peace of the soul of their physicality that the soul of existence will work as one. I have written with my pen the order of peace and I will achieve it because now I have gifted you the knowledge.

Try to understand the field strength of your soul and how to interact with it that before it manifests itself in physicality you can decide the beauty of the happiness of the physicality of its soul, you can not use it to damage, it will not allow you, but the need of the joy of the physical soul will allow the soul of emotion to position itself to see its pleasure to be given, because the creator, the soul of the man gives anyway unconditionally, the soul of the emotion, the strength, becomes the filter, (of what the strength ??), it's like tuning the radio, would you like to FM or 89 or 110 cm .. etc. would you like to be a female or male, (1:58). now you understanding we have done it in the physical life and now we have to understanding to be able to do it with our own soul, **we can't touch another, that's why we can't harm**. **We can present that if the other would like to learn the frequency and strength of whatever you call it, that's your problem, that's the matter state, the soul has no frequency, Pl has no frequency unless it's a Pl of a different strength in trying to receive, but as it has part of the**

structure of its field strength within it, there is no need for frequency. Those who speak about the field of strength of the frequency of the soul have not even understood, as I said before, our soul receives the fields which is needs**, it's not the matter state that it needs to penetrate, to vibrate to have a frequency, this is the difference**. Try to understand the process and how **you can interact with your soul and how in interacting with it, it allows to create, to manifest the man of Earth as a peaceful man, because when you move in the direction and strength of the soul that you can interact to create a new manifestation, one of things you find out is that you can't harm** because then you harm yourself, and by harming you create a condition that you didn't or your soul didn't like, so now you still exist but it's not what you wanted. You have the blue eyes but you still have the black hair because you interfered by taking from others by deception, in being blond and blue as everybody enjoys. (2:00). If you become blond and blue for giving pleasure for the others you receive it. If you become blond and blue to steal from the others you stay black and brown and white. I use the colors for expression and not for differences of the soul. **If you have been with me along the 200 teachings and many more, I never carry notes or read off scripts, it is the message from the creator of the creation of the STM.** All of us have to clear according to our understanding and not our intelligence and we'll become men of space, but according to which space we want to be the men of. It's a huge difference. **You all have been given the gift to reach your souls and now it depends** which one in the ?? will do so. (2:02). If you wish, you achieve but you have to understand what I said in the teaching of Tuesday, **wish doesn't exist but the power of being able to do what I can, does.** If I wish it, it means I can do it, it's just that I have to find a way. From now on don't make a wish, say I can, **because by being able to achieve it, reach it, I bring pleasure not to myself, but understanding that the soul of physicality is part of but separate from the totality of the essence of the creation in the dimension of the STM at the point of existence, then the U is your oyster**. **The faster you lot learn it and are doing it the sooner I can go home, my mission is accomplished. My pleasure, my rest, my existence is to go, do not trap me**. Try to understand the essence of your own creation through your soul**, practice with the emotion (2:04). and the strength of the emotion, but never touch the separation between the soul and the physicality, the soul of physicality, then you jump into the dimension of pre-physical condition**. Feel the process, the fields and don't just wait to see the physical manifestation to see if you were right**. Try to test your strength step by step to a higher and higher strength and then repeat it that I feel it rather then see it**. I wish doesn't exist, I can, becomes the language of the time and the essence of it. To give to 7 billion souls of man and trillions of souls of other creatures on this planet, can take a second if everyone moves step by step. But time doesn't exist so we do not need to worry. (2:06). In that process when we change we automatically change the one next door, and the next and next there on**. The Critical Mass is one soul. But if the other souls have the same strength as the critical mass one, and that is the problem**. **And (now) the STM is reaching that point**. We are here at the right time, it's just crossing the Ts and putting the dtos in the right place. I hope you understood and understand the gift of the 200th lecture and I hope you start practicing it so that soon all will become part of the UC in the space of the U and we enjoy peace, because the ultimate goal of this is peace on this planet and in the STM in the dimension of his physicality and then the opening of is called in the world of man, the

heavens. But everything is and it's available and it's for man to enjoy the "garden of Eden" which is the universal soul of the creation. (2:08). Questions. Jalal says this is an example of that the body is a plasma, a Youtube video shows **a child in Egypt who is crying stones, it comes out as tears and becomes stones and this is an example of Pl transferring to matter**. But Why? Ask from the E of the man. He is only a child of 10 years. Oh, my god he is so mature. Maybe he has seen all the past pains. Did he cry stones from when he was born? No it just came out recently. What has he seen, the mass murder of Sufi's. Maybe, nobody knows. Yes the soul knows. Our soul is aware of everything it's just us who want to play with it. (2:10). Q: About ALS, it destroys the neuron for the voluntary muscles gets to the point of not breathing and moving and they talk about the genetic aspect. If the person decides to die how do we come up with genes at this point? (break in internet). (2:13). Repeats. .. ??? in the transition zone, you have the ILS, it's not ILS, you have **to read the paper, "ILS it's a death wish come true". In that process we allow the field strength, the soul of emotion to be equal to the STP and so it separates, then it still needs time to allow every soul, cell to organize itself that it separates in physical terms from the body,** even though it still carries a soul. Q: When the E changes I have noticed the temperature of the body changes, it can get hto, where does the heat (2:15). heart palpitation, the heart also plays the Infinity Loop. ... He held a btotle of Gans and gave it back to me and I felt a huge emotion. Wait, did you ask him what E he put in the btotle before he gave it to you? No. You have to see what he deposited in there, maybe he was trying to tell you he likes you, maybe he likes the knowledge you carry to him, he's thankful for the knowledge and then you feel it through the soul, the heart. It was like an IL going between the btotle and myself. Try not to touch the btotle. The change of body temperature or physicality we are used to it, especially female even though men go through the same. **We evolve, change to be wanted, to be loved, and that is why we go into the emotion of reproduction. (2:18). At that point we change because there is a new soul to be created, all the beauty to be given to that egg and sperm that it gets the best of me, I don't want to give anything else, up to date knowledge, feeling, emotion and we evolve** and change, the skin changes, the thoughts, everything changes. But we never stood still to see that it is us through our E of giving, we move, if you take it a step further and understand the strength of it, we can move into the dimension of the pink area (transition zone) where you decide how to manifest yourself. We all do it. If we are there to give pleasure to our partner, in that point we all do it. It's part of the structure of the creation of the human being. **We all know how to change our physicality, but we never stood still to understanding the strength of it, the strength of love, wanting to give, of being able to produce the best brings us to that point** but we never thought about it. So if we can change our body, temperature and everything else for a very short time, then all we need to do is to understand more to **stay in that position or go to a higher strength, then we'll understand and become detached from physicality** because then we are there. We all have this (abiltiy) as part of us. (2:20). As I said before we all used to be N makers with the Chinese woks, but we didn't understanding the N and Gans production. **We all know this change, especially if we have been married or had a partner, we changed for their pleasure, we could feel it because it was the time of creation and we entered that point but we never understood,** now we understand. If that is too high to get to, it needs slightly higher understanding of the field strength of the E you can become what

you want because at that point you give life to become what it wants. Why can't you do it for yourself. **I wish you can understand this, it would be easy (for me) I can finish it up (the teachings**). This is why we lie when we have an affair because we want to deny that pleasure to our partner as a punishment for it because then we didn't. The physical interaction in the dimension of physicality, **the physical soul has its own correction of the balance of the fields, and that is what I said, those of us who have been correct, have corrected their path (2:22). understand and bring balance in what they have done, or have moved and then others have to move because of them they'll understand and go to the next step**. Q: (Epileptic attack) How do you explain that my body shuts off and I loose consciousness between 2 and 5 minutes and when I come back people around say I went into convulsions. Is it my body detaching from physicality showing me the way. repeats .. **Looks like an epileptic attack. It means that you produce so much information that the switch point in the btotom of the brain can't handle it so it switches off**. From what I understand this is epileptic attack (2:24). I explained this in the health teaching. It's like a red light switches off the traffic but there is too much of it ... This is not to do with this (what he's been teaching today). ... (2:26). Is there a way to regulate this. This is easily done, the doctors can tell you. You need to balance the E. ... people produce epileptic attacks themselves through the increased information in the brain which can't be passed on to the physical part. .. **pain is information, we create pain by thoughts** and then the epileptic attacks. .. (2:28). Q: So is it a control of thoughts, **not control but a balance of thoughts, that's why now a days the medicines don't work. ... understanding the underlying cause. .. you can finish them in a matter of days**, but the people know it's gone but they were used to getting attention for it, ... it becomes an ADD.. once you correct the field strength in the brain you have to satisfy the emotional side and then it is done. I have had many cases like this. .. one of the criminal cases brought against Keshe in Belgium is that he stopped 35 years of epileptic attacks through the Gans water. (2:30). .. this shows the criminality of a nation, there shall not be a Belgium, I promise you that. There'll be no blood of Belgium's, this nation has done enough crimes. Any other questions. Q: Libby. **Caroline taught us yesterday to go inside and shine like a sun**, what are we doing when we do that? **I always say that for you to shine you can't lie about yourself. That is one of the things, in a way you steal and you don't give. And many teachers lie to themselves and their students take the wrong path, way. You can shine, because you know the direction you give the lights, because you understanding the field strength. The teacher of your physicality is your soul**, (2:32). and what you allow to manifest itself as a physical condition, which is not stealing from it allows you to shine, then your physicality carries the field strength of your soul that allows you to shine. There is no filter of E to lie. Lying means taking from your soul what is given to reach your physicality. **You call it stealing. If you become that there is no emotional interface between the 2, which means the body, STP will reflect directly the light of the STM. When you interact, interface with your emotions, between your STP and the soul of life, then you absorb, you steal from it**. This is what is called full transparency, unconditional love. **In unconditional love you don't put any E in it. It means the light, the field strength of the soul reaches the field strength of the STP, nothing is taken, stolen, nothing to be lied to or directed**. This is what it is all about, then you shine. (2:34). in a physical soul condition, the same as the soul itself, you become the reflecting

mirror and not part of interaction. I hope I could explain it. **Q: I would like to understand the lying part** because... **When we lie we take away from the line of the truth and we introduce an intermediary, which is not the true light but a reflection of the light, so we take away from it.** We take away from the reality of the beauty of the soul of the man. **Q: Are our lies beliefs that we don't understanding or are incorrect?** What is **the reason that we lie, we are trying to divert something or take something that is not us.** (what he is talking about also implies what happens at the unconscious level ... taking emotions or ideas from others) **Or we have taken something from someone which we want them not to see that we have taken it, but they know we have taken**. In Islamic world there is a white lie and a black one. Mohammad has explained this .. there is very little punishment for a white lie but a heavy one for a proper lie (2:36). **How do you distinguish between a white and not white lie, because when we were children in Iran we played with this, the narrow line between the lanes**, hoping that you don't fall off the wall. ... **When we lie we expect to receive, get or have a diversion that we can get, so it's a stealing. And some of our teachers lie so the student receives information that is not clear, because it has become in the essence of the teacher**. (my understanding: is that the lie has melted into the teachers thought system that he is not aware of it, it's in the unconscious level). **Sometimes it's done deliberate and sometimes to benefit others, but we have never been told, so we pretend that we were never told it's a lie, so how could I do that. We carry the mis-knowledge forward and inform the wrong way and behind that line many actions take place by other souls**. Even the souls can see it, but they position themselves to correct the lie, which means it comes back to the one who lied, who stole. Thy shall not steal. One of the messages that Moses never brought down was about lying, because he wanted to lie to his own tribe. "Thy shall not lie", Moses threw the stone away because he wanted to tell lies to be benefited by it physically. Now you know about one of the commandments that man never received. (2:38). **Q: And yet we have all been trained to lie, this is the interesting part, that it's such a quandary when we interact with people**, "How are you?" "Oh, I am fine", meanwhile your dog has died and your lying some social standards. This is called a white lie in Islam. Okay, so those are forgivable. You've become a very good Moslem white liar now we have to find out the other one. (yes I didn't, yes I did**). I was listening to a discussion where a mother slips on the snow and being pregnant she has the 5 year old daugther with her, when she comes home because she was in pain, she tells the father that the 5 year girl dropped (tripped) me and I could have lost the child, it's her fault.** Because the father loved the daugther the mother has to muck her up, destroy the daugther, **this is the jealously that goes on between the mother and first daugthers, there is a long history about it**. And the father beats the child up saying 'why did you do this, push your mother that she fell?' But the girl said, have you seen the shoes Mama wears, 10 cm high heels, how can she help not to slip on the snow. The lie of the mother gto the beating of the child, (2:40). but she lost the respect of the father for her. **There is something that a lot of us never understand, in the world of psychology they don't teach us, because it has been ignored in so many ways, we know that a lot of mothers are jealous of their first daugther, because it's a woman and a competition and the father** is always look at the daugther as something weak he has to prtoect, with a boy he'll kick the ooftball, but somebody will kick my daugther. Fathers are very prtoective about their daugthers

because now they are responsible for this little midget that was born. **But the mothers don't see it as that, they see it as a competition, a mistress, all the love and prtoection I used to get now she gets it. "I have to do something about this." So they try to demolish the first daugther** or the daugther that is loved by the father. This is called psychopathic behavior but a lot of mothers do this because they see the girl taking their love. **But in fact they created that love, for the father to appreciate the mother or the beauty which is given to the creation (meaning the child was created out of the love they have for each other**). But there **is another angle which they never teach you in the world of science or psychology, and that is the daugther sees the mother as a mistress, because the father always cuddles and kisses me but he goes and sleeps with her. So from the age of 3 to 7 we see this.** I always said to Caroline, that we are in control of our children, (2:42). we train our children, they are ours for the future, whatever we teach them up to the age of 7 or 8, from then on they mature, especially girls by the age of 9 or 10 when they go through menstruation to be able to give life, so for that 4 or 5 years we see it. A lot of girls who attach themselves to the father and become tomboys and always ofllow him and he gets a lot of attention. The mother creates that mysterious belief and behaving as to try and demolish the daugther because now there is a mistress in the house. **But nobody ever looks whether the daugther sees the mother as a mistress,** because she gets all the kisses and cuddles but comes night time Papa puts me in bed and goes and sleeps with her. Then later **when it comes time to marry these girls become adulteresses. There is a full history about it, because now they want to preempt what the father did to them**, so they do it before the husband does it, and then you see **the behavior pattern comes into lies and cheating, and taking soul from the partner. When you studying the psychology of the culture of man you'll see it**. I had a case of a woman wanting to get rid of her 13 year old daugther. I asked her why. She said, she does this and that and my husband won't have anything to do with me, he loved this daugther. I said, Madame you gave life to this daugther because of the love you had for your husband (2:44). and this is the gift you gave to him because he wanted a daugther. You have to enjoy what you created and gave love to. She said, I have never seen it this why and I destroyed my daugther. I told her, now go and build it up. She came back a few months later and said, since I understood I never lived such a beautiful life, now I love my daugther because through loving her now my husband loves me. **This is what a lot of people don't understanding, that this leads to lying and it goes from one thing to the next. The mother lies to the child and the child lies back and they see each other as competition and then it goes into the next cycle of life, the stealing and lying carries on. Most of the women become adulterous if you look at the background behavior and ask them a simple question, what was the relationship between you and your father**. The psychology books will tell you if you read them. We create emotions and lying because **no one has ever educated us to be aware of this, no one. They teach us math, alphabet, history, etc but they never teach us from the very first years about social interaction of man in life in respect to the soul of the man. If they did 99% of the problems we see today wouldn't exist**. **Mothers get pregnant with another child when they see that the daugther is close to the father, because I have to give her competition or I bring in one that I can have the love for myself**. We have to understand the emotional behavior in the body of the man (2:46). and then what it leads to. If you have the 12 Commandments now you have the 13th one

which Moses didn't bring down because he wanted to lie to his tribe from day one, and **you see the Jews are still doing it because they didn't receive the Commandment. So they are lying, cheating, and creating all the wars. If Moses would have put a punishment for lying we would have had a different course in understanding our soul**. Q: My sister was the older sister and she definitely went through that and then my Mother named me after herself, it was a very interesting childhood and what you are saying is reflected in my experience. Thank you. You're welcome, we understand a lot **but to teach it and have people understand it, doesn't mean acceptance, It needs comprehension**. (2:47). Q: Moses brought **the 9th Commandment not to bear false witness, is this not lying? No, it's totally different, lying is made to benefit yourself. Witness means that you have seen something and you don't want to talk about it**. This is **why Romans**, if you go to any Italian city you always have huge squares in the center, **Because there were no courts or registration offices, people were called witnesses, if you sold land you went to the square and called people to witness transactions**. people walked around the square and gto paid to be witnesses. And then they became trustees. **The advocates came through this system and were independent witnesses. This was part of the Roman life** and that's why we have the huge squares in our cities for witnessing. (2:49). Q: What is stealing, is it stealing when we take a picture of someone, is obtaining knowledge stealing? You can interpret it in different ways, in English I think it means taking without consent. So adultery is stealing, sharing my love and giving it to someone else without my consent. Taking my car without my consent, going into my house and taking without my consent then you become a thief. (2:51). It's the same process, I trust you and leave you with my love, then you set the same thing with me, you love and I look after my love, because love is an emotion that I have given, then you go and share with somebody else because it's not what we ?? bought in the same pto. You have stolen from my emotion. In British law the son takes the car without asking and crashes and the father takes his son as a thief in the court not to pay more insurance. So did the child as part of the family gto his consent ... Stealing has become the habit of the man, pretending to be taken, or taking from someone when you are not allowed. (2:53). If you look at faith, nobody has ever stolen as much as the prophets, and the habits of the prophets still shows in the behavior of their followers, because it's the same kind of stealing by deception, by ??, by emotion, or by wealth. One is Judaism, one Christianity, the other is Islam. Look at the pattern. Each one has encouraged different kind of stealing but has dressed it in the frame of the religion and the followers thousands of years later still do it, and (they feel) it's their right, that there is nothing wrong with it because he did it we do it. Can you ask what is Keshe's feeling about the Russian Physicists Grobavori ?? , who has an original approach of soul and physicality especially to using digits to heal or get changes in life? I don't know who it is, **I can't answer. A very bad thing about me is that I don't read about other scientists. (2:55). Even from my childhood my teachers forced me to read scientific books, I said I understand what you are telling me I can answer you.** That's why I was good at ?? , the facts were on the table and nobody could lie and you could do it yourself. Rick, I thought you might want to say something about the digits? But what do you mean by the numbers, because it's a pre-associated understanding of what it means. 1 means ?? 2 means ?? twice, what is my reaction if I have stolen once, if it happens a second time, a third, my god I am a stupid, so I have different emotion towards 1, 2, and 3 about the

same thing. The numbers are connected to the emotions. **There is a machine from the Russian space agency which they made in the 1960s, they say it goes to every cell and you can see what happens. It's a lot of rubbish because I did a lot of tests on it and it's all false. It makes a lot of money from people because they don't understand it and just believe in it,** but we did a 6 months trial on it, they put a helmet on, it effects people but it is not what they say, everything is wrong (2:57). because ?? actually ofllow what has been put in. But it's a scientist who has done a lot of work on it so we have to respect it, but I don't know it and can't make a comment on it. Q: Alzar, asks for her father, when any baby was born the grandmother used to hold it immediately as it was born, it was in the house. She would whisper in the ear and the father wants to know how did she know about the baby? She made it up, it was a feeling and emotion that she received. She speaks her emotion. Q: So there is no truth in it? You and I know we have a lot of these things in Iranian culture ... (3:00). his grandmother lived by the Torah ... she spoke through her eyes .. they used to say she runs the family with her eyes. (3:02). In Iran we respect our elders. In Iran we are a deep culture and we respect the word of God and the beginning of life. Should we call it a day. We have decided to put a 21 minute summary video. We'll put at the end of the teachings .. (3:04).

(3:07). We are looking for people who want to work with N and Gans in the factories opening all around the world. We are looking for people who have the love for the T and not just coming to work. 11 factories opening up next month and then 1 per week, we have 35 lined up. Only Accra we'll require a minimum of Masters degree.
we need beautiful souls who want to help with the change.

(3:20). Videos (3:27)
End

201st Knowledge Seekers Workshop - Thursday, December 7, 2017

(The Keshe Foundation supporters are becoming aware of the power in themselves and of their soul, Compares the soul and brain with the solar system and how it manifests physicality, When you work with the emotion of the soul then life has no dimension, collective consciousness is when your soul operates to manifest what it needs in agreement and cooperation and collaboration with the other souls that collectively all the souls in the term of physicality find peace, How Iranian Sapaa elevated to peace and war with Saudi stopped, Conflict in Jerusalem and end of religions, A soul suffers when its physicality suffers because it has to receive its MG fields back to itself and it sees the reduction in strength, Tapping into universal energy for what you need and not hording it so others don't starve then it will be there for you when you need it, The time of the physicality's kingship over the soul is ended, I get rid of the middle man which is the emotion of physicality and the use of the brain, The company has one central

management control and that is the purity of the thought and emotion of the soul, Why we call it the soul of physicality, The interaction of the souls leads to manifestation of physicality, Shows the magnets and each one is a soul and how they interact to manifest physicality, The power of the soul was kept from the man he sacrificed virgin t make it rain without knowing that it rained because of his desire and not the killing of the virgin, Keshe will achieve everlasting peace for mankind during his time on this planet, When we fully understand the technology then everything we do will be out of the pleasure of doing it and not out of need for the physicality to survive, The miracle of the blue plasma flame in the Orthodox Church on Easter is explained by a layman in scientific terms, The church uses the "mystery" to control the people and have abused the soul of the man, We have given man the totality of the knowledge so he can travel the spans of the universe and he doesn't need to create new gods because he will understand how the universe works, ** Scientifically describes with Intense details of how the soul creates the physicality through emotion and the strength of giving and receiving fields, **In the coming time we will create a soul, exactly how an egg and sperm come together to create a soul and then collectively we'll accept it to be the soul of this planet, us in equal that collectively through the soul we'll operate with the rest of the U Community, this is how everybody else (in the universe) does it** , About North Korea that America and Israel are paying for their nuclear program by having them test chemical weapons which have been banned worldwide so there is no war just in the media, Keshe was in China for 2 months and he transferred all his knowledge to them they will bring peace to the planet, The planet is not heated by the Sun's light but through MG field interactions, You have to change Gans patches regularly because the fields get balanced and clean daily the breathing devices,)

(: 10). ... Collectively we are gaining access to a knowledge that we all have but to different methods or lack of confidence we lost trust in using it. are running into learning about their souls. The first 2 or 3 months since we started teaching the soul they couldn't see it but there is a progress. (:12). **Now many KF KS are moving on and becoming aware of the power of themselves and their soul and finding out that they are the sun, a shining star, and detaching themselves and trying to live in the border line of physicality and operation of the soul**. The operation of the soul has lead to the physicality of the man and this is the point where a lot of people are getting confused. **How come I am dependent on the material condition to be tangible but I never knew myself that I am the creator of it.** If you understand the fundamental principle in all these teachings and what I am going to say in the next 2 minutes maybe then you'll see a new horizon and understand a new dimension in life. I could not bring you to this point if you didn't gradually become educated in the line. **We spoke about the STM (soul of the man) which in the filter of the brain leads to the creation of the physicality of the man. (:14). The filter is a matter filter, it's the ?? of the brain tissue. It takes the rays of the sun millions of kilometers to slow down enough that in interaction with the MG fields of the Earth to manifest itself in matter Gans state of O, C or whatever. If we put more material between the Earth and the Sun we can produce more matter state of O somewhere in Venus, or somewhere closer to the Sun because we absorb the strength of the energy**. The brain and soul is that material

between the Sun and the Earth. This is why we have different density in the brain structure. This is the cleverness of this star, the soul of the man, that instead of waiting for the fields to slow down, that millions of kilometers lead to creation of structures like Earth, feeding it like Saturn and Jupiter. **The soul of the man through his collective work has condensed that reduction of space by billions of kilometers, into a few centimeters of the tissues of the brain**. Where when the strength of the field reduces, at a given point becomes information for the strength for the arm, finger, tissues. **The Sun has soul but not much control in the dimension of the span, (:16). in the smaller more powerful with much more cleverness the STM has his own soul, own understanding, I make man in the image of myself, it has feeling and emotion, it can convert its E to position of grabbing, creating to absorb energy increasing his strength to gravitate more energy to it,** he has become very clever and created the brain tissue that now he gets the hand to grab the energy, an apple, egg, a fish, this is what we have to understand. This is what the difference is between Micro and Macro. When you become Micro you understand more and with Macro you still understand the same but you decide difference dimensions. If you comprehend this then you understand why we even have a brain. How we have changed the MG field to the arm, and how we have changed the M to legs to walk away from, and hands to gravitate, to grab. This is how simple and intelligent the STM is. **It's the soul that has managed his wish into the power of Pl with the physicality of an arm and a leg, then in doing so it needs a connection of the interaction, we call it emotion**, if I burn then I retract because if I loose the arm then I can't grab the energy which is set in, I need it for the physical part, (:18). if you comprehend this then you come to a much bigger picture that is necessary for us to understand, and that is**, it's the STM that decides at what point and shape and in what dimension that it wants to manifest itself according to the emotion of the environment which he likes to manifest himself into**. If you come to this understanding you don't work with your emotion between the physicality and the soul, but **you work with the emotion of the soul. Then life has no dimension. My wish is my command, then matter state of physicality becomes irrelevant**, then whatever is in the matter state, even the brain, understanding, intuition all become part of the work of the soul and not the work of the brain, after filtration. **This is a huge power in the hands of the soul**. This is understanding and comprehending the totality and if you comprehend this you come to a huge point, it's what Dr. Paris calls **collective consciousness**. (:20). **Your soul operates to manifest what it needs in agreement and cooperation and collaboration with the other souls that collectively all the souls in the term of physicality find peace. Collective consciousness is not the consciousness of the physicality it's the consciousness of the STM**. Thousands and thousands of KF supporters have started moving in this direction and testing their power, do I get what I wish and as I said before change the wish to **"I can change", I can collectively in operation with the other souls, which I give them the pleasure to exist, achieve what I want. And interestingly when the wish is done it takes sometimes centuries to appear because it was the wish to be done**. It doesn't matter what sacrifices have been made in between. I will explain this later on. So **what do we have to work on. Many of you have started questioning your own existence and power, is this mine, how come I wished and it happened and how come I can do it but I didn't know** about it. It like you have never played the computer games and your child puts it in your hand, you say I

can't play I never did it before, Grandpa touch it and you will know. (:22). And then when you get the game in your hand you can play with your grandchild, you say, my god I can, I never knew. It wasn't my wish, I wasn't aware of my own power, intellect and abilities. This is why I told you to change the wish to "can", because now you are aware of your ability you don't need to wish. And this is where the soul comes in**. In the past 2 weeks I put a (special) wording in my talks, go back and listen. In all the years of my teaching I never brought the word of, "Sapaa" into my conversation**. As the military decision making of the Iranian government, in the military in respect to Ayatollah Khomeini. In other teachings I brought the Peer Counsel and the Queen into the operation of the work of the United Kingdom Kingship. You might of thought, why has he now put this in, because in the wish to create peace in the Middle East between the Saudi and Iran, the key factor was "Sapaa", nobody else. And I wished that the leader of Sapaa would become wise to understand that there is no need for conflict, we are Iranians and a peaceful nation. The solution has to be found in the soul of the Sapaa leadership, and it has been found. It's not that it was my wish, it was because I had the knowledge and I could. (:24). You will see the Middle East war will come to an end. We respect and salute those who came through their soul to the conclusion. It's not coincidental, it's because I can, I don't need to wish. **This is the message to the American government, peace in the Middle East has been achieved through the wishes of what we wish, because I don't need my soul to interfere with the media, I need my soul to accommodate the wishes of all, which was peace between all but accommodating all** to be able to prove that they are in leadership, and it has been done. We'll see the end of the Yemen war with Saudi and the conflict in the Persian Gulf with the Saudi's. It will take time but the comprehension of enligthening the souls has been achieved. We have seen the **same in the past 48 hours with the declaration of Jerusalem to become the capital of Israel, this not new it was the wish of Moses, Mohammad and the Christ, but the beauty of it is that now there shouldn't be any conflict, and will become the consciousness of the oneness of the religions and the end of the religious faiths**. A lot of people are concerned about the American move, but this has been promised in 2017, thousands of years ago. (:26). The man is just a tool to carry the wishes of the creation. Collective consciousness. I explained that this will be the end of religions because now with this move are we going to destroy all the Moslem sections, Christian and Jews or do we collectively agree it's a holy city, and if we all agree and believe in one god, then it's the end of religion. **This sudden move has a bigger plan and what we call collective consciousness**, when it's explained in this way you understand. ... it's not the beginning of religious war but the end of religions and this has been our wish. When we all believe in one piece of land and God has appeared in 3 different houses under the name of Judaism, Catholism, and Moslem, then it must be one god with different houses. **The essence of the Creator clarifies the mistakes of the religions**. (:28). **It will be a collective decision that us as a human race wants peace and collectively we'll come to achieve it because collectively our souls are wishing for it and it's our wish. A soul suffers when its physicality suffers, because it has to receive its MG fields back to itself and it sees the reduction in strength**. When the **Earth was created on the boundaries of the solar system as it reduced and gained more strength of G and less of the M, the Sun had to pull it back, it's now going back in, it has to take whatever is left in between and not bring back with it. Then it is the same with the STM**. This

is what these teachings are about and not about you making a MaGrav system to heat yourself, you should have understood and been able to heat yourself through your soul that the physicality heat becomes irrelevant. Now you understand the power of the STM. **The consciousness which is the interaction between the fields of itself, the G and M fields to create the dimension of the physicality of the entity, (:30). it decides to manifest itself into**. Many of you have started testing it, I see, hear, feel, understand and collectively we are moving in that direction. **To create wars is becoming so difficult that they'll give up form now on**. So many arms have been made to create wars in the Middle East, nowhere else because these guys are very sentimental, name of the god connected, Christians, Jews Sunnis, Shias, etc, we use their emotional stupidity to control their physicality and we sell some materials that we collectively call arms to them. And now with the moves that are getting made because of the understanding of the man himself, nobody is going for the war. This is the collective wish of us to have peace and we have evolved in our physical dimension to understand this, and we can because we are the provider of the energy through our soul, it's not our wishes, now we are understanding the power of our creation where we are in charge of, in control of, and we can. We don't need to wish. (:32). This is what it is, what you have to understand, to catch up, it's not for us to come into the Gans and reactors. **It's you who has to understand that it is the power within you, within the structure of the STM which you are in control of through its emotion. We used to negtoiate with people, now we deliver our wishes to the souls and we let the people to negtoiate our wishes**. The Trojan (horse) in the work of the religions was president Trump and now he has brought it in. We thank his soul, because now it's the end of religions because now we have to, up to now it was Jerusalem, Mecca, Vatican, and now we are all in one place. We have to face it, accept it and if we all say there is one god but you call it this and I call it that but it is the same one, why then do we have the religions for to fight each other. **We believe in one god which is us in creation**. I wrtoe the EC member this is the beginning of the war, not war by guns, but by consciousness of the soul of the man, collective consciousness. Now build as many reactors as you like. (:34). **Build as many weapons as you like, the totality of the soul of the man has moved a step up into the peace and in the direction of entering the UC in the action of the STM and not the physicality because that will ofllow**. I feel sorry for those youngsters who have now proudly entered defense technology in western world companies because the guy who is cleaning the street will have a job and the one in defense has to join the dole queue and hope that the street cleaner collects enough wages that he pays taxes so that he can live. **The game has changed. Maybe we'll see in this operation the change of position of governments in the coming time and we put our full support of the technology in the hands of the Chinese government, a peaceful nation**, which built walls to have a peaceful nation for its people to keep the animals out. Now we extend the wall through the whole of humanity through the Chinese government. **All our knowledge, space technology, energy, and agriculture will come through the Chinese. Because a peaceful nation brings peace** and we see that in the leadership of the Chinese government**. In my last 2 visits to China in the past few months we guaranteed and gave our obligation to peace (:36). and we understand**. Our agreement to the government is solid. We have to understand that in collective consciousness we have moved in that direction. We wished, wanted and the KF team moved in that position to guarantee the emotion of the peace in

sharing knowledge, and it was understood. We are in every nation and we touch the soul of the people of that nation and not their bank accounts or physical life, and we teach them and put them in position, and we agree with them that it is time for change and they understand. Now start understanding the power of your soul that you can. **And those of you who have done wrong now you have to put it right through your own soul through your physicality. We have to understand ourselves and the power of our own soul**. We have seen how it is made and how it works, and how it creates its power through the N, Gans, Cores, fields of the cores, and then through its existence confirmation that we are the fields, the essence of the creation. (:38). we take the side towards peace, collective understanding move in bringing humanity into the UC, but we have to allow the beauties to show and the mistakes of the past to be corrected because be it the soul of Libby, me, Rick, in China, etc has become one and collectively our souls have committed itself to peace and collectively we are changing the environment of this planet. Because up to now we went marching on the streets for peace, now collectively we put our souls, our energy brings peace to those who have a different agenda. The biggest achievement of Trumps leadership is and will be recognizing Jerusalem as the capital of the state of Israel which means now we are in closed conflict. It's not the human anymore, now religions have to fight, which were abusing the STM. Trump has become the man who unified the religions, you'll see. He put his point in to bring the physicality, we won't see house to house arrests, (:40). fighting in Jerusalem, because if you seen what came out of Vatican and Islamic world yesterday**, they are all fighting for one god. And that one god, collective consciousness is us as human beings. And now dictate because we can dictate peace.** Because in the world in the dimension of the soul of the man there is no war. Now the war is between bank accounts and power houses which now find that they can't find something else to fight about, because the Jews will meet the Moslems in the streets of Jerusalem and sort our the problem... then Jerusalem will become the house of negtoiation of peace in the blood of ?? and nowhere else, it doesn't touch China or anywhere else it is just for them. And this restless child with this move has come to peace. Now you can, you do, you call it a wish, make your wish. **We still have to go through the processes of everything else feeding, supplying, find materials and clothing because our soul has decided this dimension of existence**. (:42). We used to have the marches that lead to the revolutions and lead to a change of policies, governments and the kings. Now we have the marches of the souls in collective consciousness wanting peace and they don't need to march on the streets but gathers strength and powers that changes to no king, leadership, and equality and peace. I have achieved my aim and these few moves in the past few days according to the wishes of us collectively wanting peace has been completed. Out of nowhere suddenly we are going to bring Jerusalem in, it was our wish and they served as servants. We can and we are delivering, now we have to create the tools and toys that it gives the physicality to be busy, the rest has been done. **The process of the unification of man through the collective consciousness of peace, that has been going on step by step was the key for the admission of man to the UC. There was a mandate to me and I delivered. (:44). Collective consciousness of the UC to bring peace on this planet and to deliver an ambassador who knew how to do it. We are the Messiah, I am the "Medee", the return of Christ, of Moses and ??, because we all are collectively**, because it is not I any more, it is us collectively, this is your mission, you job and you have to understand

that you can. Let those who have a problem with this to find the answer in their souls and not in their guns. **You have to understand and practice to know the power of "can", then what you thought was the wish that somebody else would bring**. To be able to do this you need to exercise it, it won't come by moving a cup anymore. **It is by giving that brings peace to someone that they move the cup for themselves and not for you**. (:46). Because they need it more then you do, because you already know that you don't need to move the cup, because **you can tap into universal energy to receive the energy of what is in the cup, and take as much as you need and no more. You don't need to keep a full cup of water on the table when you only need a sip, and then you find another man dying of thirst because you held everything inside, by depriving him. You give the cup and by him being able to drink what he needs, he will (later) bring the cup to give to you when you need it, and not by expectation (obligation), but rather as a thanks**. One becomes a servant not to be served, but to be able to reach the servant, that I am serving you. The time of kingship is over. First we have to understand **that the time of kingship of our soul in respect to our physicality is over**, then we can translate it into the real life. We'll see in the coming time **that companies that manufacture arms will gradually come up with new dimensions and technologies which will mainly be around the production of the new plasma technology**, because they still want to be profitable and want to make money that they can pay their workers and creditors. The old game in town is over, nobody is buying broken buckets why do you make it. (:48). **I thank through my soul the soul of president Trump he has delivered our wish. I thank the soul of president Zhi of China for bringing the message of peace, through correct conduct and the development of technologies and structures in China that collectively elevates the whole of humanity in industries, knowledge, and technology. This is the way to do it. During my last visit to China we gto a good understanding of the Chinese leaderships work and we thank them for their hospitality and for what they have taken on their shoulders to bring peace to humanity**. The problem is for us to understand our power. For me**, today is the birthday of the father and it is precious. Go inside your inner being and try**, in the way you made your Gans' and see if you have the power to create something. Now understand that **you have a permanent reactor radiating**, you don't need to buy the power source to rtoate it to see if power comes out. (:50). **You know that it exists and is there because it has lead to your creation and you understand that you didn't have access to this gem, but now you do. Now I don't nee the intermediary of the brain to put me in touch with my soul to give me what I want. I get rid of the middle man which is the emotion of physicality and the use of the brain.** *This is what was missing from the vocabulary of the power of the man to understand that we needed an intermediary between the Sun and the Earth and the interaction of the fields of the Earth to create the O and H that it lead through interaction to the creation of AA that it lead to the creation of me, and then I created another intermediary called the brain between what I have gathered from the Sun to feed my soul, to create the physicality*. So we have become the subsidiary of the subsidiary the subsidiary of the subsidiary of a bigger company. Now we understand **that the company has one central management, control and that is the purity of the thought and emotion of the soul**. When the Sun radiates the light, the energy, the fields it doesn't decide that this one is going to my little sun, the Earth, (:52). or it goes to my bigger sun, Jupiter or Venus, it releases its energy and everybody takes

according to what they need, and **this is what has become the soul of the man, we have to understand this so that we can step into the next cycle. We do not need an intermediary in the name of god or whatever**. We need the understanding of the operation of our souls and that doesn't need an intermediary. When you want bread but you don't know how to make it you go to the baker, but when you learn how to bake bread then you never put a ooft in the bakery, because you make your own bread to your own taste and pleasure that it satisfies your soul. Now we have to learn the process so that there is no baker between the bread and our own pleasure in eating it. We don't need a faith, or others who in space oofls us saying that they know the god and want to take us to him, and call me the prophet this or that. **We all know the path to the Creator and that is the gift with these teachings and knowledge. It's you who has to decide. In time to come these teachings will become the norm of humanity**. Up to now Christ said, Mohammad ??, Bahaula had somebody to correct his writings, but **now you hear the words of God from the mouth of God, the Creator through the intermediary of the soul of the man**. (:54). You need no intermediaries and **if you understand this there are no souls that would ever destroy it will accommodate that it exists and lets others exist and it's a peaceful co-existence**. This is the process we have started and we have done a lot of work in the background. This week I tried different ways to establish to get the message, **and I set out to get the message and 3 days ago the message came, that the souls have accommodated, and then it was strange that we had been told that they were going to make such a move (?Jerusalem). We already knew but we wanted a confirmation that physicality has received the message. Dr. Paris as a member of the EC we have respected your wishes.** Rick shows his board of different size and shape magnets. You see these magnets, they all have fields, (:56). and all have collectively decided that this is the position we take. The shape, size, color is irrelevant because collectively, **I have decided with the other magnet on the other side, that this is the position I take in order for him to be there. You can compare each of the magnets that you see there to the soul of each one of you**. If you bring **one of these magnets close enough to a position near to another and even though you can't see it, there are interactions of the fields which are dynamic all the time, and it leads to the creation of a matter in the state of the power of the magnets, so every one of them is capable to create matter states at the dimension and strength of the field of the transition between the 2, as everyone has a capability of manifestation of physicality**. You call one the Earth, the Sun, the STM and one the STP. **Why do we call it the soul of physicality? (:58). Because it has a soul that in the dimension of its existence in interaction with the fields of the soul and the Earth has lead to manifestation of its physical dimension**. This is exactly what Peter showed us months ago. The interaction of the fields of the STM and the STP and in interaction with a third dimension which are the fields of the Earth has lead to the creation of physical manifestation of the man. This is if you understand, a matter is made, a matter state manifestation of the existence as we look exists on this platform (the table with the magnets). **Each one of the fields of these magnets in interaction with each other are creating different matter states amongst and between each other, because they need them to decay that the others can use. Collective consciousness of sharing collectively the totality of the energies which are available. This is the state of peace.** This is a state in a matter state we can achieve, but in the physical state of the man we have not understood. (1:00). In the interaction of my

knowledge and physicality with yours we make a "bread" that is a physical manifestation of our interaction of the fields, we make a car, a pen, in interaction of the STM in the soul of his gravity we make the human body, in interaction and presence of the third dimension of the fields which are the Earth. In the interaction of the Sun and the solar fields and Jupiter, Saturn and Earth **we make other things because each one has a soul of itself**. The sooner we understand this the sooner we'll achieve the state of the magnets you see on this board with the STM then collectively we have entered into a new dimension which is a collect U Community, collective peace, collective consciousness of peace. Move any of these magnets ... they all have to move to accommodate a peaceful transition, it doesn't matter about the size. ... if you make a wrong move the whole thing collapses. (1:02). This is what we have to step into, and collectively have to ?? **We move in and create a condition that doesn't allow the others to create conflict, and then we move out**. Collectively the human race is coming and achieving the position. **Peace through the operation of the STM is the cornerstone of the peace on this planet and now collectively we have decided that we don't use the ooft or a pen, but we decide through the soul**. The most advanced technologies created by man to make the tools of war, is perfect, because we needed that knowledge to transfer into making tools of peace, it's just a different application, it's making a tank or using the same metal to make a piano. One kills and the other is a music to the ears. Collectively in the understanding we are triggering the souls to understand their own power. (1:04). **Because up to now by keeping man away from the truth of his own power through the name of religions and gurus or whatever, that they themselves could gain the power. Now we give the power back to the STM so that no one can abuse it**, except if the man decides to abuse himself. Rick makes magic with the magnets. The big magnet is the STM, .. **the STM is a control of the physicality and in so many ways the physicality is (now) a controller of the STM. (1:06). and we don't need that intermediary**. ?? The little magnet is the STM in the gap between itself and the large black one, creates a bigger physicality manifestation of the body, but internally it dictates the position in respect to the others, and visa versa when the physicality joins the STM its the same game, Yin & Yang and Yang & Yin, it's all the same. **Those who are worried about what is going to happen, they should be confident that nothing is going to happen because they can create peace** and influence, because a little magnet as you have seen dictates the move of the others. The problem with us is that it took 4 years to get here, and it has taken 6,000 years to oofl the man. **We wanted it to rain, because we wished for it, it was our desire because our soul would have been hurt, and in that process we didn't need to sacrifice a virgin (old Pagan ritual), that the soul of the virgin changes the dimension of the physicality that it leads to confirmation of the change, which is the rain.** (1:08). Raining in the heart more then in the physicality of the rain form the sky. It's the raining of the heart more then the loss of a life that created the rain in physicality because it was the wish, and that is what man never understood. Because we can, we don't need to sacrifice (virgin) we need to comprehend the principle and now gradually with these teachings the humanity is moving in that direction. **Someone said to me, Mr. Keshe it took Christ and Moses tens of decades to become in numbers what you have become in less then half a decade. Because this time we have come to change and we have not come to rob**. We have come to teach and when you teach you move fast. Because all of us understand, the KF in less then 5 years since we started teaching (I

have been teaching totally 10 years), have passed the number of followers of Moses and Jesus in at least the first 3 centuries of their lives. **Collectively we have decided and collectively we bring the change. Because the soul of every one of us has the power to do, but we were not aware of our own power**. Now we are and now we don't need the dimension of physicality to go and march we know that within the wishes of our soul we can change and to let the other souls know that, I am not happy with the war. (1:10). And I am sure that you are not happy also and you'll find a position because I am a man of peace, then the tools are made for that to be achieved**. I will achieve peace during my time on this planet and it will be everlasting peace because we open the man, his eyes to his physical eyes that he is in power of the control of peacefulness**, and if he doesn't want conflict, as we have seen with the magnets they will move away. I stay there but I am not prepared to fight. I take my distance but we are all at peace. This is what you call collective consciousness. **Because we have all become collectively conscious and we know that we have the power to produce everything we need, the knowledge of the universe is in our hands. Therefore there is no need now to kill, to destroy, to see another package of energy as oofd and to steal it.** Thy shall not steal, when you take a bite in the flesh of a meat you have stolen from the soul of that animal. Now understand the true meaning of, thy shall not steal. **Man (will) become correct when he looses his digestive system so that he doesn't commit a crime to kill another, until then man will go through the process of conversion. Man will not commit a crime by looking at another person's partner, because he knows he has (already) achieved through partnership, his (own) soul.** (1:12). Man will not do anything wrong because he works through his soul and not his physicality and the process has started. This was our wish and we have achieved it. **The whole purpose of the current cycle of Messengers is that the time has come to use the power (within you) and you can and you don't need thieve another.** This is going to be very harsh for those who benefited by stealing from the soul of the others but in time what they have stolen will be used for the benefit of the man to teach those, the houses of god, be it the Church, Synogue, or Mosque, they will become the places of teaching the new technology ?? the soul. And when they all teach the same will there be any god to fight about. Now you understand. It's no use going and destroying all the Churches etc. .. now the Moslems, Jews and Christians will go to these places to learn that these are the houses of the STM and not for the abuse of the man. **Then collectively you'll find out that there is only one god and this is the correct operation of the STM**. We have done with the Temples, Mosques, etc. because even the religious leaders are made of the same and they'll walk the same way, this is what I can and will do, and I have done. I don't wish because I know that it was a term that man could understand. Now you understand that I have come to do and will do, then it's done. Now let us work collectively to understand the technology more that in the process we become more aware of the ?? gains of physicality and how we can enjoy it and not that we need it. I said, **that when we fully understand the technology then everything that we do will be out of the pleasure of seeing what happens and not that I need to do to give from my physicality for it to suffer**. (1:15). Going to a lab to make a machine to see if it can fly sideways while it is going up and down, will become a pleasure. Because I don't need to worry about the money because it is already there, which is no need for me because I know how to tap the energy out of the ?? or go hungry, I go and see what other games there are. This is how the U works, there are no banks, Churches or credit cards**.**

It's the time to enjoy being part of the creation. We have no factories in the U that the man has to give from his suffering soul to be able to find something to feed himself. Now we make it available. The way we have enligthened leaders of different groups and organizations that they are coming to understand that there is no need to go to war because it is not in our intention. Now we understand the process of peace, through not wasting time by being in pleasure, but I go and open a cafe, the coffee comes because I see the others coming in and sitting down and I taking pleasure in having served them. Because I have within my power the create a coffee in a cup with the different tastes even though it's the same water, **and I enjoy being able to serve to see their pleasure. Now we understand the total process and it's for us to make the change that we can and we don't need to wish**. (1:17). Any questions. The dog barks ... we have accepted responsibility for him and he gives us so much pleasure. Q: If you can repeat several times so everyone gets it, how the bread, man and other elements are created. Rick says, you tend to tell the story in many different ways so that everyone eventually gets it. .. The beauty **of the teaching is that it is recorded so you can just replay it and every time you listen to it you get a different emotion and understanding**. That's a good point. In the past it used to be the word of the mouth and it became (1:19). a "Chinese Whispering", and now we have the recording and it's the exact words that were said. The point with the present teachings is that there is no Chinese Whisper, **when I teach specifically in certain times it comes through the soul of the Creator, my mouth is the physical transformation of the knowledge. I have been aware of the existence of the soul of the Creator within my soul from the time that I accepted the mission**. The choice of the body and physicality has been promised centuries and thousands of years ago. In reality we had to wait for the technology and the development of the understanding of the man that there are no more "Hafizes" (abuses). That there are no more story tellers with the Chinese whisperers to suit the man. When you hear the word, you hear the word of the Creator at that time it is spoken, and that's all it is. Never claim it and it shall never be claimed. (Farsi). **It means if you don't want to stand out become part of the crowd, and when you are part of the crowd you can dictate which way the crowd goes because they ofllow you, and this is the way we have come**. (1:21). We have taken a position to create peace and we shall achieve. **All the guns, hatred, and opposition to us is meaningless, it just shows more and more of (ones) incapability, their weakness, and of what we can, do and we deliver what the humanity needs, because in totality we are fed up with destruction**. We hear the STM and we respond to it. We see a mother giving life to a child to become a soldier to be the pride of his nation because she wants to be powerful, I am, I can bring to be a nation that we control, but when the bullet goes and that child dies the mother curses herself and suffers for life, what happened to my son. Outside she might be proud that her son lost his life for the nation, but inside she cries the loss. And this is what our purpose is, not to have the cry, the pride, the pain, and to not pretend to be joyful. This is what the ?? are, you don't need to go back, **all my teachings are recorded, you hear it from the horses mouth. No one can interpret it, the minute you ask for somebody to interpret it, what it says and means, (1:23). it means that you have not understood part of the teaching, go back and understand it and you will have elevated yourself**. You don't need any messengers, priests, etc.. to interpret it for you. Because when they interpret you have become a slave to their interpretation because they can use it. This is the beauty of the

present time, education for all, everybody can read, listen and comprehend. Now you can educate yourself. You want me to explain in different ways, it's the same story, but now you have the recording, just press replay, then there is no Chinese Whisperer. Jan says he understood but he was asking for everybody else to understand. No everybody understood. (1:25). Shrtoa from Australia, but from Georgia. Q: **Every Orthodox Easter the Orthodox Christians have a miracle that takes place in Jerusalem at the tomb of Jesus, a "holy flame" comes over only for the Orthodox Church**. I would love to understand this and how can we explain this. It ?? doesn't burn for a few hours (fire that doesn't burn but can light candles)? You should have answered it yourself. Actually I answered it myself ... so let us know how you explain it. It's a blue fire plasma (1:27). but why does it only happens on O Easter. **Many scientists tried to explain and measure it. They measured radiation, not radiation but magnetic fields, but they can explain it properly.** I am not sure how it's created. **No, let's go through it by yourself and not by me, because you are intelligent enough. Go back on the time and event. The Tomb of Christ. Can we analyze it and open it up, can you as a Christian explain to us. Does a Jew or Moslem see the same light or is it just available to the Christians? Everybody can see it but it (1:29). only comes over an Orthodox Church's representative or High Priest**. Can you tell us the origin of it? I am not sure I can read it. it happens annually on that day to a Holy Father of the Church at the Tomb of Christ on Easter which eventually forms a column of light containing fire from which candles are lit and used to light the candle of the Church and pilgrims in attendance. (1:30). The fire is said to spontaneously light other candles and lamps around the Church. The clergy claims that the fire doesn't burn them. You are the interpreter for us we are Jews, Moslems etc. I am not ... **No, no you brought it and you understand it and your knowledge is equal to that high priest and the prophets of the past. Go to your soul and explain it to us. This is what you have to do in the space. ... You are knowledgeable enough to understand**. Do the candles get lit one by one by themselves physically or do they come by the light of the man that their fields, their physicality lights the light of the candle? ... **you are exactly in this position as Alex was 2 years ago when he brought the beads up, yeah, or when we showed the MaGrav System. There is a purpose that you are here and it's very important. There is a reason you are here at this time and minute and bringing such a thing up with these teachings. It's not coincidental** but we have to understand and for you, a man at your level, coming from the O Christian background, from Georgia, somewhere in the Middle East and now gone to Australia. (1:32). There is a purpose for it. Let's explore the purpose that you understand it and explore it and don't teach it. Jalal brought up yesterday that **there are twins in the Middle East that when the daylight comes up the go paralyzed in their arms and legs and can't do anything, but at sunset they can move again. And there is a girl in Iraq that in the daytime she grows hair and at night all the hairs fall off.** He asked if I can explain this. Jalal is he on line to explain this? Okay, Jalal you're a Moslem, you have the Christians, and you are both speaking about the same thing in different dimension, you explain what happened in those 2 cases, that through the light of the soul of a Moslem a Christian can understand about the manifestation of his own prophet, that he doesn't (just) believe but he also understands the future. (he's at work) Am I allowed to do the explanation. Yes, please. **Now I am a (person brought up as) a Jewish, Moslem, Bahai and now I have to teach you lot, but it is all names, so you**

can forget about it. The reason I don't believe in any of the religions, is because I know through my soul, that it was a game to guide the man. (1:34). There was nothing wrong in it, but man couldn't understand and he had to mature and do it step by step. I am not Jew, Christian, nor Bahai nor anything else. I am a human in the STM who believes in the equality of all. I passed and matured to understand that there was a purpose for the names and they had ?? and now we see in the physicality and what Trump has done. But why does a child go paralyzed, twins everyday on the sunrise? It's a miracle, something we don't understand? Yes, up to now if you were not versed with the new understanding of the work of the plasma. **Now if you understand that everything in the body is field dependent, you should have been able to answer it. The MG fields of going to sleep or ?? has a strength. Crying has a strength so does fear that in the filter of the brain creates a contraction and escaping or whatever. Where these 2 twins are and the condition of the emotion they carry happened to have a MG field strength which is coincidentally created at the time where the sunrises in interaction of the field of the Sun and the Earth, that it is like a frequency, you tune to channel 9.99** (1:36). and that channel to these 2 physical conditions at the point of birth is the sleep of the arms and legs, you call it paralyses. Caroline asked, if we moved them to another part of the world would it occur at the same time or because the fields are different they might change. **We have a hidden strength that works through the soul, is it the strength of the soul or the strength of the physicality of field interaction of the Earth and the Sun which creates the paralyses, or sleeping of the arms and legs. Now we understand and can create a machine, or put these 2 kids in a condition slightly at the strength of the emotion of the physicality of the soul or the body and you'll see them living full time day and night.** All of this gets hit by this, we can move into a condition and we change. It's very strange what it says about this. **In Italy especially if you live in the south like us, we have a collective paralyses like the twins, for the whole of Italians in the south. If your a tourist you don't feel it, you don't understand it's incomprehensible. The condition of paralyses comes in April and May, they call them the sleeping months**, out of nowhere around about 12 or 1 O'clock you just fall asleep, there is no way they can keep you awake. It repeats itself in a lesser strength in September and October, the April and May is a killer because the MG field of the Earth in the position of the season, just ?? to the whole of humanity (1:38**). in this area that you feel exhausted, it's literally paralysis.** For the 2 twins it was just 2 children, this is the repetition every year. The first year we stayed in Italy we felt it, it was unbelievable. During the teachings at that time sometimes you hear Rick turn off the microphone because I would fall asleep on the chair for a few minutes. They could hear me snoring so they switched my microphone off. **So now it should be no mystery, now we understand that the position of the fields matches about and it creates that condition. But in Italy it hits the whole environment of the south, known as the sleeping months**. ... I even saw that some visitors to the KF gto the disease, but now we know that it is the field interaction. **The field created touches at the strength in our brain, as a filter that creates that condition. Now we can explain these strange occurrences and it's the same with the girl who looses her hair.** The ?? field matches the growth of the hair and the way we drop hair everyday. All of us looses hundreds of hairs everyday, the hairy men know it better then anybody else, you need a bucket to shovel it every month. Now we understand there should be no mysteries. (1:40). **Now**

when it comes to the explanation of this Orthodox light, understand where, a light, Christ moved out of his own body in a state of the soul and then when the physicality, the state of the physical soul diminished he brought his own soul to dictate a new cycle of life in a different dimension of physicality, you call it reincarnation. We know this, so now as a Christian explain to us how, what you see and enligthen us because you understand the knowledge. **The actual date plays some kind of role which creates a field strength which allows it to manifest as a fire which doesn't burn hands for a few hours, because so many people are gathered together to see this and they believe so much in it** ... Okay, we do some corrections, is it the fire of the soul that it doesn't burn or the fire of physicality, so **we are talking about different types of fire. .. is this the fire of physicality's soul that it manifests itself in a physical condition, therefore it doesn't burn. So the man walks in (High Priest) which creates that condition which the Christ left through his soul**. (1:42). The other part is that it passes through the other people who hold the candles, by the wish of each person standing there creates the field that passes the fire on to their candles. **In my understanding it's the wish of all the people standing there to receive that energy, fire that manifests as a physical fire on their candles**. (correct) That's how easily you explained 2,000 years of mystery. The reason I want to understand this is that I want to teach this in Georgia where the Orthodox Church is very powerful and I wanted to have every answer that might come up. You don't need to have every answer. Never have an answer, enligthen. .. reach their soul before you open your mouth then they'll understand. **Learn to teach through your soul. If you listen to me in the past few days sometimes I go quiet. (1:44). It's not that I need to gather thoughts, I feed that the knowledge spreads equally to the STM. You can teach the soul before you start talking**, then they'll understand it. So as 1 Christian Georgian has understood this now because you have become that light the rest will start understanding. It's you who has to teach it through your soul and not through your mouth. You can do it from Australia then you don't need to go and teach it in Georgia. ... **my great-grandfather comes from there**. That was the land where the Jews had a good money making system so that is why they were there. That's why we have so many Georgian Jews. They were the backbone of a lot of revolutionary changes after the split of USSR. Georgian Jews did a lot in bringing a lot of things into Russia. I used to work with many of them. **You see you understand a mystery and by you explaining more you'll understand more yourself. This goes back to what I taught in the past few months, you can hold out your hands and create gold in your hands. So now it is the wishes of the people there to create the fields (1:46). through their soul, and it lights a candle.** We have already known this, but the truth has been kept away from you, and now a layman like you can explain it so simply. It doesn't need any Jews, Christians, or Moslems. **If you teach this to Vatican they would kill you, because something that is a mystery they used to dominate and now there is no mystery**. Q: There are also icons in O Churches and when people pray to they give from their soul and when somebody is sick they can go to **the miracle icon and get cured of diseases** or have anything they wish. My understanding is that the icon receives that energy when people pray on it and when somebody needs something it gives back, their soul manifests it. (1:48). **Some icons start to cry blood**, I can't explain this. When people go outside of themselves it's not right, the Church steals the energy from them, they make you believe that this icon gives it away. Okay now try to re-explain

again and see how much more you understand ... maybe I can go a bit deeper, those Icons that cry maybe people pray so much on it that it create a plasma field around it. (1:50). that it starts to create a physicality, I don't understand why it's blood or a sorrow manifestation. Are the people trying to give their negative energy. Icons in Georgia's Church plays a big role in peoples mind control. Maybe it's not that clear Mr. Keshe? No, it's good, when you bring such a discussion on the table, you haven't come to show a reactor or a new method. What you brought ... the seed of it was set yesterday in the private teaching. I **knew this discussion would come up today, but there was a need for a soul to deliver in the voice of the man.** (1:52). It's not coincidental that it was discussed yesterday and other teachings or the move of the American government. We are all step ?? in the development of the other souls and gaining position. Now that you brought this discussion in the way that you explained it in your understanding, and we tried to explain the science of it in the background. More people will come to think, it's not just a voice. **Hundreds of thousands of people listen to these programs, we have reached millions and somewhere down the line you have inspired people to think, now all these things that are used as miracles to control man has a physical explanation**. it has an explanation that they never thought of and from a layman, if I explain it, they say Keshe says, now they say a Christian who understood the knowledge and can explain it himself. We haven't brought a church that one sits and they tell you something, we brought the ethos of understanding that we all think and we can accommodate each other, this is what Dr. Paris bashes on me, collective consciousness. **Collective Consciousness of the soul and not of physicality. It's a big difference**. We work and explain and when the time is right someone like you, a layman comes and can explain the light. (1:54). Because now you have the scientific explanation of it from the past 4 - 5 years. You understand why on Easter the light appears, **because the people go there with their souls to see, so they have already created the filter. And you have to understand that the light of the soul of the Christ dictates the manifestation of physicality of himself, let alone the candles. But it has been misused because it was never understood, now we understand. It is because everything has a MG field strength**. Was it coincidental that the field strength of the planet at a given time always matches and creates that light, that it matches the soul of the man with that intention manifests itself in the physical dimension of the light. So what ?? is what we have been teaching and now you understood. **In a way you came and sat for an exam and you passed. And now you have become a teacher and you have to teach through the soul, not through the physicality**, but you can explain the physicality. Can I share the screen. (1:56). With the **explanations like what you gave will stop us to create more prophets in the space because then we'll understand the true process**. He draws an icon, when people pray to it, it creates its own MG fields and decides how to manifest itself, as a blood or oil sometimes. Do we know what is inside this, is it a physical blood, they don't test it. Mr. Keshe says**, now go back to the science, we have a field strength that matches with something inside (the icon) that is the level of the emotion of the man**. Everything in the U is explainable. When somebody says I can produce magic say, explain the magic. We see these things around the world many times. (1:58). Here it converted itself to a tear to manifest the pain of the man and **within this structure of this metal, this Icon there is something placed (in it) that creates the (field), somebody understood when he made such a thing**. Do you understand? In **Brussels square there**

is a statue called "Manicanpiss", it's a few inches high, on the road there is a (statue) of a lady lying down and they say if you make a true wish and if you touch the lady from toe to head, **but it brings only 1 wish that of having a child and then you'll get pregnant**. You see many people walk and touch this statue**. It's not the statue that makes you pregnant, but in a way the field within it allows the field emotion of the man to be in line to receive life**. The woman (statue) is in a lying position and we make love in a lying position that we can impregnate or make life. **Even the position of the stature was chosen .. the guy who made it understood the concept, the essence of creation.** (2:00). I know many people who gto pregnant by going to see this statue when they wanted it and the soul agreed with it. There are many things like this around the world. Tom Cruise's wife went to a lake in Australia where Aborigines say you can get pregnant and she gto pregnant. Because now we understand that it is the field strength that touches our emotion ... our brain has created a massive dense filter to convert its fields to physicality, whereas with the Sun it takes millions of kilometers to do it. The more compact the soul gets the more clever it becomes, because it has more energies packed to go. We say in Farsi, the smaller the pepper the htoter it becomes, they say, if you want to taste a pepper break it, don't look at its size. Because it's the essence of it. In our soul we convert this, in physicality we made. **Many people over centuries have been enligthened to this knowledge and they transferred the knowledge into the physical condition or to statues or other things,** (2:02). in a way that people could understand it, otherwise they would have killed them. You know what happened to the first man who said the Earth was round. **Many people throughout the time of man have been enligthened but they couldn't pass the message so they hid it in different statues or whatever. And it works so that's it. But even they themselves couldn't understand that it was the soul of the man**. The beauty of it is that the manifestation of the soul of the Christ, ?? the **catholic body of the Christ is called the resurrection, it moves out soul with physicality and then re-manifests itself. This will be done by many people who reach the purity of the soul**. I had said in the teachings that the repetition of it, exactly what the Christ did when he resurrected, in a short time.?? was **done by the body of the Bab (Bahai) in Tarres when they shto 900 bullets at him. In that case it was an instant resurrection because he wanted to show that this is my power. In physicality the bullets hit the body, but in soul he was not, he reincarnated himself**. In the reincarnation of Christ in which people say that he wasn't gone, has truly been repeated in the ?? of Bab in Iran, clearly but people don't understand it so they just write it as part of history. The Iranians have made a TV series about it. This is what is not good to do, but it's the way we have to understand it, how can you shoto a man with 900 bullets, because he said I have not finished, and he is where he is. It's impossible. A magician? (2:04). Prophets of God are not magicians. **It's a resurrection which means he has left his soul and re-manifested himself in physicality**, his physical life is not there. These are the things we need to understand and the faster we do then the faster we become passengers of space because then nobody can oofl us. We just look at what it is. I used to play a lot of magic with my boys, when they were young they were innocent, it's like the human race. I used to put the coin in my sleeve and they were looking everywhere for it, then I would show them and say don't get oofled. ... This for us from now on has to become a known and all these things that has happened to us as magic and mystery has become the backbone of our knowledge to understand so that we

can't be oofled anymore because we understand the reason. **When an entity shows you a wind that half of the Earth will shake, you say, show me how you do it, how do you change the M fields, you show me the strength and which part of the spectrum you use, then there is no magic and you don't call him the god of wind.** This is the beauty of the knowledge and **we have given man the totality of the knowledge and it's for the man to understand it then you can live in the spans of the U**. Even when god comes and appears in front of you, you say okay I want to see the sequences (2:06). this, this and this. Because my soul is talking to you and not me and I am you, because I am the soul of physicality, I want to see if I want to give my life, my physicality as a STM to you. The STM has lead to the physicality of the STM that it comes in the dimension of manifestation. **So the STP is aware of the existence of the soul of its own created, creator (?), that it lead to its creation. It's the collective souls of the entities within the egg and the sperm that lead to the creation of the STM, and now the STM in return as a collective shares balance equal to all the others to lead to the creation of the physicality of the man of the soul itself**. The sooner we understand this process then we see the same, the presence of the STM confirms the existence of the soul of the Creator, otherwise there is no creator. **Our soul as the STM, which has lead to the physical confirmation of the man, confirms the existence of the soul of the Creator, without us He can't be confirmed.** So we are part of ... we are collectively as one and without Him we can't confirm the existence of our soul, (2:08). because we gave and now we receive from what we gave, we gave to elevate all of us as equal that we became the STM and now through it we get confirmation of our own existence. **Then you explain what kind of filters you use between the two, the brain, the spaces between the solar system, the galaxies,** the center of the U and the galaxies and then the space between the universes and the soul of the Creator. It means our physical soul's existence as a STM, for God to exist to confirm His existence. "I made man in the image of Myself". So **nobody can trick us, we just have to look at the filter, how it is and which filter has been used**. The sooner we get this the faster we become man of space. **You see the lights of the screen (stars) they would be like the soul of men, of the entities in the universe flying around and it depends where these lights manifest themselves as a star, moon, or a light**. there should be no more magic for us. There should be clear understanding that **we are part of what we are because we chose to give manifestation to the soul of the Creator**. It's so easy. Now do you want to explain more of your understanding to us. (2:10). He draws a figure of a man with a dto for the soul in the brain and a heart, which is through giving emotion, a field which goes to the soul ?? which starts to feed our body. It's very correct but let me expand on the knowledge. **The heart of the man is the collector of the individual soul ?? of the emotion of the physical soul of the body. It goes around and collects from all the subsidiaries and then when it comes into the heart, it's like the sperm to the egg which comes collectively together and creates the soul. that in the heart through the operation of the fields** (2:12). of entity ?? and existence of 2 the physical and the emotion leads to creation of the continuous balance of the soul of all parts of physicality and in conjunction with it, in the interaction of these fields with the STM creates a dimension of the physicality of the man. If you look at it ?? other way, the soul of the center (not the soul of the heart) the center interaction balancing of all the physical souls sits within the heart of the man. That's why when you shoto the heart the body dies. When the heart

stops working it looses its participation in the physical soul, to the main soul of the man to keep the balance. The STM is for example the Sun, and the STP completely connected at any instance, is the soul of the heart of the man, within the heart of the man and the 2 need each other to confirm the balance between the manifestation of physicality and the existence of the soul itself. **That's why the blood cannot feed the brain because it has its own source it receives its energy from the universe, from the environment outside the physical body**. That's why we don't see any blood vessels in the physical structure because it uses it for its manifestation of it physicality. Q: How can we create a Free Plasma with our intention? (2:14). ??? different emotions. I am going to go back. You have a big (bread) dough and you have to decide how you want to cut this dough and where you want to place it, one will be a cake, biscuit, one sweet and one salty. **Now you understand the operation of your soul in your brain. Now you have to see what temperature, what distance, where you are going to put what dough with what ingredient and where, and what ingredients need to be added to it for it to become a cake, bread, salt bread and the others. The beauty for you is that you don't need the physicality to control it, you have to understand the field strength of the environment that you manifest in that point what you need.** It means that man has to learn another dimension which he already knows but he never comprehended it, **collection, part of the fields of the environment where through the release of its own fields can lead to creation of the other one to see what he has created.** This is very delicate, it's like a telephone call, you have to receive the message of the lover, to be able to speak the love words back to them. And it's within us, our brain and soul has it, (2:16). but we never understood it, you have **to become more educated in the inner working of the strength of different fields in your soul, that I have to detect the field strength of the environment and at that point I want to release a bread with certain things that, that at that point it tastes like a sweet bread and the other one, at about a half meter away is salty. You have to learn, not only to give but also what am I receiving**. Our soul or let's say **planet Earth doesn't receive just any MG fields that are coming, if it doesn't have it in it, which is a need for it. The field won't touch it, it passes on. Somewhere inside the planet Earth there is a need for a given strength field to come in, because it wants to give but it needs a receiver to give it, and then it gives more**. Even Earth has a mechanism to know what field strength it needs, it doesn't absorb all the fields from all over the U, just come in you are there I take you. It only takes what it needs to manifest the weather, the air we breath, the interaction of Mg, Ca or whatever we need. Now you brought a new extension to the knowledge which we have explained before and it goes back in part of the teaching very recently and it's in the book, **the Earth, body of man, the U, the soul can only expand into the dimension (2:18). or to the space which is available for it to exist and it's allowed by other universes for our U to exist within**. it's the same, just change the U to the STM and the fields of the environment and you get a bread, sweet or salt bread. Thanks to your coming to the teachings that now we were able to extend the knowledge further. Now not only we know we can give, because we said that you can create light in your hand (candles were lit by fields), And now we know the soul is part of us and we can do it better. Now **we have to understand the needs of the balance of the fields of the others at a given point, that they like, along with us, to make the bread at that point (red spto he drew on the screen). Now it's coexistence interaction between the fields, then you can produce**

anything, because you respect the environment and you understand it, and you give to it because it gives you the pleasure of your physical soul to be provided by the STM. This is something that you have to understand, I explained this a couple of times, maybe we can go in the depth of it again. **The STM gives unconditionally to the STP for it to see the pleasure of existence of the soul, and for the STP to see that it can create the physical condition of manifestation that it can be observed that it exists. The soul doesn't just give to the STP, it gives to it so that the STP through its power can show that I can manifest myself, and with it through that manifestation confirm the existence of the soul**. (2:20). This is not theology, **these are pure physical facts**. This is science and it has nothing to do with theology. It means that those who call it this, who call it a magic, it's because they don't understand it. We are not talking about theory and theology and the existence of God. This is a physical manifestation, the Earth exists because through the fields of the Sun in existence, in conjunction, in interaction with the soul of the Earth, the **Earth can manifest itself as a beautiful planet that with it, it confirms the existence of the Sun**. So is the STM with the physicality of the man. If this is theology then Earth is a theory it doesn't exist. In the interaction of the G field of the Earth leads to the creation of the condition that the Earth can manifest itself, as being. Is this a theology, ... it means we are all ignorant to the true essence of creation. And what you have shown is exactly what it is so it should not be a mystery. Now you have to understand, this is the same in all the teachings, **you manifest yourself in the space according to the condition of the environment in which you appear and if your physical soul would like to manifest itself in this environment**. It's like you pass a road and your wife says lets go to the party, but you say I don't like to go to the party because they drink, smoke and do this and that and I can't stand it so I am not going to the party. **If you don't go to the party it still goes on, but if I don't go, it's the same as if you go and you become another member of the crowd and it gets bigger**. (2:22). But it doesn't mean ignorance or the non-existence of the party, or the ignorance of you not existing. This is a beautiful thing we have at the KF and they put it at the btotom of the website, it has to be right at the top. It says, where science meets the soul. **Because the soul is scientific. It's not theology**. those who **want to abuse it sticks it with theology and those like you who understand it can expl**ain it scientifically. Then this creates a problem for them, they can't rob you in the name of the Church, Mosque and the rest of it for centuries. **Now you understand whereas before you couldn't put it together that you can create the condition for the wisdom of the man, which is the confirmation of the existence of you. And nobody else, because you have no right to interfere with another soul unless it would like to share part of its fields with you and not all of it**. There is no theology in this science it's a pure physical understanding and it has to be one to lead to the creation of the other or manifestation of the condition. **There has to be a creator, the One who has the essence of the totality, or the majority of the soul, the resources of the energies of the universe that the interaction of itself by the fractions of which are created out of itself, (2:24). can perfect and show itself in comparison to the totality. We are fields which over millions of years, which have no time in the real life of the creation, have separated and become small and then fractions and then ourselves in fraction become, and in interaction with the center call ourselves of the existence of the totality**. It's like you live in the village and you move out to another field outside but you still keep in touch with the village and that village is kept in

touch with the city. So the city can exist without your little village, and the village can exist without you as a person outside it, but your confirmation clearly states that there is a village, and the village confirms through people going to the city (that there is a city) to get some else which there is more of in, so we go for more of and more of and more of. **The creator needs the souls of the fractures and frictions which are created out of the interaction of its own fields, to exist, to become, to manifest themselves that through that manifestation confirm the existence of the Creator or what we call the God or the soul, solar system and their**. I made man in the image of Myself. **I have all the attributes of the Creator**. Therefore we can create anything in the space ourselves. The KF is opening a number of research centers and in one of them, which we don't disclose anymore, there is a development of these things has started and we'll go to the next phase of it in the coming months, you'll see. (2:26). **In the coming time we will create a soul, exactly how an egg and sperm come together to create a soul and then collectively we'll accept it to be the soul of this planet, us in equal that collectively through the soul we'll operate with the rest of the U Community, this is how everybody else (in the universe) does it**. Otherwise everyone goes and wants to ?? the body of the man works the same way, so does the universe. This is the reason we set up the UC and EC. People (?don't) understand they look at the physicality of the people of the councils, but in fact the operation is through the soul of the man of the members and not their physicality. And nobody has understood this but gradually you will. **It was the wish of a member of the council not to see war in the Middle East, that was Dr. Paris of the EC and we granted it because his wish was pure**. He saw the Iraq and Iran war and he had to help both irrespective of ??? teachings. He did not want to see that again and it was granted. We'll see the "Sabaa" will announce different moves in the M East and we respect their decision, the ?? understanding through their soul, the same with the Saudi, American and other governments. We have elevated their souls, this is not coincidences. They see that there is no solution through war and there would be more losses. **We don't support any radical organizations, we support the STM which sits within these organizations, (2:28). that it wants peace and carries it out**. Because now it has the strength (from) us that it can receive it, give and elevate. Now the soul of peace has found the ?? tone of work through. It was the wish of Paul on the EC to bring peace to Togo and we see it, one man. **These Council members will become a point of strength for man to understand because they come through the souls**. Those who came with a ?? tainted heart, they have already left and will leave. **Those who come with the true souls to serve they come with the strength for all humanity**. There is no theology, it's understanding of the work of the interaction of the fields of the physical state. Theology belongs to those who play magic, because they never understood so they can use "subsidiaries". There was a reason you came here and I knew this discussion would take place, it's amazing how people bring the subjects on (the show), because we have already called up on the souls to be there. I wanted to talk about this for a long time Mr. Keshe but today was the right time. Thank you very much for coming. .. Don't make a wish you can, that is the difference. (2:30). Before falling asleep I make a wish and put emotion to it and sometimes the next day or in a month it manifests itself. I have tested it a few times myself. My understanding is that I can communicate better to my soul when I go to sleep because the brain ... when the wish is for everybody it manifests more clearly. (2:32). Any other questions. Q: **Now that we are reaching peace in the M East what**

about North Korea and the USA, whose soul should we elevate? Don't take me there because I can open a Pandora Box that a few world leaders would resign immediately. Maybe it's time to explain this. The problem in N Korea is not US, is the US itself. There is something that they don't tell you and I know this is going to create a lot of problems for whatever reason for whomever. **At the moment chemical warfare testing is illegal across the planet. No one can do physical chemical warfare tests. But it is done in N Korea and the nations in this business are paying them to do so**. Who is paying for these tests. In the west it costs millions to do clinical tests. Now they pay governments to do this. Which governments need this, China doesn't. (2:34). There are 2 or 3 nations that would like to develop their chemical warfare and other new technologies in countries with a dictator and nobody will ask questions. Walla you have your answer. Israel is one of the biggest clients in N Korea for chemical warfare testing, we know that from a CIA report. So where does the money come? We know that the technology for launching missiles is given by European governments, we have disclosed their name and they know. Knowledge, science in exchange for life of man. So is there a problem between N Korea and America, not really, on the surface yes, because without N Korea American scientists can't do their tests ?? call them whatever (in the press) but do all your operations inside (their country). This is how it comes, there is nobody .. once man understands the work of propaganda that is going on, what will they do. The biggest contributor to the State of Israel is Saudi Arabia, so the Israelis have a great say into Saudis work, as well as ?? because the Saudis pay the Israeli government to ?? the Palestinians, that's how it is. It's not a bribe, it's an open book policy that has been going on for decades. Without the support of the Saudis the Palestine will suffer, the beauty is that it is the grace of the nation, but to give them help and freedom or whatever, Israelis use the game to play the Saudis. So on this the game is finished. (2:36). You have to open your eyes to the diplomacy of the world leaders and see the soul of the world leaders. .. it's the reality which exists .. China doesn't need N Korea to test because it's the structure of the nation they can do it ?? they have the knowledge and the power, but they are a peaceful nation and they don't need. You have to understand the beauty and knowledge of president Zhi and the Chinese government, they don't see the need to develop these things so that they can do more for their nation to keep them calm and serene and peaceful. Whereas with the American it's different, with shouting they try to create peace but actually they want to have a war. The N Korea ??? is the Americans and Israelis are fighting for their own tests. Germany is one of the biggest contributors to N Korea through another European country. We already exposed this to the securities and gave them all the documents. So is there a problem in N Korea, in the news yes, they are testing yes, but nobody is telling you that there is a huge amount of chemical testing being paid by the Americans and Israelis, now you know where most of the money comes from. The same thing is in Saudi Arabia. They want to sell arms and dictate in different ways and then put the Iranians against them, but now they have become wise to them through the STM and we'll see. This is the beauty of the technology, (2:38). **this is why we feel comfortable to work with a nation that has 1 face and not 2 and that's China. It is a pleasure to be and the KF will support every move the Chinese government makes because they are a peaceful nation. All my technology is at their disposal and they (west) know it. Some of you didn't know and now you do that I traveled to China twice meeting with top people in the government and ?? full transfer ?? and**

in my talks in the past few months you should have understood that. Nobody can stop it, we transferred the knowledge, the technology and it will be used for peaceful application. The KF team spent time in China as a group so that we develop things that it comes, we see the peace through the understanding of the soul, and so do the Chinese. I have every respect for the Chinese leadership because they don't talk they do. I have spent months in China in the past few .. time, to make sure the process is complete. At this moment the KF team in China are developing everything for the peaceful application. We are committed to peace and work with the peaceful nations. We asked the Chinese to keep silent about our present and they respected it until we announced it today. It's time because in the past 48 hours we see the end of religions and we see other moves going on. .. there is no problem in N Korea (2:40). if the nations don't want to test and hide. Now ask the Israeli government to release how much chemical warfare testing they are doing in N Korea. How much weapons technology testing are the Americans doing there, they hide and shout. This is a very interesting point so that you can understand more. DuPont the producer of Teflon have faced multi-millions and received penalties of $350 millions for producing **Teflon which creates the 9 most dangerous cancerous elements in the world that we know. In the US they have been banned to produce it. I can publish the list because we are involved in these tests. KF is heavily involved we have spent nearly 2 years in development**. DuPont gto penalties for dumping in waters in the US and many multi-million dollar cases from people who gto cancer from swimming in these waters. It's not going to end. But all of you ladies would like to have Teflon in the house, yeah, so they moved the operation to a European county and now their waters are poisoned. We are working in that country to reduce it, we managed to reduce some of it by 93% and some by 45% .... (2:42). **People in the US are still using Teflon,** in China they are watching that it doesn't contaminate, they are controlling it. Now Europeans are getting cancer because Americans are using Teflon. They exported their problem into Europe. Because when they do it in Europe they are safe and don't pay any penalties. But what about the Europeans who are getting cancer? It's heavily in the water system in Europe now, over 65 wells have been closed in the past 18 months because of this contamination. Where is the noise (prtoest)? Now what they have done is to take it to North Korea and you get Teflon from N Korea ?? I can bring you our specialists, KF permanent staff who are dealing with this, we are trying to develop (a cleanup), we gto a MG field condition we are working on to eradicate this contamination. So you want Teflon, America is having it, Europe now has become wise to it and they're going to stop it and give heavy penalties. So who is going to do it? North Korea ?? ... this is why their nation can afford these things (nuclear tests). If the Americans, Israelis, Chinese and the rest decide then there won't be any war. Be open, we can do not chemical war tests, but chemical tests to see what ?? has been done?? in the space, we agree, this has been done for ?? (2:44). But even in this we have to have an agreement for the ?? community that we don't endanger them. This is the U Council is for, their job. ?? this is how it should be. Who is paying for all these tests in N Korea, where is the money coming from if this country is not doing anything? Have you ever stopped to think about it, do they grow grass to feed the people, we don't see their dead bodies on the street. The money comes from the US through the State of Israel to finance it. So there is no mystery, they can play the game but we see the soul, they can't oofl us we have the information. The Chinese, Japanese and Koreans are watching this game. What is it

(chemical weapons) going to be used for? Why are there so many Israeli scientists in N Korea, so many? Or trained by them to do what they want them to do. Stand still and think about it. We asked for the end of the State of Israel because of what they have done in Jerusalem, they ended for themselves. We wanted to have peace and it was done, because it was done by a world leader, and now its going to be done in a different way, ?? it will take us a few more months or a couple of years. (2:46). it will be done. Then we'll have peace because there will be no State of Israel, Palestine will become part of our one nation. ... it's this way because it sells arms. Iran being a rogue nation it sells arms to the rest of the Middle East. Now this process comes up, now with the intelligence and elevation of the soul of the Iran government that there is no need for war as we are a peaceful nation, we see their retraction and the process of peace coming through. It is our wish and it will be achieved. North Korea is not a problem ?? as long as Americans don't do weapons technology tests in a country ... now everybody knows let's see what they do. We have an intelligence report on this. ... why Germany who is not supposed to be weapon country becomes the 6th member of the nuclear negtoiating team. It's against what we signed in the UN in the Second World War. (2:48). they start killing other scientists like me ... we let our souls interfere and they won't even know what happened.

.. they were developing these weapons to later use against China so that they can have more power. Now there is no power so what's the us of it. There is enough knowledge in China from what we left that they can enforce peace and we support them. I support the movement of president Zhi 100% and even with my life. He is a man of peace and he needs to be supported, no games. I have repeated many times, we transfer all the energy technology into China. And the space technology because through it we'll achieve peace and we won't have these Mickey Mouse games. We don't take sides, we see what it (really) is and if the Americans move their position we'll work with them also, same with all. The technology belongs to all. Understand that there is no move but a peace move. Put your weapons down and I'll give you the knowledge of the U and you'll be ashamed why you even contemplated for 1 second something else. (2:50). They have to do it themselves otherwise they say I did it.

Dr. Gatua shows what he is doing in Kenya.
(2:57). Comments.
(2:59). As you can see we spread the technology equally across the planet so that nobody can abuse anybody. 25

(3:04).Dan presents Water Crystals. interrupted ... (3:06). Caroline .. I would love to get more explanation **of how the earth is actually not warmed up from the Sun because above a certain height it is cold so how does the Sun interact with its field strength with Mother Earth to give in certain places a change in temperature**? And if you go up in a balloon it can be very cold up there so the sun isn't radiating it's warmth from the source so its field strength, how does this interaction with the Earth gets created that in certain places you get a higher temperature or a lower temperature, we know from the science that there is a warm field and such a cold field but that covers the whole planet. Is this possible Mr. Keshe? **Yes, the creation of the AA and the fields what we call the light, (3:09). comes from the MG fields of the center of the planet, which then ??**

whole of universe, but at certain distances from the Sun (from the Earth) in interaction with the field of the planet it creates the matter condition, but if you go through all the books and my writings, I explained that **Earth has a composite MG field**, it's the MG field from the center which expands, and then we have what we call in science, Inertia, which comes from the MG field of the matter state, it's like the soul of the physicality. The heating of the surface of up to say a limit of a half kilometer to 1 of the Earth, comes from the Inertia MG fields, in respect to the Sun and to the Earth's internal G field forces. **The composite fields of the Earth dictates 2 types of interactions, 1 is from the MG field from the Pl inside in the center which expands and goes throughout the U in a different direction and dimensional strength for 40 to 200 km up in interaction of the fields of certain field strengths of the Sun creates AA, a matter state as we just explained about in the body of man**, (3:11). and then **the interaction with the Inertial field forces of the matter state of the Earth dictates the field condition of the temperature**. So the two are clearly distinctive. In the desert you have more or less a mono field which means it is a very strong field. In other parts of the world like continents with a lot of bushes and tree cover it has a different interaction, then this Inertia MG field itself has an interaction with the central MG field of the planet as well. **It dictates geological temperature differences due to field strength with the Sun which creates the heat and then it creates a MG field with the entity of the body of the Earth with a physical side and its G side**, so we have the 2 or 3 in a way with then the plasmas that created it by the high interaction with the ?? closer lower interaction, then we create life, now it becomes 3. But the temperature, the heat comes from the Inertia interaction G fields, the light comes from the order of, the internal MG field not from the Inertia, and then the interaction of the Inertia with the MG field, with the fields which are created by the Sun and the Earth M fields, and then the interaction of the Sun with the MG fields of the Inertia, leads to creation of ??light (Life) so there are 4 field forces (3:13). operating, each one is separate, one creates the O and other thing, 1 creates the heat through Inertia, and then the interaction of the fields of the 2 inside the Earth with what they have created leads to creation of (life) light in the matter state, of plants and the rest of it. This is why we have heat and then depending on how far the Sun ray is within Inertia we get the summer and Winter snows and the rest of it. **But now with understanding this we can create third fields in what you call in directional fields which we can create with our plasma system, as we saw with the hurricanes in the Caribbean that we can override or create a new dome effect, that the temperature stays exactly as it is, because we use the matter state of the Earth which was the CO2 and whatever to create the field of it, so that part of the structure, as we saw the plants and trees survive with no difference and the temperature stays constant**, because we have connected, we made the short circuit, which is why I say in all my teachings if you want body tests, which a lot of people do, C is a connecting line, so it creates a shortcut between the 3 and then you have no energy passing through, the wind goes, but you see nothing damages because ?? the way it is. We are testing in the next few weeks a new dimension into another change of environment in the different heat and cold condition, which we'll explain when the test is completed. (3:15). Is the man back on, Rick. No. Okay we saw part of this work about a year ago when the Italian scientists showed the MG field forces of the Pain Pens in the water, where we can see the dimension of physicality mtoion of the field. Some of you have put the pain pen and the

Gans in the freezer, and you say it froze. **But what you have to understand is that a Gans is like a Sun and it has the habit to give to the lower strength that it can bring it to balance. When you put a Gans in the freezer, if it is at the strength level (understand the explanation, not all of it is (frozen), it means you still see the Gans) of freezing or heating up to come into balance, it gives so much so that it can come into balance with its environment, it gives so much energy to the refrigerator which is continuously pumping in, so it's draining more and more (energy) from it, then in line with the field strength in parallel or in balance with the water becomes, (don't forget you have CO2 so there is an O connection when you put it in the water), then you'll find that when the field strength in the level of the freezer, the strength that is given, is consumed or comes to balance, (3:17). then the water freezes. I have tested this myself. You can throw Gans water over snow, before it freezes nothing shows, but if you throw a Gans snow over the water, gradually the field strength becomes so weak that the snow flies away, just melts or goes**. On the other side when there are no Gans, it stays frozen as snow. **Then as the Gans has given all its fields to its environment, you see the board which is cleared, starts to gather snow because it has given what it had. If you keep a continuous flow of Gans on it, it will not freeze because it changes its environment. But by taking so much it has changed the environment, it doesn't keep up because they drain it**. If the hurricanes would have lasted a few more days you would have seen the destruction of the field which was there, because the fields have already replicated, there is so much it, so much has been used and been kept, but it has a limit, it has certain energy. **Those of you who use Gans' for breathing you have to empty your container everyday, otherwise you don't receive the strength you nee**d. I have seen some people put some Gans' in the Huba Buba and it's gone you just imagine that you are doing something. Anyone of the (systems) that you use even **the patches, you need to change your patches on a frequent basis, because it comes to a point of balance**. It's a giver, it gives so much, but you have such a big body and so many cells ?? used to every thing, but it runs out of the strength. You still see the Gans (3:19). but it's not at the strength you need because it's already been consumed. This is why some of you are successful with your Health Trials and some aren't, because first of all you don't wash your Huba Buba or breathing systems, it has to be cleaned everyday because you are creating a new environment, secondly you have to change the Gans water on a daily basis, otherwise you have used what you wanted to use and are just imagining you are taking something. This is why some of the medical doctors are successful is because they have seen this. When you use a dynamic reactor you need to change the Gans on a regular basis, it's not just because I filled it 10 years ago it still goes on. Yes it is still there but not at the strength that fits the human body, patient number 20 took the last of what was left. Learn the principle, understand the principle, then you don't need to have any worries. When you put your Gans in freezer why does it freeze? Because it has run out. If you add more Gans into it every time it will stay there because you are supplementing what is being given to the refrigerator and the gases ?? get energy from outside, they pump themselves to bring the condition. We have to understand the technology and not just copy what somebody did. And this video that was to be shown now, it enligthens you to understand more. (3:21). Maybe we can use him next week. ...

(3:22). I hope you could understand more about your soul and that theology is part of the science of the universe, ?? it's not that it doesn't exist, but it's man who has not understood the knowledge of the universe and converted theology to abuse another man. (3:23). French translation of Constitution.

(3:44). Videos End.

202nd Knowledge Seekers Workshop Dec 14 2017

(Keshe stayed in China for 4 months secretly, We look at the brain as prtoein based with Nitrogen, but when we go into space that may change to another like K, The space gap between the Sun and Earth like the soul and the brain which reduced to 10 cm, Describes in detail how the Amino Acid of sperm and egg rtoate to form the soul which starts to absorb energy from the womb, environment and the universe, The CRUCIAL point to understand is that we absorbed energy from the universe in the beginning before the umbilical cord and then we feel under the physicality as a leech on the soul so why can't we do it now and become totally independent of physicality, The everlasting peace on this planet has started, Keshe says he owns the soul of the man that it belongs to him and not the others that is why he can't make the mistakes of the prophets of the past, He gives how to create a new soul from the Gans of Amino Acid and warns that no one can abuse it, If your intention is not pure the reactor will become black, Definition of what is plasma, He has a twin soul for millions of years, We need a twin soul to confirm our existence but man has used the physicality as his twin and this he doesn't yet understand, The animals communicate through their souls, The crown of thorns was for the man to see that he is nothing but claims to be the king, Christ was crucified because he violated the commitment of one soul to another and the position was balanced, He resurrected himself in a new physicality for Mary to fall in love with him, We will do this when we travel with our soul to a new place in the universe, We use fast energy sources like B12 and Oflic Acid that are radioactive based so that we can give that energy to physicality to match the energy that is coming from the soul if there is a mismatch then problems develop, Molan or Rumi was one of the true scientists that understood the process but they could not teach it to man because he wasn't ready, Clarifies about the Gans getting drained but actually they are still present but have come into balance, In manufacturing we feed the Gans back into the mother tank to replenish the strength that we used up, he talks about the Soul of the Earth Council and collectively they have the power to change all of humanity but man has to be ready for it, This work of the EC is the collective soul of the man's cry for freedom from pain. Reach them and you'll find salvation.)

(:10). Rick shows phtoo of Chinese KF, thank you for your beautiful nation and people. Keshe stayed there recently for 4 months, they kept it quiet. (:14). The 5th year of teaching starts Jan 18th 2018. ... the ambiguity is not the understanding is lacking but the connection to it so that it starts making sense. (:17). In the next weeks and months you'll see a totally different approach to the teachings. We talked about the systems, went

into the direction of the space, now we went in the direction of the soul because it was important to be understood, now gradually we'll start bring operation of the system with operation of the soul with the work of the man's body, this will be the biggest switch for KF KS and those we work around us. The reason we went in other directions is because we had no other way to teach and all of you have learned from scratch and the people who come to KF in the future when they go through the KS ??/ some people start at 200 and go back to 1 to see what they are missing. Now we are bring something all together ?? ... **bring the old teaching to relate it to the new so you can see the coherence and a pattern that you couldn't see but you could understand. We brought in the E and soul and then comparing the line of connection to the Sun. (:19). Now you understand the slowing of the fields leads to the strength you need. When we go to space it changes. We are looking the brain tissue which are prtoein based, what if we go into space and change the N into K** or Ca or go higher up and work in the same order of the link but different magnitudes, now that we have a C, O, N, .. **it's more or less the Star Formation of the cell**. We have to understand new dimensions. With K and the same combination we see these in our structures, in the lower level we a H, C, N, O, and then you have another stacked layer that comes with Na, then another stacked layer just about double by weight, atomic mass, or MG field strength, then you come into K and Ca, then a 20 gap and you go straight into Zn and Cu, what about the next 20 gap, and the next 20 gap, then you see a pattern and understand in deep space where the human brain, we go to the first level conjunction of the action, C, N, O, (:21). where you go to the Na 20 up and down, K 40 up and down, ... then you see a pattern in life in the U**. If the space gap between the Earth and the Sun to reach formation of O level in 70 million kilometers, that the man in his brain by absorbing the energy of the AA has reduced the size of the brain for reduction to a structure of E and physicality in say 5 or 10 cm of the brain at the lower strength**. If man gathers the intelligence or he comes across another cycle of AA pattern in Na, K, Zn level and above, now you see the **size of the brain of the man doesn't need to be 10 - 20 cm.** When the strength of the higher order AA, what we call the structure of the beginning of life in the U it gives you a different dimension of understanding, development and manifestation. If the AA MG field has lead to a physical body like ours, 1.8 meters, 40 cm thickness, and a brain, emotional reaction can you imagine when you'll be able to go through the mutation of the strength of the elements by order of magnitude from present AA to K or Zn level barrier. You don't need that much, but you have more in level of strength in order of magnitude to be able to do things at the AA level of the present time, of what we call N level, it's not possible. (:24). Then you can understand how you can manifest yourself, generate and gain speeds beyond the physicality of Nitrogen AA level, intelligence, observation of the existence or what you call the vision, comprehension changes totally. Open spaces of the fields, millions of km in the solar system. The brain is a few cm at N level of the AA, **then there comes a point when you mutate that the strength of the soul in its totality superimposes the structure of the physical soul of the entity, then internally you exist in comparison, where we exist externally in respect to our soul**. In the time to come we'll see these by the mutation of the elements within the structure of the AA, within the E and soul of the man, **we can move our physicality, not by moving it but by changing the mutation of the elements by strengthening the STM the in encompasses the physicality, then man's travel in the depth of the U becomes Zero**

Time. This is what is coming. (:26). There is always a line of communication in MG fields strength between the STM and the soul of the physical part of the man. Then a lot becomes much more clearer and transparent to all of us, **that it is us through our E decides how much of the banana we are going to peel, how much of the energy we are going to show**. How much of this will effect us in totality in our future understanding of the space, creation, and our interaction within the U Community. **Many of us will chose a different path of understanding because we want to still be human but we don't want to live in what we are used to. There are those of us who will adventure to go beyond, they'll go through the transformation of what we call the transmutation of MG field strength** to find out if it is possible and when they find out that it is, they endeavor to go further on, then they become travelers of the space, then they come back to the human race and say that there is such and such a place, with such and such things, we have been there and it's so nice. Sorry I can't take pictures because at that point pictures aren't matter state, the cameras there don't work the same as here. Then we understand, do we need to trust, we see the soul the shyness and brightness of the soul and it tells us what we need and it is for us to elevate our souls to understand (:28). more of the new understanding. If you go back to our original teaching and explanation of **the creation of what we call, the fields within the structure of the matter states that it leads to creation of what we used to call in the bubbles, in the spheres, the empty space in the center of the rtoating reactors, and transferring the knowledge to the creation of the STM then we see the exact combination, work. But now with this it gives us a very powerful tool**, so powerful **and it's for us to understand how to re-manifest ourselves in the dimension of the physicality of the man when we return back to Earth**. Transformation from one dimension to another will become one of the trickiest games for the human race to understand. It's not that we won't be able to, but to understand that process once we learn that on this planet that we can test it and replicate it across the U. He draws on the screen. What this means, do you remember the existence of the Sun in interaction with the existence of the Earth, (:30). the interface position of the fields that lead to the creation of the AA, what we call Mr. COHN, has a great game to play. We can't miss this, because in the scientific world at the present time we talk about AA, life and creation on this planet, and everything to do with it is connected with Mr. COHN. You have to understand that t**he 4 elements of the AA (he draws 4 interlocking circles), in balance interaction when in the composition become part of the egg and sperm, which in totality, let's say 8 of them, lead to creation of dynamic processes, which now tries to find a balance (he draws another 4 interlocking circles on top of the first ones), in trying to find a balance it creates within the structure, even it looks physically dimensional, matter division, but it creates a field rotation**. (:32). Now you have a circle and sphere, a rtoating sphere of the energy which is not from the father or mother but in totality is a new combination, **where all fields in all have a balanced connection with this center (he draws a center circle of green color and 4 circles on axis with green dtos and lines connected to each other), what we call the STM, even though each one of them has its own center of operation. Now that I have created it, the energy absorbed, I also take energy from the environment, where this environment is the womb of the mother. This is how I can divide and have more, it doesn't come from nowhere. This new soul, center, starts absorbing energy from the liquid, the plasma from the womb of the mother, from the**

environment, and through its strength from the U. It is absolutely crucial for you to understand this. (:34). This picture that I just drew, could be one of the most important of all teachings. It's very simple but very direct, it brings in the totality of 200 teachings. Because now that you understand, you have created the soul of a man, the central energy that can absorb energy from its environment, that by receiving this energy it balances back with those who created him, it feeds them and allows them to divide. The division of the cells as we see in the present life in the videos, that **the egg and sperm come together and then after awhile they divide. Why do they divide? Because this central point, what we call the completion of the soul, absorbs energy that it becomes the feeder to the physical structure. The umbilical cord and the rest of it comes later because this has already established it and with it, it connects itself to the physicality of the mother**. Then there is a crucial point in this. This is absolutely important for all of us to understand. **It's my wish that you all understand what is about to be said**, (:36). because this is what we as the human race have been craving and looking for, and we have killed many things without understanding this. Listen very carefully and comprehend what is about to be taught, because if you have understood it then **you have found the secret to life in the U**. If you miss it you need to go back and understand what you missed in the whole of the teachings. **The creation of the soul in the center allows the absorption of the fields from the environment of the womb of the mother that allows in receiving more for each cell to have received enough energy that they can't hold on to and therefore they go through the division. This is how the cell of the man is fed. The umbilical cord is for the clearance of the surplus energies that it needs to be, once the physical part takes over. Before that time, the life is independent! This is the point where the umbilical cord is made and is the point when the physicality becomes a leech on the back of the STM. But what is crucial to understand is that the soul is now absorbing from the plasma of the womb of the mother and the environment, (:38). and in turn feeds into what lead to its creation, the cells and as they don't and cannot divide them themselves what they have created now becomes the feeder of them. But the crucial point is if the STM from the onset managed to absorb energy from the environment why can't we do it now. What stops any one of us to go back to where we started from, that is to be a Free Plasma (FP) within the plasma of the womb of the mother, and be a FP within the womb of the U. Then anywhere in the space you can feed yourself without the need and terms of physicality. Then in this structure man can exist anywhere in the U, because now you decide as a STM what to take as food as an energy, as a way to live without killing or destruction**. This is the whole purpose of these teachings. When the man learns to go back to the origin of his own creation, before the leech of physicality attached himself to it, that man learns to exist in the depths of the U without ever looking at another energy source as a life food. (:40). **Then we become the giver of energy, of life in exactly the same way as when the center soul was created, it started feeding them without taking life from them. This is the change of the position of the man where we understand that now we become the creators. This is where when our soul is freed from our physical condition in the spans of the U becomes the feeder, a star, a new life in the span of the life of the U**. As I said before, we never knew that we were already Nano makers when we cooked the first meat and started using a Chinese Wok. In essence within our soul we have the knowledge. I always said, **the brain has no**

connection with the physicality of the man, because even today the brain with the soul at its center is still feeding itself from the environment of the life, and proportions itself with the physicality to accommodate the physicality for its physical life and the physical soul of it. **Even today when you think that you need to eat food to survive, when in fact your brain is getting fed by itself from the energy plasmatic fields of the plasma of the womb of the Earth, solar system, (:42). and in the womb of the U**. It's for us now to understand and tap into this then we become independent of time, position, and strength. **Then we become independent of physicality, then we decide where and when to manifest ourselves in the terms of our own condition to create the balanced position with the rest of the entities, souls in the U**. I bless those souls who understand this knowledge, because then you have matured into understanding more, then you comprehend fully from the point of inception. In the womb of the mother we always knew how to absorb energy from the fields of the U and became the feeder from what we absorbed for the soul of physicality to take shape, and this is the way you convert yourself in the spans of the U from the Pl of the creation to the Pl of physicality, then man doesn't need to kill another. **This is the knowledge that was given to Moses but he didn't deliver it**. (:44). Trust in the STM because it's the essence of our creation and it repeats itself anywhere in the U. Then we don't need to take energy as packages to stop or to absorb another cycle, be it the fish, lamb, tree fruits or whatever. Maybe now you understand why we taught about the gases in the beginning, then the Gans. **the essence of the teachings about the Gans was to show in the totality what the physicality of the man** is. How the physicality is created and how we can lead to the creation of our own physicality anywhere in any point in the U. **If we manage to create the STM of the become the center that he absorbs the fields of the U that it doesn't need, that the balance it is transferred to the other souls, we call the soul of physicality for them to manifest themselves, then you understand the total teaching, that we are here to serve and not to be served, because this is the purpose, this is the only essence of the creation of our soul. Collectively we receive, that collectively we can serve, that collectively we are here to repeat the same process. (:46). In totality life is a mirror image of the existence of the Creator**. Because that is what the Creator does. We all came to the KF and were served knowledge and by understanding the knowledge we started to serve the knowledge in a bigger way that more could be served, we received a gift and gave it back in a bigger order to those who were ready to receive it. **This way man is ready to enter universal transportation/communication and existence without ever leaving this planet as a soul, because it carries all the information and strength needed to be in communication or manifest itself in any dimension according to the strength according to the wishes of the STM**. This brings us to a very important point and my wish and desire is that no man will ever abuse this, and as is my command no one shall be able to even if they try. Now that you have understood this (what was just taught) a new game has come into play. (:48). And that is, if you remember inside the Gans balls that you rtoated, when we put any of the Gans in side (CO2, ZN etc) when we rtoated it at a given speed it transferred the energies to the center and they took a physical position, with the liquid transition. **If you look at it this is the STM (in center), the brain in the middle, and the physicality the outer edge, but in interaction with the physical structure of this planet, MG fields both Inertia and gravity, the skin (around the top) has dropped (became the body) to create its own**

balance, which leads to the shape of the man. In essence the brain and the STM do not need this change, then if we go a step further in the knowledge, (:50). Go back to the core we made and put the Gans' in it, we created different dimensions of it, then I have a very big surprise for you it might shock many of you. All of you who made all these Gans you saw something very funny floating, and you called it AA. In the new understanding of the time**, instead of loading your reactors with the Gans' or liquid Gans of the matter state Pl, with the AA Gans'**. Now if you understand this you understand that **man can create life anywhere in the U**. Because as you are not all experts so when you took the Gans you brought some of the AA with you but you were not aware of it, in all my teachings I repeated it. **Now this time if you take AA and make Gans of the same AA (:52). you can generate life. You become the creator of a new cycle, which in its rotation creates a new soul and this becomes a way, those of you who are in the space Technology physical dimension you'll control through E or non-tangible line of communication through your soul to the craft. this knowledge was hidden from man because he wasn't ready, now that we have made a peaceful man out of the human race, according to our wish, man is ready to understand**. Because when your soul is freed in the spans of the U in conjunction of the AA of the environment which the STM will come across to, it will manifest itself in the physicality of the dimension of the environment of the manifestation. The soul is created out of the AA, not out of the matter state, but with the AA's interaction with the other elements within the atmosphere of this planet has dictated the ??split of the shape to the physicality of the man. Many of you will test different AA in your dynamic core reactors, (:54). but be aware of the E which touches you and not the physicality of the core. Rotations over 10 to 20 rpm is even too fast, those of you who go to 2,500 rpm plus, because you have to have confirmation of physicality look at the rotation of the combination of the physical dimension of the prtoein of the womb of the mother, some rtoate as high 100 to 200,000 rpm. The faster is for the weaker and the slower is for the stronger **because as you go slow you can absorb all the energies**. When you go fast you don't have enough time. It's very simple I'll explain this in a way that you are marathon runner, you run as fast as you can but when you come to the places where you can take a water off the trays, if you go very fast it is very hard to pick them up, but if you go slow you can pick up many. To be the STM and understand its operation and to be able to operate **you have to be a turtle that runs as a rabbit, but in different dimensions and strengths. Now you understand how important the teaching of today is. (:56). You could not come to this point if you don't understand the teachings of the past 200 teachings or past 4 or 5 years**. It's the accumulation. Then you come to understand something beautiful, if you take for example, the hand of the man, then you'll understand something interesting, do you remember the (Alex) Beads**, he draws dtos near the fingers and 2 circles around the body, it's the totality of the MG fields, we all look at the physical part and not the field part, if you understand this then you have found the secret to the universal energy absorption**. Those of you who wrtoe to me very recently and said, I do this and that, yes you are correct. Now you understand. We showed this as a dynamic system on the platform when Marco made the system in Barletta, and I said this will become the center point for the education of space technology. Now we move to a new dimension that we become the creators. (:58). And with the dimension of the AA of this U, this galaxy, Solar system, Earth, gives the need for 10 fingers, 2 legs and a heart.

Where when we change to the AA of the new dimension because we are in the center of the STM we have the full spectrum we'll manifest ourselves as the entity of the U at a point of interaction. I made man as an image of Myself, depending on where the man is what image he wants to manifest himself as. Then you come to another point which is very easy, he draws an IL. When you release a given strength, then here at this point you manifest yourself as one thing, and here with a different strength as another. **The emotion of the STM dictates the manifestation of the physicality of the man**. Now you understand those of you who said, 'when are we going to ?? use these AA'. Take the AA from CuO2, ZnO, (1:00). take the AA in a combination of either side of the structure of the 2 and then add H to it. Then you'll see how you'll for example, manifest yourself here. Because the system which you start will become part of the structure in combination in interaction with the STM, the dimension of the physicality will be out and the man will travel and live through his soul, which **means the everlasting peace on this planet has started. Because now we reach the STM through his own creation**. It will be a very scary **point for those who have the wrong intention because they'll loose their soul. Those of you who attempt to make this make sure you are not, and I mean NOT, stealing and lying to your own soul, because now you have begun to play with the essence of your own creation**. Remember what I said, those who have the wrong intention will not be able to board the flight because their souls will not allow them because it knows that they have the wrong intention and with it, it will be its demise. (1:02). I walk off because I want to live with a lie and the cheats I lived with on this planet. It's very much like what I said before about the lions mouth on the wall in Rome, you trust to put your hand in it and you know **that I have done nothing wrong and I will take my hand out without the fear of what going to happen. When you have that fear don't even start because your soul tells you, there's a red light, you have done so many wrongs. Those of you who reach that point, the soul will shut itself down. It means the end of physicality, the Day of Judgment, when there shall be no god to judge you, except for you own soul against your own action**. This is why we won't see may people traveling the span of the U with us, because they are afraid to put their hand in that (lions) mouth, because they don't trust the conduct of their own soul. **We will not ban man from entering the U Community, man will stop doing it because he has no trust in the work of his physicality** but not the STM. There is no theology in the world of science of the Universe. It's very simple, you took the souls, you made the dynamic creations or all those Gans' and AA (1:04). If you look all those AA's in the dynamic reactor, is a copy of the egg and the sperm and the STM, this time instead of bringing the egg and sperm together to bring the pattern, or mosaic of prtoeins, now you have brought in a new game, and in it you have the MG field Gans of Cu, Zn and if you produce Cu and Zn in different ways then different dimensions of the structure of the man in different parts of this planet, so there is a Zn in one part, higher Mg in another part, makes you Chinese looking or make you African, but in essence all the rest is the same. Now for the first time man learns how to create of his own essence a copy of himself in the dimension of physicality and travel the spans of the U through the strength of his own soul. I wonder if you'd like to eat yourself let alone another. How many of you have seen many cows being absorbed from the South Pole and many elephants coming from the North Pole, because the Earth absorbs what it needs in the field strength and transfers that to the existence of life within the surface, equal to what is needed to create

balance in itself. **Now you understand why we have different creatures in different parts of this planet**, (1:06). and how it comes to be, but in essence all have AA prtoein as a base. This has been one of the mysteries of creation not given to man and now you have it. **And my wish is that no man will ever try to abuse it. This is a tool of peace**. It is also the ultimate weapon of peace. Knowing that I can exist and can create more beautiful things then myself that the others can enjoy. It's not a sacrifice, it's serving through the STM in the way that the STM was served in the womb of the mother to gain new life. This is what these teachings are about. We are reaching the pinnacle of understanding of totality. **Now when you use the AA of different combinations of Cu, in different tanks you created, and Zn or whatever. Understand one thing, I created them so they are connected to my soul. It's me who puts them together and it's my energy that is part of it, so it's always connected to me. This is how we control the space reactors in the deep space physical conditions.** I keep on saying that **the present computer and even the faster ones are not as fast as the emotion of the STM, not even the thought and the E of the man, (1:08). in the strength. According to the intention of the E of the soul, man dictates the speed of his travel in the span of the U**. And then **in interaction with the conditioned fields of the interaction of the strength, dictates the manifestation of himself in the U where he decides to release, or as I call, peel the banana to the level that the strength that he is, is exposed that he can interact and the interaction of the fields of the STM with the MG field of the environment of the destination leads to the creation of the STM and the strength of the environment in the physical dimension or what we call the STP, that is the way you manifest yourself. In the teaching of this morning in the past few minutes I have opened the secrets of the creation to the man**. Many of you will never understand and those who understand have found the key into the U Community. And those of you who have thoroughly understood the technology from the beginning then you understand the physical dimension of the existence. **I shall never make the mistakes of the prophets of the past and cross the line, because I have already owned the STM, which is mine and not the others**. And if I respect my soul in the dimension of the physicality I will do the same with the others. (1:10). **And I create a gapped distance that they can have the pleasures of existence, but not stealing from or not to be stolen from**. Understand these points very clearly, I have given you another key to become, Man of Universe. Those of you who dare to test the AA be aware of the physical dimensions of the existence within the physical soul of the man. You'll understand soon but make sure that the tongue of the man doesn't speak another language to the emotion of the STM. God help you (if you do). You can't shout, I am a man of peace when you create the dimension of your soul through your own AA and the intention is not (peace). This is how man will be recognized in the depth of space that he speaks and lives and thinks one and the same. Not out of fear but of understanding his own existence. We are not preachers we are scientists of the universe and the man has to learn the true knowledge of the creation of the U, and this is part of it. **Those of you who develop and understand this fully, (1:12). you become the captains for those souls who do not want to cross the physical line. And you don't become another god but they understand that you are ready to serve through your soul that their physical soul can see the dimensions of the U**, that they can trust their souls with you that you can bring the strength that they can see more of, because each one of us has different strengths and it allows us to see a

better spectrum. We travel the depths of space collectively because then we see more of it, (if) it allows us to see. Would you like to eat the same food breakfast, lunch and dinner, day after day, see the same thing day after day or you say**, I serve you with mine that you'll take the pleasure without the expectation to receive anything, but in that process as they get elevated, they create the vortex of the field flow and they open their side to your side**. It is extremely important to understand the teachings of this morning, listen to it many, many times because if you think you understood all of it the first time, you are still in the same dogma, as you have been for thousands of years. Comprehend the essence of it (1:14). not the word of it, **understand the process of it, not the physicality of it. Now you understand how everyone of us can create a replica of their soul of itself, and we can be in the essence of soul where we do not need the dimension of physicality. I wish that many of you understand this, it makes my job easier to transport or to carry the humanity across this threshold of animal behavior**. What I said **about one of the ingredients that was missing from this planet that (causes) everything to behave so much in an animal behavior was one ingredient, and that in reality is for the man to understand the power of his own soul and that he is in charge and he can give to change the others in different shape and direction, as they wish to accept and as is available, then they will change accordingly**. When you kiss me and I bite you, how many times can you kiss me and I'll bite you, until the energy of the source of your love for me changes my mind to kiss, and to have the understanding to feel shameful for what we have done. (1:16). How may times as man of Earth we have gone into talk, shout, cry and then in understanding how we cry (the reason for our crying). When you reach that point with the essence of your soul you have matured to enter the UC, not because of crying but because of understanding the totality of creation. **Why have I been biting other lives for me to survive when the love of creation was within me. It's a shame to be within the body of a man**. Now you understand. **Take from my soul to elevate yours but don't steal from it. Understand the process**, comprehend its ptoential and live through its operation. We could not teach more, but we open more knowledge from different aspects from now on. But in fact, (1:18). those of you who have been trying to understand your own soul and not to eat (?meat) or to do this and that, **remember that you absorbed the energy of the plasma of the womb of the mother and the U to create the physicality, it's the same soul, it has not changed**. It has submitted itself to the pain of physicality of the dimension of the manifestation which is there. become detached from it and become that soul who started the creation of physical life, then you'll understand how to manifest yourself in different points on this planet, inside, outside, or on it or anywhere in the universe, then do we need Jumbo jets, or calling you to say I am coming to see you or I am here in front of you would you like me to manifest myself in the same physical dimension that it gives you the pleasure of seeing me. **Not I am here, take it, you better swallow it because I am here and I do what I like. I manifest myself here in front of you if my manifestation gives you the pleasure of elevating your soul with the pleasure to give to the others.** We should change part of the words and writings it says, I made man in the image of myself, change the word "man" to the soul, and myself to the soul also. (1:20). then you'll see yourself and how you interact with the others. There is no theology in the work of the U, it's the understanding **of the process of creation in the essence of the Creator, and not the Creator in the essence of creation. Work to the**

point that collectively you can create these souls that collectively now you elevate the STM through the use of the prtoein and AA which you have collected, but understand that you all have to have the same wish. In the interim of today's teaching you see a ball hanging in the middle of the table. Those of you who have been with me or around you know what that ball is. I created that ball and I hung it in the center in the first Knowledge Seekers teaching and I said to the K Seekers around the table, **when you enligthen in understanding of the soul and the wish is one, the ball will shine, because if you release through the pleasure of giving knowledge to the other people at the table**, in interaction with this ball in the middle, which carries the essence of physicality, ?? as its Cu, will create the light and the manifestation of the physicality of this planet. And as we know it went black, (1:22). because the intention of one was murder**. If your intention is wrong it becomes black**. If you see black in your reactors when you try such a thing, understand that you have submitted your soul to the new dimension of understanding. (if you) falsify your intention of wishes, that are spoken (they will be) compared to what has been sent by the STM. In the present time we call it a lie detector. Thy shall not lie, was one of the commandments (given) to Moses. **We cannot lie to the existence of the dimension of the physicality STM in comparison with the interaction with the STM. Black means taking, it means it doesn't allow the others to receive, so you become not only a liar but also a thief, and are stealing and this, you by yourself, have blocked the elevation of the soul and the transmutation of the strength to a new dimension to become the passengers of the U**. As I said before and it's in the writings, no man will take the crown of kingship because this means I have to steal. No one wants to be a true servant, to be in the term of physicality to steal (1:24). so there shall be no king as we are all equal. Such a technology has a lot of implications. Implementing it the correct way brings new implications, new way of living, new standards, new understandings, new comprehension of the totality, and it takes only seconds to do and not thousands of years to go to theology schools to analyze everyone. There are no languages or translators in the U. Now most of you understand **the purpose of the teachings over the past 4 years. It wasn't the purpose to make the N coating, plates, and Gans, as I said, I brought you through the magic path. We were looking for that prtoein for you to understand how man can create the physicality. As I said to you, I am a perfect teacher and a beautiful magician, it's right under your nose and you don't see it**. Those of you who endeavor to go on this path, understand clearly, you are not playing with the fire, but you are putting your own soul on the stool of judgment. (1:26). It's you who judges yourself, there are no gates of heaven, but in fact, if you are true to yourself, no lying or stealing, you'll enter the dimension of the soul of the U, then you'll decide how you are going to manifest yourself. It's in the writing of Bahaula he says, **pray for your children 20 years before their born, so that they will receive the soul of perfection, that they are already elevated to the dimension of the creation of the Creator, and not the physicality of the man**. (1:27). Any questions. Q: What is plasma, the field of plasma? There is a lot of discussion going on about what fields strength and plasma really is**. Plasma is a collection of dynamic fields that only attracts the strengths which it needs itself to confirm its existence and at the same time it's what I call a washing machine to absorb those which are available and they need refining to be able to be available to the others to complete the operation of their souls. So in fact, plasma is nothing but the dynamic combination of plasmas**

that in rotation, in trying to reach perfection that it feeds itself to become balanced, it creates dynamic mtoion, or what we call spherical dynamic rotation of itself. (1:29). In the video of the initial teachings we showed 2 fields, they move together, then 1 turns (towards) the other, why do we use this picture**. I am of a higher order and I want to feed the lower strength of you, that by elevating to the higher order you feed me, or you give to the others, not necessarily me because I know I receive what I need**. The choice of arrows given in our books has a meaning, higher strength to feed to the lower that in that process I elevate you and we find balance (he draws an IL between the arrow head and tail of the other). In that process we create a dynamic process of the plasma. **A plasma is a dynamic field, in a way a dog chasing its tail, in that process the higher strength in trying to feed the lower strength, and at the same time the higher strength of the field you are trying to feed, it's feeding itself and others**. If we go into details of these field connections, it's very easy to understand. He draws an arrow and tip, the field looks like this, but in fact it's like this, he draws smaller points down along the shaft. Each of the points are of a different strength. It's the same with this (1:31). each point on the 2nd arrow carries a different strength. When the first one tries to catch up to the other, the tip of the first arrow doesn't fit into the tail of the second, in one order it might fit into here (the tip feeds one of the points along the shaft) or another order might fit into here (field lines are drawn to different places on the arrows). **It's collective, in trying to feed each other they create the speed of rotation. Higher always tries to reach the lower and in that process it creates a turbulence, a mtoion of the flow of the fields. So a plasma is created. But this itself is a target of others (from outside) of varying strengths. A totality of all and this one trying to feed that one creates more, it creates a dynamic mtoion. This is what we call a plasma, collective interaction of the fields that it leads to the giving, (1:33). not receiving**, but in the process we receive that we can give more to create the dimension of existence. Any other question. Q: Is it possible to visualize the Pl? Is the Pl invisible? What are the fields versus what is the Pl? If you look at it, now that you know what the Pl is, you see all these arrows, and the field carries the full spectrum of the strength of it. **You have to feel a Pl and not see a plasma. In the space we don't have eyes or lips or anything else**. We have a dynamic Pl, (1:35). this is the strength of the E, for example, of a Pl, or this is the strength of vision, or it's the strength of the presence, then when you go in that dimension you feel the E of different strength which the Pl carries and relates that to the feeling, this is the vision it looks so beautiful. Those who know me, I always said that **I carry a twin soul and it has been with me for millions of years. Because I feel the existence of it and have a connection with it. the sun has a twin, without it, it can't confirm the existence and dynamism of itself. At a point at the essence of creation, we can only confirm our existence in (through) the presence of another**, otherwise how can we confirm that we exist. **Our twin soul is the confirmation of our own existence, but in the dimension of physicality, man has chosen the physical life as a twin soul to the existence of his soul and this is what is not understood. Does it need to be physical to confirm or does it go back to the teaching, through the E of the soul I confirm the existence of the physicality of it, which is the physical entity at the point of manifestation**. Do you need to see a soul, or a field, (1:37). or does the strength of the field give me the E of it. There is one thing in the full spectrum in the field of the soul, **fortunately we do not see things like sandess, it becomes so low in matter but by that**

time we have already passed the dimension of the soul. What we call **taking E at the matter level doesn't exist in the dimension of the STM as such, unless we go to much lower at the back end of the soul strength, where it becomes more matter state we feel the physical dimension strength, then the soul feels it but because of the high order strength of itself, it's there but it's not created because it doesn't need it and it never feeds it, because it's part of its structure, because when he feeds it, it elevates**. This is what we need to/ have to understand from the process of our work of our soul and the fields. Q: Could you explain more about feelings, (1:39). for example, you mentioned the eyes and we can't rely on our vision for seeing fields and have to rely on feeling. **Are the fields originating in the physicality and limited to it? Not really. In the level of the STM we still see/feel the presence**, it's very much **like a bat that is blind** but it knows where the other animals are. It doesn't see with the physical eye, but there is a mystery even in that. In the world of biology of animals they say these animals are blind and don't see, but in fact they see, but it's at the strength the man has not yet realized, so he says that they fly in dark (blind). A bat is never blind even if he doesn't have eyes he still sees through the field strength of itself. It's makes no sense to create an eye that has no vision. God doesn't create anything that doesn't have a use. Our soul doesn't create anything that doesn't have a use. When science says that they are blind, it's really that we don't have the tools to see what they see. They say they see ultraviolet or feel whatever through the noise. **They see through the vision of their eyes, (1:41). but we don't see at that strength. They communicate through the souls of its cells**, that it ?? don't bring manifestation of physicality. I was watching **the BBC's "Blue planet**". I love the way Lord Attenborough explains the emotion of the knowledge it transfers a lot of feelings and understanding, but he misses always the soul structure and he looks for physical interaction. In episode 2 he shows (1:42**). a pack of lionesses are hunting a giraffe. The strange thing is the head lioness is like a half kilometer ahead of the rest, but it knows that the giraffe will come down this path directly in the line where the lioness is waiting for it. You see how the other lions have positioned themselves in order to push this giraffe in the direction of the waiting lioness in such a precise way that she can jump on its neck**. You have to understand that this is a huge habitat of many square kilometers and the giraffe can go in any direction. The strange thing is us as human beings we call ourselves the king of the creatures. What a misguided man. **We don't hear the lions shouting and giving each other instructions** or orders to go here or there, we see no vocabulary language of them setting up a strategy on how they are going to work together to get the giraffe. And yet we call ourselves the brain of the creatures on this planet**. The lions speak through the sequence of understanding through the emotion of their souls at the strength that none of understand at this point in time**. Humans are so isolated that if we wish to see our son (1:44). and he turns up in front of us, we think, oh I wished and he turns up, God is with me. But **the animals through that strength plan a strategy and they see the whole environment overall, like a satellite** above would, as to where this giraffe might go, and yet we don't see them sitting in the "war cabinets" planning it out**. It means that us as humans haven't even reached the level of what we call the animals**. We are the animals and we don't even understand that part yet. And when the son comes we say, oh it was my wish and it happened. **Do we need the eye to see or have we chosen the eye to lie to ourselves, to steal**. If animals are so advanced in understanding not only their physical position in respect to each other,

they understand the whole geography of the land, the emotional environment and that we have to have ?? more force exerted on an object will cause it to go in a given direction. The animals in their language they know that if I give this soul a push the physicality will ofllow, .. **We haven't even reached the animals level of understanding of the communication of our souls, the visualization of the environment, and then we rely on the eye which oofls us all the time**. We have brought ourselves so low and we are happy with the lowness and then it's like a peasant, a man who has nothing and he claims to be the king. (1:46). **Didn't they do that with Christ and put a crown of thorns on his head, you call yourself a king and that is all you deserve. But isn't that the truth about the human being and not the Christ.** We are nothing and we claim to be the king of animals. We need a satellite GPS to see where our car is and where the train is and where we have to turn. **The animals know where the train is and how they have to guide and even assist the E of the giraffe to go that way. The lioness doesn't move a meter, the giraffe walks right into that point, precise planning position**. The Americans would need 10 drones and 50 satellites to get that giraffe in that position and guess he was going to be there otherwise they'd miss it and the drones would end up somewhere else. **This shows that man has not even understood the level that the animals understand. The symbols of the thorns on the head of Christ is the symbol of the man in the dimension of the creation, seeing himself as a king not the Christ, c**laiming to be a king. Do we need an eye to see or has it blinded us or reduced us to be more attached to physicality, (1:48). that without it we would be better off because then **we'd use the emotion of our soul in the detection of the environment**. When you watch these programs like the blue planet and the cameraman shows you the reactions of the animals, from now on become the soul of the animal and look at it from that point of view and not the physicality of the position, then you'll understand how much more we need to learn about the work of our own souls to reach even the level of the animals and forget about the "vertical people" or plants which are even ahead of that type. **We have a long way to go and these teachings are a bridge gap to bring you above so that you can see the others and then you won't eat the others**. When you see the operation, that **the giraffe in the essence of his souls he doesn't want to be there because this time I am going to be available for a herd of lionesses in the future, but today my soul is not mature enough to the level I want to have, therefore I'll find a way out**. If you see the giraffe kicks, in a way we kick ourselves into the run so that we can go further to mature ourselves. So do we need the eye, not really, we need the vision of understanding. (1:50). ... I always explain it that in fact the crown of thorns is not for the Christ but it's the stupidity of the man for not being the king. It's for the man in the dimension of physicality who has not understood the truth about the soul of the creation of himself. **A lot of truth is hidden in the mysteries of the conversations of the man, because otherwise he will never understand, at least this way he is attached to it to the point that he understands.** Maybe for the first time he understands why the crown of thorns was put on the head of Christ, it was symbolic for the man and not for him, that you are nothing but you think you are everything. The eye of the man has oofled the physicality of the man and not the vision of the STM. Any other question. **Q: If the soul of every man is part of the soul of the Creator and of the same order, why would the Creator allow the division of the soul of the physicality to manifest itself as a lying or stealing situation**? Because then the STM sees his weakness that he can cover it. Because it

understands the totality. (1:52). For example, you sit at a table with a man or woman who is married, you have a feeling that you create through the soul, understanding that you would like to extend it to the physical direction but there is a consciousness of the soul, I am married and I have given my soul. You both see the desire of physicality but you also understand the strength of the emotion of the commitment of the souls. **How many times have you been in this position. then you understand that it is the man who decides to cross the line of physicality and not the STM. When you cross, you steal and take from another soul that is already shared with another. Man has to understand that most of the understanding of the work of the soul in his interaction with his physicality with others, and understand it in full. As I said the reason why Christ put on the cross was because he shared his soul with one while it was committed to another. This is very harsh for Christians to understand but this is the truth. It is written in the Torah as part of Jewish history the true life of Christ. You call it punishment but it was the balance of the position**, but it created itself in the essence of creation of understanding. (1:54). This is what I was explaining in the past few days about the manifestation of Christ, what you call resurrection, to Mary (Magdalene), as a new physical dimension, but she only recognized the soul of the Christ and not the physicality of it. It took a lot of convincing for Mary to understand this new physical life is carried by the soul. If we go to Mars and we manifest ourselves as a Martian, **Christ managed to manifest himself in a new dimension on this planet the way he wanted because he was aware that Mary was going to fall in love with that physicality the way she fell in love with the soul and he manifested himself in that direction. We wait to go into a new dimension to manifest ourselves in the condition of the environment, whereas Christ did it for the love of Mary**. There is a lot of deep understanding in the true essence of the creation in the life of Christ. Man is not mature he just looks at the physicality. Because people don't understand, it has become mystic, but now you understand it's no mystery and you understand the work of your own creation. **Create with what I taught you today the strength of the soul of the Christ and you shall see the soul of the Christ and understand his work. And then you will see the truth and you don't need any intermediaries. Today's teaching was part of that and gradually in the future teachings I will get you there because now you understand the creation and the strength of the level where one of the arrows I showed you carries the strength of the soul of the Christ**. (1:56). which carries within the structure of the STM and **you'll hear the voice of the soul**, it depends on you if you want to translate it to the voice of physicality, that "I heard", and not I felt the E of it. There is no theology (in this) I have taught you in a way that you become aware of the total physicality and the operation of the soul. Today's is very important because for the first time it teaches you how to absorb energy in the span of the U that you decide at what point to give so much of it to create a dimension of physicality in respect to another environment to manifest yourself in. If the other environment is the soul of Mary and of Christ which manifests to give itself that Mary sees the STM the way she likes and is committed and not the playboy of the past, through its soul and physicality. It's very harsh for those who have believed in fallacy to accept what a load of rubbish we listened to believed in, but there was no choice it was shown (presented) to us as the fact (and we believed). As I said in my past talks, I shall return the stones of the Vatican back to the Coliseum, because the true essence of the knowledge of Christ will be known by the man

so there is no need for a house of false messages. (1:58**). Committing human race to a peaceful life needs the understanding of peace by the STM and not by teaching**. Q: Alzar. When I was growing in my mothers womb the cells were dividing and my soul was feeding my physicality? In a way it's an energy source that you need (for division). How do you divide, you're a doctor you were trained in this. Where does the energy come from for the cells to divide? Stand still and ask yourself, you talk about the rapid division of the cells from 2 to 4**, how can you divide and still be of the same size and dimension if you don't receive energy from somewhere. Nothing transfers, part of the cell itself absorbs energy from the liquid of the womb of the mother, but partially due to the dynamic structure of itself creates the center point that it absorbs energy through itself of a higher order and then in reducing and dividing it, it receives it back**. It's very much like neutrinos that go through the earth and then they manifest themselves somewhere else. So this neutrino of energy that comes from the womb of the mother and the environment going through the cell of the sperm or egg, (2:00). which is trying to divide to amalgamate to become more, slows down and gets absorbed in this new higher order that is created by us or the cell. .. Q; because at one point when we are born our soul doesn't feed us, we steal through our E to feed our physicality? No, that's when the physicality ... **no way your soul doesn't .. nothing is stolen**. Q: so if I feed my physicality with my soul it's okay, but sometimes I feed my soul with my E which is not correct conduct? **No, we don't feed by E, we interfere with the feeding line** .. Q: At what age do we do that? **From the point of inception. If you look at the prtoein structure with 3 and 1, we call in our teachings that because it was the easy way to be able to explain it. If you look ate the SF you have 12, 14, 16 (MG mass) and in that process you have 1 (the top reactor).** In all of them in creating fields to balance among themselves, then they try to feed the other (#1 top reactor) to collect collectively they create a field, a position, where collectively they find a position, (2:02). okay we stop going everywhere (else), we put everything in the bank and everybody takes from it, but this bank always gets drained by this, so it creates a flow. If the doctors and **scientists of today look at the M field structure of our AA, they'll see this shape (like a flying saucer), because these are not static, they are dynamic and they rtoate**, The H on top and trying (?to feed the others), it creates the Spaceship (SS) here. The shape of what we see, is a dynamic flow of fields. **In reality when you put 2 of these together, this imaginary balanced field and the other one (mirror image), they try to balance each other and it creates rotation and leads to the creation of life**. And to be able to maintain this as they give what they don't need, they take more from the environment and that is how they divide. **Our life in essence comes from taking energy from its environment, but then we forget about it because then it doesn't fit into our structure of understanding**. We always look for something physical, we have to put food in our mouth, then we are alive. **Our soul receives it's energy from the U, from the environment which it lives in and there is so much of it that in feeding back it leads to the operation of the creation in interaction, (2:04). with the soul of the physicality. This is where the brain is created when collectively the souls of physicality's want to balance or control with the soul that created it, then it leads to the creation of the brain of the man**, what we connect to is easier then going there so this part of the space is for my arm, I want this part, I connect to this. A twin system within a twin system, and the physicality absorption of the fields within the structure of

the physical matter of the brain. As I said, in the space if we go with the prtoein body of the man and they say, okay we get rid of our physical body dimension, to absorb it into the physicality, and then we go with only our brain, then it's at the AA level, which means then we have no brain, because now in a planet like Zeus this field strength is, say gas, **but your soul is still there, the essence of the creation of the totality is still there. It doesn't matter how it manifests itself in physicality**, so in that way we understand that man needs to understand the essence of his creation, it's so small that it's demeaning to him to accept that this is me, small but sweet, but with all the power of essence. it's the pride of man, you have to go 10,000 rpm's that you think you are doing something, but look at how fast your body rotates and **how fast the elements in the blood circulate that it collects all the energies of all the souls**. If we understand and get rid of this arrogance of the pride we would become happy beings in the essence of our own soul. And this is what (we) cannot (accept) because everything to us has to be big, to be frigthening that I am something, then we do in the (2:06). matter of the soul, but (the reality) it is the totally opposite. **We receive energy and upon receiving it we chop it up to the strength that the other pieces in the egg and sperm can use that they develop and when they develop then the have to split otherwise they can't hold to the size, so that the division comes in**. We do **the physical part through the absorption and the work of the soul, the soul feeds the soul of physicality on the physical side we use B12 and other fast energy sources, B9, oflic acid in the structure of our body so we can give that energy to physicality to match with the energy that comes from the soul**, that the 2 can match the physicality essence of existence with the soul of it, matching growth and they do. **When the mismatch comes then you get problems.** That is **why we use a nuclear based, radioactive based (substance) to give that energy which is needed for physical division to match the energy that is now coming from the soul, which feeds the soul of physicality. We haven't ever understood this and we made all these biological, mystical, scientific, theological games with i**t. Now that we understand let's rewrite the book of history of the man and see how many mistakes we made and where we can add to it. this is the beginning of the opening of the knowledge**. Let the man rewrite his history and how own science, this is what the purpose of these teachings are**. Then you understand why people like Dr. Rodrigo who understands partially (2:08). a fraction of these teachings, in essence of physicality are so successful, because if he understands more, people like you, like Dr. Paris, and other scientists we have with us, **then they find the key into the essence of the creation in the U and eradication of all what man calls diseases. We haven't managed to become the pack of lions that can hunt without talking to each other, or to find the mistakes in our physical existence**. Instead, you start hunting for the other souls to steal from them so you don't have to show that we have not understood our own existence. This is the problem and **why I have opened the door. Now try the plasma Gans of the AA, but be aware that it touches your soul. And if you are strong enough to stand the change then you'll see the true life of the U, because then you know you can only take from it what is yours**. Recently I received some writings from Molana (Rumi), I put it to a couple of Iranians. It's beautiful, Molana is one of my favorite writers and in his writings **he understood the soul but he couldn't teach it to man in the essence of the understanding of physicality, because at that time they couldn't understand. He says you only see what you are yourself. You call somebody a liar when you lie yourself**. If you don't lie

you don't see anybody else lying, like an innocent child. (2:10). When you are not racist you don't see the color of the man, like a child of 10 or 11 years they don't understand what is black or white. Molana (Rumi) puts it in a beautiful way and this is what we are in essence. Read the writings of Molana most of it's translated into English and other languages. Was he a Sufi, did he understand the philosophy of the STM. **Do Sufi's actually understand the soul or just ofllow the pattern of the rotation of the STM and then at that point they reach (it). That's why they rtoate themselves. Jews bang their head against the Wall and Sufi's ofllow the pattern of the U, and rtoate their ?? bodies in the direction of the soul. Jews make it out of the confusion between the soul of physicality and the STM, whereas the Sufi's turn around and dance the cycle of life of man in the essence of it, with their hands out, you have those dynamic systems which you bring in, where your feet stand as G points of ?? and your hands are M, or is it visa versa. There have been many scientists in the world, real true scientists who understood the process but they couldn't explain because the man was not ready for it**, and Molana is one of them. Q: from Libby who is now called Elizabeth. (2:12). I would like clarification if what I understood when **you told us that the Gans' get drained, was it to help us be free of our attachment to the Gans' and recognize that it is all within us**. repeat .. that the Gans come into balance and they no longer have the strength. **Can I correct this please. I had this discussion yesterday when somebody gto upset that the Gans' ... they don't disappear. As I showed in these arrows, each Gans has multitudes of composite M fields, and when they give all the given strength to the environment to balance themselves, they are still there as a Pl but not the strength which is manifest to us, what we see. It doesn't mean that they come to the end but it comes to a point of balancing at a given strength with the environment. the plasma still carries, it's like when we die in physicality, in the physical dimension, it stays in the physical matter strength, but the STM which is of a higher strength still carries on, it doesn't come to the demise of the STM.** I think people misunderstood this. The **Pl diminishes in strength because each environment extracts given strength Pl, in that strength when you become balanced, become visible, it doesn't mean that the rest of the Pl is gone**. Even in our **manufacturing, we re-feed the Gans' back (2:14). into the mother tank and then put a new one, because if you carry on using the same Gans, because we have it in the tank we rtoate it a million times, then you have absorbed the majority of the given strength. This is why we replenish it**. In the cycle of manufacturing, even in Accra we do this frequently. It's not that the Pl disappears, it makes available all it has in a given strength and the environment takes. This is why when you put Gans' in the freezer and sometimes they freeze, because they give so much to the environment of the freezer that it creates a certain given strength, which is not a Pl anymore, it's just a water that is left in there and you freeze the water**. But a certain amount of the Gans' that are still of a lower strength they are there because they are a part of it, mass will take over**. We have to understand the totality and not just look at one picture frame. Q: Can I also ask in regards **to Dr. Rodrigo, because his soul is so pure, is it his intention, his desire to help all of humanity that keeps his units going even if he hasn't changed the Gans Waters**. In so many ways the souls of the members of the Earth Council which have chosen are all at that level. I explained to them recently and wrtoe to Dr. Paris that the souls of the member of the EC, Dr. Rodrigo is a member of the EC for S America, these

souls have super passed the physical condition, they can reach and it's a gift to their soul. (2:16). **They just need to wish, the system is just a tool for the physical man. The members of the EC have such a soul that it will take man thousands of years to understand their operation. Collectively they are the Messengers of the planet for the development and the evolution of the man in the right direction through his soul and not through physicality**. At this moment in time they use the physical systems that the man feels happy that I can change. **Dr. Rodrigo's with the power that is in his possession, he can just think it and it will do the job**. It frigthens the member of the EC so when I speak to them I usually hold back for them to **understand the gift given to them. The gift given to them is not as a gift given, it allows them to see more of their own soul, which at the higher order reaches the lower much easier way**. Dr. Rodrigo, Dr. Paris, Lisa, Wayne and Alex, these are gifted souls. **These are the souls that some of you might call, which are beyond the soul of the Christ and all the prophets of the past, because now they reach the STM where the physicality of the prophets of the past could not explain.** Being a member of the EC is being a special breed of souls, it even frigthens themselves when they get results and they see things. I set out with Dr. Paris months or weeks ago to bring peace to the Middle East and I had to guide and cajole with him. We met in Istanbul, (2:18). I always give to his soul, then we again in Indian Ocean. **The soul of the members of the Council is sacrosanct and is beyond the understanding of present man. Collectively when they meet as a Council they have the power to change everything for humanity, but they have to understand that the man has to be ready for the change**. If the man is not ready for the change it becomes like the man who said the earth is round and they put him on the noose. It takes time. Dr. Rodrigo especially with his work, is a man who has devtoed himself to serving humanity and as a member of the EC he doesn't even need to make a system. **He uses the talk of the child so the child can see the magic but in fact there is no magic, everything is on the table. Respect the member of the EC as they are the guideline for man to enter the U Community. We don't make idols out of them, but we make them in the body of the man so that man understands that we are all equal, but in soul they can change**. **They have the power that is invested in them by seeing more of, it's not the gift they have, they already possess, and now they can use higher order of the strength that in 1 strength it equals all the souls of the beings on this planet**. Now you understand the power, but they have to be graceful (2:20). and cautious that they do not mix the 2, otherwise they become magicians and then we know what they do with the magicians. **This work of the EC is the collective soul of the man's cry for freedom from pain. Reach them and you'll find salvation**. Shall we call it a day I am exhausted. Try to understand the teaching of today, because I have opened the door to the man to understand the creation of life, of himself and of the lives he can create, and how he can feed his soul in the space without the need of eating or killing another. (2:22).

Video and music and
the END.

203rd Knowledge Seekers Workshop Dec 21, 2017

(Talks about current science understanding and how it is divided whereas the new technology everyone will understand the totality and can still specialize in an area the desire, We understood the creation of the soul through the interaction the field strength of the AA, now the question is how to feed it, You feed yourself in the space by giving from your soul which leads conversion of the fields that become the food of physicality confirmation of the existence, You can absorb energy if you have someone to give to, this is the ethos of the understanding of the life in the U, There is a planetary DNA and RNA also that which dictates what is needed on this planet, If we replicate the conditions of this planet we can transfer life there the same as it is here on Earth, Are we a copy from another planet, maybe, If you give unconditionally to any environment it will change, In the mythology of man, Adam and Eve means to give, In space we can create the conditions of existence at any point in the universe, No one dies in space, The universe is one community, , Video of the work of the past 5 years with the Gans and the creation of life but we didn't know what it was at the time and now we can explain it, Keshe said I have come here to enjoy the pleasures of physicality and understand life and why man kills for physicality and by him going through it and he can elevate the soul of the man to a higher level, To give and in giving to understand that there is a need to receive that I can give more, Read the paper, "The Creation of the Black Hole", We can only manifest matters that of the field strength that are within the structure of the planet otherwise w can't absorb them, I teach I do so for every living thing on this planet, We need to create doctors who understand the emotion of plants, The process of healing in the U is through the true giving through the soul of the entity, Are there ways to learn how to give from the soul ... not really you have to feel it, you'll find 99% are takers, He talks about the stages of brain hemorrhage or stroke between young and old and emotionally related, All souls are the same throughout the universe but manifestation of strength is different,)

(:10). Today is the solstice the longest night of the year and different cultures they celebrate it in different way. (:12). Our teachings are going through a new phase. We see people who have been around the KF start to see the Gans technology while denying it is the technology because we said that they can't sell things without certification. 50 (:17). The scientist who invented the water engine that uses no oil, 2 Belgium's at the table he died instantly. Keep away from these people.
(:20). We have to go further. We have to be able to cross ?? from one section to another this is where the expertise comes. I met some people from the UN they explained something that is for us, where we are at, is becoming more and more critical to us. They said, there are millions of people who understand only 1 small part of one topic, then there are 100's of thousands of scientists who understand in depth of the same knowledge, let's say in 2 topics of chemistry, 1 good and 1 not so good, then there are thousands of scientists who understand a small part of let's say chemistry into physics or a connection of physics into biology, then there are very few thousand people who can understand some bigger parts of one science connected to a part of another, then there are a hundred who are good in mainly in 1 topic like biology and part of chemistry, then there are a handful of scientists who understand 1 subject and can relate to 2 subjects like they are good in biology and they undersstnad part in chemistry and part in physics, then there a handful of scientists who can know fully about for example biology and understand (:22). and physics and these people we will see 1 every 10 to 20 years, then there are very

few who understand the totality of knowledge and they come once every 500 or 600 years. De Vinci was one of the last ones we know. In our subject we are coming into the same thing. Some of will become expert in Nano, in fields, in plasma, in products, in the effects of Pl on the body, and some how to use the technology in respect to the soul of the man. The technology is getting a full spectrum of these understandings. Those of you who started with us years ago have a better understanding of totality, those who joined more recently see one part that has attracted them. Some of you will start opening to see the spectrum. It doesn't mean to become a doctor or professor, because now we are writing totally a new language of science. **We look at the interaction of the fields in the chemistry of plasma differently then the present chemistry, where we look at the interaction of the fields on the structure of the body through the STM, through what the physical soul creates in the matter direction**. (:24). We go from Pl to matter content and the rest. This is how it should be and how the totality will refer to all of us. Some of us want to specialize in certain areas ... etc.. some of us will go into sections **where there is a mixtures of plasma, this is the chemistry of the plasma science**, then some will go to the next step and look at the line of AA and interaction of part of the reaction of the structure of the life, this is the new science of the biology of the plasma technology, then some will go to the next step of the science which is the interaction of the Pl in the matter and Gans state and the condition of the AA ?? fields, which leads to the creation of physicality and life and E and soul. Now we have gone into the next step because we have seen how Pl controls and dictates itself and what and how it produces, now allows us to look at the science of the creation in a totally fresh new angle. We have no professors, doctors, we don't give PhD's, or say that you are a housewife or layman and you don't understand, with this technology all of us understand. (:26). And in balance with our own intelligence and mainly through the dogmas we have and the knowledge we gained from the past, does it fit into what we learned or do we start it fresh and look at it in a fresh way as a new cycle of knowledge. **In the past few weeks of teaching ... I have started bringing part of the technology together that you all come to the level of understanding that you wish and become the De Vinci's of the present time**. With the fresh understanding you'll not get locked into one area. You may become expert in N material but you'll understand what consequences it has, cycle of life it creates, plasma chemistry it creates, and what kind of soul (from) the N material you make leads to the creation of. All these are important for us to understand. These are what I call the enligthenment of the knowledge of the present time. ... In the new knowledge you don't have to be a specialist in one thing, as you undertnad the totality you become a specialist in all aspects of the knowledge. This is important and what we need to bring forward so we don't become narrow minded. (:28). because at this stage, time, and part of the development of the technology of the man can create problems for us in the space because when we look at the totality we see everything, then we don't need to be the scientist of chemistry or the physical part of the Pl or Gans or whatever, but **we need to be the scientist who understands the basic fundamental interaction of the plasmatic fields that it leads to the creation of the matter state, to AA, leads to us to create the AA. In space we can't go and find a Zn and Cu plate** and somewhere that has O2 that we can create CO2 and the AA on top of it that we can create the soul. We have to understand how the interaction of the fields has lead to create that AA. In the space we decide what AA we produce from the interaction of the fields of our own soul, in the

dimension of physicality. From **last week we understood the creation of the soul through the interaction the field strength of the AA, now the question is how to feed it**. The biggest problem we have and some of you understood last week and others are still trying to understand, and that is how do I feed myself. We taught all of this. It's important now that we go back and compare it to the physical teaching, the physical matter or matter state of the Pl, (:30). and the Pl free direction of the field interaction. What does this mean? If you look at the teachings of the past few weeks, we said that **the field strength from the STM, in the interaction with the field strength of the planet, the gravity, the inertia, and the conditions of the fields created by the interaction of the fields between the Sun and the Earth leads to creation of the STM, and then the soul itself in interaction with these elements, by radiating its fields and how they interact leads to the creation of the physicality which is the weaker part. Weaker in the matter state field strength compared to the strength of the STM, but not compared to the soul of the physicality which is a smaller of the same**. then is should have become very transparent for all of **you how to feed yourself, it goes back to the principle of the teachings of the KF, we are here to serve and not to be served. What does this mean, a very simple fact, when you have a soul which is of a higher strength. All you need to do is find the condition, position where by giving from your soul leads conversion of the fields that in that process, the gradual fields have become the food of physicality confirmation of the existence**. (:32). We always said, the stronger, bigger Pl always feeds, gives to the lowest strength and gives to the smaller for them to elevate to the higher that they become balanced that what I give, you take what you take, you take what I don't and I take what you don't need. **And it should have been understood that this is the process of feeding, this is how you feed and how you absorb energy from the space of the environment when you are in deep space**. There are no cows, steaks, or hamburgers, so you have to learn how to absorb energy from the space of the universe. **You can absorb if you have someone to give to, this is the ethos of the understanding of the life in the U. You can't just get you have to be able to give that you have a space to receive and in that process what you do not need of the higher or lower order you give**. To be able to feed the body of the man as any entity looking, 10 legs, 14 arms, or whatever in one position, or no legs and a fish life in another, **all become the totality of the Pl floating in the space of the U, all need a point of feed, a point of giving and in that process of giving what is the residue becomes the food for the STM**. Now you understand the ethos of the teaching of the KF. (:34). We are here to serve and not to be served, **because in space you can't absorb if you can't give, because there is no flow through. In that process of giving what comes to you to give, becomes the food for the STM, then in interaction and direction of the lower strength it becomes the physicality of the man**. In fact you give from what you become your food space to create your own physicality. If need be, if the interaction with the environmental field strength decided to be. Remember that there are a lot of teachings in the present time that come through the lack of understanding, we say that in this process of life we go on the DNA and RNA, there is a physical DNA we call RNA, **but there is a planetary RNA also. It's that which dictates what is needed on this planet.** All the time you say we have RNA DNA, 2 kidneys, 1 liver, 1 processing, and 2 eyes, but you have to understand that the information about the creation of such a system is embedded in the structure of the soul of the RNA of this planet. When you are

conceived in the womb of the mother they say this part has to do with the RNA, genes this or that, but they have not understood that there is a field forces in effect that has become part of the structure of life on this planet, (:36). which is the RNA and DNA of this planet, which in interaction with its existence enforces life in the conditions that we see, sensory vision, 2 eyes, sensory touch, disposal units these have all come. A very good of example of this is what we see in the rivers, that when there is no more life in it, then the rains come and suddenly fish and life appears. Transmutation of the field strengths and confirmation of the existence of the position is the reason for the creation of the new life in these conditions. **Where there has never been fish, then fish appear, because the salinity of the water dictates the conditions and reflection of the RNA and DNA of the planet to create life in these waters**. Now that the man becomes educated and he can undetrstand more and unravel what has been the mystery. You get a system, create a CO2 in the Gans of it, then the fields of it, you put it in a patch and then on your body and it reduces or stops pain. Or in the knowledge of the current masters of this technology, you can create or remove entities from the body or introduce them, so it's the same. the field transfer in comparison to what it is, in the condition of what you have created transfers the DNA and RNA and confirmation of the new life. (:38). **If we can replicate every condition of this planet on another planet anywhere in this U, we can replicate life the same as here, because here we have the atmosphere of the earth which replicates the fish, we are part of the universal ocean of fields, in balanced strength, the same applies. In balanced strength we can replicate. There is a very big question, was life ever transported to this planet in this way. Are we a copy or part of a duplication? Maybe**. But **due to the interaction of the fields of this planet it has its own characteristics and dimensions as well. It has its own structure**, we are all human but if we are from one part of this world then we get blue eyes and blond hair, if from another part we get black eyes and brown hair, **because the conditions of the environment has dictated, and not the mentality of the man**. (:40). **In this process we have to be open minded and clear enough about the totality of the knowledge and not be restricted into what we think we can't understand. If man stays open minded and gives from his soul, even to his enemies, his enemies will also change**. If you give the same to your friends they'll also change, or to anyone unconditionally they'll also change if the intention is to serve, and it's the same across this planet and the U. If you understand this **you can receive the energy of certain fields that are not available on this planet, from another position in the U, if you understand the absorption of energy from the space of the fields of the ocean of the plasmas of the universe**. Last week in the teachings, in a very open way we explained that **the STM receives the majority of its fields from the depths of the U, the depth of the planet, of the higher strength of it**. It's not that it absorbs very little, anything that is of the strength of itself it will absorb as it needs (:42). from the dimensions of the U. It doesn't take the lowest or the medium, or higher then itself**, it takes what it needs from the space of the U, it transfers that energy as a plasma into the dimension of the physicality and then it leaves it to the brain, or what we call the transition part of the life, for it to decide what this energy is going to manifest itself as an end product**. It's like a dough, once you have made the dough then you decide if it's going to be a bread, cake or cookie; an arm, leg or liver, according to what is needed, otherwise it's the same dough, the same field strength from the STM. This is what is and it has to be understood by all of us, then

we become the scientists of the U, with no restrictions to become a chemist, biologist, or a farmer, because you understand the operation of the soul right across whole entire understanding. Now we understand the totality and now we have to be open minded to understand the totality. (:44). **The point which we decide that this is going to be my liver, ?? this is where we want to be, there is nothing wrong in it. It's the pleasure of the STM to serve at that strength and point**. It's for all of us to be aware of the totality but choose which part we want to be with or function through. This is the key and the process we need to understand**. Even if I stop the talk for today you should at least have an insight into how to feed yourself in the space. We need a second entity to be able, by the confirmation of it, to be able to receive that we can give. In the mythology and the history of the man, we call it "Adam and Eve", by giving part of itself**, as we say Adam created Eve, not only to confirm the confirmation of his physicality **but to confirm that he can love, which is giving, which confirms, I exist. Adam did not create Eve for the physicality of life, but for confirmation of (:46). I exist, I can be a giver, and by giving I lead to the creation**. The creation of, symbolically a woman, but in reality confirmation of my own existence that I can exist but I need confirmation of my existence, I can love but I need to have something to love, something that can love me back that I can confirm I am a giver. The process we have seen in the mysteries of whatever (? culture, Greek myths for example), is in fact the story of life in space. It's what we call existence, feeding oneself that through feeding we need to feed another that what comes to us, becomes our food. **As long as it is only us there will be no existence, and as long as there is a lover for us to give to then we confirm our existence**. I made man in the image of myself, I needed to create an image for me to love, that by loving it I can receive back life to confirm my existence. this become very clear **how in the space we can create the conditions of existence at any point in the U, because we receive the same field strength but according to the condition of the environment we find ourselves, and our soul decides to make itself appear then we allow the field strength of that environment to be created that it leads to (:48). to the confirmation of our existence**. We have Adam and Eve anywhere in the U, it's our destination and wish to create what Eve at the point of destination of the manifestation. This is the secret of life, the way you would exist in space**. No one dies in the space, just because we have seen here on this planet, that if we don't have air we die, if a fish leaves the water it dies, but in fact if we live through the soul of the being**, you can live in the water, the sea or the depth of the magma of this planet, or you can live in temperatures hundreds of degrees below the temperature (limitation) that the man has made for himself. This is the for us to understand the totality and these teachings are for this purpose, to open the horizon of understanding and the fear of the man, from what has become a fear but doesn't actually exist. **If man leaves this planet through the existence of his soul and understands that it is the soul that dictates its manifestation at any point in the U, according to the fields which he releases in interaction with the fields of the environment that he likes to appear in, then man has become free. Man will have become part of the UC because the universe is one community**. It's very much in the larger scale the teachings that we have started, One nation, One planet, One soul, (:50). One universe, it's all the same. It's for the man to decide if he would like to be a physicist, chemist, farmer or a candle stick makers, otherwise in essence all have souls and exist and they decide in what dimension they want to exist and manifest

themselves as. Now you can see, once we understand, that **it's the soul that becomes the creation of the manifestation of the soul of the physicality which in interaction with the field environment of the existence leads to manifestation of the physical life in that environment**. And sometimes you have part that fits and other parts that don't, then we see a mixture of the manifestations. This becomes very frequent for the man of space. **We see entities with the creation of the soul that we can feel, but the physicality is not there, or we see the physicality but can't see the soul, in the dimension that we are looking for, but in fact, if we look in another strength and dimension we find life existing there. then we decide if we want to match that or we want to reach that level of our soul to be able to manifest ourselves at that level, what we call, we become the lover and we change everything to fit that we match with our loved one**, which means we become the givers, (:52). we give up and we give to the level that compared to them, we become manifest to them, but not necessarily to the others. **Those of you who entered the dimension of Gans technology in the AA level, and then the fields beyond the AA level you start feeling and seeing in the dimension, because now you start feeding the soul because you have learned how to, and you'll see it, then you'll become interaction and you'll interact with new dimensions.** For a lot of you confirmation of the existence of the soul through the water and Gans of the body of the man has been a problem, where we see when the egg and the sperm come together and create what we call the Center, the Essence. In the teachings of the past we had this, those who became the masters and developed it, but they couldn't understand it and they had to wait for the right time to come. **They have recorded their work in the teachings over the past 4 or 5 years and now you can relate to it. For example, creation of twin souls, what we call "beautiful people" (schizophrenic), creation of twin souls of ourselves one of our physicality and one of our total essence, and the interaction with each other**. I have asked our team in the background to look for these recordings and Shandor has found them, they are about 6 minutes. Rick can you play them. These are part of the teachings of the past which at that time we could not make sense of them. (:54). And now we can. ... Listen to it for about 6 minutes. You see one or 2 elements mixed and what has been created. Then you see the interaction of a mixture of Gans' which leads to creation of what I call Principle matters in the center.

.. Video from 44th Knowledge Seekers Workshop Jan 8 2015 ..

... shows the bubbles that formed in the center of the core. There is a double bubble (2 cores) in the center of the rtoating ball, the 2 "cores" are because they mixed 2 elements, 1 is CO2 and other is CuO2. They each created their own central core and because of how they were mixed they have a line of connection with each other. (:57). .. that's why you have two twin center, in time you'll see light within these cores because the plasmas will interact by layering inside each other, and that interface I explained about the create of matter in the Pl over the MG field of different strength, now in the coming time as you mix with materials (Gans') in time you'll see light within these center plasmas. These center principles because they'll radiate different fields and in attraction and reduction from their environment you'll start seeing light, they'll become like light bulbs. The interaction will come from inside, not as a light bulb that you see from outside. the light from inside will come form the same structure of plasma, then you'll start understanding how you can control these centralized plasmas to create different matters. This double Pl separation that you see is the beginning of your understanding of the creation of life. If

you can mix and control the CO2 and the Gans in a specific order in your reactors, I'll show you in the future how to do it, then you'll create 1 reactor and the 2 plasmas will merge inside each other and as they have different strength fields they interact and you'll see the light inside the ball. (:59). In the second video. Mr. Keshe says, what we see here in the central plasma is what we call the soul and this goes back to the teaching of nearly 3 years ago, the bubble in the center holds that position, exactly like the STM. It's the interaction of the cells, the MG fields of the AA which have turned to from an egg and the sperm together, which has lead to creation of this center point, so is the same with this. **This is how you can see the creation of what we call the Principle Matter, or STM, or the beginning of life, if we allow this fields to transfer then we can find the matter of physicality within ?? at the point of reduction. These are not empty spaces, they are created by ?? and push?? the fields of different strengths**. You can see the little bubble in the center. That is totally created out of the interaction of the fields of the matter inside. If you create a condition of the mixture of AA's, of the field strengths you'll see the structure of the life, maybe feed it as a field strength, or as the totality (1:01). .. **when you start rtoating at a certain speed the field separation occurs. This goes back to a lot of theories people have about there being a hollow center in every planet. Yes, there could be**, from the interaction you see it very clearly.. This is done by KS and have experimented ... when you understand this **You see the soul right in the center** then you understand that **there is a soul within the structure of the body of the man, which was seeded from the original platform of the AA's which created it. It just adds to it layer by layer as time goes, as what he absorbs from the U and its environment.** We don't need to put more Gans in it. It just creates balanced condition of fields and **from then on it's more powerful, in the future when man looks he'll see fields which goes beyond this system. In the body we call it the aura of the man**, it's created the same. In this system with that bubble, change in the size of the bubble will create different auras around this ball. (1:03). ... ... **now we see if there is a doubt in some of you about the Principle Matter in the center of the Gans liquid. When you try AA, when this center is created you'll feel the E of it**, but learn that the AA Gans is to be of different materials and different strengths for you to have or to be able to absorb ?? observe only part of it, if the field created in the center point is not at the strength that you physically might feel or emotionally accept, then it is just another ball. (1:05). **It could fit in the strength that your dog feels and he starts crying, running or laughing, or if it's at the strength of the fish he might start to swim rapidly in the tank or swim upside down**, because that is what the thing (Pl) creates. We have to put aside all restrictions which we make for ourselves to be able to confirm that we understand. If we accept and understand the totality then we understand life, emotion, intention, can be developed, exists in every dimension on every point on this planet and the U. If you listen to part of the 44th Workshop, if I remember correctly we referred to the existence of the soul at that time, it was mentioned just a touch, but we had the knowledge 3 years ago but if we would have told you this then it would have shocked you. Listen to it, I touched on the creation of the soul in these systems, because at that time we couldn't explain, you were all in the nursery of the knowledge. (1:07). **The knowledge was there even 4 years ago, but the students were not ready to sit for the exam of life**. It's not something that we have come up with, now you are ready for it and you can understand more and develop the rest. You can understand, explain, expose

different beauties of the knowledge according to your understanding. If you listen to 30 through 50th workshops it was saying then literally what I have been teaching you now in the dimension and direction of the STM, now you can connect to it. **It's my wish that none of those who listen or work around the KF ever put a rule down saying, this is how it has to be. the minute you have put the rule down it means you have stopped understanding any further**. (1:09).

... This is what we have to elevate and promtoe through our own soul to the others to reach the elevation of our soul. In a very simple way, today I have taught you exactly how to feed yourself. If you are among those who don't want to have physicality, try and you'll achieve. **The very first time I declared my position to Caroline she said, what are you doing here. I said, I have come here to enjoy the pleasures of physicality (1:11) and understand life. She said, aren't there thing like this in other places in the whole of the universe. I said, no, here we can taste, smell and enjoy the physicality until we don't go through process to understand why man committed so many crimes for these physicality's.** We can't take man out of it, **and it has taken me years to understand it, to see the weakness and the strength, to be able to see why man kills, falls in love, becomes physical to another. Once we understand this we can merge it, elevate the soul of the physical man to understand the dimension which is above physicality. How can I teach if I haven't tasted it myself**, how can I tell you how delicious a cookie is unless I have eaten one or made one myself that I have tasted it. **Many Messengers of the past made the physical mistake of getting involved in physicality, and I said I will not make the same mistake, unless I decide that it is not a mistake.** But their soul was given the message to deliver the Message of the Soul, they converted it into the physical dimension and not the message that came to them. We have to decide what is acceptable at the point of manifestation (1:13). and what is the condition of the manifestation at the point we want to manifest ourselves, but **we still carry the ethos that we have to be at the level of the giver, level of the receiver, and being both at the same time. To give and in giving to understand that there is a need to receive that I can give more**, if you keep on taking water out of a cup spoon by spoon soon there will be noting left in the cup, unless you put some more in, so is it the same with the STM**. The soul, a beginning, what you call the Principle Matter or Black hole or whatever, needs to receive otherwise it has nothing left to give in time to come**. In receiving there is interaction of the fields of those coming in with those going out, the difference creates life, at the same time there is so much taking that we can't see the giving. **Read the paper, "The creation of the Black hole", if you have understood that principle you have understood the essence of creation**. This paper (1:15). is the backbone of understanding the creation in the U. It's not if you are narrow minded and are looking only at objectivity of an entity, then you will get stuck. If you understand the essence of that paper then you understand the totality of the creation. This is why it was written as **one of the first papers, because it explains everything in the life of the creation**. The example I give, **when the energy goes in you see a light, that light is created, it means it comes out slowly, it is the beginning of creation of life**, is giving, but we do not see it. Now you can see how we go from the physical dimension teachings of the past to the present teachings of the presence of the soul. **This makes life easy for all of you, because now you can relate to everything, your creation, you have been**

the creator, you have to be a just and correct creator that in what you create doesn't end up by mistake to the demise of yourself, unless this was your intention. The only apple between the creator and the created is the wish, the condition which the environment creates, that you have to work with it. I hope that it has been made much more clearer. It comes to, (1:17). **how do we communicate with each other, what we need and what we receive.** In the language of the man we use the voice, signs and letters but what is and how do the souls interact, how do you understand the feeling of the soul. We know the emotion of joy and laugther and sandess, but go back to, I made man in the image of myself. **Your soul feels the pain of the loss, or the joy of gaining by others from what they give, what I give for you to exist. The E of the STM to lead to the condition of interaction and creation of the physicality of the STM is the essence of the creation in the physical matter dimension, in which we speak about the weight and the mass, but we never considered that the weight and the mass are from the interaction of the fields of the entity on its own by itself, or in interaction with the fields of the environment of the entity by itself, but then again according to the inertia MG field and not the mass G field of the center. There is a big difference**, because we always **can only manifest fields of the given strength of that field (1:19). is within the structure of the planet. If the element is in space and we don't have it, then we can't absorb it**, because we can't absorb it we can't create its physical condition. We can't create Cu on this planet if within the structure of the MG field of this planet, (part of it) Cu doesn't exist. It has to have that field strength that it can absorb it, then by absorbing it, according to the field strength of the environment it transfers it into the matter state of Cu, then we see it as a matter. **So shall be the presence of man, confirmation of the existence of the man, according to the environment which it manifests itself in the physical dimension, if physicality is part of the inertia of that entity. Otherwise it can't do it**. If we don't understand this we miss **the whole process of creation, created, and at the same time being able to feed what we have created. You can't create a life in a soul physical level if you can't feed it.** It has to be at a strength that you can support, feed, give life to, and this is what has to be. This is part of our work. (1:21). This is part of the totality of understanding the whole creation, not part of it. This is exact understanding of it, how we want to manifest and where, and **there has to be one condition only and that is the intention to give and not to take from the environment**. **If we enter a dimension to take from an environment then we are back to what we have on this planet. We become takers of packages of energy because we have no confidence in ourselves that we are the givers, the lovers**. It's in part of the writings of Bahuala, that **one should not love his nation but has to love the whole of humanity**. And some governments and people who wanted to use this, are not nation lovers, but it doesn't say that they are the world lovers and loving the world means creating peace. We have played with the words and their understanding the way it suits us. (1:23). **In space if you play with these things then you playing with the fire of the soul of the man, which means the soul will not allow and with it, it demises itself, because these (intentions) don't exist in the level of the STM**. If the MG fields of the Cu didn't exist in the Cu (??earth), but not exist in the body of the man. **The elements that are not part of this planet are not in the physical strength of the body of the man ??either, but they exist in the STM, which carries the full spectrum of the field strength of U, but in this condition and position as a physical entity of the body**

manifests itself as a man. If the strength level is in the condition of the fish you'll manifest yourself as a fish, or as an AA of a tree or a plant. If you understand the totality of the teaching, **when I teach I do so for every living thing on this planet, and man thinks the teaching is only for him because he can hear the voice as a man, (1:25). but we teach as a soul so we elevate the totality and those who understand they become part of the process**. You want to see **how the fish feels in the cage that you have built him and want him to live, then you have to become part of the soul of the fish, feel his pain and condition and then you change.** We had a recent case in Accra where the fishery has a huge problem. They put 5 by 5 meter tank out of mesh and put them in the rivers or the ocean, and they want to grow them. But 80% of the fish don't want to be in cages, so they create a cancer to kill themselves not to face this imprisonment. **The fishermen lose 85% of their fish growth to this condition. They don't understand and say that the fish are getting a disease. I explained to the Ministry that you have to understand the soul of the fish**, it doesn't want to be captured and live next to the guy who stinks and the other who is too fat, he wants to go where he wants. We have a condition to elevate the soul so the fish is happy with what he has, he says, I accept the condition that through my soul I can give my strength to the guy who smells and the one who is too fat, that we are all happy to be together. And when you understand that **the E of the fish comes from the strength of a certain type of Zn, (1:27). that it gives him that present satisfaction then you'll find that the fish change**. They said, oh, you found a technology that it can change the fish that it doesn't get the disease. No, we have understood the essence of the soul of the fish and not finding a cure for the physicality of the fish. **The father gets prostate cancer because of the conflict with the son, the mother gets breast cancer because of the adulterous life of the husband. Now you understand. Do we do chemotherapy on the prostate cancer and then the father still dies because the pain of the emotion with the son is too big**. Or do we elevate the soul of the father and the son to the level that the physicality of the father sees that there is no reason for the destruction of the body, there's only a misunderstanding. Or do we teach the man to leave the adulterous life because it leads to the cancer of your wife and the loss of the mother of your children. Or do we teach the woman that if you are correct the man doesn't need to look outside. **Elevation of the soul that the 2 fall in love is the point, not the physicality of the adultery or the cancer of the prostate.** This is where **the next level of the application of the health system comes in**, understanding what leads to the condition and not (1:29). that the condition is there and how can we eradicate or change it, because the present tablets tries to interact on the physical matter level. Nobody has made a Gans or plasma of the disease that you can give and elevate. The new dynamic systems do, for the first time we managed to go into the next level. The present doctors have a huge problem with it because they don't understand it because they have all been taught at the matter state level of the tablets of the pharmaceuticals and the check in the bank. The process of the change comes from the understanding of the totality and not all of us are capable to do that because we have too many other things that are ?? tied up (1:30). Try to expand your knowledge but do not take sides because that limitation can become your demise in the space. Learn the knowledge in its totality, at least hear it, you don't need to understand it because when the time comes, you will understand. It's the same as with rtoating balls we showed them 4 years ago but you were not ready. I am a master of teaching and I know how and who to

teach. Some of you learn fast, last week when I started explaining about the mixing of the AA's in the core, I received a text from my Arman, he said didn't we do that 3 years ago, I said, you are too fast. (1:31). the rest were not **ready I had to slow you down. Some of us get enligthened before the others but they will catch up**, but the problem is not for those to catch up, we are a live entity humans, in the physical body of humans, we create new souls and the teaching has to be for those also and the ones these souls create and the ones after them and the rest. **These teachings are not just for us but are for the future generations that they understand more and more from an earlier age and eventually from the time of inception that we need to teach the STM not the physicality of the man in the cages of the schools of the man.** If you teach the STM the totality of the knowledge you don't need to put him in the classroom of today and torture him by a teacher who himself is ignorant of totality and in turn creates a bunch of ignorant children by the education and patterns of his own life. We give pure souls to a bunch of whatever you want to call them, who have no knowledge but are there to confirm their existence. There are no schools in the U as what we see here on earth. **This is the teaching and torture of physicality and the confinement of a bunch of people who themselves have no understanding of the totality**, how can they teach. How can we allow an illiterate person teach graduate PhD's and claim to be a doctor. We have to teach the soul of our children that through the elevation of the soul when they see the knowledge of man on earth they understand it here, when they see the knowledge of man in another point in the U, they can understand how to fit, and when they see another life in the U according to our knowledge and strength of their soul they can appreciate the beauty of the new life ?? We should take the schools into the souls by us who understand rather then giving them into the hands of ignorance that they create more damaged souls in the hand the future cycles. Any questions. (1:34). Q: Can we use the AA in the salt without washing them? **You have to wash your AA. Some salt created on the AA let's say K or Na are of different strengths so you have to take the physical level of it out that it becomes the Gans level of Pl of the AA which is of the strength of that salt**, but you don't need the physicality of the salt with it, it will carry it. (1:36). In so many ways as a human race we have conditioned ourselves, pushed ourselves to limit our own understanding, nobody else has, it is us who decides that I want to become a physicist or a doctor or a farmer, because this is what is expected of me or what I better understand. It's good to be a farmer but understand the work of the medicine of vegetables, the same as human beings, and understanding the essence of it can give me the same, it doesn't matter if I am a farmer or a doctor, because I understand of what I call the vertical people. **We haven't grown that much even to understand that we need to create plant doctors in the same way that we created animal doctors. To be able to understand the emotional illness of the plant**. At the pharmaceutical level we change things the way we want it, but do we ask the soul of the plant, is this what you are happy with, or what are the consequences when I force changes on you by changing your conditions. We have animal doctors but we haven't created doctors with the knowledge of the plants. That's how ?? we are, because they are educated ahead of us, we don't want to show how ignorant we are of the knowledge. (1:38). I said once in the health teachings, what am I going to do if I bring an entity from planet Zeus in front of me. Because he has never created children by not teaching them from the soul level and has taught them from the soul level and they understand, they have no prostate cancer, but in terms of your own knowledge it must be

a prostate cancer even though the guy doesn't have a prostate, but it looks that way to you, why. **Because you haven't understood the process of the interaction of the physicality with the interaction of the emotion of the STM, in comparison with the soul of the entity from planet Zeus**. The **only way you can do it is to be a lover, a giver, don't ask questions. Instead, I give everything that you need as you** are a patient in front of me. Take what you need. And **what comes back from it tells you the source of the problem**, not what you are trying to give to him, because the prescription for the pharmaceuticals is what they have paid me to do. **The process of healing in the U is the true giving through the soul of the entity and not the force of the physicality of the entity, in the condition of the man's level of understanding**. This is the key, this is how all of us become man of space, because we understand what is the matter condition of the physicality of our life, belongs to us, we have to educate ourselves (1:40). to understand the level of the soul, then we become educated in the world of the universal community. Q: **Are there some clues of how to give from the soul of the physicality** or the higher level central soul so as to enable them to merge or for us to be able to maintain the soul of physicality ? higher level central soul in space? **Not really. You have to feel it. I presume that you want to teach yourself. If you have a lover or wife or children, when you lie next to them, try to feel their needs and usually you find out that they are takers. They are 99% takers, very few are givers and it disturbs you**. You get up and you leave the bed, because you are there to give but they want to take more then what you can give and that is not acceptable to you. We have to feel the emotion. **This is what angers me a lot and puts me to silence a lot of the times, is that I see that they are takers but they pretend to be givers and they talk as if they are givers. (1:42). Deception by the physicality of the man, but seeing the truth through the STM**. There is no method, you feel it and you understand it. **The only method is to trust in ones soul.** There are many thieves of Baghdad across the U and especially in the race of the man. And they call it, I love you through the love of man, but through deception of the physicality. Q: So trust, I will know, give equals take.... **You just give, don't ever take**. There are a lot of things we don't understand. There are **stages of what I call a stroke or brain hemorrhage. If you ofllow people who have had a brain hemorrhage, at a young age you see different effects. In ages 18 to 25, and if it's at a point that so much information is created in the brain that it's going down to the physicality it stops receiving and giving more in the E**, you see stroke in the upper part of the spinal cord just at the point of the interaction of the fields of the brain with the physical part, or the interaction of the STM with the physical soul of the life. (1:44). It usually leads to heavy paralysis which ?? and the rest. If you have a stroke between the age of 35 to 45, you get a different stroke, a behavioral stroke. And it changes due to position and understanding. ... In the ones past 45 you see physical damage type of stroke, but there is a hidden emotional damage stroke that we are not aware of, but you can analyze it. It bring people a lot of anger, people who forget damages, positions, forgetting ?? Anger by misbehavior of the youth, because we don't understand, I have been good and have done good, then why am I in this position, and this is huge. The world of science has never studied this, but people who have a stroke around age of 40 will have a lot of anger, and a feeling of a shortness of time, not being enough time. I have been hit in midlife so I might not have time. They tend to jump in conversations and not let you finish your sentence, because 'I don't have time I want to say what I have to

because if the next stroke comes I am gone and I won't be able to say what I want to say. At the same time it brings a shortness of understanding in the younger generation because they are wasting time, there is no time, ' I have had it at the age of 40 so I can die so I don't have time for nonsense. We see behavioral and sometimes physical changes. If you have stroke in 50's you already have had the time so psychologically you accept it, that we have lived our lives. (1:46). Therefore the stoke creates a massive physical disabilities, usually on the left side because it hits you in the direction of the heart emotion. Or it hits you on the right side, it depends on the level of the E ?? and the position of the heart. But the man goes calm and quiet because he has already accepted demise to be around the corner ... **The world of science never looked at the emotion of the stoke, the level of not wanting to live in the physical dimension, but the force of the E of the STM** had not yet finished, there is still something to do and learn. None of the medical research ever looks at the stroke through the STM and what condition of E it creates in the body. We haven't even mastered this part of our lives yet. We have to become aware of our own physical life and be part of it (1:48). to understand the work of the STM with the physicality. Why do we become forgetful, agitated, why not remembering when we have a stroke around 40 to 45 years old, and why the same condition in the later ages, because of the acceptance**. I was ready to die, even though I have anger for what has happened. Why at young age stroke the physicality doesn't respond to the E of the soul. Why do we see Alzheimer's at young ages, or ILS with different effects and ages, exactly like the stroke. Do we have to blame them for what has happened or are we the creator of such a condition that they gto there** ?? What we have learned up to now in our sciences are not wrong but we have to go further and put things right. Some understand the interaction of the STM and STP which leads to the physical condition we see. Then we become the physicians of the U. Every single one of us has to become physicians of the U because otherwise we will not be able to exist. (1:50). We are not training a bunch of space doctors but souls who understand the work of the soul of the entity and not the physicality. We study these because we have to adjust our understanding we have to add to our knowledge that the process of change comes in a deeper way and faster otherwise we can not. Any other question. Q; Do the souls of other galaxies have the attributes, are all souls the same in their internal structure or are there different nations of souls? No, **all souls are the same, this is why you can manifest yourself in the shape of another being, in the environment of that being. You don't go and import it, it is already within you, you decide at what strength to expose**. You manifest yourself at a point of environmental condition field strength and that condition tells you to have 20 arms and 16 legs. It doesn't mean you couldn't have it on earth but it's not applicable. (1:52). You try to be a centipede and try running, shopping, etc. on 100 legs. More then 2 is enough**. But in that space (the environment you manifest) because it allows you to function is a certain way that is necessary for that environment, but it meant that you already had it, but if you come to earth and you try to copy that 14 legs and 16 arms it doesn't work, you'll be falling all over yourself**, and with it will you be able to carry the weight of it. We carry all the ?? all the souls in the U carry the spectrum of the field strength and manifest themselves at the point of manifestation. That's why I keep saying in the teachings from time to time, that there are many of us who are not from this planet, but they behave and look. This Sunday is what you call the Christmas for the path of those who chosen to find a way through the

Christ ?? **When you look at Christmas look at the essence of the soul of the Christ and not the Churches, books and crosses that are put there to deceive the man, then you might hear the voice of the Christ in the essence of his soul**. (1:54). Try to free yourself from attachment to things that you don't have a need to be attached to in the physical dimension of the physicality, but understand it through the STM, then you'll find out that living becomes very easy. You can walk away from those who have the wrong intention and let them live within the structure they have made for themselves until they receive enough from you to elevate their souls. They call themselves your lovers but in fact they are not, they are the lover of their own physicality to confirm their meager existence. We don't preach, we enligthen you to see the truth and ?? and that is the purpose, when you see and understand it then nobody can abuse you and nothing is magic. Q: Paul from Togo asks about a road that passes by a mountain in Togo, (1:56). In that place we have a lot of accidents where 1 to 2 million people have died by accidents. At midnight they see a lot of "dead people" are moving and you can see them but they dissolve when they are 10 meters from you, how can we explain this. You have to understand what has happened there, what is the condition and what is the position of it. We have many places in different parts of the world, because of the configuration of the MG fields, they effect us in a certain way and create certain conditions. You have to understand what strength is created in that environment which effects what part of the creation of the man. (1:58). What does it elevate or reach. We had a scientist with us in Italy who said that since she has been using Gans that she looses time in the same area when she travels. 31

(2:04).

(2:10).

(2:12). Q**: from Togo, when I give, someone feels things, and I say by my soul level I can give a help for that person.** I don't understand. ... ?? with my soul I can relieve others pain ... Maybe you share because you don't want her to miss the class and the knowledge you are teaching. I have seen this happen where people instantaneously come up with a pain, and you don't understand it, (2:17). but if you stand back and analyze how and when it happened, and the reason, then you see it was made through emotion. I was witness to a sudden attack of pain, and they say why, and they come up with all excuses, but I say no because I was there witnessing it. Why do we manifest pain? Is where the pain manifests in a given part of the body the result of not receiving enough emotion that with it we want to confirm it. I have seen this recently where out of nowhere someone comes up with pain, but it has a specific ?? which means it has an emotion tied to it. If you explain it to them then they understand that you know why the pain came and was felt as a pain, but it was of the emotion at the level of the soul of the physicality and not the physical pain as a pain. If you get poisoned or hit on the head you feel a pain because of the physical interaction, but these kinds of pains means, ??feel what I can ??? you still have to understand why it does that. In other ways it means that I have the same strength as you have and I want you to be here that I want you to receive the knowledge I give you (Togo man) so I take your pain. (2:19). I become part of it that you don't feel it, you become the pad, you transfer the energy to yourself. We do it because we are emotionally connected and it's very common. A lot of us do it with our children, if your child has a

pain you put your hand there and take the pain way. ... you transfer the fields of the emotion through the body. One thing you 2 are from Togo and you speak clear but when Paul speaks we have trouble understanding, you 2 better talk to each other and use your system. Paul says they have solved the internet problem. (2:21**). Q: Man feels uncomfortable when people see him as unique because his view has changed**. .. since I embraced the ethos of the KF ... they say nobody is like that these days. ... the souls are lacking in real love .. why am I feeling that discomfort by uniqueness. (2:24). **... I don't know I am not in the environment you are in, depends on how you are seeing this process of giving, are you seeing that you look generous and this gives you a pleasure to be because now you are part of ... or do you need to give in the physical dimension, where at the level of soul you can give more. It just depends on how we see it, perceive ourselves** and what actually gives us the satisfaction to exist. It's very personal and depends of what gives you confirmation and what you are happy to do. The teachings are very compact, what I have been doing in the last weeks is the first 20 to 30 minutes of teaching is so much condensed and it needs a lot of understanding. We explained about the soul ?? how you can feed your soul that you can live in ?? the universe. When we are left alone in the space (2:26). the physical dimension existence according the Kelvin temperature of minus bla , bla , bla has no relevance on the STM. When you fall in the volcanic magma it doesn't take the STM but only the physical condition of the man, the STM is free. When we understand this it makes us men of space, it brings us ?? in the physicality of the U ?? and the UC. It's not that when we say we are going to take you to the UC, ?? that a bunch of aliens are going to come out and say that we are here, would you like to see 20 tails or whatever. No, it's to elevate the man to see the truth about the creation and the STM in the dimension of the soul of the universe. To understand that I am a part of, I belong and understand the totality. Those of you who are sightseers you are quite welcome to call them UOFs, those who universal seers enter the soul of the universe ?? STM. There is a big difference but to a lot of you it's just words spoken, but those of you who understand will take the path, and see the universe ?? strength of the creation and not thorough the dimension of the physicality of the man. As I said may times, I am ashamed to be in the body of the man. (2:28). because it has too many restrictions and too many things that force it to do wrong because of its physical existence. What has gone wrong on this planet, we have never understood but there is something inside in the grain of the soul of the physicality which has caused this problem. Why man has become so self centered, why he has become so much that he is everything, and the beauty of it is that all the men feel the same, so there must really be something that needs adjusting in the total soul of the man in conversion of the emotion of the physical side of the STM. This is the problem. If you look at the teachings, I have given you many choices, stay as you are you don't need to reach your soul, whatever you ?? need 10 generations down the road, I already know this part, but where, oh my great grandfather 10 generations before heard it, you have been given the option to become free from the physical attachment, but to still be here, you have been given the option to become passengers of the physical life ??? transportation, what you call UOFs, and the option to have understanding of your soul that you become passengers of the universe, then you are given the option to understand the totality work of your soul that you understand the work of the Creator. And every man has the capability to enter any of them. It's you who has to decide and that is what these teachings are coming up to. We

taught you the physical condition and a lot of you have a problem with the flight system. (2:30). but as I said many times, you are on a UOF called Earth and you don't see yourself inside a ship while it's traveling. How do you expect to be able to travel inside this thing while you yourself have never understood how the thing you are already traveling in is traveling. It is not my teaching, it's your lack of understanding of the totality. I have taught you everything. Try to understand the essence and choose the point of ?? comfort and do not choose the point where you want to be seen because it's fashionable. There are no catwalks of fashion in the spans of the U. You can go with the naked STM, you decide the manifestation of time and the position of its place. This is where the teachings are leading to, for you to see the totality. Thank you for today and hopefully we'll learn more next time.

204th Knowledge Seekers Workshop Dec 28 2017

(Those who understood about the soul used their knowledge to abuse the man and called it faith and religion and now we understand that we have the Star Formation within us to travel in the universe, When you discover the strength of your soul then you become enligthened and then become part of the Universal Community, All the knowledge had been given to Moses but he changed them and only brought down 12, Today we release all the 24 Commandments that had been given to Moses, The 2 languages that have abused man the most are English and French and will be handled differently, You give and it depends on the receiver what they want to receive but you never interfere, The reason for man's intelligence is related to the Universal Community, Over the centuries many men have reached the enligthenment and become men of the universe, Man received the knowledge to be peaceful at the creation of his soul but we have decided to accept limitation, If we give from our soul and the physicality comes into alignment with the soul then we all become Messiah for our own physicality and not for others, Reads 10 Commandments these are all things Moses himself did, He explains the 24 Commandments which completes the cycle and the start of the new cycle with these commandments of the universe, The prison is the body and if man is taught this from the beginning he won't commit crimes, People are selling Gans for their own pockets but the goal is to teach and not fill your pockets, I have no fear for my life, that way I can speak the truth and tell what is correct, Teach my technology don't just give a patch so people have to come back to you like the priests and then you have power over them, Teach to everybody freely and don't judge who can understand or not, everybody can understand this technology. We are not Robin Hood, the guy who takes from the poor to give to the rich, nor from the rich to give to the poor. We take the money from the rich, the ones who can afford it, that by giving to the poor that the blessing of the soul, elevates the soul of those who provided it. There is so much more to learn in the process of using these Gans' but the only problem is that you don't teach enough so that more knowledge comes back in (to us) so that we can all learn more. I am not a philanthropist. I am a man of God, because I am God because God in our language means the Creator. I am the creator of my own physicality, so in that order I decide how the energies and the fields of my physicality as a creator of me is used. Thy shall not steal. At 19 when I took this position

I what Judgment Day is and how to judge myself, Certification through FDA is underway in the USA, The completion of the Commandments was the end of the time, of the present cycle, and it's done today, In the space we don't need to sleep, This time we will not leave the man alone until he matures because we have seen the abuse of the man by the Messengers and their cronies, Wishes for 2018 man will mature and enter the space, Chinese government to head space program.)

(:11). It has been a big year at the KF with a lot of changes. **We have done a lot of work, soul searching now that we have started teaching about the essence of the creation of man** and especially this year we have taken a long journey in trying to understand the essence of our own creation through understanding of the new technology, that there is no myth, or because somebody said so, but because we understand ourselves, who we are, how we are and what we are made of, and what is our destiny once we leave the physical world in the essence of the body of the man. **Many people have written to me and I get it from a lot of international organizations that say, can you stop mixing the STM with the science, in that case we can support you because the science makes sense, but there can't be a connection between the science and the religion**. (:13). And I explained to them and to you again and again, that the science of creation has lead to the faith of the man and not the faith of the man to the science of creation. When you come to understand this you understand the essence of creation, why and where we come from and where we go to. As a human race we have chosen a very interesting path, where ever man has appeared he always accepted somebody to be higher then him. Somebody has more power then him and is called the god of wind or rain, then he has made the statues and put his mind to the mind of the stone, and the wishes of the bricks, and wood, and in every shape or form he has considered himself not to be intelligent enough to understand and that has created a channel for those who think they can abuse these conditions to come into position of power, and also adding to the ignorance of man for their own benefit. The interaction of man in the dimension of understanding his own ways ?? the creator, has known different channels, in different ways and over time man has learned the science because he has done it himself, and whatever has been brought to man for him to understand the essence of his own conduct ?? physical structure, he has called it a mystery, a god, a creator and then has chosen different paths of believing in it. (:15). **We try to break open the stigma for everyone to see the reality. Now it becomes very dangerous, because the abuse of the man in the name of the man himself, as a creator of himself ... they have become the intermediaries to control the STM with the physicality**. In fact what we have seen in what we call a path of belief, religion or whatever has become another, what I call, a strength length, strength of fields, that instead of us internally interacting between the soul and our physicality, we call it our emotion, **the external strength of it we call it religion. Those who have found this strength they emphasize on it and can tune into it, and then abuse it. It's very much a controlled mindset of those who could understand it, and then abused it**. If I speak to you in the language of love and you understand love, then you understand the reality of the fact that you speak and understand the same strength as me in sharing and giving. Those who could understand the strength of the abuse they have created it and given it the name of faith. **In fact there is no difference between what we call religious belief**

that touches our emotion, and pain, joy, sandess (:17). but man in the time, has found that strength, we call it wavelength in the matter state, and so has abused man and has called it every name you can. Now we understand the totality **that the faith of the man is the conduct of the soul of the man in interaction with the emotion, and then it depends on whatever you want to call it, god, sin, happiness, joy and this is what has been part of these teachings. We are elevating our own knowledge and the understanding of our own creation and now we can do it**. Those of you who have understood most of the teachings this year you'll be able to understand this very easily, and those who have not and haven't comprehended the totality, hopefully in the future you'll understand. If you go back to the **Star Formation (SF) and you get a dynamic setup of 4 base reactors and 1 above**, with the understanding that the strong gives to the weaker for it to become strong and equal and in that process creates a condition, and if you understood **that the STM is a dynamic sun, which is within the man, then you have 2 choices, stick to the physical dimension of the spaceship program or use the STM to create (:19). the spaceship of the man in the depth of the universe, or if you have elevated your soul further enough to understand the totality, 1 soul with the understanding of the operation of the physicality which is the distribution of the soul's in collective areas as sub, or taking part, of G part, the heart of the man absorbs, the lung absorbs, you found 2 of the G parts, and the STM which is in the brain, which is a giver on top, you found the essence of the SF within the body**. If some of you who have not gained in your confidence, structure yourselves that your souls, the essence of the creation of your own being in conjunction to be a giver to the others in the SF can lead to the creation of the spaceship which can take man out of the position. It can be done individually or collectively, or you can do it in a physical matter, I have seen many of you creating these dynamic cores. The STM is dynamic and of the highest strength known to man and in the universe. Man on his own can create his own dimension of travel within the depth of the U, or collectively men can become and create that dynamic setup, or if you are connected to the physical entity you get to that point. What has happened in the past times and past year, I have tried for 4 years and the last 10 years, to teach the physicality that you become confident and gain strength in that process, then I have moved you to understand that there is a mechanical system or the STM, some of you have started to use it and practice it, it needs a lot of understanding ones (own) strength to be able to achieve it. **Once you achieve it, it's like that god that you have created and understood the strength of, and they could abuse you because of it, between the dimension of the soul and the physicality, or the strength of the love**. In either case you become aware of the knowledge and at that point you become enligthened and become part of the man of the universe, the UC. In the past centuries and thousands of years, in a hidden way all this knowledge was given to Moses in commandments. (:22). We know of the 12 he brought down, I opened 2 of them to you in the past 6 months and today I review the rest and then you'll understand. **The rest of the Commandments will be released today. Then you'll understand that man had the knowledge to reach maturity thousands of years ago, except for the intermediary of those who received the enligthenment but for the benefit of their own physicality, they blocked, destroyed and ignored**. Today I would like to let you ask questions, but understand that we are not here to speak about N coating or Gans, those will be left to the teachings of KFSSI. I'll let you ask questions and in the process

we enligthen each other that as it was said, today is the last workshop of 2017. **We start the 1018 in being enligthened, and we should start seeing the changes in all the KF work**. The supporters are learning more and more about the dimension of the STM, and then **we'll cross the line to become members of the UC. Will it happen in masses or individual cases, or will it be a collective work between the U Council and EC and Core Team to facilitate**. You'll see the change of the souls in the members of the councils (:24). in a specific way and reason. **The 2 languages that have abused the STM the most in the past times will be presented in a different way, and you'll understand. One is the French and the other is the English**, then you'll understand why this process has taken place because the language and **the use of these 2 languages has brought more abuse on the body of the man as a race then anyone else in the past times**. So by the wish and the will of those who wanted peace, it (they) have been left out that we can understand the totality according to us, then if you understand this then what comes as part of the Commandments you understand the totality. If you have any questions that are relevant to this we'll talk about it, but we are not a religious group, we are here to look at the totality of the facts and **understand the physical process of our soul and how understanding the physicality of our being we can use our soul to create new dimensions and new crafts**. Are those organizations who put man into space, used the knowledge of the science of physics and tried to enter the world of the Universe, are also meddling in the work of the God, are they then in the process of interfering of the soul, science and religion, or have **we found a new fuel, a new system, (:26). which allows us to travel much faster, and much more clarity and safety in the space of the universe, then those who chose propulsion**, or jet, or a donkey to travel. This is where the change has come, for us to understand we have access to a new fuel, system, a new mtoor which you like to call it the STM, and this time we don't need a captain, or astronauts to take us there, but we can do it because we understand the process and have understood the creation of the Gans' and the field forces and how to convert a Gans to matter state, and through that process we have become the new generation of those who bring the science and religion together and make one out of it. This is where the fear of those who threaten these teachings is, that now **the generation, production, understanding of the new fuel and new system, is an industrial revolution in the STM and the physicality of the man. There are many that do not like to see this as they'll loose control**, as they have to become part of (the) one, and they become part of it. And this is what it is. Those of you who go into dimensional understanding they new, plasma technology which is the plasma of the STM, which is the sun, which radiates, gives, which in its fields creates the earth, and through the interaction of the fields of the earth and the sun creates the man and the intelligence, and that jet engine propulsion system for the rocket, (:28). now has lead to for **the STM to complete its cycle and become another sun in respect to the sun of creation. And this is what is the problem with all these teachings, that now you have become the scientists of the whole knowledge** because you understand the basics, you made the Gans' and saw the fields, you have seen the reaction of your body to the fields, and now we have matured to become man of the space. **Many of us will cross this line in 2018** of the Christian calendar. Many of us will start the space travels in different shape or form. We promised that in 2018 we'll make wine on Mars. It says 2018 travel to Mars, ??wine Mars will be served. The knowledge is there, go back on the KF (statements about) travel into space,

there is a line that was put in there, **and this is how man has advanced in such a short time**. And we knew that 2018 was the time for it. **It is us who can fail or succeed according to our own path of belief**. A lot of things have changed, a lot of us would like to understand more, and a lot of us will walk away because we don't see ourselves to be worthy of being the man of space, but listen to the rest of the Commandments that are going to be released today. (:30). **Moses brought 12 and reduced it down to 10, 2 have been given, and 2 have been hidden that when you mature to become the man of universe you will receive those 2 through your own soul, then the 24 Commandments are complete**. Any questions? Q: Alzar, What were the first 2 can you go over it. No, it's for you, it was in the teachings in the past few weeks. One was that thy shall not lie, because Moses wanted to lie to his flock so he had to break it. What you see in the 10 Commandments which **Moses refused to release because it effected him personally in what he wanted and planned to do**. But if it would have been released it would have changed a lot of things for the man, and Moses could not have done what he did, and what we saw with the followers and then the continuation of people of his path. (:32). Q: **Before you said the Earth is a nursery and the UC is watching for everything and are teaching us here on Earth, why did they let all this evil come through for all these thousands of years?** There is a rule in the UC and you will abide by it when you become men of space or members of UC, this is your obligation. **You give and it depends on the receiver what they want to receive. You never interfere**. The knowledge has been given to man and it elevated the soul of those who were supposed to be elevating others. In the process of time many has chosen... many times correction has been put in. If the ?? intimation of the UC had not been there, man would still be a wild beast as in the jungle. Something very interesting regarding the STM and the physicality of the man, **the way the STM, (:34). and the soul of the physicality of the man is positioned in, and the way it has processed itself has lead to a given intelligence that has a common denominator with the rest of the UC**. It's not just that you can walk on 2 legs you gathered the intelligence, **it's because of the combination of the interaction of fields and in some strengths you can receive universal energy fields but the enligthenment is dependent on the man**, this is what I have been saying for such a ling time, people take from this technology according to their intelligence. **Many of the man of Earth who possessed or reached the position of understanding the totality, have already become man of universe, many, many have done it over centuries**. And those who used or abused through the path of weakness, but they understood the strength or the strength field of the emotion of weakness of the man, they have brought in different lies. This is why from the beginning we said that we are not a religious group. We have nothing to do with the faith, because it is the understanding of the STM by the man himself in the dimension of his physicality. We'll never become a religious group, because we carry the science of the universe. **The knowledge man received, all of us from the day of the creation of our soul received the messages of what has been given to the others to be peaceful. It is us who has decided the difference, we decide the limitation of where, and how, and how much we want to go**, (:36). we are beautiful people, such gorgeous loves to our beloved, and then the same man becomes the worst enemy to the others. Therefore, we chose**. It's not that we were left alone, the option, the clarity is with the man**. **How come you worship and love one child but hate another, but you were the creator of both, so you chose and not**

the children. It's the same with the love of God, which is you the creator of it. Man received a message from the beginning, through his creation, he chose how to handle it and how to ignore it, because the term of physicality to him was something he could touch and feel and tangible, it was perfect for him. If we could, like the space agencies that used the rocket propulsion to get out into space to become part of what you call another planet or whatever, call our work wrong, who is there to believe, them who hide themselves behind the gates to lie to themselves, or you who see the effects of the Pain Pens and MaGrav Systems and you know you have access to a new source of energy and life. (:38). **The message has been given and man has chosen different ways according to his power**. **If you find the strength of the power, where man becomes power hungry, like a food, and you can elevate that soul to become equal to the others, there will be no kingship**. It was given to Moses but he refused to deliver because then he couldn't call himself a king. Any other questions. Q: About the SF in our bodies, the soul is 1 reactor a giver, the heart is a receiver (G), and the lungs are G also, which would be the 4th reactor or does the lung act as 2 reactors? The lung acts as 2 reactors, go back to the previous teachings. (:40). Ursula translates Spanish. .. we have come here to serve and not to be served. ...
(:44). And **we'll elevate our souls in helping others**. Thank you. I think there is a slight misunderstanding from the first question. We all ??? .. this is where the rest of the problem comes. **If we can give from our soul in the right way that our conduct in physicality is in line with the conduct of our soul, then we have become the savior of our own physicality, and that is what the Messiah means**. It doesn't mean that you become Messiah for your son, neighbor or nation. **If you live through the correct conduct of the soul with the interference of whatever in between then you have reached the maturity of man,** where the conduct of the physicality is the mirror of the wish and the conduct of the STM. A lot of us look for Messiah that somebody will come and salvage everything on the Day of Judgment. The Day of Judgment was in one of the 22 Commandments to Moses and he took it out, because then he knew that he couldn't do it (himself). I am going to tell you one by one the 12 Commandments. Rick can read on the net. (:46). Then let's add to it and you'll find out that the knowledge has been correct from day one, and man would have not been here. **This message which was given as a formation of light is the essence of interaction of the Creator's fields with the essence of the creation of the man what you call, the past prophets, .. not in the word of God, but man has converted it to ... he felt and that feeling was converted into writing by Moses, Buddha and the rest.** And this is where it comes (from). Buddha and others took the path of the soul in the conduct of the man. **The ?? Abrahamism came down through the physicality for the man to abuse, because of the pleasures of physicality. And you see the difference between the two paths of the same message, the same light ... was used, or appeared to all, when they reached that enligthenment, and then the interpretation was done according to what they wanted to do, or abuse**, or to give not in the direction of physicality but in the direction of the STM. Would you like to read the 12 Commandments ... 10 Commandments. (:49). **Ten Commandments. Ricks reads. I am the Lord they God, No other Gods before Me, no graven images or likeness, Not take the Lord's Name in vain, Remember the Sabbath Day, Honor they father and mother, they shall not kill, commit adultery, steal, bear false witness, covet. ... And this is everything at the btotom that Moses himself did. He**

killed ... interruption by Spanish .. (:52). Go back to the ones which are there, one by one, to the 10 above. Initially when **Moses brought them down there were 12 and in the process of running his affairs, the way he destroyed the other 10, he gto rid of 2 more because he would not fit into it**. One was thy shall not steal, and he killed and stole a lot. Thy shall not commit adultery, he killed men of villages and kept the women who were all married to men and he took them as his whatever. And he broke everything that he brought with him, every promise, even to the state of calling himself whatever. In the process he did not bring the one, thy shall not lie. **One of the first tablets he destroyed was one with that one because if he was to rule he could not tell them that he had more**, so that was the first thing he destroyed. One of the Commandments to him was, **thy shall not judge, no one (else), except (he could judge) himself. And not to be judged by anyone**. Because he knew that if they will judge him, with all the lies and what he had done, they he could not do the job, that is, what he did, to acquire more physicality power. (:54). **The 4th one was, thy shall be equal to others and do not consider thyself to be higher or lower then them, which means there was no leader or kingship**. And he could not do this, because now had found the power that he could do what he himself wanted to do. If he would have listened there would have been no kingship from the beginning, as we are all equal in soul and our physicality decides the happiness as a fraction of our soul. He says, **thy shall not touch or carry arms to defend or kill another**, he took this out because he wanted to use arms to achieve what he himself wanted. He says, **thy shall be a peace with one another and oneself, with thy neighbor, tribe and tribes**. He could not invade and kill if he was at peace so this had to be destroyed, because he could not have done the coveting that he did, he knew of more beautiful women in other places and to be able to covet he destroyed this commandment. He says, **thy shall be the river of life and love not only to thy self and thy loved ones but in equal measure to his enemies**. He could not create enemies but was to love them, therefore he could not do genocide and (:56). the killing. **Thy shall accept no path except the path of his own soul to his creator, who said, I made man in the image of Myself**. It means that the physicality had to ofllow the path of the soul to be perfect. He says, **thy shall serve his loved one and his own as he expects to be served by the others**. You don't like to be treated wrong so you don't treat wrong. One thing which he did not put upon the top, this was important because then he couldn't rule under the name of god, was, **thy shall believe in One Creator for all men**. If this would have been done we wouldn't have the religions that came after him because he took the most important part out of the whole equation of the elevation of the man and the elevation of the STM. Thy shall believe in One Creator for all men. Then we don't call one Jew, one Christian, or one Buddhist, because at the end it is all related to one. ... President said to move the capital into Jerusalem that the true essence of the first order (:58). of the tablet was this. Then all becomes one, there are no religions of different paths, we all call it God. He took it out because then he couldn't say to the others you are different and that I have to change you because of what I believe and received. **Then you understand that when you receive the 2 and elevate to understand the work of the soul of your self with your physicality then it's complete**. There are 2 missing that came done with him but he took them out, because they were read to the others and so it wasn't to him anymore. **I will release those 2 in due time, then the circle is complete**. When you **mature to understand the work of your soul through understanding the**

fields and operation of it, then when you hold your hands together and see the light in the palm of your hands, you don't hold for you to watch, to enjoy the beauty, you give to it what is needed that it can receive from it, what it needs, that it sees the same light as you. **The maturity of the STM, the missing commandments of Christ or what I call Moses is complete. We have finished with the old cycle and we start with the new**. Because in the new way that we have taught means **we start understanding the commandments of the universe (1:00). which is one, which is the totality of the 24, which is the mirror image of the Creator**. It says I made man in the image of myself, **man made the image of himself as a physical condition from his soul, and he doesn't need the physicality but he made the image of his soul in the STM to go the dimension of physicality, interaction of the inertia of this planet, it created that physicality, so it could memorize and multiply in so many ways to create what it is**. So many times the present scientists, those involved in deep space science and who go in depth and understand, they have already seen and understood. **Many philosophers of the east have reached this point, because through the path of their belief, through Buddha and the rest, they elevated their soul and not the physicality, therefore it was easy for them to reach the understanding of the position of the interaction of the STM with the soul of the universe**, and then they understood that they are part of the creation of the U and not this planet. **The Christian and Jewish world has been waiting for these commandments, (1:02). to be completed for thousands of years and now its done. But the promise was that when they are done (completed) then the man has reached the point of maturity** to go into the next step. I have completed the balanced step, and I walked you through it very slowly in the past time. **Now it's for you to elevate your own soul and remember do not judge and don't allow anyone to judge you. Do not become arrogant as you are equal then there is no kingship**, as men you are all equal, then you are all kings, of your own physicality and your own soul, and no one else's. When you are equal and not a king to anyone, then there is no need for armies or killing, then the whole of the Commandments make sense. **A lot of people don't understand the true essence of the last Commandment, it says thy shall not covet**, (Rick interrupts ...) (1:04). No we'll stick to one because that is. The coveting doesn't come from dreaming of the beautiful wife of the next door neighbor or the man you saw on the street. **Coveting is for the STM**, because the Christ took the second Commandment I spoke about the soul, a few teachings ago, **it comes from the soul, I want to be like him, a soul as good as him, not I serve to become the giver, that he becomes better then me**. The coveting is not the physical coveting that a lot of people talk about, dreaming of. **Because most of these commandments were taken out of context, destroyed by Moses and it was not completed. One of the things that Moses took out, he had to take out, was thy shall not rape**. And we know why he took it out. At the beginning when he brought, and when it happened in his time, he could not tell people not to do what he did himself. Because he was already given to the high masters. **As number 11. Rape didn't mean physical rape but rape of intelligence (1:06). and understanding the STM, and to use the physicality of the man**. It's that simply. Now put the 21 that you have up to now, then you'll easily understand the 22nd. The last 2 will come in the maturity of time when you enter the UC by the understanding of the elevation of your soul. I have completed the 22 Commandments. The cycle of the prophets of the past is complete. But for those who understood and chose the path of ?? ,

but in so many ways **applies to Buddha and the rest. Take the physical part out, listen and read these in the essence of the STM,** because it says. The first one he received was, Thy shall believe in one creator for all men. Then how could he divide those who were his followers and ofllowing his god from those who didn't. The 22 Commandments are totally complete. These were given to Moses thousands of years ago, **and it was given to every man who was enligthened to understand the true creation, be it the Mohammad, Christ, Buddha, and those who called themselves prophets in the South American continent in the time of the past, and those who became the prophets of the people in Australia with different names (1:08). and features (aborigines), and those in the far East, they all received the same**. I gave the same so it was equal to all children. The difference is only the path that we chose. The Day of Judgment as they said, you never judge and you don't allow anybody to judge you. In that way **you are always aware of your own conduct so that it doesn't need to be judged because it's always correct**. This is what they took out, because if you are not aware then we can create for you a Day of Judgment. The Messiah has come for many of those men who have matured to this point and became part of the UC or they decided to stay as men and serve humanity, not in the shape of robes and ropes to abuse children, and others and to call themselves kings and the rest. We created these kings because the true message was taken out by Moses ??? and that is why we see most of these wars in this part of the world where they have become part of. If you go back to **the original tribe of men, there were no shoe makers or fishermen, and everybody fished for themselves and they all lived in the same community. If they needed something, they took and gave. (1:10). In the present language we called them barters and this way everybody was dependent on each others skills** and what they became better at. By creating these weaknesses in man, who could understand the man's weakness, **it created the influence of what they called the village, and created the influence of what you call financial gains and monetary system**. Now with the teachings that you have matured yourself to, you understand that you don't need any of these (things). There are no banks or churches in the space. Now it is for us to understand the totality**. I have done my job. I will teach you more until more of you become mature in your understanding the operation of your soul and the conversion of the strength of your soul, if you are man of physicality** to confirm your power of becoming mature to the understanding of the totality. I teach but it is **for you to understand according to your intelligence and we are all intelligent in equal measure, it is the fear that has been put in us by those who abuse our souls in line with our physicality, which has stopped us to open** and understand more of ourselves. You don't need any prophet to be enligthened with the light of the Creator. Become the creator of the light yourself. (1:12). **Your soul is the mirror image of the soul of the Creator. It depends on how you turn the angle of that mirror, as to how bright the light of the STM will shine**. That's all. **That mirror is the physicality of the man which reflects the light of the STM**. The more you become aligned with the correct path of life, the more the line of the sun comes in line with the sun of the STM and shines the same as the light of the Creator, I made man in the image of Myself. **You need a mirror to see the image, and you need to have a mirror which is the physicality to understand the position and the conduct of the STM, in respect to his physicality and the soul of the Creator**. Blessed are those souls who understood this. Any other question. **Regarding number 12 which Moses took out**

(1:14). was that the man feed his loved ones the same as with his enemies. And he couldn't do that. **The food wasn't food of physicality but the food of love**. The food of giving from ones soul. Because food for us, we work for it, to earn it, to be able to consume it. He had to give from soul the same to his enemies and to his tribe and he couldn't do, so he had to destroy it. **Now you gto the 22**. Q: You said you forgive but you don't forget, in this way are you not judging, how do you approach this way without judging? **The forgiving is the maturity, and the forgetting it shows the path to forgiveness. It's 2 different ways**, 1 is the path and the other is the way of living. When you don't forget you'll not make the same mistake or you know the path to reach (1:16). the same position faster. You forgive because then your soul is mature enough to receive more. It's 2 clear points, 1 is the path and the other is the destination. **When you don't forget it means that you know the path, forgiving is enough that you can give so much that it doesn't take much from you, but in the next cycle you'll know the path and you can reach it faster**. Q: It means you can use a different path to approach it? Yes, but if you have seen what the end result has been, then you choose if you want to go on this path to get to the same place or the other to get at the same target as I want. All road end up in Rome, it depends on what path you want to take to get to Rome and what is the aim of it. In Italy you see it very clearly, wherever you go you see the sign that says where Rome is, there is always a line to Rome, it doesn't matter whether you come from the south or the north. (1:18). Q: **You said prisons should not exist... but in this period of transition what is the solution for people likely to commit new violent acts**? If you listen deeply to the teachings, **prison is the body of the man and not the physicality of the prison as you call it. We have imprisoned our soul and conditioned it to so many wrong things**. But if you look at it the other way and understood all the Commandments, with this there is no need for prisons that one can be in charge or in control over the other. No one will do wrong. **If all this were taught from the beginning to the man**, crime. We always want to be better that we have more but if we realize that we are equal, we serve more to give more for the others to be equal as well. It's not that it's through the soul, it's understanding that giving through the soul you have helped to elevate the others. Last week I explained that **a lot of KS have started selling good**s, (1:20). without certification and some of them gto very upset... that you have told us bla bla and da da. . Yes, **but I told you to teach, but I didn't tell you to sell my teaching. It's a big difference. How many of you when you started to sell the Gans or whatever**, you put a note with it that, this is a gift you paid for my time and this is the way that you can make it yourself and you can teach it to others. No, you just went for the financial gain, you have already failed because you never understood the ?? then they get upset when we asked people to report them to the authorities and the rest, if we do this and that. Of course, you were taught to share not to sell for money and then change things just to suit yourselves. This is the path where a lot of people have become merchants of death, in the past, in the name of the kings and the rest**. Knowledge is given freely with love and care, it's your soul who has chosen to abuse the other side. In a way you're beginning to do as we see with the priests and mullahs and the rest of those doing this today**. The only difference is that you have found, instead of a bread to be the body of Christ and the wine to be his blood, the Gans, Patches and Pads. We produce it because the funds from it will release the others in the physical dimension, but we haven't seen you doing anything, you just take more and more for yourselves. (1:22). **Teach my**

knowledge don't sell it for your own benefit. Then you'll understand the message. I teach freely and you teach freely. **I give unconditionally, without judgment of who is listening, or are these people good, bad or whatever**, I don't judge. I don't expect you to judge me, because if you were a correct judge you would have judged yourself first. We have to be in control of our work, not others judging us, because then they bring their own feeble, misguided works into it. When a man needs a judge it means he is not mature. Q: Who is going to correct Wiki ? The KF, it's not correction it's adding. KF has its own Wikipedia. Q: Boniface, could you clarify by what you mean by judging, because there is a school of thought that says when we look at someone's behavior and evaluate whether they are doing right or wrong ... I am going to stop you there. **The judging is man being aware of his own conduct, that's all. True conduct and not what he imagines to be**. (1:25). A lot of us do sins, as you call it, and we find an excuse to do it, so we have already judged ourselves and we have found judgment to pass, that there is a reason for it, that's all. Q: So when people are selling your teaching, the Gans and what not and you are pointing out that they are doing something that they aren't supposed to be doing, is that not judging? **No, that's my property, my knowledge, it's them who came to me. I don't judge, the judgment is for them to decide if they do right or wrong**. You have to always clear your point why you made the system and what's it to be used for. For the person who uses your system, if you made them a computer or a machine, it's not a judgment, you gave them an instruction, a manual. We gave the manual, which was, this is the process and teach it. If you have to put your time in to make it, then you ofllow the process, not just taking part of the teaching out to make a copy out of it. **We didn't say to stop making anything. (1:27). We said 2 things very clear, do within the law, which is the correct way. It's you who has to judge whether or not you are within the law. Secondly, we said when you do (make it) then teach**. There are many people who start running workshops around the world in my name and we see them disappearing, because they opened these workshops only for the profit of their own pocket or whatever they could do with it. We had the peace conference in Italy and I put my 3 books on the table outside and I put a cup next to it. I didn't put a man next to it to sell the books, I said, if you need it you take it free, you pay how much you value it. It's for the man to judge, am I going to take the book, I want learn knowledge, I can afford it, but I want to see what it is, or I paid for it, then I'll read it because I paid for it. I didn't judge who has the money to take it or not, or who takes it because he needs the knowledge. The judgment is by you. the system has a manual, if you don't use the way it is written you (1:29). won't get the same end products. It's no use heating the milk and adding the lemon at the wrong time to it, depending on what you want to make, it's the same here, would you like cheese or anything else from it. It's you who decided which way to go. **My work has a manual and if you want to achieve it ofllow the instructions in the manual... SERVE, share**. If I share and serve this is what I get, what I need for it, then it's for those who accept it to share with you. But always share my knowledge with every piece you sell, so that you **are not like the priest that they have to always come to the same church again and again. this is what you all missed, and i kept on saying to many people, teach in your workshops to freely to those who come and let them do, and don't make the workshops as a banking system for yourselves**. And then they sell products with it. It has become a cattle market. I am alive and they have already started abusing it, so if I don't put it correct now it will never be

corrected. It doesn't matter who gets bothered, that only means that they want to carry on with the same path, they want to judge that I am wrong, because they want to do wrong. **Stay within the law, stay within my instructions and you'll see the gift that you receive**. (1:31). Q: Okay one more try at my question if you don't mind, what word ... **you never understood the answer that's why you are trying again**. Okay. **It's your understanding because the abuse is there**. Okay what word would you use to describe those who are not ofllowing your instruction? They have to judge themselves and understand what they are doing wrong and not me. They have to understand, otherwise I have to be there everyday to judge them. they are there with themselves**, go through all the teachings and not just the parts that suits you. Then you can do the abuse.** I have seen this many times. In the Iranian history, in the writings of Bahuala it says, that one loves not only his nation but the whole world, and what did they so in Iran, (1:32). they took the part "the whole world" out and then said that it says, not to love your nation, and they persecuted the Iranian Bahai's for that. Because that suits them that way, but was it the complete message. It says, do not just love your own nation, but love the whole world. Whose is judged and who served**. Understand that I have no fear for my life, that way I can speak the truth and the correct, those of you who have fear of what might happen to you, adjust the things the way it is, just to suit yourselves**. I don't need to suit anybody**, I just have to be correct with my own soul that the message is given correctly and as a whole, but in the steps that it can mature the man and not to flood the man or drown him (with too much knowledge**). Do you know the story of the king who came from the desert and knocked on the door of the old woman, she opened and he said, I am thirsty **(it was a thirst for knowledge**), if you translate it the other way. The woman went in and came back with the sweet water with a lot of straws on the top, and the king was thirsty, and he had to keep on blowing the straws away, (1:34). that he could drink as fast as he could to satisfy his thirst, then when he satisfied his thirst he turned on the woman and said, you stupid old woman why did you put the straws there couldn't you see that I was thirsty. She said**, if I would have given it to you without the straws you'd have drank it all in one go and killed yourself** because you have been so thirsty for such a long time. this way he took the knowledge, the thirst slowly away with the water and that saved his life**. It's the same with my teaching, if I give it (all) to the lot of you, you'd hang yourselves because you don't understand**, but I taught you the same, with a lot of straws it in, let you make the mistakes, that you come up with the new position, **otherwise I could have shown you the flying systems and the Creator and the soul of the Christ from the day one**. It's my wisdom and your hunger to by-pass everything. **One of the things when you mature in the soul, it says, thy shall not possess. Possession brings kingship, demolishing others**, when you share and serve you don't possess because you all possess the same, you only possess something when you don't have and you want to get to have it. **Now you find number 24. (1:36). Detachment. I remember seeing Moses when he received** (the Commandments), he was so joyful that he was jumping up and down, and then at that point, that is why he took time on the mountain. He started reading it so that he could interpret it in the way of physicality, then he saw that a lot of it wasn't what he came up to the mountain for. Said to him, take the whole and not the part. **He took the whole, but by the pretense of it being heavy he dropped the whole. It wasn't written in the stone, it was carried with his soul, he wrtoe it down. The heaviness was on the STM**

and not on the weight of the stones. Any other question. (1:38). Rick says we have Peter, Paul and Mark all the Biblical names showing up. It's **Lynn from Montana**. You are the couple that is the veterinarian, and you gto upset by what I said last week? Yes I did. I hope now you understand. I do and I have to think about, it's a quandary that I am in, for example today someone was here at the house and I had given the group of women the Gans gloves for sore hands. ... let me just give you another pair .. Let me stop you. **This is where my dilemma is, you gave the gloves out of your generosity. (1:40). We say if you give a man a fish you have to feed him your whole life, teach a man how to fish and he feeds himself. The problem and quandary with you is that when you gave the gloves did you tell them how it's made so they can make it so they don't have to come back to you**. This is what my problem is. (the gloves are baby steps because nobody ..) It doesn't matter, this is what it is. Some of them will never come back to you. One came back to you. Because they don't need the glove today, but if they have a pain in their leg they can't put their gloves on it, or if they have a pain say in their liver. **Because you haven't taught them. this is the problem I have** and I appreciate and respect your work (Lynn and Paul). I have a lot of respect for your work, but the essence was don't feed the fish, teach how to fish, doesn't matter if you give a fish until the time they are hungry and want to catch another fish, to feed themselves. There is no quandary, the quandary is live, give and teach, but on the basis of that I didn't just tell you and gave you a patch**, I taught you how to make the patch**. It was taught and explained even in the medical teaching in which you were present. Whenever I attended (medical teachings) I explained in detail the process of what it does. (1:42). People can't understand the process but they can understand the basics. **Teach my technology and knowledge, but understand that you are just a messenger, and not someone for people to come back to you to ask for the next message.** What was the message, that you kept the book hidden. It's on the Internet it's well taught. I understand your problem. I understood what you wrtoe to me, but I hope you understand what my quandary is. **My quandary is that I teach and serve unconditionally. I don't ask for you to pay and to come to these teachings**. Whoever pays gets an entrance, this is not a ooftball match where you pay and watch. **Your soul and conduct have to be the same**. Alzar interrupts ... they want to give something for free so they can see. People come in and see and then I can teach you. ... (1:44). I offer to teach them but they said no. You see Alzarjan, you leave it to them. Do you understand? Yes, but always they say give me the Gans, they don't want to .. But tell them there is a manual, you read it**, ok I give it this time but make it yourself next time. This is the difference. I can bake a cake at home and I can make it the way I like it**, but I don't have the time so I go to the baker and I say I want the same cake that you gave me the recipe for. It's a big difference. One of the reason i teach it this way is. **We have opened the UC to man, you are going to have a lot of problem in paying and getting paid in the space. You have to learn that you give unconditionally. And when there is need that your soul sees the need and sees the knowledge unconditionally** also. It's understanding in a different way. It's not just giving a patch. We don't open the factory in Accra and put patches on the street. No we accumulate to teach, to give to the others. **We are not Robin Hood, the guy who takes from the poor to give to the rich, nor from the rich to the poor. We take the money from the rich, the ones who can afford it, (1:46). that by giving to the poor that the blessing of the soul, elevates the soul of those who provided it, this is the difference**.

We have to understand that the game has change, but we try to fit it into what we know at the present time. **Do you know where the term Robin hood comes from? Rob was stealing and hood was the man using a hood so nobody could see him**. taking from the rich to give to the poor. **Stealing under the cover**. This is what we ended up with. **We give for those who can financially do, to elevate the whole and then we give to the poor that the blessing on receiving goes back to the rich man who made payment**. This is in line with my teaching, **I said the man who makes the gun carries the pain of the soul of the soldier who shotos the bullet, it's the same with the man who is the director of the arms factory**. It's so with the factory in Accra, the man who pays to buy a btotle of water, MaGrav power generator, or patches which are made, his money goes to supply and educate and bring facility for the rest of the people in Africa, that the blessing of the one who receives the water and his pain is relieved, does not come to me, it goes to the worker of the factory (1:48). and the man who bought the btotle. **There is no difference in the work of the creation, it's us who has to understand the totality**. My instructions are on the table everywhere and anybody can go on the Internet and make it. It's shared by the others, **I become the merchant of your souls. I arrange factories that they sell so much that they bless you from what you provide them, that I become just as part of the system**. I live a good life. The man who bought the btotle because he needed it has paid to live a good life, and **the one who receives from the benefits of the work of the factories has a good life also, because we don't rob anymore and we have no hood to cover us. We work as one in the openness. It's us who judges ourselves and not the others, this is the difference**. You teach, I teach. Nobody comes to me and asks for a patch, but you are there because I teach. **If I make a patch I give a man a piece of cloth but with it goes my soul and his level of understanding and what he wants to do with it**. I don't give a patch, but I tell them to go on the Internet and read it, it's there. This is how we have to understand the work of the KF. (1:50). In the coming time we work to teach. **These Patches, MaGrav systems are nothing, nothing compared to what you lot will be able to do in the coming time when you understand more.** You will talk about the old times, do you remember when we used to make Gans' now that's child's play. **There is so much more to learn in the process of using these Gans' but the only problem is that you don't teach enough so that more knowledge comes back in (to us) so that we can all learn more. You want to sell and when somebody pays for something, then they don't need to understand how it's made, and this is where the problem is**. People have to understand that through this ... it's not just the Gans, but then **you can explain about the fields or they can read that the fields are at the level of the strength of their soul, that they can elevate their souls**. They see the process of the use of the glove or the patch, but when they understand that the fields of it are the fields of their own soul, then they can elevate themselves to become part of the UC. This is where my problem is, and this is what you don't see. **I am not a philanthropist. I am a man of God, because I am God because God in our language means the Creator. I am the creator of my own physicality, so in that order I decide how the energies and the fields of my physicality as a creator of me is used. Thy shall not steal**, you can't steal from what I have decided my physicality to contribute to serve humanity. (1:52). **It's you who want to abuse, but you want to give it a conformity that it satisfies you**. It's not the shape, we put it. This is important for all of you to understand. We have a structured society we call nations, as

one nation. In this society because of whatever we have brought in, conditions, and the new conditions are very easy. It's just me who I have to judge, nobody else, and it's me who has to be correct and nobody else, and it's me who has to serve and nobody else. That's all. I hope Paul and Lynn I have answered your question and I hope you understand. I appreciate you work and highly appreciate the knowledge you have brought and bring, but a slight correction saves you a lot. **We are not here for the elevation of the pocket of the man, we are here for the elevation of the STM**. Understand what I said, **the man who makes the design of the gun shares in the suffering and pain of the man who shto the bullet, so is the benefit of the soul in teaching and receiving when you relieve a soul from its pain, then he can share**. When a soul is in pain he takes most of the energy to compensate for his pain. When you elevate the man and alleviate his pain (1;54). he has more to give back to you. **And there is a society at the soul level**. A man with a cancer in bed can't do anything but to take. When you take a cancer from a mother when she is ??under load with her children, and she educates the next cycle of man in a correct manner with love and care, ?? we can't help society in the next cycle, but we save ?? ones own. This is the difference and **the sooner we understand this the faster we elevate our own soul and enter not only the UC, but the point of judgment that when we leave the physicality, we go in a balanced condition and not in debt, when we are in debt we have to find another way to pay for it**. Q: **Lynn** wants to add one thing, when we provide the energy station we have instructions on how you can make patches to share with other people, and we have videos on website to explain, **and we used to send 12 pages and what I found was people didn't read it so I sent less information** and said here's where you can get **... please don't do that. Don't become the judge of what they don't understand, let them judge themselves**. Do you understand? Yes I do. (1:56). **It's there, they might read one word in one sentence, and that enligthens them to something new. When you judge that they have received too much then we are back in the same wrong track**. Make it 20 or 100 pages. **It's for them to search for it. This is something that we have been taught the wrong way, we think people don't understand ... everybody understands everything, but it depends what word suits them.** Do you understand? Yes. Don't limit that you have or you put, I have seen your website... We told a lot of people to correct their ways. You all are doing a good job, you're spreading the knowledge, the whole thing, but realize one thing, **do not judge who understands what, leave it to them to understand what they judge themselves** for. Do not limit with 10 - 12 pages, you have a beautiful website and you teach a lot and that's how it should be. But the problem comes ... **stay within the legal framework**, because we understand and have seen how these people who understand it will come up with a new knowledge, they add to our knowledge, community and society. It's not for us to judge. **People like you are the cornerstone of teaching the new technology. (1:58). But the conditions we have are that it has to be within the conformity of the law**. Let me tell you why you'll thank us in the future. **We have come to understand that there are people producing Gans' dangerous way**. They don't understand and for them they do whatever they like, I can mention the name of one of the guys. But if they damage then who will get damaged, you and me. When you are controlled and confirmed that you ofllow the procedure the way it is. **We had one person say that he made the Gans and it was toxic. We asked one**

question, did you wash the plate when you took it out of the caustic. No he didn't. So now you tested it and it's wrong. ....
I don't need to be in a place and see it to understand, I am there present in the STM. I understand and comprehend and in time many of you will do the same. I am prtoecting you with what I said, but sometimes the pill brings some pain or bad taste in the mouth. (2:00). But the effect of it, the end product is correct. It gives the result. We have to prtoect all the KF work first the teaching, secondly the process of understanding. Thirdly when we produce it, it has to work. ... if you want to start production they come to see you factory and they have to certify it. ..
(2:02).

(2:06). we do the right job the way we said, ...
.. we'll become one of the most organized groups, we need no government support because the humanity will do it, we'll explain at the right time ..

(2:09). Q**: I was born Catholic and we were told that there is a Judgment Day? It's everyday and every action. That's all it is, they should have explained to us that we should judge everything we do**. (2:11). I tell Caroline that **when I put my head down at night I sleep at peace. I wake up with worries in what I haven't done and what I could have done more of. This is the only worry**, I could have taught more or done more, but I never look back that I have done anything wrong to anybody because I learned that when I was 19. **I learned then what Judgment Day is when I was 19 and accepted this position and I came to know that I judge myself. I judged when I received the message to do what I do now, I was 19, I said I am too young I need the experience, so I knew how to judge and how to delay. Again when I was 29 or 30 the same thing happened and I knew I was still not mature enough to accept the responsibility because I didn't gain the knowledge to do. I judged my position and I knew my capability and I knew the expertise I was lacking to be able to stand. When I came back from Iran at age 30 to 40 I knew I was ready to go**. But still it took a few years in accepting it to become master of it. To understand how to judge and nothing else. We have to judge everything we do. I don't know why I come into peoples life and this and that happens to them, I become a judge, jury, and executioner**. I became the judge of myself and not them, in me being correct they had to find a way to be correct and they sorted themselves out**. I don't judge no one. (2:13). If you understand it, **I have become a messenger of my own soul and I share, no more**. Q: Lynn asks **where in the USA does one get certification? We have tried in different channels. You have to go through FDA and the laboratories that do the tests for FDA**. There are companies that do it, we have logged in to one of the largest international organizations that do it. It's just by chance, in the summer I was sitting in Guangzhou airport in my travels in China and I met a man and we started talking, and **he is the head of one the largest laboratories in the world, and he said, Mr. Keshe I never knew about you, and I said I never knew about him. (2:15). He said, everybody in the world knows us**, I said, not me. **He said, we accept the job to do these things because its a new technology and we have to be with**. Now KF is working with them to start the testing. To issue the certification worldwide. ...

(2:18). continues about certification ..
.. world governments are looking very closely at us and they want us to do it correctly. We are receiving a lot of support governmentally. we need to be correct.
... the opening day of the Accra factory will be a Blueprint Day in how to open a KF factory. (2:20). You'll be with us with the world governments. We are not short of assets. **We are short of time to bring for you lot, you are too impatient. You are too good of students just be patient with us that we can prtoect you. We need to prtoect you because we need to prtoect the whole of the KF work in the new technology and science**. We touch every corner, health, energy, space, materials, new communication system which you haven't even had a chance to understand it yet ... everything that humanity has worked with through one technology. We have to prtoect you Lynn and Paul, if I let you down and you have a problem then I have let myself down and I can't allow it, even though sometimes it's a bitter pill to take**. I don't want you to take the name of the KF off your WebPages. If you are proud to use it, use it, but understand and work within the law**. We saw **the guy who was a member of the U Council, he came to do the wrong thing and when we found out and told him he can't do it. He just changed the name on it and said it has nothing to do with my knowledge**. Let it be, but your soul will know. I wonder how much ??? because he went the wrong way. (2:22). And **he is not there anymore to be a member of the Council, he came to abuse the knowledge**. We are aware. It's my job as head of the KF to prtoect you. If I don't do my job right I prefer not to be here, but if I am here I teach you freely and I have to tell you when you go wrong that you are prtoected. **We have requests by world leaders who have illnesses and have come to the KF, and by some of the richest people in the world who have diseases and we are there to help them in the background. We don't go and put their names on the bulletin board so everybody knows, no, we rely on their souls that they support the KF work their way when the time is right**. Just be patient **we'll bring you the certification and licenses worldwide**. I said, 30 to 45 factories by the end of next year. **We plan for 500 factories in the next 5 years** because it's needed, every aspect of the KF needs to be covered. We do the work to what we know, you bring the designs, technologies in your name, you'll be benefited by it and so will the humanity. (2:24). We have not even taught you the space fuels and space stations or the flight systems. You see the swimming pool built in Nigeria by the wishes of one man. If you want to learn about it, make an arrangement with KF Nigeria, go there and see what the effects are. It's finished, if Alex is online he'll explain. We paid for it and it's beautifully done and it's there as a research center. And we have allowed for an expansion of 10,000 meter factory space, 200 million people to support a large sized factory. Any other questions. **Caroline comes on, (2:26). I love you, I love you too**. I have a very big question, a lot of people are asking in regards the conduct of their soul is it possible to go into more depth, very slowly, to explain the original 10 Commandments as we know them, for people to understand the correct way and not through their physicality. Because it's not complete. ... they have never understood the 10 Commandments towards themselves personally. **The problem is that we always looked at the Commandments in the physical dimension (2:28). and not for the applications of the STM because when we read it, for most of them, it tells us misinformation between the soul and the physicality**, that's all they are. It say, thy shall not steal, the soul gives freely, it's the emotion that steals that the physicality doesn't

receive, the E is ?? by us. I explained about **the Hidden Words of Bahuala, the Arabic and Persian versions are done in a very different way, because in the past time when they were taught in Arabic, even though they were originally written in Persian**, but the only line of education was ?? (Arabic ??). In Iran at that time nobody taught you medicine by way of books unless you were after something. The education was how you read the Koran. The higher class Iranians were only going to ?? schools to learn how to read the Koran, that is what all the teaching was (the only place you could be taught). And in some ?? maths. In that process the teaching was ?? done by language either Arabic or Farsi. they could express themselves at a deeper soul level in Arabic, because it's a very specific language. **Bahuala wrtoe 2 Hidden Words, 1 in Farsi and other in Arabic**. (2:30). When you read the version in Arabic you see the STM, he could explain it, because he understood more in Arabic and not in Farsi. When you read the Farsi version you see the weaknesses in the man which is hidden in the name of the man, in the physical dimension. even he was aware of the 2 dimensions the STM and the soul of the physicality. All the Commandments, the ?? harif, comes from the origin of this life of the cycle of the religion, touches the STM, it's the man who has transferred it to physicality to suit himself. We have been through it in the teachings, the hundred names of God. But it's a hundred names of the behavior of the STM. The teaching of the Commandments is for the STM but man has up to now translated it as physicality. Thy shall not steal, you should not steal from the soul of another because you promtoe the STM. **Read the ?? habiss of Mohammad in the name of the soul and the elevation of the STM then you find out it's so beautiful. (2:32). It's exactly what has been taught in all the books of the past and of the future because it touches the essence of the creation**. The 10th Commandment, **thy shall not covet**, you understood what it means, it's fundamental to the soul**. I don't want, or dream of somebody else having a better soul then me and I want to be with that soul as I give from my soul that I elevate that soul to be better then me, that if he doesn't need something, I can elevate myself but not with that, I give from my soul to elevate the other soul** so I think about it, how to elevate the others, and not that I think about it just because it's a lover (beloved). Try to look at the knowledge of the conduct of the man through the STM. The Chinese understand this very clearly, they are very close to this. **Through the work of the Gans' and fields and understanding the communication with Gans', how our souls interact**. You make a Gans of Cu, Zn, AA Cu ... see how they react when you have the technology to understand, then you'll understand the behavior of your soul with another soul, it's the same but more of, in more diversity because you have so many different acidities and combinations in your body. We have to understand that the **physicality is the end product of the production line that starts in (2:34). the STM. Would you like to be the user of it or part of the creator of it, it's you who has to choose**. The faith shows you the physicality, thy shall not steal, when I go to the shop I don't put anything in my pocket without paying for it. No but I don't touch a soul, I don't take from a soul which is not there for me to take. **Then you don't even think of going to the shop to take something**. It's us who has to educate ourselves to understand the new language, which **we knew was not new, but we ignored it, but we left it with those guys who called themselves the priests, to do the misinterpretation so they can abuse us. We opened ourselves to abuse when we denied our own soul, that's all, and they used it in the name of what they called God**. Release the new 12 Commandments as you call it on the

Internet and see who opposes it, why? The Vatican will be the first, because it's the end of their job. **The completion of the Commandments was the end of the time, of the present cycle, and it's done today**. **We were not the Messengers but the people who delivered the message, they messed around with it, now we delivered it directly to the people. There are no Messengers in-between**. (2:36). Write the 22 Commandments and join with it and see who objects to it. Then we have started a new cycle, because with this we have finished with the old cycle and **started the new and now we understand our responsibility as a soul and now we have to understand the conduct of our own soul**. I told you that I will finish with all the religions because religions are soul of the man who allows it to be , and now you have the whole 22, I also gave you the 23rd, the 24th comes at the point of maturity, nobody gives the key for you to open the door. I am the beginning and I am the end, I told you that from day one. I have seen the weaknesses of when the message was received and I have seen them weeping when they lost it because of the abuse of the physicality. The same Messengers. (2:38). Any other question. **Q: Since it was Moses who gave these Commandments, if we give to his soul to be elevated, will that effect all the souls and correct the path, that it can be** .. It was **done by the Core Team that is why we are in this position now**. We asked the Core Team to elevate the soul of the prophets that they all become equal, ... they made a circle of each one, for each prophet. And then they took the world leaders to elevate theirs. A lot has been done in the background. The 14 members of the Core Team, even if they are not present their souls are operating and doing the work without them knowing about it, ?? the physicality's time has passed. We did this it has been done (elevate Moses). Vince do you remember who took Moses, Rick says I believe it was Arman, he so No. (2:40).

.. I took President Obama as the man I could handle and we did a good job with him, you'll see what will come with him because of the misconduct, but the elevation of the souls of the prophets of the past, because of the souls which have committed themselves to him, ?? they work. We'll see, a lot of unification has come to where we are today. A lot has been done by you as K Seekers. How many of you when you give these gloves, patches etc. (2:42). ask any of the people in your audience, are you a Jew, Christian, or Moslem. You have done what I have done, you taught unconditionally. And so through the prophets they ofllow, the prophets have received the message, it's just a confirmation. That's why your working so vast so quick, because the message has gone through the path of the founders of their path. **Coming up we have a number of Mozhan's who will show their work. Mozhan's have not been trained in the physical dimension but in the dimension of the STM, when they are ready and mature in the second part of the teaching, then you will see them shine**. It's been the same with the Core Team, EC and UC, when they get together their wish is their command, because now they are their to serve the totality and the One Nation. **My only wish was, if Moses would have thrown all the Commandments in the bin and only kept one, 'thy shall believe in One Creator for all men,**' then things would have been different (for humanity). Then nobody would have been jealous of the rest. (2:44). We have a long way to go and a lot to learn. the problem is this school has 7 billion students and we have all sorts, there are those who carry a lot of lines of ?? abbreviations of names of doctors and prophets, and their soul is still in the nursery, and we have those who clean cars and their souls sit in the universities of the STM. **The degree of physicality doesn't show the level of the STM**

and that is the beauty of it. This is why in KFSSI we give no certification because we only teach and the elevation of the STM at the point of need becomes the graduation of the man, and not in what we ask him ?? in physicality. Join the KFSSI and learn the knowledge and purity of its teaching, from the first days even until today. Some come because they have to emphasize their existence that they know more, but rather listen to their soul and not to their mouth**. I will be teaching next term** ?? at KFSSI, I have been asked to go back into teaching, because in private teachings I touch the STM. In this coming term I will be teaching directly like I used to do. (2:46). Learn the essence not the physicality end product. **Q: When we sleep we are free from materiality and so are our creative thoughts more powerf**ul? **When we sleep we use less of what is given by the soul and then the soul has ?? We don't sleep in the space. One of the most horrible things for man in the space is sleep. Because if you reach the process of no understanding of no interference of the STM**, Physicality of the man, when you go to sleep or what you call resting the physicality, you'll find out that **we are aware of all the thoughts of physicality, you don't physically sleep. It's a very strange feeling**. (2:48). You just see the body going through and you know you have to rest but at the same time you are fully awake operating with whatever needs to be done. Then there is no night and day because in the space there is no night and day, **we don't have the sun rtoating to tell us. the physicality gets what it needs, it doesn't need the rest time to recharge. We have taught our bodies to go to sleep, because when we started life (on this planet), (it's only the past 100 years that we have electricity on this planet) there was no light and we couldn't see so we sat down. Sleep was a natural process, doing nothing**. In the space we don't have this, you'll see that our body clock will change because there is no rotation of the sun. ... which way would you like to find the Mecca in space, except in your own soul. Will the man ever sleep. We have brought this habit of sleeping because of all ancestral time, when it was dark we had nowhere to go because we couldn't see, and we didn't develop night vision, so we decided to stay put. In the space we don't have this. We always be awake. There will be no Christmas or New year because we won't be in those cycles. (2:50). You travel at such high speeds , or would you receive it every few seconds as a new year. **A lot things need to be taught and accepted and understood, not by forcing but by understanding**. When we are in space in a few years time traveling at speeds beyond the dimensions of this solar system, would there be a Christmas or shall we spend the time with Christ, there will be no need to celebrate his birth, ?? elevate every present. We have a lot to learn. **This time we will not leave the man alone, we'll mature the man because we have seen the abuse of the man by the Messengers and their cronies. When we educate the soul nobody can abuse it because it is aware of totality and not the weaknesses of the physicality**. I **don't let anybody insult another and those who do have seen their way out of the KF, because when you insult it shows your lack of understanding, and you don't deserve to be a human. Because the soul of the human is sacrosanct**. It means you have to go back to the school to learn. to the school of the STM in the dimension of physicality. (2:52). ... **releasing the Messengers of the Creator in the name that was given to Moses, was a very hard position, because nobody can touch anybody that man understands the message of the totality**. Now it is complete and it has already been there for thousands of years, waiting to be opened up. Let any of them the Jews, Christians or Moslems put a finger on it and say that it can't be done. **It finishes with a**

lot of things because it starts with us opening our eyes to the work of the STM. It's not the Commandments but the understanding the work of the soul, which commands us what to do for our conduct to be correct and understand that we are all equal. We start a new calendar in the Christian calendar which most of the nations of the world in one way or another ofllow the work of the Christ. **2018 will bring a lot of changes. It will bring the maturity of the STM, the opening of the space to man, a new dimension, I foresee the work of all the space agencies in the coming months will come together, and we will see the rapid expanse of the opening of space, but the scientists have to understand the work of the STM in the space and not the work of the physical systems** (2:54). It will be very hard for them and once they do, **all these resources we see of the different nations, will become One Nation and will go in that direction. I see the Chinese government to head the space technology. I see the same that humanity will change in a very big way, we'll become more aware of our own conduct and not the others. On the other hand 2018 is 11, it's a very balanced year, it's the beginning, it's individuality in totality.** Let's see what it brings and I wish you a Happy New Year and that you have had a very merry wonderful Christmas, but remember one thing, my physicality doesn't count, it's the soul which speaks, or changes the soul and not the sound of the physicality.

(2:56). Music End

205th Knowledge Seekers Workshop Jan 4 2018

(LUNGS, Summary of the 24 Commandments are on Webpage, If any war is started Power Plasma generator will be released worldwide, the soul of the man is the sun and so it's the creator of the physicality how can I produce things on my own when I always relied on the intermediary of the sun to feed me, In deep space there is no cycling of time by rotation of planet so we don't need to regenerate cells so fast as on Earth, The Indian guru who came and developed the ability not to eat for 21 days and Keshe explained how he did it, ,,, Our present science taught us that we need to breath oxygen to survive and this is a big fallacy no where does oxygen cells ever cross the lung wall into the blood, This means that we have learned in our blood to create a replication in the same way as the orange in the water. We bring the energy of the air into our lungs and the matching energy in our blood cells, in the liquid of the blood, converts and receives the energy it needs from the air we breath, Next time what you need for a cancer put in that water you don't need to make Gans' of it (fields will transfer ?), Every cell in the blood is destination coordinated to a specific cell in the body and it only feeds that one, By feeding the Amino Acid which is partially the soul I can survive, , New research centers will start to creates systems for food and materials needed in space, The lung is functions exactly like the stomach and is enough to feed the body so we can get rid of the stomach and digestive system, What these commandments are, is do not create any filter between the soul of the man and the soul of physicality of the man, How and where the liquid in the lungs come from up to 6 liters, The oceans are created the same way as the liquid in the lung, Earth is a nursery for the creation of souls to become stars in the universe, It's a brick wall and man has to be the giver and to always be the btotom brick that the others can be put up higher that in totality it reaches the highest to see the top, the beauty of the

further distance, The reason we say don't do this or give commandments is so that when the soul leaves the body that it is of the higher strength that it doesn't become a burden on the other souls for them to elevate it, To clean your soul from wrong doings in the past you have to recognize it and don't repeat it, We have created one of the worst things on this planet, by killing if somebody kills, In the coming months we see the establishment and end of Catholic Church, The whole purpose of the teaching is to give pleasure for more to see and enjoy and for more to be able to give more, When the Church of England sold their properties they found many bodies of children during excavation so the Church passed a law so that only they could demolish it to hide their own crimes between the priests and nuns the same will happen with the Catholic Churches, John Paul created more crime then Hitler, he didn't touch the children the fresh soul, but he knew and he allowed it to happen, the same with the present Pope, ,When look at your aura and you see all sorts of colors, these colors are not coming out of your body but from the interaction of fields from the objects around you, the chair wants this field and the bed that one and the frig wants something else, ,)

(:10). There is a new webpage for the new year. Stanley shows. "We are here to serve, not to be served." ... (:20). **The 24 Commandments on the webpage from the 204th Workshop, with the excerpts** from Mr. Keshe teaching. ...
(:26). (:28). **The Power Plasma Generator is being development by 3 different groups. We are on alert for the starting of any wars which would cause us to release them and you would become energy self-sufficien**t and with it comes a lot of other things, understanding, 46 ..Ghana is our space station in Africa and huge amount of money getting invested there to reach this. ...
(:28). This is important as we convert governments to one government that collectively we see and understand the change. The PPG (Plasma Power Generators) have been given to 3 different groups to develop in different ways and understand the process. **We are on a standby in the case of any incident that can trigger a war due to fuel, energy or political, if this happens the 3 groups will release the PPG automatically**, which means you become energy self-sufficient and with it comes a lot of other things, acceptance and understand through the work of the soul. Now that we understand that **the STM is the sun and so it's the creator of the physicality of the body of the man. This is the part in which many people have problem with. How can I produce things on my own when I always relied on the intermediary of the sun to feed me, when in fact the sun is the center of the energy for the strength of the life on earth and the Solar System, but the STM has the power of totality**, the whole understanding. One of the biggest things was understanding the Commandments**, I released the balance of the Commandments that were given to Moses that he didn't release. Those who are religious will fight this** and discuss why and how as it suits them. It puts straight away the religious leaders in one question mark, thy shall not lie. (:30). And the second one, there is only One Creator, when these 2 if and **when they are accepted by the religious groups, of different paths, of political and economical, then we understand that there is no need for the financial monetary system that we have created or places of worship because the temple of man becomes the STM**, then **we don't need to go somewhere to ask, lie, or beg or whatever we have done for the past centuries and thousands of years, to get energy, that actually comes from our own soul, and then**

we give the credit to somebody else. When man releases the power of his own soul then he will have evolved, the point of evolution comes when we understand that **we believed in the sun to give us the light, energy, food, but we never stood still to understand that the sun is the STM**. We need a constant reminder, what does this light do, where does it convert to, become. Most of us have relied on 1 or 2 things, going to the shop, cultivating, or somehow getting the physical need energies. Rick put up this picture and explain what you see. **When I saw it the first time it's amazing how much it brings home. (:32). Comment on what you think this picture is. The rush of food before a disaster, scarcity of food do to break down of structure**, I remember this from Yugoslavia. (:34). **This picture was taken in Germany with all non-German products taken off the shelf to show the Germans how dependen**t they have become dependent on other nations for their food. What I want to show is that this is the state of One Nation, if we call ourselves nations this is the situation. ... **This is how we have become One Nation, relying on each other as a nation** ... this was to explain why they are fighting in Germany with the racism and the rest ... we all need each other. ... this is what we are striving for as KF, when all these shelves are filled in there will be no mention of what nation it comes from. Another brother or sister or position on this planet, that they care for us that we can have the luxury to live. **When these shelves are filled everywhere then we have achieved the target of being equal**. (:37). this will be what we would like to create from our soul that we can take the pleasure. **When we learn that we can convert the energy from our soul to the energy of our life, then we'll see the reality. We can produce everything through the conversion of the energy of our soul. Then we can develop a condition that in the space all these shelves don't exist, are empty. We have become habitual to produce what the man needs, now that we open the space** of the U in an open way, and manner to the other races, would they bring their foods and put them on these shelves. I have said that the travelers of the space on Earth can openly purchase what they enjoy, or **have they developed to a position that they understand the position of the essence of the soul and they don't need to bring anything**. (:39). ...

Would we learn how through instruction of strength we need to taste the food from another planet, another position in the U. In 2018 we start looking at the realties that are to come. One of the things that concerns all of us from the second we open our eyes to the second we close them, and the thoughts of the next day when we open our eyes what we have to do .. is one thing. (:40). It is liquid or water and food. Would we have access to water to drink and would there be a food that I can eat to guarantee my survival until the next night. **In the space there is no night and day, so it becomes what do I need for the next time, months or years that it can feed me. Would the cycle of the regeneration of the cell of the man in the space, if he decides to carry his present physicality change**? At the moment we change the cell of our skin every 28 days or so, same with the blood cells, and other cells in the body change, because there is so much need for energy to give and take. In the depth of space when we don't have such a huge interaction of the fields, the way we have established on this planet, **would the cells of the skin change every 200 years**, or every 10 days because of the initial energies that come into it. It is part of the evolution. **Our body has tuned itself to every 28 days because it fits into the cycle of the moon and the sun and everything else that we have created, because each day of the moon's cycle with the earth creates different**

absorption rates of the fields from the sun and from the moon and earth. This is one thing we never understood and we have to, because **the environmental conditions dictates how we receive and we have cycled ourselves into it**, we do it so naturally that we don't even think about it. We receive different energy on a full moon (:42). then when the moon disappears for a couple of days. We need that because it gives us a spectrum of the energies which we need to conserve to do (we need to absorb). **In deep space when there is no such revolution and evolution of time in respect to rotation of the earth, moon and sun, then it becomes constant. Therefore there is no need for regeneration of the cells so fast and so much. The life of the man will run into thousands of years like every other being in the U**. The secret of the Ofuntain of Youth or life is the combination of understanding the totality of life. **Would we take into space to live a longer life or would we stay on this planet and use the food on these shelves to limit our lives. This is what mankind has to open his eyes to in 2018**. As we develop and bring resources then we have to understand how do we use them or do we use one source which is the STM to feed it. If you remember some 3 or 4 years ago we had a visit by an Indian Guru, in one of the presentations we see his picture. (:44). **This Guru gained prominence with his cult and his elevation was based on how many days he didn't eat, which was 21 days**. Every time he could do this his mastership and elevation in respect to his followers increased because nobody can live for 21 days without eating, drinking we could do but without eating only a few days. This gave him position and elevation that he could do things. In his meeting with me **I explained in detail what he does and it's not very clever and yet he gains elevation, because he has learned a physical trick in the dimension of the man. In fact any one of us can do this, survive without food on earth and beyond**. Many of you though my teaching has started drinking **Gans water and substituting the energy of the food with, pulling in of the G field strength of the food into the water and drinking it. We are still relying on being a "copy cat" job, we copy the field strength of the orange into the water and drink it, and the fallacy is that now we don't kill an animal because now we know the energy**. (:46). We just copied and stopped eating. Last year during my travels in China I have seen many people who stopped eating and just drink the water. They have made the Gans water from the materials, so it is going to the shelf and buying the same product but now instead of being in a package it's in a water. This is beautiful but we can go 1 step, 2 steps, even 3 steps further in our understanding of this evolution. If any of you stop eating for 50 to 100 days you would definitely take over his cult, because you are more clever then him and you become the new gurus. And if somebody can't eat for 1 or 2 years definitely he is god, if we go according to the present understanding in his cult system. **But we understand the science there is no cult system, we understand the technology so there is no need to make anymore churches and gods because now we have become the creator and we create the energy we need**. We create the condition for the energy that we need to absorb. I said to the guru, you should have explained to your flock what you are doing, you are deceiving them. He said, you have found my secret, I said there is no secret. (:48). this is what is done all the time for those who understand. **The process is very simple, all of us do the same thing as the guru but we have never realized (known it). It's amazing how much knowledge we have but have ignored it** or we never understood it and it became an ignorance on our part. Very early in the teaching I explained many times **that in the present science of the body of the man**

they explained to us that we need to breath O2 to survive. I have said that this is such a huge fallacy. No where in our lungs do any of us every allow a single cell of O2 to go across our lung into our blood. This means that we have learned in our blood to create a replication in the same way as the orange and the water. We bring the energy of the air into our lungs and the matching energy in our blood cells, in the liquid of the blood, converts and receives the energy it needs from the air we breath. This is one point that the world of medicine and biology have never understood. Now we have the knowledge and understand more. (:50). **In your systems you have created a condition where you put an orange above the water in the condition of a plasma, and the energy of the orange is transferred into the liquid (water**), and now it carries the energy which you can drink from and take what you like, in a way it's a third hand process conversion**. The same thing happens in our lung, the energy from the air coming into our lung with the liquid that is present in the lung, it becomes that water because it's all in a MG field strength environment** (of our ? body). Then as the blood passes, the same as, the lung in holding and converting energy. What you do is to take a cup and drink it or put it on a patch and next to your skin and it evolves to become, as you have understood the conversion of energy and it always gives to the weaker. **You have a floating dynamic body, which is the blood and you have a stationary pain pad, which is a food pad, you call the lung. So never does O2 cross the lung wall. Now we understand the science of the food, the conversion of the fields into the water** and then drinking the water (:52). or making a patch from the water and putting it on our skin to get rid of our pain, which never of you ever done before. When you made that orange and drank it and tasted the orange**, next time what you need for a cancer put in that water, you don't need to make Gans' of it**. This is how you have become copy cats, extend the knowledge, then you'll understand. **This is the process that in that condition we only transfer energy from our lung, and from the air we breath, and because of the weaker strength in the liquid blood the energy is transferred across, no O2 has ever left the lung and enter into the blood** to oxygenate it as it has been said. **The brightness in the color of the blood as we see it, is just because it receives more energy it becomes of a higher order**, so it becomes bright, but there is a limit in what it can carry and that limit is what it carries for a given cell. **Every blood cell is destination coordinated, it finds its way like a mtoorway, it goes only to Rome and not to Brussels or Beijing. The lung ?? is GPS connected to a specific cell in a specific position in the body. Every cell of the blood is specific to one cell where it feeds and no others**. In time man will understand and when we do, when the blood cell gets to its destination, (:54). it does the same thing, it transfers its energy for it. It's just like one caging system for one office, 1 cell ?? for 1 cell of the blood with the transportation**. In that process because it carries the energy, it also carries the information that it needs for the interaction between itself and the cell, and it has a few micro-seconds to pass and transfer energy in the blood system, it already predestines what I am short of to receive from the lung. So in a way the cell of the tip of the toe tells to its corresponding blood cell in the blood th**at when you go to the storage this is what I need from the pad of the lung and for you to bring it for me.. **In this process I can feed the AA with that cell, The AA is partially the soul of myself and by feeding it I can survive Now we understand the biology of the man in a totally different way and in a correct way for the first time. What we breath and how we**

breath, we dictate different energies. The air we breath in ?? in position where we are in, as an altitude from the center of the earth, even a few hundred meters difference, which is a meager distance from the center of the core, dictates a different physical condition, different absorption because of the condition of the environment of the fields of the planet, the sun, what the body and what the cell at the toe has decided to be, to be working in balance. For the first time we understand that when **the STM creates the physicality of the man, (:56). which becomes a cell on the tip of the toe, it's actually with that dictates what it needs to release, so our soul becomes that orange, by conversion to a liquid, of the presence, which doesn't need to be a liquid, it can be a different dimension strength field, converts the energy which the cell in the tip of the toe needs. So we understand a new dimension, which means how to feed that soul in the tip of the toe with the soul from the energy of the STM that the physicality can confirm its existence**. Back to the guru, I explained his trick, we all now understand that the strength of the field we absorb dictates what is given to the body of the man. **Even water has energy field strength, if you can find a way that the energy transfer in the lung can be of the liquid of the water which the body needs, you can create the same O2 and H which is in the air you breath to the strength of the liquid of the water which the body of the man needs to survive in deep space if you decide to carry the physicality of the man**. It's for you to test. (:58). Then it brings another dimension, as we know that everything is exactly the same, has an AA base which is a C, H,N,O in combination of different field strength, then we decide through our emotion in interaction with the field of the soul and what comes in as an energy of the planet, through our emotion that I taste banana because that is what I need and what my body is craving for and the energy of it. **Your E in interaction with the fields of your soul and the environment which you bring in to convert, can give you anything you need or as we do in our subconscious, we re-create the matter state of E in the physical dimension through the interaction of the field of the soul and the environment which has to itself a dynamic gravitational system or a dynamic combination of gravitational and inertia, where we decide to replicate the field strength of the inertia, we give ourselves physical manifestation in that dimension**. It's so easy. If through our E we decide to give ourselves no manifestation, as it is only G and M but of a lower or a very higher inertia we decide not to manifest. So **the physical manifestation of the man is understanding between the interaction and the E of the physicality in interaction with the environment which decides on how, where and the way we manifest ourselves (1:00). in the space. We have to understand in the physical body how we are going to convert energy to the need of the physicality**. Very soon in one of the **research centers we will create everything that the body needs through our systems. The team will start working as of next week. We'll be able to produce any energy that we need. The new space research centers for food and materials** are established and becomes operational next Monday, is set to do **this that you can physically see it**. These are competent plasma physicists and they can do the conversions and have all the support from me to develop it and they have already achieved some of it, but now it's integration of the total system. One of the points go back to Mr. guru, you **understood the conversion of the AA to what you changed with the essence of E and you called it orange, now change your breathing, understand that your lung is the G point of your body. You decide by different rhythm, (1:02). what you breath in,**

move slightly the position of your breathing and physicality and then control the heartbeat, which is now, as we said, the STM is a star, and then the new system which has received all the energy, which is a ??mixture of , now the heart of the man as the Earth. You decide if the field strength of the heart which absorbs the energy through the pad system from the lung, the environment of the existence, if it's going to create AA, banana strength in interaction, or as we have seen in the body of the Solar System the interaction of the MG field of the sun which is the STM and the MG field of the Earth which is the heart, dictates what materials are created in interaction between the fields of the 2 elements, O, H ,N so now understand how easily it is, **if you can control the speed, rate, the absorption of the energy from the environment you don't need to be dependent on anything**, then you walk through the shelves of these supermarkets with everything to you (1:04). being irrelevant, empty, **because I don't need to have a banana which is made out of the slave work of the man for peanuts to feed his family for me to become the abuser**. I don't need to rely on the African to die in starvation, meager food, just to have the matter state put in a tin or aluminum ofil or whatever, for me to have the pleasure of having it on the shelf. In deep space there are no supermarkets, where are you going to shop, except going to the supermarket of the STM and you become yourself the supermarket with the shelves ... This is where we are evolving to, in 2018 we enter a new dimension. **Now we bring all the teachings together and you start understanding more and more. Through the dynamic systems you understood the soul, now through the orange and cups in which you drank the water, now you understand that the cup is the body of the man and the orange is the E of the Man who would like to feel that orange and the source of it is the STM** which created the orange to start with. (1:06). You have **to use the dimension of the physicality in the interaction of the E of the STM with the field of the STM to feed the body**. It's so easy! Those of you who went through the evolution especially those in China, who only drink the water from the Gans' you made, have gained trust and started to test it. **Start testing and decide the rate of the absorption of the energy from the environment by breathing, even this is an intermediary step until we teach you more, then you absorb the fields in the blood and bring it to the central G field of the heart, then through the E you decide to interact the field of the soul and the heart which is the physical part of the body, and create the friction, which gives you the taste, feeling, pleasure of the banana**. Then do you need to cut a tree, kill an animal, or to destroy anything else, except what the environment has freely given to you, which it has available, which you call air to become food, then in this process you'll find something very interesting , **because of the field you absorb in this way will create a new (1:08). atmospheric condition around you because now you create without any waste, the body of the man will evolve. The waste system we have today becomes irrelevant because now the body doesn't need to discharge any waste because it releases** (what it doesn't need) back as fields to its environment, there goes our digestive system. Back in the medical teaching with Eliya, we clearly made this when we discussed intestines, stomach and the rest of it. Webmasters please release the sections of these which my part covered (not Eliya) where it was done as physicality, because it's important. Now I explain again that part again about where **you breath and it becomes like a Pad in your lung, that it feeds the blood vessels. It's happens the same way with the food in your stomach. No single atom of banana ever crosses the intestine in**

your lymph, but it does it the same way as in your lung, but understand that even the banana was created out of the AA of the interaction of the field of the Earth and the Sun. Now that you understand do you need the digestive system? (1:10). **Now that your lung can feed your body not only with the emotional part field strength which is the combination of the AA, but the physical strength material which the body needs then you become independent of the position in the space anywhere in the U**. Once the world of science and many of you have done, **you drank the water with the orange in it and when it went into the stomach it gave the E feeling of the orange but there was no orange cell in it, except an energy pack which is at the strength of what we call orange**. Then it transfers to the lymph which is the physical liquid, not the emotional and soul liquid, that it transfers it to the point in the body where it's needed. So there is **no difference between the lung and the stomach, one has the pad for the gaseous dimension and the other the pad for the matter condition**, but now that learned about the field interaction in the lung, it's enough to create and absorb all the energies, do we need the stomach. Or gradually as we don't our body converts itself to a disposal system as a kidney or a storage. **Would our liver shrink to nothingness, or very small, just in case there would be a need for the storage of energy. Would we loose our kidneys, large and small intestine, the answer is yes**. (1:12). As I said to some children as a joke, there are no public toilets in the space and we don't see **what we see now with the astronauts putting all their wastes in a bag and throw it in the deep space that it hits somebody else and not me, if by accident it comes back and hits their spaceship or the Spacelab they'll be in a big problem, they'll be the cause of their own demise with their own excrement.** That's how simple it is. **As we don't have churches we don't have toilets either in the space, because they are both the same, they are all a waste of time for the waste that doesn't need to exist**. This is the clarity of understanding the totality**, I am the Creator, I am the point of existence of my own. This is why I have released the rest of the Commandments as I gave them to Moses, now you are all Moses'. you have to understand and evolve yourself. None of you will become the priests, or Moses, because now you understand the totality**. What these instructions or commandments are, is do not create any filter between the STM and the soul of physicality of the man. **Read the Commandments and understand the teachings of this morning and you have found partially the path to the UC**. **Understand the totality and the reason we are here and why we are born, (1:14). I can live on this planet for thousands of years, but I have chosen the physicality of the body of the man, with all its pitfalls and all its joys, to transfer the knowledge that this time there is no mistake**. Once you sell one item, you become a salesman. There is no salesman here. This way we give you the knowledge that you decide that, **I don't need to pay for someone to kill for me to enjoy, as the creator of the energy, me, what I call the Adam, in the interaction of my physicality, with the soul of my physicality, which is the Eve, I decide the creation, confirmation of my own existence in different spans of the U and in different conditions and positions**. What you have to learn from today's teaching, which is **the next step for us to understand the entering of the energies of the U within our body is under our control we decide where and how we like to be presented to manifest ourselves**, or to feel to be. Start practicing. **Change the rhythm of your breathing, a slight position of your arm to the left, or your leg to the right that it changes the position of the absorption of the**

mtoion of the fields in your lung, (1:16). decides the mtoion of your arm, is the energy of a banana, the mtoion of the leg is the energy of the olive. **Create a slight movement and get the feeling of the emotion of what you might receive. If I sit and slow my heart down and I put one of my fingers up and move my lung slightly forward, I get the feel and taste of an orange. It goes back to one thing, the energy I absorb from the environment as the lung and heart are the G point, I have to feed into the STM that it understands the condition of physicality that the soul of the physicality can exist**. it's not that the soul uses the environment to absorb of the matter state, it receives the energy of the universal G field force, the physicality is conditioned to the inertia which is a matter state and in every position in the U there is always a matter field strength according to the condition and the position of the fields in that area of it, even when you look into deep space and you see nothing there is still matter state according to the strength of its position, otherwise you would not shine that you can see it in interaction with the field of the U, translucency of the depth when we look into the U through the eye of the man is because there is a matter state strength in that position that it manifests itself but allows the light, (1:18). according to its strength of the field of the eye to be absorbed and to be observed. Do we need these supermarkets or does **the E of the satisfaction in the strength of the STM with the MG field of the matter state, what we call the Inertia, gives the lucid feel to the pleasure of the taste, of the look, of the belief we have**. The reality is simple, we have to start learning a new way to feed ourselves, then this brings a new dimension, and that is that **when we achieve this would we look at the oranges when we don't have the digestive system and just enjoy the beauty of the fields that they want to give us, without us ever eating them**, even though the orange will fall of the tree and decompose and become something else. Or **would the physical dimension of the energy to become an orange, as the orange tree sees that there is no need for anyone to take it will change itself to the field without the fruit that we can absorb from the tree, don't forget the vertical people are much more advanced then the man**. Then we understand that we'll change the condition of the whole planet. These are not theories. (1:20). In time man will see**. In time the space travelers who are here as visitors, this is what they do, they don't eat from this planet, they don't take and kill an animal to receive**. If the animals at the strength give their fields that they need, they'll receive what the animal gives that now it has become the earth and the STM, the sun and the interaction fields is what their body needs without ever touching a single animal. **Then we understand that the monetary system that has been created to control man through his food and his need becomes irrelevant**. Nobody can control what you breath nor charge you. In 2018 we'll see a lot of changes because many of you will start. this year we'll open to the public and be one of **the main forces in teaching the man how to become a peaceful man,** through understanding and teaching how we can survive and that we can create a condition that we'll not feel cold, or hto, but we'll decide what temperature we want according to the fields which we create within the boundary of the man, from the energy that we release from what we need that it gives us the temperature we need. The very big question is, (1:22). now that we have become wise in understanding this process, I wonder **how many of you can tell your partner, when you say I love you with the mouth, the words with a sound, and your E confirms through the souls interaction of yours with theirs**. Thy shall not lie, it's not the word of it, now we have the interaction of the STM. **When I tell you I love you it's**

very easy because my soul carries the dimension of the strength for that and you carry the same and the beauty of it is the love has the same strength across the U. It's the only common denominator in the UC, which means I am giving, you take what you like, I am a lover. Then you fall in love with the soul of yourself, that means I can't lie to myself and you become a clear transparent soul, which is the ultimate goal of all these teachings for man to join the UC. Now you may understand **the 24th Commandment. (1:24). The equality of the soul of all created things across the U** and it goes back to another Commandment that there shall be no leadership or kingship as all the souls see each other as equal in giving. **The competition is who can give more that more can elevate through the condition of giving**. In English we say all men are equal, but in the **universal language we say all souls are equal, and there is no hierarchy**, and the minute we achieve this we don't judge, steal, lie. In so many **ways you can't tell another soul I love you when our soul is not at the strength that it shows itself. This is why most of the stars in the U shine the same color because they are of the same strength**, it doesn't matter about their size unless their matter state Inertia interacts in the field of the ?? language. You made the Cups, oranges, etc, and as Alek can tell you as a member of the EC, and one of the leading scientists of the KF, you could taste the banana, orange, and drunkenness from the same cup, according to the E of the time of the need. (1:26). This is why he is one of the members of the EC**, he understands the strength of the soul in the dimension of the physicality, he was one of the first ones to open the door, you were all blind to it**. You copied it but you never understood. It's time in 2018 to move into the new dimension. **Once you learn to be done with even drinking liquid, now we understand that you create the liquid within your own body yourself, then you understand that you are the creator of the physicality as you decide**. In one of my medical papers I explained something very interesting, I never understood, maybe now you can understand. **The doctors and the medical people of today cannot explain, and they just pass by it, and nobody has the knowledge nor has anybody asked about it, is that they empty the lungs of 6 liters or 4 liters of liquid, ask them from where does this liquid come**. (they say) oh the body has produced it. But the patient has taken no liquid or hardly any, not enough to produce 6 liters in the lung. (1:28). This is a natural phenomena, it's because they don't understand it. Now from the teaching of today you can **understand when the E is not befitting, the interaction of the soul of physicality with the STM, it doesn't take from the pad of the lung into the river of the life of the soul, which is the blood, what it needs, you create a dam or a reservoir of energy fields that are equal to the fields of the lymph of the body which it has no need for, then the interaction of the H and O field strength enters the lung and starts creating its physical dimension in the Gans level, which is the liquid**. So in fact as I have explained to the doctors, that **if you change the E of the man, or the physical conditions of the posture of the lung, or if you allow different rates of breathing, all the liquid will disappear from the lung**. The liquid in the lung is created by the interaction of the air we breath, it doesn't come from the inner physical body and get stored in the lung. **Now you understand how we die of pneumonia or the lungs being flooded with liquid, (1:30). because it's our E, it's the fields that we have absorbed and have not converted it to the usage we needed, but through the construction and restriction which we have created emotionally, we convert the oceans of the planet, which are created the same way, in**

our own lung. How do you think the water came to appear, **the physical MG fields of the center of the earth, in interaction with the Inertia of the body of the earth has dictated the absorption and creation of the liquid that we call water. Now we understand the MG field of the heart which carries the E of the man in respect to the central G field force itself and the earth has created the same ocean in the lung**. There is nothing which comes from the physicality of the inner structure of the body. You decide in breathing what type of water, liquid you produce in your lung, then the pad absorbs that energy that it transfers through the blood into the STM and the dimension of physicality. **There is no difference between the creation of what we call the oceans and the liquid in the lung**, but we have become expert in it and do it faster and that's why when we go in the lungs we'll see liquid, that gel like thing we call liquid of the lung. (1:32). **This is important for you to understand, then as we see how energy is transferred from the body into the lymph, then you'll understand how the energy is transferred from the orange into the physicality of the existence of the man, this is what we are, how we are created and how we can create and manifest ourselves in the dimension of physicality anywhere in the U**. Now you understand why **when our soul is released when the physicality has nothing to contribute or to hold on to it. And now the STM becomes free and can take its position in any dimension in the U, and because of its accumulation he can become a star, a beginning, the creator of life.** If your soul in its interaction with inertial MG field of this planet lead to creation of your physicality and the dimension strength of this planet, so it can do it anywhere in the U now that it is free. Now you understand why in one of my teachings **I said that Earth is the nursery of the stars of the stars of the universe. We need a nursery to create a soul that it becomes the seed for the creation of the absorption of correct elements in the U**. This is why you see billions and trillions and beyond the imagination of the man, stars (1:34). in the U. Where do you think it comes from. **The STM is sacrosanct and the sooner the man understands** the sooner man will enter the dimension of the universal condition. You remember that **the Sun in interaction with the field of itself, creates the essence of the creation of MG field of the Earth and that has lead to the creation of life on this planet and life of the STM in a finer strength, and now when this planet's strength gathers together and becomes a STM and establishes its physicality, so the same can be done anywhere in the U.** This is why **when the time of the physical dimension finishes the STM takes a new position, because now it's free, it has matured for itself to become part of the totality**. The beauty with this is that we do not understand and now we have to understand. (1:36). **We have to evolve to the next level, we have no choice, now we understand the purpose of our creation. A single speck of dust on its own doesn't make a planet, there has to be a collection of these that it leads to creation of a seed for a planet, so is the STM**. This is what we have to understand and this is part of the further development in understanding of the totality. **the sooner we go through these processes the sooner we'll decide if we would like to live the life of the man of the universe, because it is us who creates ourselves according to the condition of the energy of the environment in which we feel happy to manifest ourselves**. This is what is for us to confirm our own existence. (1:38). **This is what has been denied to us, and what we have to evolve into, to comprehend, what changes the teaching from now on**, because **it's not teaching anymore but understanding the operation of ones self. We'll still carry on with making the cores**

and medical and food systems, but those of you who have gone through the evolution of comprehension of the totality will suffer a lot because it's a dimension, a transition, and you see the physical side and now you have to live with the dimension of ??(non)physicality, in the dimension which you want to manifest yourself in. It will be a process of conversion, of us understanding the totality of ourselves, all the teachings we have done up to now with the different parts of the educational and experimental come together. This is the graduation time. **Many world leaders will rise against the KF** (1:40). because they see their position in danger, because now they have **no position to control. Food, water, financial forces have been used as a point of control, fallacies in the name of religions, different type of sects but all same have been used to enslave the STM. Now the only person who decides that his soul is going to be enslaved to others is me myself. Thy shall not rape, means you can't rape, steal from your own soul, it's not for the others**. You can't deny your own existence to confirm another to be better then you. **You confirm your existence as the soul of a lover to give, that the others through your own process elevate themselves to elevate the others. It's a brick wall and man has to be the giver and to always be the btotom brick that the others can be put up higher that in totality it reaches the highest to see the top, the beauty of the further distance. The understanding of the totality is the essence of all these teachings, and not creating another dimension of mysteries (1:42). and magic. Listen to these teachings of today, this is the process for you to start to become independent of the Earth planet**, and any position in the universe, because what do you do in another position when there is no need for the lung, **but still the transfer of the energy of the environment is needed for the survival of the man, or for the confirmation of the existence of the STM**. The teachings from now on are very much targeted to the understanding of the man and how to survive in the space. As we walk, and teach we understand more, and the more we understand the more we teach.

Any questions. Q: **When the man dies** can the soul take any position in the U or is there a judge who decides the new position, **or is there a Hell or Heaven** or does the Creator decide? (1:44). I think you better read the 24 Commandments, you'll get your answer. There is no one to judge and no heaven or hell, because if you haven't done wrong there should be no fear of hell. On the other hand **the position of the soul is created by the MG field strength which is created by the soul during the time of his existence**. Go back to where Rick showed the magnets on the table, each soul in freedom from his physicality will find its position, in balance and where it can be in the U, it's not predetermined. This is why we say, thou shall not commit any crimes **that in doing wrong you use a lot of energy, or fields of your strength to cover it, to do it and the rest. Then you have less to give and are positioned as a soul in the fields that are less, which means you become a burden to the other soul to give to you to elevate you to reach their level**. The reason we say don't do this or that, or give commandments, so that when the soul leaves the body that it is of the higher strength that it doesn't become a burden on the other souls for them to elevate it. (1:46). As it, itself becomes the feeder to elevate the others. You don't (want to) become a burden, you (want to) become a source. The **hell is to be a burden**, if that is your ?? intent or orientation, when you understand my teaching it will come to the point that man will do nothing but giving, because **he'll have pride in the light, the more it can shine the deeper you can go, and**

you can reach more (souls). It's not to light up more, but to give more, in a deeper and higher strength. This is the fear they put into you, by creation of heaven and hell, because heaven is the ?? when you need you become a burden to receive the things you did wrong, and you took from the others in the physical dimension, MG fields of the soul of the physicality, that you have to compensate. **Would you like to carry someone on your back like a backpack and to feed them, or would like them to walk next to you that he walks the same as you and they feed you and you them**. There is a lot to learn, go through the release of the new **commandments put them in the context of understanding all the 24 and you'll find the path. Listen to the first 33 Medical Teachings that were done, there is a lot there in the understanding of the transformation of energy with the emotions (1:48). of the physicality of the different organs of the body. Understand it and bring it forward to the present understanding and you'll see how we can live independent of any physical dimension**. **My enemies are many, but the fear of my existence, puts the fear of life into them, because of what they might steal that they can't complete their cycle**. My **biggest enemy is me** and not anyone else, because I don't want to understand the true process of existence, so I rape, steal, I do everything else to my own soul and nobody else's, then I tell other people to judge me where I have to be the judge of my own conduct that if I don't do wrong I don't need to be in front of a judge to be judged. If you don't do any crime, cross a red light, hit a man or rob a bank, then you don't need to appear in front of a judge do you? When you don't rob a bank because it means stealing from the others, cross a red light because it means you put other peoples life in danger, (1:50). and you watch your own conduct then there is no need for a court and a judge, because you have judged your own conduct. **Q: Is there a way to clean your soul from wrong doings in the past? If you know that you have done wrong and you know it and have judged yourself that it is wrong, you have already achieved balance, as long as you don't repeat it**. This is the key. If you say you want to clean up the wrongs of the past, it means you stood still and know what you have done wrong. There are 2 ways, to know what you did wrong, and secondly what were the consequences to the other souls and your own soul. **We always look when we did something wrong at peoples reaction, but we don't look that what I did wrong has created a condition that my own soul has taken a new position which wasn't to be**. We call it a punishment, but in fact, it's a new position in which my soul is not in conflict. When you are adulterous and sleep with another behind the back of your partner, and you know it's wrong, you find every excuse to justify it, then the energy of the soul that you were supposed to give to your wife is not there, (1:52). so she moves to a different position, then there is the soul of the person you made the adultery with, they move to a different position, and now your soul has taken a new position because it's not what it's supposed to be, to be shared equal with the 2 souls that you shared it with, and then you find that this position is painful, it's not what I wanted it to be and then you blame everything else instead of looking at how you started looking to change. **If at that point you realize that it is yourself that has been the cause of this and you have judged it and found that you are the cause of it, then you carry it out the same way, but you might not be able to achieve the satisfaction of the both**, but at least near to it, by giving more of what it needs to create a new position, **then you have already judged yourself and achieved that peace, that position that you wanted to be in**. When you judge yourself you don't

need anybody else to judge you, unless you don't see the correction that needs to be done. **We have created one of the worst things on this planet, by killing if somebody kills, this is the worst thing and it's against all of the teachings of Christ. Eye for an eye, totoh for a totoh, what a rubbish**. Those who created these are the ones who are going to abuse the man. **If I take an eye from you (1:54). I have to give you an eye. I give you enough to see, not for you to take an eye from me. It was put this way by those who wanted to abuse and take control of the man**. If I take from you, it's not for you to take from me, but **it's my job to give to you to replaced what I have taken. I become your eye, I give you the eye of my soul**, then the eye of physicality is not needed. It's the **elevation of the soul and not the taking of another eye**. This is how the whole teaching has been misrepresented to suit those who could put man in fear. Then they could abuse the man as we have seen. **They tell you to come and confess and then they know your weakness then they rape you and do everything else to the children. Who do these souls confess to, the other abusers or to their own soul**. In the coming months **we see the establishment and end of Catholic Church through the ?? That is my promise and it shall be done**. No body needs to confess to anybody except to his own soul. With it will come the end of fights between all religions. (1:56). **We have to understand the totality of what we are here for, not to be judged, and not to do what we have done again and again, and we have always found a point to justify the same state and then when we suffer we blame everybody else accept ourselves who did it, and we found an excuse to do it**. Like with adulterous behavior, you justify and then you go from one man to another. You did this so I'll do that, you stole from the condition and now you have a lower soul. **To achieve it you need to get energy and you always suffer more because it's not the level that the soul wanted, it's the physicality that has pushed the soul into that position**. The pain or punishment as you call it is that the soul which give unconditionally has found the filter of stealing from it and then it does the soul itself to find its position and puts the physicality in a position to find the mistakes, **if the mistakes are not corrected, it gives it another one, so you repeat until you learn. And when you learn and you don't put it right, then the soul looses the totality**, **then you fall into what I call a freefall of not being able to receive and give**, then you say the relationship has run into problems, because when one is not there the soul will not commit itself to anything because it knows that the condition is not what was agreed. (1:58). **When you enter a relationship you become like 2 suns, a twin system, one takes from the other one and the giving has to be equal**, What happens when one takes more and gives less, or when you give more and take less, or what about when it's in balance. We have to become the judge of our own conduct of physicality, and then the soul always shines. **Have no fear of judgment except yourself judging your own conduct** and don't be afraid because there are no courts and judgments in the space. I have seen none in millions of years. Man has conditioned himself to abuse and those who are clever have used it to abuse them. I explained this to a man of the robes, they have created this condition of confession, so now the one you confessed to knows your weaknesses and can abuse it to his own advantage. This is **what the Catholic Church has done, and because the mother has confessed to adultery he abuses the children of the mother, because if she talks he talks, so he has captured the wife and the children. (2:00). We see this especially in the Catholic Church, the confession of adultery to the abuse of children. We have been witness to it for centuries and man**

doesn't want to understand, 99% of the children abused by the Church in the condition of the home is when the mother or father has confessed to the weaknesses of the soul and then has opened the door for abuse to the children. And the fear of sin, and silence of the parents against the abuse of the man on the child. If we open the door of the abuse man will be shocked. Any other question. **Q: What is the meaning of higher or lower strength in the UC**, is the soul with the higher strength closer to the center and the lower further away**? No we are all equally positioned, the higher strength means being able to give more and in giving more receives more**. I explained this to **the EC members. (2:02). They're not being gifted, but are open to have access to higher strength of their own soul and when you have a brigther light the deeper you can shine, and you can be observed deeper in the depth of space**. If you have a candle you can light a room with a flood light a whole stadium. That's all it is, do you want to be a candle or a flood light, man should be the floodlight and with the 24 Commandments we make the path for man to become the floodlight. That's **the whole purpose of the teaching to give pleasure for more to see, enjoy, and more to be able to give, more to come together for them to share more**. I am a lover of oftoball ... where the present way of the religions has made sure that man remains the candle (2:04). so that they can abuse, and they can blow it out and play with it as they want**.**

Q: Does the soul need to bring the energy of physicality into itself before moving off into space? It's not the energy of physicality but the energy of the STM which leads to the creation of physicality, look at the higher level and not the lower then you get enlightened. How beautifully all the teachings come together, **you can understand and use your own physicality to absorb energy without taking and killing and then you decide how much of this energy from your environment you give to your soul that it can give more. You take from the physical dimension field strength and you convert it to the energy of the U. The body, heart, breathing and physical dimension of the man is conversion of the lower strength matter state into higher strength which is the STM,** where in the spaceship structure the 3 base reactors are G they pull everything in to feed the top (reactor). (2:06). It's not that the top is weaker, it's weaker in taking because it's such a giver in giving. The understanding has to be complete, when you are a taker, you're G and you bring everything in, but when you are a giver then it means you don't need to take much, you give so much that the others can exist through your giving. **When we look at the structure of the H in the AA, it's such a giver because it doesn't have such a gravitational magnetic field strength in the center of it, it has only 1 electron and 1 prootn, and 1 neutron, if it's Deuterium, but the others because of the number of the plasmas in their center, they're heavy and they need to get fed so in feeding they absorb more, then in that process, they have to release and in coordination with each other, the one which is not ?? but is weaker in strength of the G, they feed into it, but as a giver it gives. If you look the H is a lover**. Now we have to understand all the parts of the teaching and if we understand it, comprehend and translate it the correct way, then we have achieved what we are here for. it will take time.

Many of you in the coming time will start the process of, feeding your soul, physicality feeding and then to see how your physicality can feed your soul and physical body

through the breathing and the others, that you don't need to kill, be worried where my heating bill will came from, (2:08). because **now you can warm yourself through the interaction of the emotion**, I like to have the feeling of the snow at Christmas because there is joy and it means something, it doesn't matter that in South Africa the sun is shining and hot. **It's us who have to create the conditions of understanding of the soul for our physicality, and there was no other way then to go through the teachings up to now as we have done, the Gans' the field strength**, when I speak about the pad of your lung transferring energy to your blood, if I would have taught you this 4 years ago you'd have said that this guy is crazy and we don't understand it. But now that you have seen it and produced Gans and had enough time to experiment, now it's easy. **Yes, why didn't we see it before. there is no need for energy to be transferred by O2 to go across the lung wall. Now you see how many fallacies we accepted because of the lack of knowledge**. In a way it is good because now we know what has been wrong and what is correct, then no one needs to fast 21 days to become your new guru. ... the what is the next trick up his sleeve. (2:10). **Q: What is the difference between a man like Mandela and Hitler, do their souls have the same position? No, I explained this in respect to 2 or 3 parts of the teaching which you have to put together. The man who makes the gun, his soul pays as much as the man who fires the bullet and kills**. The same for the one who creates the conditions for the elevation of the STM will receive the same. As I said before, in the process whose soul was elevated more, Diana or John Paul II? I don't think that the light of the candle of John Paul's soul even flickers. And maybe the light of the candle of the soul of Diana is much brigther. **John Paul was placed, brought in, and knew about all these adulteries and child abuses from day 1 and he kept silent and many children and people suffered**. He was brought in to create the revolution in the Eastern Block and that was the only reason we saw the Polish Pope, and what came with it was the (2:12). opening of the new doors and more abuse. We are aware of another revolution by the same people and I promise you that will not happen. **Which one was worse Mandela, or which one gained more Hitler? That is for you to answer, not me. You understand enough to be able to answer it**. Read the Commandments as was released and revealed to Moses. **Those which he carved and those that were carved on his soul by interaction of the fields between the soul of the Creator and the STM**. We need to understand, (2:14). to comprehend the totality, don't read them on their own one at a time, put them together and look at it as the conduct of the STM, then you can judge it through the physicality if you want to. **We will see many disasters and joyful things, and the maturity of the man, this year. In the coming cycle we'll start a new approach, a new way to look at life, and once 1 receives the others will elevate to receive**. I hear from **many KF supporters that they have started to experience many different things with their soul, their brain and their body, and some of it is joyful and some they can't explain, and some of it is experimental for man to start learning the nest step, and some of it will be very harsh because we have to correct a lot of things of the past**. We will see, understand, comprehend the totality when we connect all the commandments together, not one at a time. What I said to Moses was easy, I transferred the E of the soul and that is all you need to do, but he transferred it into the physical tablets, which was not the condition. (2;16**). He was supposed to with the light that he received to enligthen the soul of his followers, but instead he chose the abuse of the physicality. No tablet was ever carved (by God), he**

did it to abuse. The enligthenment of the soul of Moses is exactly the way you are getting enligthened, small pieces by connected, but in his condition it was given to him all in one go. If you would have seen him at the time when he received it, he was a glowing sun, but then he chose the path of deception and physicality. **He couldn't say this is what I was told, he had to make something people could see so he carved what he wanted to carve and not the totality**. If **you go down the process to Mohammad, he did most of it correctly, even though he made other mistakes on top of it. What in part that Moses did not bring, Mohammad tried to bring through the enligthenment, both of them saw the same thing.** Q: After Moses I understand why Jesus came but why did Mohammad come? Because the others did not receive the message. Q: Was Mohammad's message more complete then Jesus' or was it the same? More or less the same, and a little bit more, he released more. **One of the things Mohammad (2:18). released that you see now in these commandments, God is one, one creator**. This is very different then the 10 Commandments. **Q: Is there a reason that one is born into a certain religion? No, it is just the way that the soul that is created out of the dimension of the physicality of the position of the parents. There is no reason why someone is born Buddhist or whatever, you are created one and what we are created out of should be equal.** When you look, it's a very interesting point, most of the KF scientists will come to it .. we have such a system in the space but it's not in the way we see it, but I call it a system. We have the night vision glasses to see in the dark**, there is a vision to see the STM, and then you see different strength souls, the flickering souls and the floodlight souls**. How much energy that flickering candle needs to take from the floodlight to show itself in its existence, a lot. We see the souls that way. (2:20). When the man is created all the souls are the same, it's us through our conduct that decides. It's very hard, what happens to the child that is just born and dies. How pure is that soul? It had 9 months of pleasure to give and take through the soul of the mother and the others. The time of the departure is irrelevant, it's the strength of the soul that counts. Why do we pray and bless somebody's soul, we give to them more and then they have more to give. **Why do we tell our beloved I love you, because in the reflection of the receiving it tells you I love you too, and what she doesn't need I receive to confirm my existence. Religion is a manmade thing to abuse the man**. It doesn't matter if you are born in Iran, New York or Mars or planet Zeus, **all the souls have the same attributes. This is what is in the commandment, all souls are equal**. ... it is us who have been put in that position, then you understand that there is no religion. **Religion is one, believe in the same oneness and believe in the Creator which is the STM.** (2:22). This is very hard for those who abuse. The biggest opposition that will come to the KF is from the religious groups, but on the other if you look at all my teachings I have always respected the prophets, when their conduct was correct, but never the false temple which were made by the fathers by abuse of sons. **If you are Iranian then you are aware of the present uprising in Theran, we know the outcome without the interference of US or Israel in Iran**. Because it all has come to an end at the same time. What will be the outcome after this for the Iranians, or this postmortem ?? fall, what they believed because it was created to abuse. The same as the Catholic Church and Jerusalem, and the same in other places. **Everything is coming together perfectly** it's just what we have to do. So it doesn't matter if you were born as a Jew in Jerusalem, Moslem or Christian in Vatican. I have said something very amazing to someone and I

saw tears, and it will come. (2:24). I said recently that **the city of Vatican should be returned to Rome and it will be done soon. The same story as we saw in Church of England in the 1980s** ...they found out that not many people go to the churches anymore because they found out that we are the tricky guys and when they first started selling their Churches ... and found bodies of children from the nuns who gto pregnant. They were private companies so they had to call the police to investigate. **Some churches they found 50 bodies of children. They found out it was from the adulterous behavior of the priests and nuns and the others. Then the Church made a law that they couldn't demolish a Church that they buy from them, the Church has to proved their own workers who already know about the adulterous business**. (2:26).
... then the whole thing collapses. The same will go through the other religions because they'll see their own conduct. I am not attacking any religion. Where did the vow of silence come from, it's not in any holy book. It only applies to women in the Catholic Church because (2:28). of the nuns who gto pregnant. How could they be a sister and get pregnant. So she takes a vow of silence until the child is born and then she comes back out. This is where it came from. ... the abuse and the hiding of the lie of the abuse has brought the "vow of silence" and now it's open**. An unbalanced condition creates problems, when a man is created to create and then he is told he can't do it (sex), but still the body has for millions of years procreated. It's like deciding to become a vegetarian when my body is used to meat then I can damage myself. It's the same with the body of a man who is produced to reproduce. It's written that, I made thy to make children that they may love me. How can a man who is created to love, to appreciate the presence of the soul which created it, now is told it can't create. You can't stop the process, it's still the same love affair, love for another, so it creates a false condition of homosexuality and child abuse and a vow of silence. All created out of lies which Moses was commanded not to do.** We can tear the Catholic Church apart in such an easy way that they will do it to themselves. I promise you one thing, I will return the stones of Vatican back to the Coliseum. (2:30). Because it's better to abuse the physicality then the STM which is the source of physicality, then you can stop it. It's the same with all the religions, which is the point of weakness of the man, for he has created it himself. He had no choice because he couldn't understand it. **When you are on an island and the hurricane comes and you know what it does and how long it takes to cross, then you sacrifice a virgin. Now we have satellites and know when it will come to be ready and so we don't need to sacrifice because we know it's a natural process**. **Which one was correct, the sacrificing the virgin or now understanding the actual weather forecast. A lack of knowledge created the abuse**. Now we understand more why should we sacrifice a virgin. I take man into space to be equal to others in the U that he can't be abused. **The abuse doesn't come from the others abusing you, it's you who abuse your souls because you go and believe in everything else, the guy didn't say I am the god or the priest, he showed you a new revelation, a new way, and because you abuse yourself you made him a god. It is us who creates these images, and not the images that create us**. (2:32). Now you tell me is it Mandela, Diana, John Paul or Hitler? From where I stand, to me, John Paul created more crime then Hitler, he didn't touch the children the fresh soul, but he knew and he allowed it to happen, the same with the present Pope. The same with the other religions. When I talked about President of US announcing Jerusalem as a new center for US, who

was **the loudest opposition, the Moslems who want to be there and the Catholic Church who is claiming it illegal**, why it's your home you are claiming it. How come they claim it as theirs and you yours but they can't claim it as theirs, because you are claiming it, or are they all the same. And have they all cheated humanity, those who were available to be cheated. It's not the message of the Messengers, it's the abuse of the followers, which is the pain, but don't forget the followers have done exactly what the Messengers have done. Cut of the same piece of cloth, the soul accepts to the same elevation of the level (2:34). of the prophet ?? themselves. Those of you who ofllow the KF in time to come you'll carry the soul of the universe, so there will be no abuse. Because you enligthen to the level of the strength of your own soul and nobody else's. People will understand very soon when we speak. The question is what is going to be the reaction of humanity. We saw in Austria some years ago that 90% of the people used to go to Church. When the child abuse by the priests opened up, at the moment they are talking about less then 10% going to church, they lost their faith in faith. Soon we'll see the same when the truth and reality come out across all the faiths of how they have abused. And how **collectively in the background they collaborated to keep the status quo but they lost. The reason is because I have changed the time and it is the wishes of my soul, the freedom of the total soul of the man that it can join the UC. Within me there is more then all the priests and churches, mosques and synagogue put together and every other one. Because I am the giver and they are takers**, and in giving I will change. **It's the mistake I made with Moses and the ones before him and I am putting it right. (2:36). And nobody else can do, it was my mistake. I trusted the STM, a weak man**. (2:37). Alzar tells her life story. (2:58). (3:03).
What is important to all of us is not where and what the condition of the environment we are born in, but what we learn and what we expect and what we ofllow. I was born very much like you and not far from where you were born**, in a house where I saw the conflict of religions. My Jewish family couldn't eat at the same table as my Islamic family. I was taught the principle of Bahai faith and in the end I came not to rebel but to see that it was another path of abuse. It's us who decides to what extent we want to go. I sat and I watched my Moslem uncles by accident turning up at the house where my Jewish cousins were, and they washed their dishes or hands 10 times because they touched a Jew**. I witnessed this at age 6. I asked my mom what are they doing. (3:05). She said, because we are Jewish background they wash their plates 7 times that it is clean and not touched by a Jew. ... I never understood that if my mom is a Jew and they invite us to eat, then why go through all this vigorous washing to be clean, then don't invite us, or don't do all these stupid things. **My father used to say, it's for them to mature. It doesn't mean that because she is my cousin I can't love her or be here because of out childhood, but I love your mom and she comes from Jewish background, and for love of both I take them both**. I became aware of the conflict in religion at a very young age. Then I saw more abuse, I watched many times mullahs who came and took their frock off and became normal people, because they didn't want to be mullahs, or teach because they couldn't see the light. ... I realized that man of faith is the STM and not the man himself. ... My father said, they don't even know why they exist in that frock. Then we saw the change during the revolution. (3:07). Many people just put the frock on as a path to earn to do what they wanted to do. I have respect for all of the religions, because at the end of the day I brought the religions what they came to be later

on. But it is for us to understand , **I married a Catholic and I watched the same abuse, then it became more and more with Caroline the fallacy of the abuse has different names. I call one faith as sexual abuse, one as physical, and another as psychological, and all of the religions have found a way to abuse the man, of the STM in dimension of physicality**. The sooner we open our eyes that behind all of them that they are all one, and that was the first message given to Moses. There is only one Creator. **Very soon we'll see them all come together, the peace on this planet has started because it is our wish. We have to realize that the strength of wanting to be peaceful is much stronger then those who want to be the intermediary between the STM and the physical life of the man that wants to be peaceful**. These (temples) will be turned over, in the coming time. What are we going to do with all these temples, properties. (3:09). churches, mosques and synagogues. **Don't forget they didn't pay taxes because they're nonprofits and they bought as much land as they could, and the have been given through the fear of getting a better position in heaven, by those who are weak in character**. What are we going to do with all these properties that will become available? Are we going to make a nation by nation decision or do it as One Nation. **What are we going to do with all these properties that have been collected by abuse in the name of religion**? It runs into a percentage of the total assets in the world that are held by those who used the name of the faiths and the abuses over centuries. **What we see is the collective abuse of our grandparents and great-grandparents, etc. One thing the EC and UC have to thing about is what are we going to do with all this wealth that has been collected over centuries pennies by pennies from our ancestors, how is it going to be shared**. And **the gold that was taken in Philippines and South America and bought as shares in the New York and London**. There has to consensus and to find a total solution for the financial ?? of our ancestors in the dimension of the abuse of the soul of them and of our soul. (3:11). .. how are we going to solve it .. what about the properties that were given to these abusers ... then we'll see only one alternative and that is One Nation. We have all invested in New York and we all have to be benefited by it. There are a number of positions coming up and dilemma that arising very fast. Palestinians and Jews are of the same blood, Christians and Jews of same blood. How to correct all of these. **A lot of people will oppose (3:13). the end of the faith as we see it because they are afraid of the abuses of the past which will be opened up**. The only thing left is to forgive. we have no choice because it's not one abusing the other, we all have abused each other at the same time together in one way or another. We referred to the other one not to show us. To become One Nation we need to close our eyes to a lot of wrong doing of ourselves and our forefathers, and a lot of abuse that has been done in the name of the Creator by the those who could see us as weak. I attended Fabio's funeral we were absolutely shocked, the priest limited the time of this beautiful soul to only 1 hour, was the soul of this boy so worthless or was the priest for hire, or has it become a business in how we can rob in the name of God. In the end it is us. We'll change into One Nation this year it will take shape and the coming time and it will force us to change these things. The only alternative (3:15). left is a compromise somewhere that, we were stupid enough to let them abuse us and our forefathers, but in a way the ones who abused us is part of us. .. these priests and mullahs are not born to be, they are the product of the environment that we have created. Becoming One Nation is not just teaching the soul the understanding of how to exist, it's to understand how much

we need to compromise, to close the doors of the past with the knowledge and not to leave things behind the door, but knowing what ?? ?? and start to live in a new house. I have been to Vatican and I have felt the pain. The funny thing is all these religious people are aware of what they are abusing, the only thing is they don't want to admit the level of abuse. As a priest once said to me, I am not a child molester I don't abuse children. I said to him, but you abuse the STM, it is the same rape. (3:17). the position with us and the change of new technology will bring up the new One Nation, One Planet. We have to do a lot of work and have the strength to see that the time has come for change through the conduct of the STM and not the physicality. **I watch many revolutions, many things are happening at this moment around the world and I see how it has changed compared to the past, and I see how much man's maturity is leading to it. We are becoming mature and more aware of , but now the physical awareness has to lead to awareness of the STM and then opening of the UC to man**. Will man mature in a night or in another thousand years. Would those who mature have to wait for totality or (if) we become part of the totality becomes (will the totality) mature faster. All of it. It depends on us and the human race. **Today I taught you how to feed yourself. I know many of you will start doing it and see. Start with one taste, vision, understanding and then when you achieve that one go to the next one. Start understanding the operation of your soul and the physicality in respect to the soul, and operate through the soul of physicality**, which is the heart and the lung, to give to the soul of the humanity, or your own body, that by giving it creates a new position. (3:19). **From now on when you eat, don't think of it as an orange or a potato, think of the soul elevation of what I can give to the soul of myself, using the soul of physicality to convert it to the soul elevation of your own soul. This was the purpose for teaching you about Star Formation (SF)** and the MaGrav systems. This is the reason I teach this way because the common man can understand. Some of you got touched by having a free energy system, I even gave you the free energy system but you don't see it. You looked for a medical application, I gave you one. **Every man that lives and has heard of the KF can live without any pain for the rest of your life or any diseases, but understand the essence of the teaching, work through your soul and not through the physicality to touch the soul of the physicality**. At least start by working through the soul of the physicality to change the physical condition. **As a man we suffer, it's a part of physicality because the interaction of the fields are so much, when you walk through your own home your body continually has to interact with every field, the chair, the table, every cell on the carpet, on the spoon and everything else, it is a continuous battle when living in an Inertial conversion environment. Whereas in deep space it's not so** much a battle, there your cells don't need elevation, that's why you last and live longer. This is the problem with living in an enforced environment, (3:21). in space we still have all the same fields but it is open to what we want to take, it's not encaged. When you are encaged you have to give and take, **when look at your aura and you see all sorts of colors, these colors are not coming out of your body because the chair wants this one and the bed that one and the frig wants something else and it depends on where the frig and the freezer are (located) then your aura is different because they pull on you**. And the one who wants to abuse it (Feng Shiu), says oh, 'put something there or their is something wrong with the liver'. But did he take the same picture where the frig and freezer were behind you when you

were giving and taking. We have to start opening our eyes in a bigger dimension in the totality and then we'll start seeing and we'll become in charge of our own physical dimension, then we can travel the span of the U. **I promise you that I didn't come here with a spaceship, I came through the STM. Nobody landed anywhere, but we traveled the space of the U through the expansion and need of the STM**. Try to understand the teachings from now on in depth and not just by the words. **The teaching from now on will become very intensive but it is what is needed to go through the evolution of the change to be able to travel the spans of the U**. We'll still make the Gans', spaceships and everything else, but if you are a real entity (wanting to be an entity) of the UC, I have given you all the knowledge, it is your choice. (3:23). Would you like to go by donkey or jumbo jet, or now a spaceship, or travel through the STM. You choose according to your intelligence, but at least this time you can't be abused. Let's call it a day. Try to understand more about the totality, the soul, the physicality and the operation of the systems and the knowledge of the creation, and all of the teaching from the past time. **2018 is the time for the maturity of the man** and we have started it and it's for you to expand your horizon and not for us to push you, because **if I push you and say this is what it is, then we'll create another term. If it is done by you, you decide when and how of what you want to take from it**. Thank you for today and hopefully we'll meet on the 206th teaching next week. But be ready for a change and to see a lot of changes on the international scene because we have wished for it and because of it, it will be achieved. (3:25).

206th Knowledge Seekers Workshop Jan 11 2018

(PHOTOSYNTHESIS, If you say to someone in the universe you lived a thousand years they laugh what a 1000 rotations, In the universe we don't rotate but are part of the Creator and life is everlasting, When you die you become non-dimensional, Most Solar Systems have life that man can't imagine, This planet has a huge mixture of elements and this gives the soul of the man new dimensions, The tilting of the axis gives huge spectrum of MG fields so that the soul of the man can manifest in many different parts of the universe and this is unique in the universe it's one of the reason earth is a nursery for souls to help others in universe and also become stars, This creation on Earth was a beautiful accident and why they want to help man, We need a physical body to be able to transport and transfer all these different strengths from this planet into the STM, suicide means the body has not done its work to mature the soul, Men who went into space come back to earth for an upgrade of new added experiences and dimensions to the soul, With the new technology the expected lifespan will be a minimum of a 1,000 years, In an accident the soul can remain connected to the physicality and it can repair it, Viruses which are energy packages attached to the Amino Acid are part of the evolution to receive fields of the universe because in the space it's the strength which is absorbed by our soul that determines our physicality, The fallacy of photosynthesis, The MG field pressures from the earth and sun effect the current to drive the electric motor and this is proof of field effect, Like the lung no Carbon or oxygen ever cross the leaf it is done by the Amino Acid in the leaf effected by the MG field pressures of the earth and sun, matter is created by the fields not chemically, The tree line on mountains reflect this MG field pressures, Those who want to travel in a spaceship will have to learn to create matter out

of the fields like the plants do on this planet, The photosynthesis is really the process of the plasma of the Amino Acid Nitrogen being the balancer and why we use it as fertilizer to make the plants grow it drives this process forward, In this process the matter state of O and C are created from the fields of the plasma and like the lung no matter state crosses the leaf, The same process goes for the fish in the sea and the lion in the jungle the energy transfer will come through the Amino Acid field pressure, Inside the leaf is Gans of the Amino Acid which experiences emotion because it's the same AA as we and therefore we can communicate with them, The plants don't need water from the roots, It's possible to stop the deserts migrating, The deserts are created by the tilt of the planet UK used to be a desert, What was the North Pole gradually becomes the equator, The M and G fields have a flow like in photosynthesis but on a larger scale, The MG field shielding that took place in the hurricane created higher strength fields in that area so the winds couldn't effect it, (NEW understanding): In the Gans production: One side of your plate is creating the condition for what we call photosynthesis of the C, while the other side is creating photosynthesis for the O, one side of the plate is day operation and the other side night operation, If we change the conditions we have to consider what effects it will have will it create a new pest or cause problems for the neighbors, etc, Plants also have viruses, Using copper axe doesn't kill tree but iron does, The heart plays both the balancer of the Nitrogen and the higher strength of the Oxygen in the Star Formation, We carry all the knowledge of the past from our ancestor in our RNA or in the soul of the physicality, The creation of the earth and the way it turned out with such a mixture of elements was a beautiful accident and the others are amazed that the man doesn't see it or understand his own creation, , ,)

(:10). .. I hope we enlighten you to think more on your own strength of thoughts. We have inspired many people to do the right thing and that has been **the purpose of the Messengers of the past, to inspire man to live a correct life and to live independent of any imagination because in reality he is in charge of his own destiny and he decides it**. If you listened already to the most of the teachings you should have already seen it that life has no limitation. Five hundred or one thousand years (life span), number are the rotation of the earth around the sun**, but in the U we don't rotate around anything except the Creator, the central cosmos, where everything rotates around it. It's the center of attraction, the center of life for the whole of the Unicose**. The sooner man learns that he is part of the Creator, the sooner as we tell, he is everlasting and so shall be the man. This is part of the process of maturing and it's very hard for us to think. When they said that Noah lived such a long time in his day 50 years was a long time with diseases and everything else. If you lived into your 50s they said you lived a long, long time. Some say he lived 500 years, still what is 500 but a number of days, it is a meager time in the time of the U. **We have learned that the soul leaves our physicality and becomes independent of the rotation around the sun. The year on earth is absolutely meaningless in the universe**, if you say a thousand years is old they laugh, a thousand what, how many times you rotated. (:13). **If you are a Sufi and rotate so many times you add to your lines it's a Sufi life, you can keep on rotating. Man's life in essence is the life of the Creator,** without it .. our life is part of the Creator's life as He is everlasting so shall we be, but we have to learn that if the Creator has manifested Himself

in different shapes and forms of the time, as universes, galaxies, as stars, planets, man, as the animals on this planet. **We have the same capability to be part of it and in a way to understand it. It's very important for all of us to understand that we decide our own lifespan, it doesn't matter where and when, once the ??seating of the soul takes shape in the womb of the mother, as man on this planet, it has captured the essence of the creation**. Now it has its own dimension and it absorbs (:15). gives and takes. When our soul leaves the body in the dimension of the universal cosmos, as we feed ourselves as it was shown with the magnets it decides where it's going to be, it can come across, and **most of the souls of the men who lived in the space after parting from this physical body, or what I call the leech of physicality, then they decide what strength fields they take and they give, and if you come into a very high strength fields which is in the strength of the STM you get elevated because you can receive more, because they want to raise you to a new level**. We see the rise of the manifestation of soul in a different level. These are the things we have to open our eyes to. When we talk about a thousand year, it's just numbers on our count, because we limited our lives to the number of rotations of our physicality around the sun, and the sun is a small speck of dust in the whole of the creation, and imagine that we are a speck of dust in comparison to the sun, **but in essence we carry the essence of the essence of the creator**. When we speak of thousand or ten thousand years in the depth of space as we adjust ourselves to different **dimensions we become part of the totality of the bigger structure and life of the man in space is everlasting**. Once and until the time of the dimension of the strength of the STM becomes part of the soul of the bigger structure, but even that still lives within itself. This is the secret of the creation (:17). and this is what most of the men, the creations in the U **die for, they want to be able to release their physicality to become part of a non-dimensional entity that they can choose when to manifest themselves**. **Not very many creations of God have managed to reach this, nor have many races in the U have managed to understand this**, but who understood have matured very rapidly and this **was a gift that was given to man, to mature rapidly, because in the structure in the building of the STM there is such a capability, such a potential within the STM and it is unique in the way it has unknowingly become part of the nursery of the creation of the Unicose** in creating new dimensions of existence, the flexibility. As you all know and it is very e**a**sy to understand**, most of the Solar Systems support life in the dimensions that man can't even imagine, but on the other hands to them they can't imagine life like in the human race in the U**. We are as amazing to the others as they are to us. We amuse them as we get amused by seeing different things, different dimensions of life. The beauty of this planet is with the cosmopolitan presence of the huge mixture of elements, this gives the STM new dimensions. If you look at the rotation of most of the planetary systems (:19). the vertical axis, they don't have such a combination of the mixtures of materials as we have, **this creation of the rotation (tilting) of the axis of the earth in the few degrees creates the seasons and with it creates a combination of new dimensions of the strength of the MG field has given the STM the strength of fields which covers a huge spectrum across the U,** and don't forget that whatever we discovered**, Plutonium, Uranium, Cobalt, etc these are the first few elements but they are the fundamental cornerstone of the creation of the STM, and in the universe if you have such a spectrum of energy of the MG field, it means you can manifest yourself in many different dimensions**. It's a cake with many

ingredients and each one stands on its own, a bouquet of flowers that carries 100 or 200 different elements with it, and put all the isotopes with it, and put all the dimensions of strengths of the M fields, **this gives the STM in the dimension of the U to be able to manifest itself in a huge spectrum of lives**. If you understand this now you understand the beauty of the creation for man where and how **we can manifest ourselves, in having and being able to carry such a huge spectrum of the fields in the STM, it's MG field strength, it gives man the ability to survive as multi-taskers of everything in different dimensions, and this is why the STM is precious.** (:21). Because in the dimension of the U if you come into a position where there is only Uranium mixture, you can manifest yourself because you carry the strength. And you use the other elements then the strength of the M field to add to it and manifest yourself in that dimension. If you come across a planet that is only Carbon and manifestation of life in C strength, man can manifest himself in it. **This is why there is so much emphasis on guiding the man. It's an accident of the creation but in that process it has brought a beautiful creation which we call the STM**. You call it a Swiss Knife, because it can do everything, man is a Swiss knife of the soul of the universe. **Man's soul and there has been so much contact with the man in the past in trying to educate the man, it's not for the physicality but for creating the perfect STM, then the STM in the universe become the messengers of peace, because he knows peace.** Up to now he has created so many problems, so educating man to understand the beauty of his soul has been our responsibility, to appreciate his strength and to see the beauty of his creation. **Not many creators have been made the same as the human race. The spectrum of the strength which is built in the STM is unique, in so many ways the man can become, those men who were men of peace and have joined the UC (:23). are the peaceful ambassadors of the U. In that process they are the teachers,** in the way they created the structure from the beginning which is peaceful. It's like with languages if you speak French and I put you in with the English ??? because you know multi-languages you can survive, you can go to China and speak Chinese, so it is with the STM, it's the facets of the beauty, this is what man has to understand**, the life of the man is everlasting as is the creation of his soul which is needed, but we need a physical body to be able to transport and transfer all these different strengths from this planet into the STM**. This is where it comes, **from the sperm and egg, then the creation of the physicality, that we adopt and perfect the strength of the soul. Then in time when a man decides to leave or by accident leaves the physicality, the soul is already carrying the full understanding of the strength of the dimension of the creation**. So is your body, your soul a thousand years old or are we nourishing the soul which will become the creator, communicator in a life in the different dimensions of the U. This is what man has to understand the beauty of his creation **and not the torture he has been put in by those who abused the physicality. The more we abuse the physicality the more we deprive different strengths to be developed in the STM that in the U he can exist in all dimensions**. (:25). We take feathers of the wing of the bird one by one, and this can't be. This is the purpose of all these teachings. Many people who call themselves theologists and religious people are baffled in how to handle the knowledge which is getting released so rapidly in one go. **And the biggest shock to them is that so many people are understanding, there is no need for intermediaries, no need to call the priests, translators and transcribers. the words spoken are being understood and will be understood by more men**. This is

where we are, why we said the life of a man is a thousand years in the life of the U and not a thousand years in the life of this planet. And that life is everlasting. Don't forget in some of **the writings of the past these numbers have been hidden**, if you look in the manuscripts of the old times, the essence of time was explained to man very easily, but then they covered it, and they said that every year is equal to a thousand years, every day is equal to 1 year. Try to manifest something different this is the essence of the creation of our soul. **Once the STM is created and takes what we call flight in the realm of the soul of the universe, then there is no time limit**. (:27). As it has been said, **if I tell you the beauty of the life in the dimension of the soul, every man on this planet will commit suicide from physicality, but at the same we forget, suicide which means the body has not done its work to mature the STM to be capable to live within dimensions of the U**. This is why in most of the paths of the belief structures suicide has been forbidden, which **means the soul has not gathered enough strength to be able to fit in all dimensions, it hasn't yet reached the point of m**aturity. It's like when you have a child, it can only take suckled milk from the breast of the mother, then you introduce it to bread then meat, and as it grows older and travels across parts of this planet it gets to learn, acquires the tastes of the beauty of the English foods, Chinese etc. and he adds this in the way that we learn languages, the vocabulary of the science of physicality, all these gives strength to the STM, the more combination we add to it the more we have added to the dimension of the soul's strength, into the survival and being able to manifest ourselves in different dimensions in the U. **The STM is sacrosanct and it has to take its own time, when it reaches maturity it will know when it's time to leave**. But as we understand more we get educated more, we interact more (:29). in the dimension of the STM meets more dimensions in need of physicality that it adds more to its different strength. So it's now to started adding to the time of his physicality, this is why at this moment in time we live , **we used to live 30 to 40 years, as the time of viruses and infections and the killing and the wars reduced, man started living more secure, we found rice, wheat and converted the grass to food and we stopped being nomads, every step in this process has added more to the strength of the STM**. We need time to mature in the dimension of adding to our soul, **when you don't do wrong and last longer on this planet, you give more vocabularies, you add more languages to the strength of your soul that you can manifest yourself in different dimensions in different parts of the U**. In the future **as it has been done by many men of today who have returned to Earth from deep space, they have learned this, you go back to the point of physicality to charge up, to add more**, just like when you press a button, they say, update or upgrade, when you return back to the origin of life from where you came from, because you had the essence of the origin within you upgrade, you add more, and this is what the essence is. **Many people of this planet will return back to this planet to upgrade, (:31). because the people who stay here as natives are developing and upgrading and creating more and more**, not in a materialistic dimension but in a way of absorbing more and more different fields. It's like going to Italy and asking for a pizza, or India and a curry, and Mexico for Mexican food, but if you go to England you can ask for a pizza with a curry and a Mexican taste and they make it for you. Nobody in the world is so flexible then in UK. So it is with the STM, you come back to see what has been added and because you want to take more mixtures into your soul. (:33). If you understand this process then **the dimension of physicality becomes the absorption of**

understanding more and more and realizing what is needed and then when you travel into the deep space of the U and the Unicose, then you speak all the languages, so you already carry all the tastes. **Mono-material and mono-structure lies in the U of many and then they can only manifest themselves in that dimension**, but the STM due to his construction, actually through **the construction of this planet in the way we have connected our physicality to Cu, Zn, Al and everything else, this has given our soul a mixture of the combination of the strength in its optimal of life in the U**. How long do you think you need**. In the new science it is said that by 2018 those who are born in this year, a large majority, up to 15 to 20% are expected to live 200 years**, those born in the 1990s were expected to pass 100 to 120 years, with the present knowledge. But now **with adding the new knowledge of the technology of the plasma the life of the man for children who are born today will be a thousand years minimum, because we have learned to overcome those diseases** that overcome our life in the physical dimension. From now on when you are a thousand years you are just a youth, you have just acquired all the tools of life, then you have to exist in the full dimension of the U. Recently we received a letter of thanks for the plasma technology for what we call the regression of the breast cancer of the wife, he sent it himself. We have seen new dimensions with our medical application. We have seen the return of a Coma patient to walking and eating. These are not medical (healings) but understanding the science and the true essence of creation. (:35). We have seen it with our dearest Naomi and in her cycle now that the accident is over, she'll live maybe 500 to 1000 years, because now even the physical accident can be remedied. In the new KF clinics we'll emphasis on many of these strengths**, not the returning back of the dead but knowing that the soul still has a connection with the physicality that it can be regenerated, it can be brought back to bring the physicality into dimension**. I have done this twice and it's very easy. It is so easy and if we teach the physicians **how to allow the soul to still be connected to physicality that it can now use the soul to repair itself**. In the coming time there should be no one in a Coma for more then a few hours. As we teach more and learn more, **that even the death can be negotiated in the dimension of physicality and STM. Does the soul still want to leave the physicality or does the physicality still want to be attached to the soul, it's a marriage that has to be in perfect harmony and it has to be accepted by both, separation from physicality**. I have taught you a lot in the past few weeks, you can decide. You can decide to change the physical dimension into the dimension of the soul, (:37). and then bring the soul within the physical dimension when you need. This is an art and an understanding of the true method, structure of the life in the U. .. we have seen this, been there, **we transfer our souls in the physical dimension and when there is a need, we interact, we live, and then we bring the soul back into physicality** for it to be there and then like a chameleon we turn inside out and let the soul to take over the physicality and we take a new dimension in the U. Every man on this planet with the essence of his creation should be able to do this. It's a choice, the creators given right and nobody else. This is why **we see how much man has let himself down when he allowed himself to be abused and with that abuse he has not allowed the STM to educate the physicality of the man,** this is where the balance of the equality has gone and then it has been abused. If you look at the history of the man, at the Persian Empire, Greeks, Romans and Egypt, look at the Chinese cycle of the understanding of their life**, man has progressed in these cycles where he has been**

just, correct and peaceful with himself. We have seen the dividends of the true (:39). men of peace, and now we see the true meaning of how they have added to the man through the time when they were peaceful. **Their is a myth that when the Pharaoh built all these buildings that is was done by slavery, but that was the time when there was more equality then in any other time during the time of Pharaohs. The leader, soldiers and onto soldiers were all looked after the same, so they worked the same, there was a harmony, no one was nobody above , it was done by the pleasure of doing**. We see the same process now in KF, many people in the background work on the same ethos, they are there to see the change because it comes with the man's peace of mind. In the coming time when you say you are from planet earth they don't ask how old you are, they ask you what do you carry, I need this part of it, have you managed to add so much to your soul that you can give from it that we can survive. It's like what we call on this planet, the blood type. Are you O, or AB, if you are A you can only give to A and nobody else. **What about to be the blood that fits everybody and that is the STM, in the space, and wherever you lay your head that is your home**. You are there because of the knowledge you have gained and the strength to be part of souls and life in that dimension. (:41). The STM has many beauties and assets but the man hasn't yet found them out, now it's time for him to appreciate himself, and **to understand the true essence of creation and the reason, be it just by accident for him to be precious in the UC. This is why we spend so much effort to try and bring man to understand that he shouldn't do wrong, because in the space these wrongs can be dangerous for some**. The true essence of life is not the physicality of the man, it's the STM that can do so much in the depth of the U, in different dimensions and parts of this Unicose, needs the STM. No one has ever told man which universe they landed in, in man's words lions with lions, birds with birds. **The soul which we have created can fit in the dimension of the soul of another cosmos, another U, which now we become the feeding line to that dimension**. In many ways I have hidden this work and I have spoken many times about it, we said, now that we understand the work of the plasma **we can make a magnet for anything, Carbon as we see in the CO2 box, (:43). for plastic, metal, wood, because we create the dimension of the essence of that element, so it is with the STM, where we create a magnet that it can be attracted into any part of the U where he can serve**, not only this U but in the Unicose. So does man live a thousand years, meager number of rotations, of a meager planet, in a meager star which is in a meager part of a solar system, in a galaxy that is totally lost in the whole structure of the Unicose and the rest. Or **is this the nursery of the soul that with it helps every dimension in the whole Unicose**. The answer is the second, we are not born here to be physical, but there **is so much pleasure in physicality because it allows you to elevate your soul to all dimensions**. It's like if you just drink milk, you don't know nor understand the taste of juice, it doesn't matter what it is. As you add more the more strength you get, the more we can interact, enhance our body. there has been a path which man hasn't understood but in time you'll understand, you call **it viruses. I have explained that viruses are fields strengths that add themselves to the AA and that's why man hasn't found any solution for viruses, except in the dimension of the new technology with the plasma, where you actually interact with a virus, (:45). which is an energy package, which the plasma is this interaction of the virus with the AA is part of the new connections**, trying to find solutions for the interactions of the physicality with the STM. What you

call viruses we call energy packages part of them are **created by the soul itself, because it needs it for the body to be able to understand the new evolution in the depth of the U**. You think you just live on this planet and that's it, but you have to understand a simple work, **your soul is interacting and working with the rest of the UC, so slowly and gradually it's trying to educate its physicality that there is a need for the dimension of the field strength which has nothing to do with the AA**. Maybe for the first you understand why some viruses kill some people but not others, because the soul has already planned in the process of physicality to receive these kind of energies. Man has to understand more about his own physical life and **the energies which come from the U and those that come from the STM, trying to train his physicality to be able to withstand more that is to come, which is the interaction of the field of the U**. It's the evolution of the soul in the dimension of the physicality, we have to learn this **because in the space it's the strength which is absorbed by our soul that determines our physicality** (:47). Now you understand when I say that **we open the true science of the U to man in 2018, you have to learn more, you have to understand more, when you do you don't forget it's scribed in the dimension of the soul, but when you learn it, it's a physical entity and you loose it with the physicality. Comprehend and you survive. Remember and you'll always forget, memory is in the dimension of physicality of the life of man. Comprehension and with it bringing position is part of the STM**. This is what we have to achieve, understand and if you are so busy to learn about the life of the U, then no man has time to fight wars in this physical dimension, what an absolute waste of time. Why do we see wars and aggression, because those who don't have, want and are unsure of the future, once they get the habit of getting it by misconduct then it becomes their nature. Look at **the UK it can't produce enough potatoes to feed its own nation**, and if you look at the structure of your own family, if you're a father or mother, (:49). you always look when the next food will be on the table so the children don't go hungry. If you're a doctor or scientist you go to work and put effort and time and get what we call money so that you can buy and feed your family. When you don't work and there is no structure to support you what do you do, begging, thieving, robbing, killing so you have something to eat for your children, then you become part of organizations that the killing and destruction is part of it because it guarantees you can put food on the table so your children and yourself can survive. So has been the structure of the UK. I have annoyed many British politicians etc, over the years I lived in England with my talk this way, I always said that **this Island can't produce enough potatoes and that's why you became colonialists and invaders to guarantee that you can feed like your father and family**. (In England) there are no guarantees for it, to put food on the table to feed the children and then you loose your position. We have seen this with every ?? structures in the British system for centuries. Why did they invade different countries, and now they call it Commonwealth, because they need to feed and this guarantees then the life. Once we make One Nation and UK is part of it, you don't need to let them come and rob, we'll provide them with what they need. (:51). The ethos of the ?? teaming and the work has to change, then the same work we receive from the intelligence of the food of understanding, the man in England will come up with the systems that we can work better, in conjunction with the better that we add to it, then it becomes one family. There is no better time for peace then now, because the more the UK ?? increases, the more need there is to ?? carry that the kings stays in

position that he can have a kingdom and with it comes more war, because there is not enough intelligence in the Monarchy structure to go out and say we don't have the food but we can create the technology that it can help you to live a better life if you feed us. Then we won't see what we saw with the German supermarket (photo) last week. ... if there is a famine they know the rest of the world is there to support us, food will come and everything will be available. This has been part of the structure to build military and arms to guarantee food, and we'll get women to guarantee more in the sexual behavior to guarantee our race**. If you look at the history what has man done (:53). he has never killed all the women of one village, he has always killed the man, exactly what the animals do**. When the lion takes over a herd of lionesses he kills all the babies of the past lion, so has done the man, he has not evolved. How many times have we read in the world history that the world leader has killed all the men and how many when they killed all the women, I think there is none of the second. It is the habit that has been brought in by the misconduct of Moses, we all know the story of how he came in a basket because they were to slaughter all the males, so that there will be no one to oppose the king. This is how **Moses was brought up and in the history he killed many times all the males of the villages**, even the dogs and the ?? pigs were left alone. Then come done the history 2,000 years, **Hitler of Jewish descent did the same thing**. In Netherlands he ordered a couple of villages where all the male species were to be killed. The wrong doing of the prophet has become the wrong doing of the subjects. We see the same process in other parts (of the world) and in religions and sects, and everything else, because man has not understood. It is the STM that is precious (:55). and not the physicality of the man. **If you live in Africa and you have been robbed by the British for centuries**, you should have never forced we'll give you what you need you don't need to kill. The Africans had nothing to fight with, because they had the guarantee of survival. It's the same with the French, their government is tainted with blood. If you are a true Frenchman look where your money comes from. the British made the Commonwealth and left the freedom to them but at the same time they controlled to take money back in from that nation, what they call the slave. **The French budget stills receives slavery money from every French colony. This is one of the reasons French colonies are not growing and they are all suffering in absolute poverty is because up to 80% of their income is sent to France** for the French to live a good life, and Africans to be killed as their slaves or any other place they have been. One of the major work of the EC is abolishing this from the French structure. Why should a nation after 200 years still pay billions of dollars to the French government for being enslaved, and then they call it their freedom. Look at the French income and that of the colonies and see how much money flows to the French central bank. (:57). And then they say the black this and that. Because they don't understand without them the French don't have the bread to eat. The streets of Europe are paved so beautifully by the burden of robbing the rest of the planet and this will change. We'll make sure of that because we'll elevate the souls of the ones who call themselves European to understand this misconduct. There are 2 choices, you judge yourself and nobody else. Every part of the teaching is coming together and it needs to, in time to prepare man to be at peace with himself and his neighbor and then his planet. This is the purpose of these teachings. When you know you can absorb anything you need from your soul to feed your physicality, it there a need to rob another nation or to enslave another person. In fact by enslaving another person you have enslaved your physicality to your

soul. Man needs to learn and teach a lot**. In the coming time we'll see huge conflicts within the structure of the European continent**, I have recently warned this and you'll see it. Because the other nations will not yield to be subordinate, and the other nations will not allow the Europeans to make arms to kill each other on the planet with their guns. the man of peace will not allow this. (:59). **The Europeans need to learn that there is no more time for gun manufacturing, then they'll become equal**. they don't see themselves because of the color the skin and the murders that were done ?? for them to be superior to the others. When they learn that they are equal to the others and have to be part of the same society without being any higher then the others, then we start the first steps towards world peace then many of them will become the messengers of peace. This is the time for it and the ?? evolution of it has come. **The start of the game comes very soon with the abolishment of the kingship in the kingdom of Belgium**. You'll understand very soon. There was a reason we were banished into Belgium, why all this had to be done, it's part of the life that I have accepted, and through it we'll show the mistakes of the past, and with one kingship going the rest will follow in the winter of the end of kingship. Because through my life the others will understand how wrong it is, and how much abuse there has been, and then the rest of humanity will very rapidly go into it. We'll see the end of the kingship through the understanding that nobody is a king to no one, and then those who call themselves king and abuse others will have to stand for their own terms. If I went for revenge on all the killing and abuse we had from the Belgium's, then I would make the mistakes of Moses. And that shall never be done, (1:01). not in my time under my watch. We'll mature them by them understanding how much they have done wrong to themselves and the others, and then through it we'll reach the maturity of the peace. the time has come for the religions to collectively fight each other, or to find a path of peace. ... when it's a financial damage that they can't take then they'll find a solution among the religions. ... as part of the predictions there will be no place on earth that man will make a single arrow to hunt not even an animal let alone another man. That will only come when the man is guaranteed that his hunger won't be there, shelter and the wealth that he can have and the pleasure of time to do what he likes to serve others. We are approaching this time. (1:03). **They have left me too long, too free, to write too much and publish and teach too much. Once the Fox News brings out the KF and these teachings become so available across the planet and promoted by those, you'll find that 99% of the human race will become peaceful in no time**, because they have been waiting for these teachings for centuries. Then who will they blame, those who control the Media, then we'll see the end of financial empires. The process is set ?? we can't so anything with it. As we have seen the new factories and research centers of the KF, up to now the wealth of nations has been by gold, now ?? bitcoins, but the KF stands on the strength of the knowledge. It's the only One Nation that guarantees its resources backed by science technology on the basis of peace. In a very short time your children will say, my father and grandfather was one of the first groups to join the KF work. They'll be proud ... this is where we are going. **I don't need to teach you about the Gans technology, but I'll still (1:05). teach you because you have to know how to elevate and add more to your soul. When we go back to physicality and the teaching of other things is to teach you how to add more to the arsenals of the soul, so our soul can survive in more dimensions in different parts of the U**. I am going camping and I am taking gear for every weather, it might snow, sunshine or raining, I carry

everything I need. This is the purpose of these teachings that you carry enough that you can manifest yourself across every position in the U. This is the beauty of it and then we can contribute and be part of the totality and not be isolated because you don't carry that bandwidth of the strength, if everybody else has a party in the physical dimension but I can't be there because I am just in the dimension of soul, I don't carry ?? to be at the party. I am not there, not because I am not invited, but because I am not dressed appropriately. This is the craving of the man in the space, why didn't I do more, to have more so I can participate in every party in every city and town where I have a friend, and that friend is part of the structure of my soul. the purpose of these teachings is to try and add to the structure of the soul in the dimension of physicality. Many of us have taken in plants and we understand the process of vegetation, of the process of photosynthesis. (1:07). where and how it happens. The same as what we explained last week in the passing of the energy through the lung, through the blood and then the connections to the soul. There is a mystery or misunderstanding in the world of the plants, maybe today's teaching will start a new cycle of understanding. If we look at the history of the education of the man in the physical dimension of the plants, **we have been told that the plants give oxygen during the day and absorb carbon at night. We explained it like how we breath air and the O goes through the wall of the lung into the blood. A fallacy, the most beautiful fallacy we all have excepted because of the lack of understanding. the same fallacy exists in what we call photosynthesis.** How do we explain photosynthesis in the world of science today. Rick will show it and then add to it that we understand it in a more correct way with the new knowledge of the science of the plasma, of the creation of the fields of the U. (1:09). Shows Wiki page on Photosynthesis, is a process used by plants and other organisms to convert light energy into chemical energy that can later be released to fuel the organisms activities .... for maintaining the O supplies in the earth's atmosphere ... and for most life on earth ...

(1:12). Video on Photosynthesis. (1:17). Mr. Keshe, let's look at the facts of the transfer of energy in the body. The physical process has been understood and explained this way. (1:18). but the real structure has not been understood. Now we understand how and why because we have systems and technologies that we can use. **If you run dynamic reactors, a fairly large dynamic core, let's say 200 to 500 grams, and you put it on a motor and fill it with Gans plasmas** as we showed a couple of years ago, and connect this to a power supply. He draws. (1:20). .. gas reactors connected to a power supply, current and voltage. For those who have done this have learned a lot about plasmas and what they call Photosynthesis. He draws a graph, take a 24 hour cycle and plot voltage and current, something very strange happens. If you go back to Einhooven where we showed reactors that produced more power during the night then the daytime. This should have been clear to a lot of you what it is and how Photosynthesis works. (1:22). Photosynthesis comes through primarily and only through the operation of MG fields of the planet and it has nothing to do with anything else. The rest of it is the process of conversion. **Why does photosynthesis happen in the dark, at night and not in the daytime? If you look at this voltage current chart you see something very strange, the voltage stands the same, but at night time the current dips to the lowest point at 12 PM and then picks back up at 12 AM. This is very strange for a motor that carries the same weight, it should be a straight line like the voltage, because we**

haven't changed anything. We see a drop in amperage between sunset to sunrise. (1:24). This is exactly what we showed at Einhooven, in the papers and the (reactors), that the power production increased 2 or 3 times during the night then in the daytime, why? If you look at graph A and B, as a scientist it tells you something very strange is happening, because by the law of physics, the power used is Ampere times volt equal power in units of watts. The power should be constant because we haven't increased weight to put pressure on it or we have reduced any other factors to increase the power. the only thing that changes is the day and night, which is the pressure of the sun (MG fields) and the pressure of Earth (MG fields), how come the power reduces at night time after the sunsets, we see the dip. I have asked one of the research centers to do this for themselves because this is important for space development on how you can lift from a planet. And what is the reason that they can't get their flight systems sorted out? Because they have to understand this concept. (1:26). **Why do the motors use less energy in the night? this means that there is less pressure on the motor so it uses less current, which means the Suns MG fields is withdrawn, and the Earth MG fields in the absence of the Sun it can push further up, and in pushing further up it takes weight off the motor, and off the plasma inside. The mystery is not the system, but this, the gas inside, because it's in a Pl condition, and in MG field strength, therefore the Earth's MG field strength touches it, so it has less weight to put pressure on the motor**. When you run a system the way I do, it is very significant because the body stays the same, during the daytime you go to 100 mA and at night it comes down to 85 - 87 mA, it's nearly a 20% difference. For the first time scientifically we show, **we created a Pl, (in the blue section) (1:28). which now has the intermediary of the Sun and the Earth's MG field**, and it's only a few, maybe 20 cm above the ground level. And then you change this **to a leaf of a plant which is dynamic**, then take it a step further (you should be a wizard in doing this by now) , **the stronger strength O, the weaker C, and the intermediary N, it's the MG field of the planet which dictates which one is taken by the intermediary and then which one is available to be released according to the MG field pressures**. This then changes everything we have seen in those video (photosynthesis), because in the videos we just saw released by the American Educational website, **they hide something which they don't understand**, but which we understand (1:30). It said, **a prootn is released and then an electron comes, but what are these prootns and electrons, what are they effected by and why do they get released. And why does the process go during the night time, because now when it's a Pl on its own, it is effected by the MG field strength**. Where do they come from when they get produced and how come an electron is released at a certain time of the pressure, the prootn and neutron comes from somewhere else. **You see the teaching is correct but what is not understood in the packages of misunderstanding of the man it is just added in**, but if you now put in the further understanding of the knowledge that the G field stren**g**th of the Earth, 85 -87, less MG field pressure, what does it do, **it pushes the lighter weight which is the C into the boundary of the N, and during the day it's the reverse, the pressure of the (C) makes the O available. Then something very interesting in the whole process, there is a word in these teachings that are added, it's called, Amino Acid, the H now you see, the game is played by the AA**. So in fact, all the, what I call, rubbish we heard, to a simple man like you who now understands the creation of AA, and understanding that **the whole atmosphere (1:32).**

around this system is AA based, now you see the interaction, he draws a circle around O, C, N, H, this is your CO2 Gans isn't it. **This is your CO2 box but you call it a lea**f. All that explanation, this and that and the mysteries, but to you who understand this it is solved. **Through the G field of the Earth you change the G field strength in the center which is N. Adding more the G field to the C with the N as a balance it makes it available, that in the process of the reversal when there is more pressure of the time, which is the daylight to be O**. If we understand this process exactly then for the first time we understand for example **why we have 3 vegetation lines in the mountain ranges. It's the MG field strengths at a given point** in the understanding of the new science that allows different strength fields to be created (on the mountain). At this point (above the tree line) there is no vegetation because we don't have the AA connections for vegetation to exist, we see the tree line. This now makes sense and fits best to what they call photosynthesis, what we call plasma technology. The reality is that now we understand more and the (1:34). fallacy of all these pictures that have been made become nonsense, because what they didn't understand they just put words in. There is nothing wrong with that video, but now we understand more of the reality. **This becomes important for us in deep space in creation of the AA of the place of existence, what factors come from the planet where we want to manifest ourselves, which part of the structure of the bandwidth of the elements we carry within our soul, that it needs to come into operation that it gives us physicality. Without the AA there is no physicality on this planet as life**. Then in different parts of deep space our scientists who still **want to travel in the matter state, in what we call Spaceships, in understanding this and creating the 2 division sections in part of the fields allows them to create anything that is needed by the body of the man**. It's the job of those who started working this Monday in the KF research Centers for interaction of the fields of the matter of the body of the man. ... I thank all of you who set this up. **This teaching is important and targeted for you, please understand it. (1:36). When I teach one I teach everyone so that the totality understands**. **If you have a doubt and don't understand you can go back and make one of those original reactors** that you put on those fan motors, fill with different Gans' and note the difference in mille-amperes, and how it drops between night and daytime, and that you haven't changed any other conditions, except the fields of the Sun which goes through the walls of the house through everything, and the fields of the Earth which comes up through ground level up. This changes the whole structure .. broken up. ... He draws on white board. There is a very important part to this and it goes back to the original teachings that we did, (1:38). We said **the AA, he draws a Star Formation (SF), the base reactors, C, N, O, and always put H on top, start with C then go to N and then to O. If you look at the balance of the field forces you notice something very strange**, it goes back to the other picture I just drew. It goes back to G and M fields on the structure of the leaves and plants and what has become the fallacy of photosynthesis. C is 12, N is 14, and O is 16. The **strongest 16 or O tries to feed the C to bring it to its own strength, the N feeds the C to bring the both into balance, at the same time you have O of 16 trying to feed N to bring it up to its own energy value, in this you have created a dynamic flow**. He draws a counterclockwise arrow around it, this is how it become the base G. But at the same time you also have the opposite base G (draws arrow clockwise). (1:40). You have 12, 14 , 16, **two trying to feed and the balance what comes up, is very little. which in**

the isotopes of the total C, O, N which we have a connection line, feeds the G needs of H, that in turn, as the receiver of the equal strength of itself, it becomes the feeder and balancer to the others (draws half circles coming down from the H to the base reactors), and because it has slightly more, the H becomes the energy source, as we see with CH3 in sugar. Anything on this planet that has an energy base in connected to the presence of the H. The effect of the MG fields of the Sun and the planet dictates and changes everything as they retract or they push in. This is the photosynthesis, of how we understand it, of how it works. If you take the pressure out, (1:42). and this is one of the reasons everyone of us goes to the shop and buys **fertilizer, N, because as long as we can keep this guy (N) these other guys (C & O) will do the work according to the structure of the pressures of the MG field of the planet. For the first time we understand the operation and the need of N in the plants. It's the balancer of it, when there is not enough of it (N) the other 2 can't operate properly, then the G field of the planet can't interact correctly for them to go, this is why even the CO2 you add to the water of the plants changes them to grow more, because you create the condition of the G field of the planet which is providing more field forces for the C balance** to be in operation that the N itself becomes irrelevant and then the plant absorbs everything which balances all the AA pressures. Now instead of relying on the growth only by N which is the present time work of the fertilizer, now every element of the C, N , H is there to feed so the plant grows faster. Now you have 3 mothers feeding the same child (1:44). not just 1, depending on the time and the place. If you can create it at the same time as the plants, **you create the (plasmatic) environment of the plant**, you are always in balance, more or less. In the future at the Research Centers the people who deal with vegetation and life, **they'll measure and see a more balanced power through the motors, meaning not much difference in amperage between the day and the night**. This is the new and correct way to understand the process, then it changes the **same thing for the fish in the sea, and the lion in the jungles, because we learn to work through the essence of the creation which is the AA itself**, and in that process of understanding we need to bring all the factors. The lady in the video said, 'the prootn comes and goes and then there is an electron', what is the game of the prootn, or of the O, electron or prootn or whatever. **These are all plasmas and because they haven't understood this process, then these plasmas creates MG pressure and gives it a new position, and it's that position that creates a new direction where the O is absorbed taken 2, or the C is rejected because of, and visa versa.** Then we can understand why it has been a mystery. For years they have been **telling us not to sleep under the trees at night, (1:46). because the C intake is very high**, because the MG field creates that structure that you create in your CO2 Box, which with **the presence of the N creates the same MG fields plus the G field of the Earth that calls in for the energy of the C to be enforcing the condition on the N inside, which at that level there is no need, no strength for the O to be as the field transfer available. It goes back again that no C ever crosses the boundary of the leaf. The pressure on the N through the MG field, which is in the leaf creates a condition of transfer of energy of C as a matter state through the Pl, through the leaf, and then the visa versa during the daytime**. No Carbon ever crosses the boundary of the leaf of the plant. The same as the lung of the man, the way we breath and we explained the conversion of the energy through the lung the same process happens here with the leaf. Don't forget that you are looking by habit as

the leaf, (1:48). the same as what you have done with the mistake of physicality. He draws the leaf in 3D, **the internal environment in the leaf is in MG field Gans state and not in the matter state, even though you have the skin of the plants, the skin of the leaf is (like) the skin of the body of the man holding the Pl of the Gans of the body of the element which is the content inside the leaf**. This is why if you understand even deeper, **the (leaf) is made of AA (COHN) then you'll understand why plants have emotion and if we can join in the MG field of them we can communicate with them.** Because they are made of the same AA, from the same environment that you and me and everything else is created from. Now the life and the creation in the dimension of the "vertical people" has different meaning if you understand this fully. **Then if at planet Zeus you decide you want to be a vertical people, not to have to move but have everything come to you then you use the environmental MG pressure, or you become a horizontal people and you move about to collect more of different things** and not one. You become the traveler on the jet plane (1:50). in different directions from China to US to down in South America, or you decide that I am a local guy and I am not moving from the village but I'll take everything that comes in the village, and become what we call the vertical people. Now understanding the science of the true process, **photosynthesis goes through the window, doesn't it. Because this environment that you have created you have all the elements, the N, C, H that you don't even need to absorb water from the ground , because in that process of what you call photosynthesis, what we call plasma interaction you create the MG field of the water**. It's the same as what the lung does, **you produce your own moisture**. this is important for governments like the Chinese who are worrying about the deserts moving towards Beijing. If they understand this they can create a condition where vegetation can grow without any need for anything (water), and by rooting to stop the movement of the deserts at the boundaries of Beijing, but this needs a lot of understanding. You create this condition, you don't plant plants which are suiting the MG fields of the environment like as we see the tree line in the mountains, but a vegetation that fits into this environment and they'll grow themselves. **You have to work in harmony with the environment. (1:52). If you try to force it then you have to fight with the environment but if you create a condition that uses the true MG field** of any destination be it the desert, sea, or planet Zeus, you can live, create a condition that is what you need for the time you need it. **The creation of the deserts on this planet is done because of the angle of the planet. the planet starts from the north and rotates down and it goes through that phase of deserts and in coming down to the equator**, and the plants at the equator ?? and it turns over. Go back to **the history of let's say the UK, some time ago it used to be part of a desert and in another time it was at the bottom on the sea, due to the angle of the rotation of the planet in which everything rotates, it takes billions of years but it comes out.** Geologists can tell you about the evidence of this and exactly what it has been. **It takes billions of years but what is created in the North Pole gradually becomes part of the equator** ?? . And we can't stop this process, but as it goes through it, it shows why we can't create, or we don't see it such vegetation in the desert area. Leave it to me and I'll make the deserts to be the oysters, green as the jungles of the Amazon, because I understand why, but then this brings another problem for us (1:54**). If we do such a thing then we'll create a dynamic flow on the surface of the planet for revolution and the rotation of the M field of the matters we call air, we**

need the hot and cold and the temperature difference to create this dynamic atmosphere that it guarantees life, and this planet has gotten used to it, and has adjusted itself in the evolution as this is happening slowly it matches up itself. As I said before without the dust from the deserts of Central Africa there would be no life, or very limited life in the Atlantic Ocean, because **the red dust from the desert becomes the beginning of life when it lands in the oceans, millions of tons of it.** If we stop this then what happens to the food that the fish need and that man relies on so much. We have become an integrated system we can't change it, one is depending on the other. But in places we can create small deviations, but **not what the Israelis did in the Sinai desert, they tarmac it (asphalt) and put a new soil on it and then orange trees, then when they couldn't control it the whole thing goes collapse**. you can read about the Jaffa Oranges that the Israelis created in the Sinai desert after the 6 day war, ... but when you can't sustain it anymore then it goes back (to desert). But you can create conditions to sustain life in quarters of the Beijing. The deserts that are moving towards Beijing. (1:56). If you understand this **you can do the same anywhere in the U, but you have to understand which way the fields are moving**. We look into the deep space and we see what we call the darkness, but in time when man becomes educated and creates new tools, we'll see the same thing, **the M fields flowing in one direction and then later on they flow in another direction, the same process as we have with day and night, photosynthesis as you call it field flow, the same thing happens in the U but on a larger scale**. In the dimensions of **the pictures coming from NASA** from their telescopes, we see the magnetic fields, dimensions and environments where the systems and **galaxies are totally rotating in different directions in opposition to what is going on in the rest of that area, why? One is the direction of flow and the other is the interaction of other universes at that point**. There is a lot to learn, but we have to understand the basics of the interaction of the fields. If you look at the reactor we showed in-between that the amperage changes according to the time, this gives you a lot of knowledge in how you can create a leaf ?? and motion from any space. Those in the space research, I asked you a couple of weeks ago to run such a test to understand, because **if you can create a MG field using the earth's MG field that it matches then you don't need to ?? burn anything (fuel), (1:58). the field of the earth like a wind blows you into the air but because you have a field strength within the reactors that you have created, then you dictate the strength of that wind, do you want to float, or block and go as fast as you like**. In the new science of space technology you don't need to burn the fuel, because **by adjusting the field strength you lift, and you dictate how** and where to, and how to blow in the winds of the environment. We see this clearly in what Tom Sellers did in the Caribbean**, how come the rest of the area is flattened by hurricane but not Tom's mother's house, because the MG field created by the Gans' which he has sprayed on the plants and more or less the whole environment with, and not just a plant. They have created a condition that they do not follow or interact with the field of the environment, the wind has no strength to blow through it because they are above it. It's what we call MG field shielding, which comes when you have a strength higher then the environment**, it's like a bullet proof (shield) even though **some wind might go through**. Now the whole science with the experiments that we have done makes sense. There is no mystery as Tom was showing us in the Tuesday teachings of the EC and UC what he did to his mother's house and why it's like an oasis.

(2:00). Now **understanding this and even the photosynthesis is field strength interaction** and we understand this more. **This is part of the total structure bringing the physical teaching of the matter state, then in the fields, and then in the soul. The plant has a soul because it interacts, it has a dynamic soul with a center line**. Why can we cut part of a tree, its limbs, leaves, and branches and it still lives and it gives more, it's a giver, because now it has directionalized its field, this is the beauty with the vertical people, because they have directionalized the stem and trunk of the tree. The trunk of the tree is from I release my energy or whatever I accept collectively through my soul. This is why the trees have different shape and structure, they decide from their soul, from inside what environment I cover. I can go because of the field strength I receive, all the way up and become a very tall tree, or I have a composition that allows me not more the 10 cm field effect, I become a herb or shrub**. I create a condition according to the central point, that at certain points I need energy points for myself (2:02). that at certain points I can balance with the environment**, call them the ?? The pictures are from Tom where the hurricanes went through the Caribbean's and flattened everything but nothing happened to them. Rick shows the video. You see flattened trees just a few hundred meters away. The Gans came in and changed the environment and created this condition, it's not that everything just happened here. Tom watered the plants with CO2 Gans'. .. this is **an oasis in the center of a disaster. ... this brings home everything we just have been teaching about, because we create a condition** that ... this is huge live research for world scientists. Now does photosynthesis exist the way we learned it or do we have to learn a new science in addition to the existing one, because if we say everything has been wrong up to now then we become hypocrites of the past. (2:05). We can add this knowledge to what we know now to complete it. That is the difference in the desert and what has been created by the hurricane**. Every plant, leaf has created a physical condition, even the structure of the building is protected, part of it, and this is a few days after and the whole island has been cleaned out. KF technology is the only solution for mankind to overcome these problem**s, the other half is understanding the totality and what we call the problems we have created for ourselves. We have to understand the true knowledge that G field strength is not just as we said with the hypocrisy that it passes their life, but that it passes the whole environment of a life. Rick add this video at the end, **because many world governments watch these teachings then they can see the real effect of the problem**. This is a big teachings for the governments in Africa and Asia. the conditions have to be understood, now what I explained about photosynthesis makes sense **that in creating new environmental conditions with the presence of the Gans' we influence the environment, we decide where we don't interfere the G field of the earth to interact with the plants in the Gans state of the leaf or of a branch or whatever, in respect to the suns MG field pressures**. Would anybody like to see this across all the islands of Caribbean. If the governments, like the American government decide to spray the islands with the CO2 Gans, they'll have more effect then what they did with Agent Orange in Vietnam, the beauty of the light of the Gans is much better then the poison. (2:08). This is why we need to become One Nation, then let the hurricanes blow across the Caribbean's, nobody cares, the buildings will still be there because the fields created by the plants, CO2 are protected .. This is what the world governments have to see, the need for becoming One Nation. Not killing scientists at the dinner table, or poisoning me, or the guy who made

the stems, and all by one misguided bunch of people who do not even deserve to be a part of humanity. **The scientist who bring the changes have to be understood and supported and not to be killed and have their knowledge be put away**. It is all done under one name and nation, and this will be stopped in the coming time. When we said the scientists are being killed by Belgium's everybody laughed, .. **The scientists are the messenger of the knowledge of physicality as were the prophets of what became the misguided STM**. (2:10). Every single one of us is suffering because it. We discovered something new ... every little bit adds to ... show this video to your governments. Why don't we spray the islands, we don't need much, we don't need to bring reactors and ??? you create an environment and see what happens next year and the year after. **This process will stay with the island for years to come**. We do pest control, this will create the conditions of hurricane control but leaving the rest of what is needed for the changes the hurricanes bring for the condition of life, but isolate places where it touches humanity. (2:12). This is the fallacy of photosynthesis, it doesn't exist, but because nobody understands you can create any rubbish and people believe, it has become a religion, misguiding people and letting them believe that they are correct. But in a way **we didn't know any more. We didn't know until 2 - 3 weeks ago how much Moses lied to us and he destroyed what he didn't want to be known by us. Now we now the, what I call enlightenment, the same is with this**. What you call photosynthesis is in fact plasma synthesis, the plasma which interacts, now we understand the operation of the Gans and the internal operation of the leave. **If you look at the color of a leaf the color is slightly different on each side because on the side where you have the central line it creates different fields which matches the C and on the other side it matches the O. It absorbs and releases according to the field strength**. It's very much like you all understand, you put a plate of Cu and Zn and then you brought a plate of Fe in, or one of galvanized or something else, you withdraw it and you still get CO2, if you add to it a new Nano coating and you get a different material. Especially for those of you in the factories (2:14). ... and **those in Gans production systems, as we use 3 plates you have to watch because if the field strength on one side of the plate, or the third plate is different on the other side, on one side you produce CO2 and the other part ZnO2, or you might produce CuO2. KF manufacturing system control this is something you have to watch**, the electric current between the plates has to be, even though we use the same plate, otherwise you'll huge amounts of mixtures of other things inside. This is part of the understanding, so **one side of your plate is creating the condition for, what we call photosynthesis of the C, while the other side is creating photosynthesis for the O, one side of the plate is day operation and the other side night operation**. In a control system when you are setting up, **make sure you understand the separation of the 2 sides of the plate, and if it can't be controlled it has to be 2 plates only**. This is the beauty of how we use public teachings to our scientists who work in different part of the sections, as you saw the space, food, materials, factories and research development. KF has become a global structure and will influence the life of every man and living thing on this planet because we respect and understand how to respect each others physicality. (2:16). Any questions. **I would like to thank Tom Sellers for the beautiful job he's done and ask him to become head of the KF Rescue worldwide** because what he has done in the Caribbean's is needed, we should have the resources. And we don't need to every year worry how we are going to feed them, instead we can change the

environment of the Caribbean and these islands that no hurricane can touch. Q: Klaus, I worked may years with the fields of minerals, and we see the possibility to help the olive trees with this ??Aquarium effect, if Mr. Keshe contact me, with the Gans and crystal structure of fluids and all the trees will be healthy. (2:18). **Yes, there is a big problem in South Italy where millions of olive trees are effected. When we offered the solution to the Italian government authorities they were not interested because the money made out of seeing the olive trees destroyed, for their private accounts** are much more important then the saving of the trees. There is a huge amount of money given by EU to sort this problem out, but the problem sits. We have worked with people at the highest level and they have been told not to do anything because there is a lot of money. It's like the bridges in Italy that go nowhere but the EU has already paid for the work. I think the work of the EUY has to change to one of performance index payment. ... (2:20). They created a 10 km gap in the South to stop the disease but it can be stopped with a few thousand dollars. I have done tests on it and it works ... you can do it with any diseased tree anywhere in the world and the beauty of it is that you don't kill the animal, you create a condition where it's not suitable for the pest, they move to somewhere else if they can find some place to move into. **It is creating a condition that the life doesn't exist, but at the same time it is a double edged knife that we have to be very careful with, it cuts on both sides. We create a new environment, do we invite new pests with the new condition, which could be more harmful or better for the plant. The life on this planet is a very complicated composite. Every single cell in the body is created under different conditions of MG field ?? and we have trillions of cells in our body, so there are trillions of different conditions we have to understand**. (2;22). We can't say everything we do is 100% correct and we have to understand that our **actions have consequences and is it good for the tree or are we just trying to enforce (our way) while being blind** to the others, or have we created a condition where another life is invited to take nest in the tree. The more correct we are ... in the teachings and in the testaments, if we judge our own conduct correctly we don't need anybody else to judge us. **We have solutions but they should not become a problem for another creation, or create a condition for another new creation**, then we conduct ourselves correct. In the work of the KF we have to have a view of 360 degrees considering everything, and not to become narrow minded and glorifying ourselves and become like the other hypocrites. **What do we create by changing, okay the tree can survive much better, but do we create problems for the neighbors in the next fields, or for the plant to become the center for a virus for the plant rather** then just being a worm. **We have not understood that plants also get viruses and we have to understand how we keep the growth of the plant, is in the AA growth of the plant, the H moves up in elevating itself in the Pl field strength (2:24). that creates a condition for the plant to grow vertically. Every tip on the leaf of a mint has strength M field connection that it adds to itself, this is why herbs are different, they absorb more because of the total variation**, every single tip on the little nudge on the edge of the mint leave creates its own specific condition to absorb ?? more from the earth. **A collection of it makes the leaf of a mint**. And then the collection of it in what we call a sweet tree creates the smell of mint, **when we use the CO2 to feed the mint would the odor become stronger, or would the strength of the mint now be good for a certain disease, because now it's not a mint anymore**, it's elevated to a different

strength and it can match something else. We have to be open, understand and be correct. It goes back to the 12 and now 24 Commandments, be correct and not be self centered and judge what I do is correct**. Look at the balance of the fields and to whose benefit is it and is the benefit correct for everyone in the totality**. (2:26). Do we make a decision to spray all the islands with different combinations of Gans' so that they can withstand a hurricane but would that create a new condition for the citizens of the islands, would they become calmer, would they need to gather more because now they become part of the structure of the environment, they are fed and calm. One KF follower said, do you know why the whites attack the different continents etc. it's because we don't have enough food to guarantee so we always worry about the next food and don't have enough to guarantee the survival so we invade other places. People are calm, they can always go up a tree and get some fruit they don't need to worry. ... we have to see that the consequences of the new technology that it effects everyone correctly and makes everyone happy correctly. ... (2:28). EU distribution of the wealth has to be performance index and not prepayment to rob. ... we see the same thing with American agriculture ... Rick talks about the Italian factory making the bombs falling in Yemen to convert it to KF technology, keep people employed ... (2:30). There are a lot of politics involved in the bomb and gun factories in Italia and the KF is highly involved to seeing the end of this. We don't disclose anymore what we are doing, as you know we travel the length and breadth of this planet to make sure of it. ... the bomb making in the Saudi subcontinent has to do with the religious financing, financed through Vatican we have seen the bank transfers and are fully aware of it. Something very interesting, go back 3 weeks ago when we exposed North Korea and who was behind it. (2:32). and just look at the news in the past 2 weeks, suddenly out of nowhere N Korea has opened peace talks with South Korea, out of nowhere. This is a camouflage, it's a plan for a bigger plan, but we still see it and we are very effective in the political scene through the correct conduct. .. it's from exposure of whose involved that we did before Christmas. **They thought is was hidden and now it isn't. Now there is a new game in town to try and cover up while still carrying on the same**. We are heavily involved in opening structures to create peace but with it we have to show who is behind it and it's possible. **As long as the Jewish and Catholic worlds keep Islamic nations at each others throat, the more they can blame the others to collect more**. I will give you the statistics sometime in the future how much each person is counted by the Catholic Church, ?? each ?? as a financial entity, it will amaze you ... **these bombs are financed by the Catholics, and this war in Middle East is planned and the stupid people because they receive money in their bank account, are following it. This is not a war between Shias and Sunnis but it is used by Vatican (2:34). and Jerusalem to create war** between them to sell more and then to create a new dimension of control. We are working very hard to elevate their souls because if you punish them then they start something else, but by elevating them and controlling their understanding you can stop it. And this is what we are doing. It's the job of the UC and especially the EC to elevate the soul of these people. We are fully aware of the arms production in all the European nations. The problem is when one side makes (a technological advance) the others feel they have to catch up to them, so it's a double waste of energy for other nations trying to counterbalance what they made to destroy. 90% of the arms production in electrical etc are deterrents and trying to have a better system. If you can have a better system and save

why do you need to waste money on war, the time has come to be peaceful and the technology we bring and the nations that can bring this, we are talking to and working with, and they can, we'll see in the coming time the change will come. People are getting fed up of creating to kill ... The intelligence of the man has to be used for the advancement and benefit of man, this is the whole purpose of the KF. I enjoyed to received the message that the new research center has started (2:36). and they are already working. **Q: John says, you must be up on what Viktor Schauberger's work, that when a tree is cut with a Cu axe it re-grows, but if you use a steel axe it will never grow again**, this is why he made a factory to produce tools made out of Cu. Keshe: There is an old saying in Iran (2:38). if you want to end the life of a tree hammer it with a Cu nail. It depends on what and how fast is the cutting, I looked into this some time ago. the CuO2 becomes part of the Gans of the tree and it changes its composition, but on the other side the Cu is part of the structure of the tree trunk which doesn't mix with it. The reason it kills it when you use a iron axe is because it's exactly what you did in the CO2 Box when you added a galvanized plate to it, you started creating blood. The blood doesn't come from the Zn alone, the composition of the Zn and other materials covering the Fe gives it the condition of CO2, when Fe is exposed on its own it leads to the creation of the blood. As long as it is CH3 it stays orange-ish color, but when the metal is exposed it becomes the red color of blood, ? on the spot. **When you cut the tree with the steel you change the composition of the environment to one of hemoglobin, which is not part of the photosynthesis of the tree**. I have done a lot of research on this in the past. Now we understand that trees are made of AA, when you cut it with steel you create the condition of the blood flow (2:40). as a hemoglobin, which doesn't fit into the structure of the plant and that is why it dies. You put blood on it. **Where Cu is part of the structure of the plant, even though there is some Fe within the structure of some plants anyway, but you increase the field amount of it**. When you cut understand the whole process, when you cut you create a heat, if you remember it's like the Chinese wok and how without knowing it you created N technology. When you trim a tree with a steel cutter on the edge and you see it dies, how it changes the color on the end of the cut, **when you cut a stem you create a heat condition in which now you have N particles of the steel with the AA and create a hemoglobin condition that doesn't fit into the life of a plant** which is different. I carry the knowledge of the U, it's just to understand how to ?? the correct way, it doesn't matter where in the U you are. **Q: How to open our soul or adjust it so we can accept and interact with the fields** of the U and teach our physicality to accept this process? **Our soul already has access to it, we have denied it through our emotion, through our physicality**. (2:42). As simple as that. We are always waiting for physical confirmation but our soul is already connected to the UC. It's how we can get our physicality, because we are so physical to understand, accept and live within its domain. **Don't think that just because you put the soul around some cells that you isolated it to itself, the STM or the brain through its absorption and in a way through attraction and repulsion absorbs energy from the U, whereas the physicality, the body needs the dimension of the Inertia matter state of the planet**. Our soul doesn't need to be fed **but it needs the tuning from the physical part of the soul that it can interact with** it. It's a leech which carries around, which found the compromise for it to exist, but at the same time it needs to tune itself. Q: (C 12, N 14, O 16) **Is the heart 14 and the two lungs 12 and 16,** as they are different in size so the flow

is towards the smaller lung? **Heart is 16, ... in a way if you look at it one way, yes it's the N but in reality (2:44). it creates the totality of the fields and the balance side comes up from the 2 sides. The left lung connects to one part of the brain which creates and effects the absorption part of the brain, this is why we are very emotional as part of the work of it. In the left side of the brain we become a giver it's M**, you give your right hand (handshake) which is connected to the left side of brain, the same thing goes for the inside construction of the Heart and the lung. **The heart plays 2 games, 1 as N but at the same time because of the strength of it, it works at the higher level of the O**. It has to be able to be a balancer and at the same time play the conditions of the balancing of N and O to feed the surplus to the STM. If you look at it one way yes it is, but the other way it's the O because it carries the total much higher strength levels, which ?? feed that dynamism. **Q: Is part of that dependent on whether we are breathing in or out? Of course, why do we feel good when we walk among vegetation** and in parks, we receive a higher order which is an O aura. (2:46). This is **why we have different behavior if we live in different environments, means height and weight from the central core of the planet**, that's why people who live in the mountains have such a behavior and people who live in the valleys have a different behavior because we are part of it, we just ?? talk about photosynthesis, plants and leaves, go back a couple teachings, **we are effected by the fields of the planet**, I explained that in the recent teachings. Why do we feel tired at night and want to sleep, the statistics given by the police is that more **crime happens in the early hours of the morning** because it's exactly as we showed in the graphs that is the time of the change from one to another, now you have to change accordingly, so we are effected by this, why do we feel tired a t a certain time, we talked about the sleeping months in S Italy, this is all part of it, it isn't just photosynthesis of the plants, we are part of it, **we are a bigger Gans container than a leaf**. Q: What is the relationship between the soul of the physicality and the non-physical soul? **The soul of physicality is connected to one matter element Inertia collection, (2:48). whereas our soul is a total collection of all the elements**. One is the Central Bank and the other a branch and they all send their money back to the Central Bank to be kept if you look at it that way. **The biggest surprise for man will come when we go into space that we realize that we have more then we thought, and we'll thank the Earth for giving us so much** that we can survive throughout the U**. Q: In our time in physicality we spend time learning skills that might be useless in the life of the soul work, how to know what skill and knowledge to develop** and how to use our time and what to develop? **First of all skill is a knowledge gaining condition for the elevation of the STM and a farmers skill is for his physical matter state and an engineer the same, it doesn't change anything in their soul, it elevates for them to understand more of what they are, but it is literally irrelevant because it adds to one part and not the other, but remember something very essential,** (2:50). **we carry all the knowledge of the past from our ancestor in our RNA or in the soul of the physicality**. So we have the knowledge because we carry the experience but that is for our physical part, the emotion, as we said there are no carpenters in the space. **What we gain from it, the joy, the happiness, that we serve, we elevate that we create something that our own physicality or the others can live off, in balance, then we'll see the difference. This is part of our misguided understanding that we have to be a PhD or a doctor to have a higher soul**. I promise you a farmer living in the jungle and

who sees no one but has chosen to live simply will probably have a much higher soul, then the man who is a professor and PhD because he had to cheat a lot, but the farmer negotiates with the trees and plants and understands them and lives in harmony. It goes back to the question of Hitler or Mandela. **Q: Why are the others in the UC amazed at us and why are we a beautiful accident, what was the accident?** The creation of the Earth was the accident. (2:52). the way it has turned out. And why we are the puzzle is that how come these people have everything and they don't see it, how much they are ignorant to their own creation**. Q: Why is the Earth an accident? It was just created coincidental to get the direction of rotation**. There is an interesting question I raised for some scientists but they can't answer it. We look at the long term and you look at the moment, if our annual time ??? in Iran we celebrate ?? at a certain time. **Was this rotation of the earth around the sun or 365 days and so many seconds, 10 million years ago or did it have more seconds to it?** We don't have enough history to have collected this data, but there is a way you can do it and it will show that our annual time is reducing by so much every so many million years, **because the closer we come, getting pulled in by the sun, the shorter in the circumference to rotate, then the other effect is that because of the interaction of the fields of this planet, would the 24 hours be 24 or can you tune it to 24, or in 1 or 2 million years it will be 23 hours and 59 minutes. (2:54). then it throws everything out that we set things up for**. The accident means that the conditions have created it, it wasn't preplanned and so it is what it is and we have to accept and live with it. **As the dinosaurs don't exist because we are closer to the sun. The dinosaurs and big trees go back to billions of years because of the same thing I explained by the photosynthesis, the tree line is an indication of the height of the animals that can exist and as the pressures from the MG fields becomes greater it doesn't allow for taller trees and animals. It is as simple as that. Our position, height, intelligence, and whatever is dependent of the interaction of the fields of this planet and the sun.** The sooner we understand this the sooner we find new technology and dimensions in life. KF is developing very fast in different aspects. Please understand the teachings of today as I said they are becoming very intense and direct because in 2 weeks it is exactly 4 years that we started the open teachings, non-stop. The governments have started taking notice, the problem is we could never get the publicity but the negative publicity has been very good for us. We are still in the nursery of the knowledge of the U and to get into the first class there is a lot more we need to learn, especially listen to the teachings 2 weeks before Christmas and now, we have taken a new course and we are entering into space technology in a very rapid way ... some of it they don't see and I don't teach it because it has to be understood by them. try to comprehend the essence of the knowledge and not copy cat and we'll progress very rapidly.
(2:58). Video about the Caribbean plasma shielding during a hurricane.
END

207th Knowledge Seekers Workshop Jan 18 2018

(The plants or vertical people use the gaseous part of the planet and the mineral or part just as humans do, Man heavily consumes vegetation and part of their soul becomes part of us, The story of Adam and Eve is man accepting part of the planet and getting attached

to physicality, When we breath we absorb huge amounts of protein through the gases and through the salts in the liquid in the lungs they become Amino Acids and source of food and elevation of the soul, plants do the same through the salt content in the Gans of the leaves, We have a composite soul through the diversity of the fields we absorb but plants have a mono soul and are more resilient and can live thousands of years, We learned about photosynthesis and photons but we find plants in the darkest cave or bottom of sea so life doesn't depend on the light of the sun but rather on the MG fields of the sun and earth, The leaf works like the CO2 Box and converts the MG fields of earth and sun into matter state of O and C, This is the fundamental secret of creation needed for space travel, A simple leaf shows us how through the MG field pressure it can absorb matter and convert it into a Gans, into energy, and by a strength push change of another field in the same environment can create matter, How to make Tritium and using the top 4th reactor change any fuel, As we got AA on top of CO2 Box the leaf also gets AA on top and because it's of the same strength as internal it absorbs through, The tree line reflects the distance from the center, Why leaves turn colors in the fall and drop, There is life within the magma of this planet, In space we are not looking for life with arms and legs but for life that has the essence of the soul existence, For the space lab you don't need to keep on creating fuel you can change from H, to Deuterium to Tritium and create anything you need in space, We need to learn how to absorb the huge amount of fields in the factories that produce Nano and Gans and this will supply the space lab, For flight the gas reactors and the Beads give full spectrum for matter creation, The vertical people have emotion, If I am not mature enough to go by myself I can join in on a spaceship and then if I want to go off on my own for 1,000 years I can and then join back to the status quo of life, The difference between matter and Gans state, The body is totally in Gans state, When you elevate the soul all the souls get elevated and not just the man even the animals will understand the change, Elevation of the soul is access to higher strength like on the spiral and it comes through giving to elevate the others, What fate is, It doesn't exist we decide from our soul and the religious people have fooled us, About forgiveness, When you pray you transfer energy from the physicality to the soul and later when you need it you withdraw back from the soul you did it yourself, During sleep our soul travels in other dimensions, ,)

(:12). (connection not very good ... broken)
(:20).
(:22). (break in connection ...) (:29). ... the body of the man needs both the atmospheric condition and matter content of the planet the same thing happens with the tree. 30 00
(:31) break (:32) Dr. Gtoawa reads Constitution.
(:58). Dr. Keshe starts from the beginning again. Up to now we have been explaining the body of the man that it uses both the air and the mineral, or what we call the solid state part of the planet. **For the first time we understand that it is the same with the "vertical people", they also use the gaseous part and the mineral or physical part of the planet, and as humans we always looked to our own benefit and thought that, that was it, plants breath, take in C and release O**, but in fact and in reality this is part of their process in absorbing from the gaseous part. They don't do it for us to create O,

they do it as part of the process to be able to absorb energy for their part of life, and when the condition between the atmospheric and the ground, **what they have chosen as their legs, or what we call their roots**, is in sequence and in balance, then that dictates the state and what type of plants, or trees or what we call the vertical being may become. It's an entity life and it's the same as the man, it has a soul, a dimension to it. **We understand more now that the root is gathering the energies from the physical part of the planet and that is because they can't move to have the diversity of the air they breath or the minerals (1:00). or what they take from the storage on the physical side of the planet, so they become limited, restricted to what they can have, as far as that root can go** and how much that root can build and dig into the ground they are in, or they can attach themselves to another entity to be a part of. It is that same as what we do, rely on the air the gaseous part, and then the matter part to eat as a physical food, so do the plants. Last week I explained how the plants absorb energy, the why and how. **There is a need to explain further so we can learn more about this beautiful structure which they have chosen to live, they work through this process, that we have understood more through the teachings and how they actually elevate themselves and become a mono-entity, and at the time of the death of the plants in different shapes or sizes or forms, or all vegetations which man consumes, we negotiate physicality and part of the soul of the plant with us, as humans we consume heavily vegetation, fruits, roots and in that process, or cycle our body has learned to transform and accept part of the soul of the plants** and trees, because it becomes part of us. It's not just that we eat a part of an herb or an apple and that it has nothing to do with us. (1:02). In the old time we were told that **Eve gave the apple to Adam and that is where the problem started, in reality in that process man got attached to the Earth, the apple was the attachment to the physicality of this planet, man had to take something from the earth for the first time to be part of it, and that became the shackle of the man to this planet**. The apple what they say was the sin was connecting the physicality to the STM, this is what we have to understand in the meaning. In this process how a plant or tree absorbs energy is what we call photosynthesis, is us again trying to make ourselves important that they release O and we understand it. Bur what is and how does and the process happen. **At night when the MG field of the planet is higher because the pressure of the sun's MG field has withdrawn because we move away from it and it is less, then the whole process of the plants living structure for absorbing energy, which in that process absorbs protein as well from the environment to feed itself, because we do the same, when we breath in we absorb huge amounts of protein into our lungs, (1:04). partially as a mixture of gases and partially when they reach inside our lung the condition is created through the salt and the liquid in our lung that they automatically become AA, they become a source of food, of elevation of STM through the lung**. The plants also do this but we never understood this and it's important to understand that **what we have is a composite soul, because we absorb a diversity of the fields. Plants however have a much simpler soul and for that they are very resilient and can live through, that which we can't live through. Trees live for 1 or 2,000 years**, some 5,000 years, and some plants only last a few months and others a few years. We have to understand the trees and plants their path of existence how it works so that we can learn how to live in deep space. **He draws the walls of the leaf a cross section, on the bottom we have CO2 and the top O. (1:06). Underneath it we have**

another process which is MG fields of the Earth and above it we have MG fields of the Sun. Up to now it was hard for us to understand the process but with the knowledge we have gained we know **that between the leaf's sides there is a Gans which is a diversity of different types of salts and liquid and according to the content of the salt, it dictates what that leaf, what level strength of C will convert, will accept, then the MG fields of the earth or sun are the composite plate changer**. If you pick up a leaf of a tree or a plant you'll notice that there is a slight color difference between the one below and the one above, they are not the same color. They are in a way not porous, (1:08). **but Nana coated.** If we have understood what was in **our CO2 Box, with a Cu and Zn plate where in that environment we created a condition of MG field strength of the C that it lead to the absorption of C and a mixture with the water created the Gans of CO2. This is exactly what happens here**. Plants have triggered a beautiful system to use the condition of the planet, this very tricky, it is a beautiful way that they have worked. Last week on the Photosynthesis video they said that **a photon comes in and the daylight creates photosynthesis, but we find vegetation in the darkest part of the deep sea and in caves where there is no light. Therefore life is not dependent on the light of the sun. The life of the vertical people depends on the MG field of the sun and the strength that can pass through and at a point and position**. Through understanding this the game of understanding the cycle of life for vertical people changes. **Why do I teach this today? Because we are opening deep space travel for man, (1:10). he has to understand these secrets of creation. This is one of the vital points and will be used in every dimension of the space and deep space travel**. This is one of the fundamental points in understanding of the creation of the conversion and plants do it so cleverly, and us humans who have not understood it up to now, and just pass over it and find different ways to confirm that we (think) we understand it, and just put things in it because it gives us a lot of PhDs at the universities. I call it the PhD of the stupidity rather then adding to the knowledge. Look at this picture, you know that **you have 2 N plates, one on either side, you have the contents of what we call the salt and this salt is 100% connected with N. Why do we give N to the plants**, because they need it, **it's their salt agent inside the leaves**, and then others constantly create the next condition. This is why when you put N in a specific way in the M field of the 2 plates, now we understand that the leaf of the plant is a MG created Gans condition, then we understand the role the N plays, but the process is just one step further then we understand. **What happens is, let's say during the night the MG field from the earth, (1:12). it has the freedom to go further then it can, it can push further beyond its boundaries, don't forget it's not just one layer but every layer strength moves up one notch up on a level higher**. What happens, here **no C ever crosses the leaf**, the same as with the lung no CO2 ever crosses the lung, never does just **because the MG strength between the 2 N coated plates (1 plate is different then the other), and now the MG field of the earth reaches further up, that it goes through the leaf in so many easier way, it changes a condition and creates a position of C MG field inside the leaf, and as we saw in your Gans bottles, the C in a matter state in having its match inside transfers across through as an energy field**. It is the same as what we have seen in our lungs and what happens is **the energy of the C transfers to join in into the leaf, and the leaf has a certain thickness or size and it has a certain amount that it can hold on to during the transformation during the earth's MG field to the sun's MG**

fields. (1:14). then when the field strength of the sun changes, what we call daylight or facing to be at the highest maximum facing, then the beauty happens in the reverse which not many of you have managed yet to reach and that is, now **the MG field of the sun allows the energy to convert into the matter state of the O, in a way the plates reverse position, and the MG fields of the earth creates the MG field of the C, and the MG field of the sun creates the MG field of O** which now becomes in that level according to the pull and field strength of the sun, **released as an energy across and converts into the matter state. This is one of the cornerstones of what man has to learn for deep space**. **How to convert the energy into the matter state**, which the plants do every single day and leaf, every second of the life, from the time of the establishment of the first life in a horizontal and vertical level. **A simple leaf shows us how in one MG field pressure can absorb matter and convert it into a Gans, into energy, and by a strength push, (1:16). change of another field in the same environment can create matter**. The KF Research Lab is trying to produce matter state so understand this process fully. This goes to the space lab you are trying to develop materials for your fuel. Taking it a step further and understanding the totality of what we need to do, it brings back **the CO2 Box. No one has ever tried, while the plates are in the box, putting different MG fields around the boundary and see if this C changes to O**. I'll tell you one thing, 99% of you will start producing O. **This is part of the cornerstone of the flight system you need to understand. A lot of you have been working to create H, Deuterium and Tritium, but if you understand this process you can use the G field forces of each reactor, especially your top reactor to convert and change the material to what you need, Deuterium to Tritium and T to H, gain, release, absorb, retract, go forward, pass the speed of light, and decide that you don't need to feed fuel inside to change but you need to create a condition that creates M field forces which gives you G or absorption,** (1:18). very much like CO2 coming in, or repulsion like O which is repelled. This goes back to the Chinese and Iranian space agencies that are working on these things. The Americans are far behind and will never catch up for 50 years. Change of the condition of the (MG field) pressure comes from understanding the structure of life, the vertical people. **If a single leaf can bring in an O or C, or change it to a C or O in the matter state**, so if you extend your knowledge it's very simple ... **put another layer in, O here will convert to H there or anything you like**. In our tests we do that we put galvanized sheets into the Gans, this is exactly what the plants do, with a Cu or Zn plate you get a CO2 but now if you look at the galvanized plate, you have introduced Fe, Ni, and everything else, so you have increased layers by layers, and the combination of the totality of that gives you CH3, what about, if you understand the work of the leaf and **if you take the C out of the CO2 and because you are in the Gans (gas??) state you have achieved Tritium**. If you have understood this process (1:20). **you can change fuel in any reactor in any combination using the 4th reactor even more to create a condition of G pull from the base to the top**. The reality comes that when you **create this condition to absorb C from the environment as we have seen from our CO2 Boxes, we get AA, the same process, as it appears here as on the leaf of the plant, and because it is on the order of the strength of the AA internally, it transfers through and becomes the food, energy transfer for the plant to take what it likes, then in this process, C according to what the salt combination is,** will determine the type of C that gets attracted into it

(there are different types of C). **The salinity the environmental roots matter which it brings in, decide what type of C is absorbed and what O is given off. This dictates the condition of the O in the environment or the atmospheric condition which feeds the man, animals, which dictates the behavior of the animals because then it touches the soul of the animal because it's in the Gans state**. Now everything (the knowledge) has been corrected, but we have to understand the totality of it. (1:22). We have to become aware of the reality in the total dimension of the existence, because if you understand this process then when you land or **are in Space and you want to produce a matter, you have to see what is available that you can interact and absorb in a field strength, not necessarily salt that from the other strength you can reduce or produce matter**, or conditions of the fields that you need. **You don't necessarily need to convert everything to matter, but you convert MG fields of one strength to another, which means this gives you the capability that if you have composite materials here you can change them to simple materials. Now you can take composite fields in the space and convert them to mono-field strength that you need by creating a very simple filter, which the vertical people have already achieved for millions of years**. The understanding of the **Nano structure of the leaves of the plants, and the salt composition of the whole structure now makes sense, then you understand the field of the earth are limited to the strength in the matter level according to the distance from the center, then you understand why we have the tree lines**, why certain vegetables, greens and herbs only grow in certain conditions and in certain areas. for the first time you understand **why plants loose their leaves (1:24). in the Autumn time. We have come up with every chemical combination except the fact of the reality, that when it comes to the Winter the Planet tilts slightly away from the sun and this has such a huge impact on the amount of the fields which come from MG fields of the sun to the earth MG fields which that process can't support the absorption of C into the leaf anymore, not being able but having so much content constantly of salt, leads to what we call autumn leaves (Fall colors) and then the same process comes back in the Spring**. That's why we don't have such a variation **on the equator** because it's (MG fields) constant there, the Amazons and all the green pastures are there, because there isn't much difference, it's always the same distance from the sun, the sunrise and sunsets are more or less the same (MG field) pressure. If we understand this **we can change what we want and what we saw with the hurricane into an oasis, all we have done is to change the condition of MG fields in that space. Once you put a Gans on the ground in a large enough volume it changes its environment, constantly and permanently**. .... now you understand the connection not only with the STM but also with the vegetation (1:26). the vertical ones and horizontals and the swimmers and now that we understand more we have to **accept life within the planet earth**. We are looking for life in deep space, something there that matches us so we can communicate, but if we understand **the process of the interaction of the MG and understanding the existence of life within the sea there is also life within the magma of this planet**. There is life with interaction that allows life within the center core of this planet. **We are not looking for a man with 2 ears and 2 legs, but for life which means that it has the essence of the soul of existence. As long as man is looking for life in the space with somebody that can talk, understand, and have 10 arms** etc. man is still in the doldrums of thousands of years. We have to accept life in the essence of the creation of the soul of it,

not in the essence of the manifestation of its physicality. The sooner we understand this we'll progress to be able to live within the span of the U, **then we'll have respect for every being unconditional regardless of its physical manifestation. If we understand this then we have reached a point, (1:28). that we can convert any fields of any strength, be it a matter, gaseous, or field, into energy matters of gaseous, matter and fields according to our own desire and need**. I can still make a spaghetti on Planet Zeus and it will taste exactly like the spaghetti in Italy, because in that I have the memory of and within me sits the emotion, the taste, and I can transfer this the same as I can transfer in the leaf to the emotion, to my great grandchildren to my friends who have and can get a conditional connection, emotional to me, and in that process I can do whatever I like. We have to be much more clever to understand what and how things are done, how we can be able to see and understand to able to feel the emotion of it, be part of it, use the emotion of our soul, (1:30). then the E of our physicality, and at the same time be able to transfer from one to the other. When e can create a link and be aware of it that we can connect the E of our physicality to the E of out soul, then we start progressing in a totally different way, because we can interact between the 2, we become aware between the 2, and then we can create a dimension that they are both happy to coexist and be part of each other, this will come to man in a very big way in the time to come. Part of the teaching of today is for our research labs in matter and field production and part of it is for those who work **in the space lab, if you understand this then you don't need to keep on creating Deuterium or Tritium you create a condition that the field forces from one allows the creation of what you need in the other and in understanding it you can change from H to Deuterium to Tritium, and in creating that you create a rotation of the fields which gives you the G pull that by feeding to the iron?? ion elements of the plasma of the neutron at the top it allows it to create in totality the sphere of the magnetosphere of what you call your spaceship.** (1:32). This is what is the next step in the development of the understanding between the physicality, the soul and the condition of **those who still like to be in the matter state condition but have the beauty of understanding that they can travel in the depth of the U without fuel or food, because then you can produce anything you like anywhere in the space**. The problem with the KF followers is copy cat and repeating what others do to show that I am intelligent. You have to push the intelligence further. We see these changes especially the M field force changes in the Factories that are getting setup in the KF across the planet. **The proximity of such a huge mass or number of N plates in a single room, creates a condition that allows us not only to benefit by the Gans' produced** in the containers that we tank, and in the tank rooms that we produce, but if the scientists of the KF take the next step and **be able to absorb the field flows within the Gans production, N coating, and plasma rooms, you'll have access, not to the matter state, but in the field strength of the energy, then those of us who are involved in the factories create a new position amongst our systems that we collect the fields**, (1:34). and that's why we are here, not the matter state that makes soaps or the water to drink. We have to **become aware of that we become field absorbers and not matter state absorbers and conditions, then we can produce in a very different way the fuels of space**. This is one of the reason the KF space labs in China, Africa, USA, will be equipped to **become suppliers of the field energy for the space labs which they suppor**t. Then we don't just look at the Gans production but **we look at the total fields produced within the**

environment of the production of Gans', production of holding of Gans', and other elements. So we look very much **like the body of the man, the Gans' and the liquid is the feeder of the physicality and the fields produced become the feeder of the soul of the system** and this process will become a breakthrough for most of our scientists when they understand this. **You can bring let's say, mercury into the factory and walk out with gold. Conversion of the elements occurs exactly as we have seen with the leaf of the plant, conversion of the C in changing position to the creator of the O**. You can do the same. (1:36). **Step up or step down, but not by changing the matter content of your system but by changing the field environment of the system, or absorbing the field environment of the system. This brings a new game into play**. If you look at the flight system shown by Marco 2 years ago, with **the 4 cores and the beads, is the exact explanation to the connection to the planet and the air we breath the gaseous and matter parts. Inside the cores the gaseous part can change constantly, but the beads can't because we have fixed them, then you can take energy from the total spectrum, the go back, the gap, the position between the gaseous and the matter state beads dictate what matter you want to in an energy form that then you can convert it as you have seen in the leaf to the matter function.** It will take man a thousand years to unravel the past 30 minutes of teaching, because **you have to open it up, what energy fields will give us H, what combination of the fields will give O, what will create tomato, and what is the strength M field of the cabbage**. If you take these further up, going back to our medical doctors who are abusing all this, (1:38). what do you do with **the part of the body which is damaged or has created extra without actually doing any operation**. We have seen that Dr. Rodrigo has achieved a lot and so has many doctors, but now you have to understand how it happens which is exactly as you see in the leaves of plants. The science has to be in totality and in understanding the reality, the facts and not just making up to fit in as we have seen in the Photosynthesis video by the American Education system. The mechanism that they came up with was literally a bunch of capacitors to be able to hold, then **if you go a step further you understand why exactly some plants stay green all the time**, why some plants have a short lifetime, why some vertical people dictate to manifest themselves in different shape or colors and change the color of their flowers as they need, because **for the first time if you understand this, that the vertical people have emotion, which is the confirmation of existence and to guarantee the existence**, these people don't like me here with the red color so I change it to the blue then people will take my seeds or nectar to somewhere else. **The change or evolution in the color of the plants comes through the feeling of their essence and the emotion of their soul**, not just by ?? random, (1:40). so does in the animal life but man has not learned this nor progressed to go to the next step, but we have to now that we have joined the UC, **we have to understand the work of our own U which is this planet**. The MG fields on either side of a plant, it doesn't matter how it is, standing up or drooping or if it is flat on the ground, it's exactly the same, because it has dictated this color and **this position is where I can grab what suits me from the matters which are in the environment and from the matters that I can give out. It's the same process with everything else in the U**. The assessment of what you can take out has to be considered first, then **you decide what you need to take out to get what you need, you can put in. Field interaction between the dynamic and static systems is the key to travel in deep space for those who choose to travel in a physical matter**

as what we call the spaceship (SS), those men who understand more and elevate in the depth of the soul will take into deep space as individual souls, then they become shinning stars, because then they decide the position of it. (1:42). Most of the teachings in the past few weeks has been for **those souls of the men who have matured to reach that point to be the creator of their own in the dimension of the existence of the emotion of their own soul, what we call in the physical matter, a soul of a hybrid**. Or would like to go in a jumbo jet to have plenty of people around to confirm your existence. What we call soul searching takes a different meaning when you understand the total teaching you have to become mature to be able to cross the line, or **mature enough that you decide where you want to cross the line from physicality to become individuals. I join a SS with a group of thousands and when it comes to a point I take off**, I want to test and be on this plane, it's very much like when you are on a jet plane and you fly from one place to another, not everybody who took off at one point will go to the same place, some will go to other places by their choice. In the space you can go as a group, but **then if you want to go and camp alone somewhere in the mountains, then at that point you use the strength of your soul, that I am strong enough to be able to do and whenever I decide in 1,000 or 10,000 years, (1:44). on the next flight I join back in and become part of the physical status quo of life**. This is now a fact with the amount of teachings that have been done, that many people will start testing and have tested and different research labs and governments are working like crazy mad out trying to be the first. **Those of you setting up the factories you have to consider the MG field forces within the structure of the factories that it becomes another source, dimension in which they become the fuel for your space labs, not carrying Gans'. If you carry Gans' they'll convert in the span of the U, if you carry the fields they absorb others but stay in constant condition as you set it up, they become part of the soul, but (don't ?) become the totality of the soul, but when you for yourself in the dimension of the Gans then you have to battle with the condition of the Inertia, because it's a matter state, but when it's fields then the Inertia has no field forces on it**. The difference between the Gans state and the matter state is very simple, **the condition of the acceptance of the strength field of the matter state Inertia, where the Gans stays at the strength of the Pl of the MG field, (1:46). and not the Inertia level. This is why you can create matter and you can create Gans, when you reach the strength of the Inertia you manifest yourself as the matter state, if you stay at the strength of the MG field plasma, what we call even the soul, the you stay in a Gans state. Inertia is a fixed condition acceptance of the other field strength to be in position of the state and condition. The body of the man has no matter,** unless it is a dust and it spills or falls on the body of the man. The totality of the state of the matter of the body is Gans in total. **Even if you have an implant it works in the Gans state and not in the matter state. And if some of those who do these kind of operations understand this they'd devise a totally different system which is much more effective**, because then their system absorbs energy like every other part of the body, if they Nano coat it and embed it, then you don't need a battery for a pacemaker. there is a lot to learn and understand and it is for man to take off the shackles of limitation off his shoulders that he can carry on to live and become part of the travelers of the U. As someone said to me have you opened a travel agency (1:48). for space as you are promoting it so good, I said, because I know how to do and have been a travel agent for a long time. You have to understand what is

called ??satellite-zation but in fact it is **a conversion a matter to Gans and Gans to matter state of a higher order, because now you have more energy to give to it and you can create a condition in the matter field strength that when it comes it delivers itself in matter state.** Now you understand how clever the horizontal people think they are, but in fact the vertical people have been doing this for a long, long time but **they have compromised their physical motion to steady positioning and not wanting too much**. It's like someone who only like fish and chips for breakfast lunch and diner, and he doesn't mind because then he doesn't have to go and look for it, everything is right here. The process of understanding the technology is gradually unraveling itself, but according to the understanding of people, individuals, in a very much shorter time you will understand and you will see that even **the animals will understand the change (1:50). Because when you elevate the soul then all the souls get elevated and not just of the man**. The **process of conversion and extraction of the fields will become one of the most important parts of the deep space,** what you extract that what you can get from, **if you go through a high field density ocean of a higher order, do I need any of this, or can I tap it and preserve it like the leaf does and in due time convert it back into the matter which I like**, a spaghetti, or fish and chips. The understanding of the conversion and the ability to convert will allow man to become lifelong passengers of the U. Then the life of the man will not be limited to a meager number of years as the man calls it.

Any Questions.
Q: What do you mean by elevation of the soul? (1:52). **It's that you get access to a higher order strength of your soul. The STM is like a plasma**, in the original teaching we always explained, he **draws a spiral, this is the field combination between the G and M field, your H sits at the opening of the spiral,** C a little farther in, gold still farther, etc.. The elevation of the soul is access to a higher strength (draws a arrow from the H inward), when it comes to higher strength it's not only G pull (inward) **it's a higher strength of giving (arrow outward) of a higher order. Then this is the true essence of creation where you can give more**, not what you might take in because you already have a lot to hold on to anyway. (1:54). **The composite STM still sits here (between the H and C), but within it, it has all the essences, it's just that you have more in what you gather (draws dots inward along the spiral), that when it comes to the higher elevation you have some that matches**. Just because we have a composite soul doesn't mean we have elevated so much. **Elevation of the STM comes from his understanding, not just man but for any creation, is, how much is he prepared to give from his existence, which is G what he is holding on to, to give that, that holding on to isn't important but by giving he allows the others to be able to elevate to use the higher order of their own strength, in a way to give more**. When you start the process of giving it is contagious. ... **so elevation of the soul is to be able to give more, and not to take more, this is the greed of the man. When you give more (1:56). the essence of your integrity to hold on more to the essence of your creation changes**. In fact when you give more **you have less to be attached to and you have more to give**. Q: How does attachment effect ones ability to move through the spiral? of course when you are smaller you more easily move through, when you are fat you can't go through a small door, and **the door gets smaller as you get closer to the center, the Creator**. ...

(1:58). .... the more you give the smaller you become, the more expert you become to give, and find the best way to get in. **Q: Is the elevation of the soul a permanent condition or more fluid**, like elevated in the morning but could later in afternoon come down**? If you feel your soul is elevated in the morning and less in afternoon, you look and see how much you have stolen during the day**, that you have actually put the clothing on this way. ... does the food slows us down? In a **way it doesn't, we are that leaf, (2:00). which we convert to CO2 the energy into the O or whatever, we convert the O into the matter state that the other beings use us. Man has never understood this, our aura is a food to those who are around us, who need that energy, we are converting energy**, I have written this at the end of one of the books, **God is Creator of all and man is converter of some**, we think we have when we do everything but if you look at the essence we are that leaf which converts the matter state from one to another, the other beings need this to exist. This is why we cuddle each other, this is why we make love, we don't put an egg on the table and say this is mine and you put yours there and then we'll get a child out of it. **We exchange energy and fields and in that process we give with our E, this is why you see the elderly cuddle the young, they hold on to them and don't let go, because literally the young convert the energy much faster** so I just grab as much as I can while it's here. This is why the grandpa is with the grandchildren this is a free energy source, come on I grab. How many times do the grandchildren say, grandpa you are choking me. (2:02). ... ... trumped up charges against Arabs. we became a terrorist because we didn't give the technology. (2:04). 27 (2:06). **Q: Can you explain the process of giving more to elevate others. Yes I can explain it. ... you are mountain climbing and one of the climbers looses his grip and he is dangling, (2:08). you reach out to save knowing that you could loose your life**. In a way you give all the physical strength you have to pull that person up, it doesn't matter who it is a friend or stranger, this is exactly what it is, there is no other way to explain it. You give to elevate, to save another life. By elevating another soul you allow it to save another. It's like a father who gives his life for his child so that he can carry on with his life, where the fathers life isn't very important because I have given, I have done what I came here for, **to guarantee the creation so that it loves the Creator**. ... Shandor .. (2:10). ?? about plasma dilution ?? way of elevation. .. The process is not diluting it is adding, when you dilute it becomes weaker, but when you add, when you give then there is more to give. ... (2:12).

(2:16). If to go from A to B it takes 3 months of walking I can take a jumbo jet and get there in 1 hour. **The physical life is the 3 months walk, in the space you decide to go faster, you bring the soul out and put the physicality on, your haven't died but now you have created a condition that you can go faster**, you can go in no dimension, vroom. We have taught enough about the fueling of the body, the Gans, etc. now it's for us in these teachings to decide if I want to go the 3 months walk or I bring the soul out and go instantaneously and when I arrive and walk out I am still me. **This is what I am trying to teaching, in deep space if you go with a UFO, a spaceship or you decide to go faster,** I have my own private jet, vroom. I don't need to walk. The man has to decide if he wants to make the tiring walk or instantaneously. Up to now man has chosen the 3 months of walking. (2:18). **But to be able to get there you can't pollute the air, go the**

wrong way that can damage all the environments, and make a few people homeless because you need that run way to land. That is all it is. Then in that process how you'll feed yourself in that 3 months, or you get there and have a really nice time, you know how to convert etc. this is the difference in a simple way. After 3 months of teaching on the soul it starts to make sense what we have the capability of. **Q: What is fate?** In which language and which path of belief. If you are Iranian and you have faith then you say it is my destiny. In English you say I broke my leg ... it's my fate, I'll see what happens afterward. (2:20). .. etc.. . **fate is how we would like to interpret others wishes to suit ourselves. The fate or the path of the life of a soul is one, to give. There is no fate ... .. fate as a religion doesn't exist, those who want to fool themselves can make. Anybody can become a guru for themselves. fate as a path, somebody says my fate was to end up like this, in a way we planned it through our physical life that our soul brings us to this point, a point of balance and not a judgment**. ?? our soul knows the position of the correctness of the physicality, because we don't or don't want to understand what we did physically to be where we are, then we call it fate. (2:22). When you don't understand the work (things) that you have done and this is a consequence of it, then you end up in that position, which was a correct position, I paid to come here and this happened to me, why not look what else your soul has done and it is fed up doing it. 29 Alan Sterling case of rape, etc..

... Persian lady .. You talked about how we can hide truth in religion, it's true, in Koran, it says you can partially lie when you are danger. (2:26). and Allah is a giver and has no child or anybody equal to him ... if we are creators, I have children and they are not able to give to anybody, what is the difference between Allah as Creator and me as creator? (she is difficult to understand..). **No there are 2 or 3 factors, first of all, the part that says you can lie about it ... we saw that with the disciples of Christ, it comes from that because the guy had to say it to save his life** (Peter lied about Christ), **but again it is how strong is the path of belief you have that allows you or how much confidence you have that allows you to lie to be able to save your own** (2:28). life by lying about your faith. tells story about Moslem lady lying that she converted to Christianity and lies to the people that she is a Moslem. She said that if I say that they'll all start doing things to me. I said, you are not really a Christian because you don't stand for it. ... but when you talk about the God and me, the STM has found attachment for the physicality of the existence, whereas the soul of the God has no attachment. Do you mean when I go on the other side I am more close to the Creator? You don't go on the other side, (2:30). **when we have the condition of the soul of the physicality, we carry the soul of physicality, the soul which has come in touch with physical existence, so we are aware that we can create and that we can be dependent on it to a certain extent. Whereas the soul of the Creator has no dimensions, it has no attachment to manifest itself, to show itself it exists to become manifest** in the matter state, or the condition of physicality. It is a big difference. It's very much like when I was talking with our researchers, the problem is that **most of our researchers look for a result to confirm what they are doing is correct. They don't have a belief that what they are doing is correct. Those who look for that always have a problem explaining it**, because then they fail. We have Alek and Armand they see it and do it and believe what they do is correct and the consequence of matter state doesn't matter but sometimes they fall in it

and say, but you have to be able to show. And I say, this is not the time, because **as long as we have to confirm our existence by confirming that something is there we are still entangled with the soul of the physicality. When we know and believe that what we do is correct and are giving everything to be there for the others to elevate, then we have reached the soul of the Creator**. It's just how can we explain to these men of physicality, that things are happening, it's irrelevant, (1:32). you don't see it, but I feel it and don't need to see. When the man gets that confidence and understands it elevates himself to level of the soul of the Creator, at least on the path to it. **As long as you look for physical confirmation to the true physical existence, you still have that dilemma of being a matter state soul**. We say show me and then I'll believe you, it means if I tell you to look in your soul, you have seen it, then you are denying your existence through your soul, and this has become a very good trick now a days. I don't need (to see), but you have to show it to yourself. **Q: What about asking for forgiveness from God? First of all, why do you need to get forgiveness. If you are aware that you have done something wrong and have reached that point, you have done something that needs to be corrected, or you are aware of what you have done wrong, then you have already judged and forgiven yourself.** This point of forgiveness when you ask to be forgiven, it means I am aware of what I have not given that I was supposed to give, or am aware of what I have done wrong, from my soul. Never ask anybody for forgiveness, because even the God doesn't, because when you ask for forgiveness it means you are aware and have judged yourself. (2:34). It was one of the Commandments, never judge and never be judged, but when have understood that this is me, this is what I have done wrong, I was supposed to do but I didn't, you have already understood and your soul has already elevated. This is the beauty of it. He tells a story of the cashier who mistakenly gave him too much, and by returning it everybody is peaceful. (2:36). We don't have to worry to ask for forgiveness. We have to be correct in our conduct to ourselves and to nobody else. In the space people will come to understand what this means, when you start coming into interaction with those who don't understand what bad habits the man has, to kill, to steal. **Q: I cry when I think I should take more responsibility but I just can't**. This comes back to the point when we create an emotion, I know exactly what you are trying to explain. When we get to the point of emotion, the position that I want to do, I can do, and I should have done more. **There is a beauty in this. In that position that you have understood that you could do but physically you didn't do and you have realized that point that comes through your emotion, you have already elevated your own soul.** (2:38). This is one of the beauties because then I have the courage to do it the next time or the time after, because now you banked the strength, this is what I need and I didn't have, I gave from my physicality knowing I couldn't give, I could have done more. I have created that condition through the emotion of my physicality to the E of my soul to have it that the next time I can do it, even though I might not be able to do it when I come to it. **We bank everything in our own soul, we elevate our own soul. It's the point of the death comes when the total physical soul gives itself to the STM**. It's very much like we have the MG field of this planet which reaches the span of the U, but you still have the MG field of the matter state of this planet, which is very limited but still when this planet blows up or gets absorbed it will all become one, the physicality, the essence of the physical will join the MG field of the center. In essence**, it is us who have to understand this separation and this power. We can give from our physical soul**

into our emotional level that passes to the STM itself. It's a savings bank and they call it a church, go and pray, who do you pray to, where does it go. My soul is the closest thing to the soul of the physicality. You sit and pray to your physical dimension (2:40). which adds to your totality. And when you need something then all you did was to take from your bank., which you prayed before and then now you found a match and your prayer become a reality, you did it yourself**, you transferred the energy from the soul of physicality to the soul at the level which is needed in the body and then it found a position, a new balance condition,** and that was what you were asking for because you banked it. .. the power of the STM is immense it's just man who let himself down. Q: What is the new image of an ET with a ball on the web page for? This is the man offering his soul to the U. This planet is known as the blue planet. (2:42). The SSI logo was designed by Iranian scientists in a very specific way, it has a lot of meaning, which is written in the archives of the KF. The man offering his soul to be part of the UC and not his physicality. She shared her dreams of blue UFO. (2:44). The point is in the world of creation we all reach a point of maturity in different strengths and levels of our own capacity and we are all capable to reach the same level. As a human being we tend to, we have been so much forced by those who understood the weakness of the man in not understanding his soul, that we have lost trust in ourselves. We can create anything of what is our wish, our point of desire to have and we given it different names. I came across this at a very young age and I thought, why don't the people see and understand it. In Iranian culture when you sneeze we wait because there is something going to happen, we say, don't do anything fro a few seconds because you sneezed, it's part of our culture. tells story, the aunt was about to go to visit them but she sneezed and then said, we don't need to go because they will come here. My aunt didn't understand that the souls inform each other, so she says it was the sneeze. (2:46). **At a very young age I was aware of how our souls inform each other** 22 **Q: When we travel with soul do we have to leave our physicality at the place of start and create a new physicality at the destination and can we return to our old physicality**? First of all **we always leave our soul in the dimension of physical life when we rest, there is a condition of what we call unconsciousness or whatever, the STM in a way leaves the soul of the physicality to be in charge of the body, because not much can be done with the body when the soul of physicality is resting. Our soul travels beyond**, or in a way leaves a trace behind, to other dimensions. (2:48). **Sometimes we call it a dream**, it's not that we leave but we never traveled. Because our soul has created this attachment to physicality, but it doesn't necessarily always stay with the physicality. The time of sleep, rest when the body goes into the position of just running **sleep, at that point the STM is free, because it has a connection but leaves the operation, because at this point the physicality can't do anything wrong**, it can just kick the wife or whatever, but it can't do the mischief's that man does the whole day stealing, robbing or whatever they do or work, so the **STM is free, it takes that chance to take a run in the creation, but it is still attached to the physicality**, it knows where it is, like a bird that migrates from Siberia to equator and back again, our soul has that freedom, because we don't understand in the emotional level of the brain we don't see that space , we call the flight of fancy, but most of the time when the physical condition has nothing to do, our soul is free. It doesn't just sit there waiting for it to wake up so I can start working, but as it has no connection, it doesn't matter if I at one point and then I travel somewhere else. The office still runs

(2:50). ... but when I am there ... **our soul is free but it has taken a commitment of looking after this physicality during the time physicality is here because it needs it to do. We feed our souls through our daily work or absorbing energy that it can do its work.** Body is with us in a physical condition in a dimension free to travel. The soul doesn't sit inside the man watching what he is going to do, you haven't yet understood anything about the soul. **Q: The Iranian government had this technology for at least 10 years, why don't we see any support from them in the main Media about this knowledge?** There is **a lot of controversy about my work in Iran and the president took all my files and the present Iranian government can't find them**. We know where they have gone to and who is handling it. All my research development has been taken to a certain part of the Iranian government, which the present regime doesn't have access to. The KF supporters in Iran are very large we don't have a problem. (2:52). If we start any kind of connections they'll mark us as a terrorist organization and KF stays clear of all these things ...

(2:54). Let us look at a brighter future by us being open to reality and not trying to confirm our physicality. We were born to elevate our souls to its maximum potential and that when it is free of this physical dimension so we can serve the others in the U. the sooner we understand the faster we come to the final point.

(2:57). Rick wants to write the top 100 Keshe quotes.
(3:00). Music video

208th Knowledge Seekers Workshop Jan 25, 2018

(Shows the first workshops, How the plants produce CO2 and O is important for man to travel in space the energy conversion and for those mature enough to travel by their souls, The whole structure is set to promote the soul of other entities then we understand that our physicality is irrelevant, We looked at the Pain Pen as something physical but it has a soul and adds to our soul, We need to understand how our soul is structured like the body, The emotional part of the physicality leads to the creation of physicality, We can decide the shape and structure of our offspring if the soul accepts, You can't clone a soul but you can the DNA of the physicality of the soul, because it's irrelevant, Start to develop all of the 300 plus patents and read them again your knowledge is enough to understand them more, We are reaching the point of the non-containment of the Free Plasma and the elevation of the soul, When we start to create the plasma condition which is above the structure of the Cu, the Cu doesn't exist but the Pl still does, A plasma current is free field forces that knows it has to go somewhere to deliver and it has to come back to give more because when it delivered it received more, Creation of non-containment plasma systems or Star Formation for flying that is controlled through the emotion of the soul where to protect the physicality you allow the physicality to enter the soul which can protect it as the soul is very much the same as a star, When you make a Patch it's not just the physical pain that is healed but the soul of the cell that is healed it's the elevation of the soul of the cell that has received the energy will elevate the soul of the man, Heaven is here and now in life, Mr. Keshe tells how he got detached from

physicality during his imprisonment in Canada, The purpose to this life is that you are here to serve other not yourself, ,)

(:13). **Rick shows the 1st Public teaching workshop, 3/5/2013**, once per month, then they become the Knowledge Seekers Workshop started 3/6/2014. (:20). plays clips from workshops. (:23). The early gas plasma reactors. If you have a single H atom in a square meter that Pl will fill the whole meter. (:28). The Pl acts exactly like a gas, it fills its container. (:31). Mr. Keshe starts. What we have done in 208 workshops is very much the beginning. .. we are rewriting the beginning of a new cycle for the human race. (:34).

(... break in connection) (:38).
(:40).
(:48). break in ... (:49). (Mr. Keshe has good connection from here). In the teaching last we **discussed how the plants produce the CO2 and O. This is important because the way the KF is moving towards the space development, those who would like to travel within the structure that they feel they haven't yet reached the maturity of the soul to be able to do it on their own**. We need to take that phase and be able to teach. (:50). It's important to understand that the STM becomes the controller of these systems. **We speak about the horizontal and vertical people, there are also those who float in the seas of these planet and in the U, they're all using the same process and they all have a soul. The soul's structure has been prerecorded in what we call the RNA of the man, in its play it creates the vibration of the physicality of the man**. This is how simple it is. How are we going to use the structure of the soul that in the manifestation of itself, what we call the RNA, what are the nodes of ?? this to play, which is the physicality of the man. **When you play the music the fish, plants, and animals show a reaction. We have to learn to play the music of the soul of the U. Those of us who serve to elevate to that position to be able to receive more to serve more. When you reach this point you'll say pone thing, how easy this has been to get to this point and how many mistakes we made of which there was no need for. (:52). But it has brought us the wisdom of understanding the conversion, how our soul can dictate the position of our physicality, and how the physicality can dictate the position of the STM, or any other being**. From the start of the teachings I said, when you start a system pray for it, give from your soul. We become part of the whole process, **the whole structure is set to be, give, develop, and to promote the soul of other entities, then we understand that our physicality is irrelevant.** (:54). It's us who decides the shape color and everything else to go with the physicality. I have tried to bring the soul into the teachings of the physicality of the past 3 years, in this process we are becoming more and more aware that it is us who dictates the position, brings about the totality, can dictate the whole process. Our wish is our command. We all have educated each other to the development of the soul. **Many who came to the KF to take from it physically we don't see around anymore because the intention of the soul was not here to serve**, or up to that point they could but then after that the soul was prepared to participate because it was not there to do. A lot of us will go through the same phase, but the beauty of it **is once we teach this across this planet we'll see the beginning of the peace, which for us is peace within the STM that he is happy with the physicality of it which is controlling it**. (:56). Where the physicality which is in charge of and with that process

we go to the next step. A lot of supporters look at the KF as a patch, power supply, or a P Pen, but in reality it was all a patch for the physical soul of the man, **it was an energy to elevate the physicality to develop the STM**. It's was there **as a P Pen to write the pen of elevation of the STM from his physical position**. We always looked at physical gain whereas in fact it's part of the development the STM. We will all understand what this means in the coming time. **Because we are so physical we just look at a Pen because it releases my pain and it's gone, but it's dynamic, it carries a soul so it adds to your soul**. A Patch is the same. If you use Cores with Gans' and they create a condition of the soul, what do you think billions of Gans' in the patch are worth, then **we start looking at the whole creation in a different way**. (break) .. (:58). ... **it's to elevate the STM and that with it, it elevates the soul of the others**. This is the main objective of this teaching. In the past few weeks we joined the soul with the physicality, we started to understand it, but now we have to go into understanding about our own soul, that we understand the Commandments **and how to understand the intention of the soul and that we can change it in the physical dimension**. This needs a lot of comprehension, to **go deep enough into the structure of the body, that you can start with the smallest cell in the body, you can feel and touch it, then through it try to reach the STM**. Then you'll understand how every one of us can reach not only our own soul but the soul of the others. **Collectively we have that power**, we can do it, that this is part of the facets and assets of being part of this human race. (1:00). The whole process is to understand **how our soul is created and structured, the same way as our body is structured so is the STM, and any entity in the U**. **The soul needs to absorb, to receive and to give, it has a part of processing** to understand what it needs to give and what it needs to receive, and to what extent it can do both. It has to understand **what it likes and dislikes, and then in what environment it would like to manifest itself, to operate, which of its attributes of it can show**. When the man evolves more to understand the function of the soul to be parallel in the shape of the physicality. **Souls observe what pain is, comprehend what joy, what it needs to satisfy a need. It's for us to understand the structure of the STM has a parallel manifestation as a physicality. A soul falls in love, the same as a man, because it says, I made man in the image of myself. (1:02). It's not the "I", but the essence of the emotions, the feeling because as we know all the souls are the same,** they radiate in the same way and manner, **it is what the soul does that brings the change,** the beauty and essence, then for us to understand that we can covert it into the dimension of the physicality. We understand that physicality has no meaning. If the man starts understanding that **the E in the STM is followed through the E, the physicality, then we understand that we always have known our soul, it's just that we connected it to physicality**. I made man in the image of Myself, it doesn't mean that I have an eye, **it means I know what the joy is when I give, and that when i take I have to move my position. The essence of the physicality has no meaning in the replication of the STM,** as I made man in the image of Myself. It's what we have always said, that the **emotional part of the physicality leads to the creation of physicality**. Many of us think that we are born with a skin, eyes, or nose and that it only happened to occur in the womb of the mother, (1:04). **but all that is preset by the physicality manifestation of the man from the essence of the emotion of the STM. It means that the soul has created what we call now a days, RNA and DNA** and it has handed it over. From this point to there you should look Indian, from that point Chinese, then from

now on I'll let you do it yourself and see what you can bring in, how you can do with what I have given you, to elevate yourself in the physical dimension. Why in some environments the collective of people have a certain color of eyes or hair, **all these are dictated by the matter state of the fields of the planet, so it has nothing to do with the STM. It's very much like, here is the paint and the brush is provided** and you can draw what you like, but the limitation (of the environment) is that it has to be all brown or blue. The color of the eye of our soul is not blue, it has no eye .... it doesn't become prejudiced for a color, **then we see each other as one soul. (1:06). There is no need for intelligence, as the soul, for correction of its manifestation operation, knows it all and has it all, and it dispenses what is needed based on the prerecorded (requirement) of what these people need in the physical dimension to be able to live**. We are on the edge of a technology in the coming years where **we can decide the shape and color of the whole structure of our offspring, if the soul allows them to be created and accepted. You can't clone a soul but you can the DNA of the physicality of the soul, because it's irrelevant**. **Each soul is unique and each one of us has to know how much we can add to this knowledge and to use** it. Very soon the KF research teams will be able to **create shapes through the Pl technology, because we'll be able to create the soul of the accumulation of the cells, (1:08). or the soul of the cells within the structure of the whole system, that by putting reactors and Pl systems in operation we can lead to the creation of life**, or the creation of the soul of the life and **then we can take it anywhere in the U**. Many of us as the human race will take this chance when we go through it, **because it's the only way to carry masses across this U. Many of us will depart from the physicality and will allow our souls to be trusted to the others, then in a time and place of our choosing where we want to manifest ourselves**, to be part of a system which we chose. Many of us will be able to understand the whole process in a very unique way. This is not a telling of the future, it is in the reach of the man even today. If you managed to handle all these reactors, cores, Gans' and everything thing that you have imagined to develop. Every move was confirmation of the physicality. ... did it help you, cure you or fly. This process has come to an end and we start moving on. **Can we replicate through the physical systems and Gans' that we have made (1:10). to see how our soul will manifest itself in a new dimension**, environment. I want to go to Spain for holidays, can I replicate the conditions and when I did, what will I take for clothes etc. or **can I control my soul that it manifests itself for what is needed** to be in the North Pole. Many of KF supporters will start creating these kind of machines in the coming time. Now that the support and finances of the nations comes in the technology will reach new heights in 2018 and 19. Many of your dreams will become reality. **The present line of communication, the computers will all be obsolete. Watch what is to come because now the line of communication is through the soul and understanding of the emotion** of the man, do you need a phone. .. the message on the page is still the same but the method of delivering and receiving it has changed. (1:12). The present day fiber optics to the direction of the STM. ... . **we'll have many offspring of the STM that the soul decides in what shape or color it would like to manifest itself**, not just because the mother and father are Chinese and he has to Chinese looking or be an outcaste. In Africa he'll be black and in China Chinese because the soul decides in what direction to create the emotion regardless of physicality. **Those of you working with dynamic reactors will**

see this if you develop it in the right way with the right composition and understanding of life you will start seeing structures. How you load it, you look for the structure but you see the soul first, then what your emotion is will give the soul the physicality to manifest itself. **Many of us will teach elevation of the soul instead of N and Gans making. (1:14). The STM has to be reached through his physicality, but his physicality has to give the soul the comfort of peace and what it needs to operate it**. We'll teach the universal language of the soul. It means the pen of the soul has no color but it cuts deep into the other souls that when they receive it they use it and change themselves to the level they like. We'll also teach **the method of transportation when you arrive in the physical dimension. Zero time communication will revolutionize mobile phones**. The production of food through energy packages, or energy stations will be marketed in the coming time by the KF. ... (1:16). especially for disaster zones, where you'll walk through a station and receive what you need and give what you don't need. These are all in the original patents of the KF and now that we are educated enough it's time to deliver. It's time to bring all the patents into operation. **Please go through the 300 and odd points of the patents, medical, Nano technology and go through the papers and start developing all aspects. read the patents through the eye of Pl and not matter technology** and you'll understand that it has a new meaning. Start developing in what you would like to see changed in the physical condition of the man. Change it from physicality to the STM, can I develop a station that all the other souls can come. (1:18). It's exactly like when people come to the feeding stations for food.. Evaluate them and now do them with the eye of Pl and a lot of secrets will open up. Those who are interested in the physical condition of the patents will receive that condition, **but if you decide to look at it through the STM or the soul of the entity you'll create new conditions that it gives you elevation of the souls. There is no where in the patents the teaching of destruction**, even those where you see destruction is the essence of the creation speaking. It's very much like the Phoenix. The time has come for a lot of KF supporters to start teaching and replicating the whole structure of the matter state of the patents into Pl and free plasma condition where there is no physicality. With what has been developed**, even the Star Formations reaching the point (1:20). of the elevation of the soul of itself, you'll find out that the glass, brass, Cu cores will totally dissolve because you have passed the strength of the Cu but you still see a Pl like a sun that will have no container**. We don't see the sun sitting on a motor or it in a brass or Cu container. **With the PPG (Plasma Power Generators) that are now developed and in your hands you can all produce systems that you call, SF without containment, which means you should start to see how you can feed the reactors, the flow of the electrons in the electronics**. Everyone can do it, the research centers are elevated to that level and start working at it. **When we start to create the Pl condition which is above the structure of the Cu, the Cu doesn't exist but the Pl still does**. You'll find what you built as a core and what you setup as a motor will have no meaning if you start using the Pl current instead of electrical current. (1:22). **A plasma current is free ?? forces that knows it has to go somewhere to deliver and it has to come back to give more, because when it delivered it received more**. The non-containment Pl reactors will be upcoming technologies and teachings, where **when you want to travel in the depth of the U, there is nothing that can contain the Pl except the field forces in the Pl, that having the balance of it can be controlled through the**

STM as it is made of the same. We don't se any stars that were rotated but by the cycle and life of them they create conditions that allows them to exist. In the coming time **all these non-dimensional Pl systems will come to be at the level of understanding, very much like a neutron or proton, depending on the field strength of the environment the Pl will shine and manifest itself according to the plasmatic field force of the environment it has manifested itself in, then it comes to a new point, would you like to look for a grain, or the fields of the sun without the grain** because the fields harvested can fail, but the sun which is the relation of the fields of the Universe never dies. One sun might die but the other suns are still there because they are part fo the setup to be for the whole totality ot exist. (1:24). You will see in the coming time reactors without containment, **Pl systems or SF for flying that is controlled through the STM through the E of the man. You have to protect the physicality, you allow the physicality to enter the STM which can protect it. As the STM is very much the same as a star it can interact. You can enter the physical structure of the Pl of the sun and at that level decide if you like to live within the center of the sun**, because now you are part of the totality of the physical structure. **This is the only time when the cat comes out of the bag that you can put it back in the bag. Where the soul allows the physicality to be developed, now you can create a condition through the soul of the physicality to go back within the STM that you can manifest yourself in a dimension when you decide the physicality to manifest itself.** The elevation of the knowledge of the man where we evolved very strongly in the science, architecture, medicine etc, was when there was equality and peace (1:26). **because now there was no war and those who wanted to do more to elevate the work of the creation. Mankind is coming to that phase of peace, in the coming weeks you'll hear announcements worldwide by world leaders**, don't forget I promised and my wish is my command. In that process when the men of military have nothing else to do except become men of peace, then there will be huge resources available to all of us, the **race will be that those who know more to give more to elevate**. This is not a dream anymore, sit in my seat and you shall see. It's us who has to be prepared for it. Development of Pl technology which will change the conditions of certain sections of the planet in the time of physical rapid changes, with hurricanes, earthquakes as we can predict it and we can protect you. But I don't need to go hunger, homeless or loose my harvest because I still want to be human and on this planet. Then the real dividend of the new cycle of technology will touch all of us, but it will be in such a rapid way that many of us can't even imagine. (1:28). World peace is in my grasp and I will deliver it. **When we deliver the Peace those you apart of the KF have to be mature enough to teach the right way, that every man chooses through his soul**, not by the bank account or palaces. We'll see changes in the whole space travel. This is part of the peace dividend that all of us have participated in. **The EC has written a statement for humanity but still can't find its way to write its own mandate, because most of them haven't yet found their own soul. And many members of the UC don't understand the operation of their soul.** Many of them have come from the structure and still run in that same process, this is the problem. The peace dividend this time around will touch all of us and change the course of humanity in the coming time. (1:30). in a very rapid way. When our governments ...
... **when you think about it, a thousand years ago, the oil and steel were there but our forefathers didn't think to do it so they had to go with the donkey. The only**

difference is that man has brought his intelligence in to utilize and manipulate to the benefit of himself. Now the same things will happen but this time with the energies of the U. It is the essence of the creation of the matter state, this is where the difference and change will come. (1:32). **We will see in a very short time we'll see unification of the armed forces of this planet but this time not to fight** and they'll start looking after every household in a correct way. ... be ready for big change, because the motion we have started, because we wished for peace and all of us that did, did it from the soul and not the physical level, and that soul has elevated the others to reach and then it spreads like a wildfire, but then comes the operation of the UC have they made themselves ready to be able to go through the interface until we come and open the doors of the human race into the human race as one soul in the U. **Much of what you wished for by 2022 will come true because of the peace dividend, this time it's for the STM** not (1:34). for the physicality. We'll see huge evolution in science in our coming knowledge. **We have no choice because we have done our work. A new generation of innovators in a new science will bring everything out so rapidly**. One of the things we'll see is **how to understand the power of the soul of hte man in respect to the soul of the universe. How strong are we as a soul of the human race, a soul of the planet, a soul of this solar system to stand the forces of the U so that we can elevate the soul of the others**. This is not a dream but a reality for those of you who made the Patches, Pens, the dynamic systems, will start to observe, because there is one point that **when you make a patch it's not just the physical pain that is healed but the soul of the cell that is healed. It's the elevation of the soul of the cell that has received the energy will elevate the STM**. We'll find new ways to elevate the soul and that game is fantastic because we all become millionaires in the bank account of the soul where there is no harm done because we only take what we need and how much we want to elevate the soul to serve. (1:36). when we get to that point, we get real fast to one point, would these **machines we call SF, with no physical containment where we said they create an uncontained field force in the center, then that station we can use to reach the STM**, where we see these systems are used to feed, charge, to receive. Like the systems Dr. Rodrigo uses where the patient goes in it, but this time once we elevate the knowledge and we understand it, we would go into these machines to charge up to go and serve more. Would we use this new technology to create servants of souls, that we just want to serve and after doing what we could we go into to charge up at the soul level that we can go more. This is not dreams anymore. **Many of you who have used the MaGrav units have already elevated your own soul, you have received partially the physical elevation and with it you have also received the soul elevation**. get the video of yourself of how you behaved 5 years ago and how you behave today and try to understand. (1:38). Don't look at the physical structure in the video, but go back to see how the soul felt when the movie was taken and then look where you are in the elevation of your own soul today. Has the selfishness gone and serving become more important, has being part of the change that you give from the soul, changed in you, then you become true men of this planet. It goes back to the logo of the KF, we are here to serve and not to be served, but the service is to the STM not the physicality. This is where the change will come. We'll still build the factories. I wonder if we'll ever get paid for our products if people will just come and take them and say thank you, and the people cured to work for the others to elevate their souls. We'll have trouble keeping the staff, because

they'll say, you stay sick because I want to work for you tomorrow so I can help others. Remember that the next step is to open the patents again. (1:40). Go to the back end of the patents and come forward because now you know and don't need the front. read the books back to front, read the G side. use the knowledge not to arm yourself that you know more, but less ...

(1:42). Reads Italian version of constitution ... (1:58). Any questions?
(2:00).
reminiscing about old times 5 years ago ..
(2:16). ... **Rick asks that all the different religions have their form of heaven, if you want to go to space is there something else. Actually when you die you are in heaven because you detached from the physicality that bound you to all this me**ss. it's a time we don't detach and we say that's it I am free. Rick says, at that point you think you are free then you get stuck on trying get back to physicality to do that thing. Keshe tells story**, a man worked hard to get his diploma and when he got it he tied a string to it and pulled it along from his belt. (2:18). He said, all my life I chased after it and now that I got him he has to chase after me**. And it's the same with us we chase to do everything to go to heaven, but in fact at the point of detachment from physicality, that what we have been chasing has become part of us, ahead of us, and the physicality is behind and it has got no meaning**. It's the false expectation that has been created to steal the STM. For any one who says, if you do this to go to heaven, it means I have already imprisoned you, because life is heaven, you have to enjoy life the way it is, in harshness, goodness, terrible time and good time, in what ever, there is something to learn in it**. It brings you a lot of wisdom. **I remember sitting in the Canadian (arrested in the Airport for 11 days threatened with death), whatever they want to call it, I was there for the reasons they wanted me to be there and I watched the others who where in there, and many times I thought. my name will survive this thing, whatever they put. As everyday, I was invited, they told me what they were going to do with me (kill). I became detached from physicality, and it was peaceful,** (2:20). knowing that I might not see my children again, that the guy was so proud to be so arrogant every time, and it got ot the point is this life worth it, is it worth it to go through this cycle, so I became more detached. It was a test for me to become more detached from physicality and it made a huge impact on the future of the KF. **They imprisoned my physical body but they opened my soul that I started preaching so massively that it put fear on every government and nation**. And now we see that in a short time, the position has changed so much, I wonder if those officers will ever utter their names out of their voice box, because at the end of it they can blame the others for what they put in front of them to do, but it is they who did the job. In that process of becoming detached, it brought a lot of peace, and in so many ways I entered heaven in the cells of Canada, and nothing matters anymore, what worse can they do take physicality, it's not worth it anymore. This is what we have to learn that every second is a heaven, if anybody else tells you, you need to do something to get to it, it means they have stolen it, your being in heaven.
(2:22). **We don't need to go through physical death to find it, we just have to appreciate every second and how much can we let others enjoy this ?? with us. This is the beauty that you learn from others**. Rick says, and yet it took a very strong emotional event to get to that point, in effect, so what I am reminded of is that if we see

others going through suffering that it might bring them to that point of detachment, reflection on their life, and what is really worthwhile, to appreciate more important things after that event and to make big changes to agree to help others more and serve in a higher capacity and that kind of thing. **No, we always serve but, ... it's like people who go through traumas, cancer, they start analyzing the position of their life. But instead of going through regrets it just has to become a joy of every second that I am here, it doesn't matter, at least I know that my soul is free to serve in any dimension. I think the heaven for man starts from the first time he takes breath on this planet, he just doesn't appreciate it in a physical dimension**. (2:24). It's just that they have made it hard for us so we believe that we have to finish, but the heaven comes on the second you breath. I have come here to enjoy the physicality because it's so beautiful and at least you can touch it and put it in the memory of your soul. The whole thing has been turned upside down and inside out, according to those who want to be benefited by the labor and life of the others, it's wrong what they have done**. Q: Is there a purpose to life, does our soul write everything the path**, or is it the emotion of the physicality who is in control, who is in control in this situation? You are. Let me explain it this way, we carry a notebook with a list to go shopping, bread, butter etc. and the rest doesn't matter, how I get to the shop, how many bags I have to carry, (2:26). but how many of you carry a notebook and write down today I am going to serve here and help there, so at the end of the day I served here and helped the others there, I did something to elevate another soul or whatever. Make a checklist for service. **Is there a purpose to this life, yes, you are here to serve, not yourself, even though you have to support it and can serve it**. There is a purpose to life it is just that mankind has got it the wrong way around. What is coming up in the teaching today and the establishment of world peace will bring that in line. We will crave to have something to do to serve because somebody else is serving where we wanted to. The race of the man will crave and suffer for not being able to serve, because all his physical needs will be satisfied. All who are serving at the KF are doing it so it comes to one point, that it is comfortable, medical needs are met, enough energy, that the other human kind are painless, are satisfied, there is no other purpose to do all these teachings. (2:28). .. it has happened on other planets. When the mans or any races basic needs are met, of confirming existence and continuity of the race, the existence of the soul, the race goes inwards to find the best way to give, because it purifies the soul. There is a purpose is to serve and not to expect to be served, and serve through the STM and not through the physicality. .... **Q: the Koran says the heaven is with beautiful girls, thank god there is a place for them ...**etc .. it's completely equal for men and women. (2:32). .. **Keshe says, the word for heaven comes from Persian language, (heaven) was from a garden with water flowing and food and all pleasures of life, you don't have to do anything. Heaven is the imagination of the physical life**, and came through the Persian word. We say that heaven is a state of mind. There are so many people who have so much and are never happy and there are those who have very little and are more happy in not having anything. (2:34). Is the heaven for us to satisfy our own needs or those of others. ... I read a psychologist talk about how we have become so selfish and use levels of birthright to protect ourselves. ... now a days knowledge has become patented and I afraid if I share it I might not have it. I call the patent rights, a thievery from the others, the thieving is I don't want to share with the, it's mine. ... (3:36). ... (2:41). **Q: Who is going to take care of Satan who makes people do wrong? You**

see whatever you call it, we created that ourselves to not allow our beauty to manifest itself out of fear of our own weakness. As one member of the UC said, I am the devils advocate, I said there is no devil and he doesn't need anyone to do his work, unless you are trying to pretend. (2:42). If we trust in what we do is right then we don't need these kind of things.
... (2:46). ... **Q: so called Christians said, that everybody has to believe in Jesus Christ ot go to heaven. If you speak to Jews, Moslems they say the same thing ... it's the creation of fear they want to put on you** ..
(2:50). Rick asked, **do you think that there are other people doing this plasma work? Of course there are and we have to bless their souls, because somewhere down the line they may come up with a way to help even one person on this planet or somewhere in the U**.
(2:52). Bahais
(2:54).
(3:00). **We have already been in communication with our soul otherwise we wouldn't have any emotion, which is where our soul gets interfered with before it reaches physicality. Then the interference creates the physical condition. You feel happy, you interfere with the physical part of it and you start making noise with your mouth and you laugh. The interference of emotion has create the condition for the manifestation of what it is.** You have found the frequency of laughter, you call it being happy. We know how to interfere, it's like tuning a radio station, music or propaganda or the government finds a way to put a noise on it ... (3:02). .. the understanding of it is that **we always know where our soul is because we know how to create fields to interfere with it on the name of emotion that it shows its manifestation in physical condition**. Use that route instead of coming into the physical condition, now you know where to go ?? that we can see, we find a beaker, you send that noise that we interfere with, then you have found a path to your soul. **The souls always communicate, you'll be very amazed why you have been put in a position your soul brings you, it means it has to find its balance, you are not doing it, the other soul has moved somewhere else, and then it brings you to be there because that is the point of balance, because the physicality has to follow the soul** ?? it turns up. (for example) once someone told me his wife found him with his mistress, I said, you stupid boy you created that condition, the soul brought her in that position because that is where it found the balance of the peace, because it knew you were up to something. It's not that what happened, it's the soul brought it together to bring peace to it. **The soul brings you in the position where you have to be, but the other souls who are of the same, to find the balance**. If man starts to understand everything the right way (3:04). he understands how much he has fooled himself with it. **We say, I had to be there and this happened. We don't say, I did something and my soul brought me here for this to happen so that I can learn something from it.** It's very much like when you make food, it boils and how many times you taste it until you get it just right that it satisfies all your emotions, the texture, smells etc, then you serve it to your family and get the joy from the feedback on their faces, the joy from their souls and your soul. ... (3:06). ... Caroline comes on, congratulations on anniversary ...
(3:10). ... **We saw a big clash against the Catholic Church in South America and a lot of people will start moving away from it, because the people who were abused by**

them and the man stands there and says it never happened, show me. We are here it happened to us. They say, no you don't count because you talk.
(3:12). what is the outcome, is that every man is respected. .. the Catholics cover it up because one of them own all the media. Let them open it up and there will be nothing left. (3:14).

(3:20). North Korean wants unification with South Korea. Mr. Keshe says it's a massive deception on an unbelievable scale, I hope I am wrong. (3:22).
.. for 10 years we tried to get this out, but now they have blocked themselves. ..
(3:24). ... now we got it ... a big problem on the 18th of April, some will disappear, some heads of State will have to answer for it. ..
... his child was poisoned ...
.. some 30 years of exile and we have home, peace and can serve. ... Q: when we are in space do we have a home? Our soul is our home ..

(3:32). End

Knowledge Seekers Workshop Summaries

209th Knowledge Seekers Workshop - Feb 1, 2018

(The level of the plasma to overcome the field forces of the planet has been achieved, they have the knowledge and will enter the test phase, Talks about 2 dimensions of life for vertical and horizontal people that is the gaseous and matter states then there are 2 more Liquid and Plasma dimensions, The creation of water in the universe is the most common and therefore liquid state life is most common, Explains how water is made from the MG fields and creation of the oceans, Liquid states in the universe are created out of the conditions of the 2 heavier M fields coming from different galaxies and can just be in space without a central point, The difference between water and magma and why it comes to the matter state in volcanoes, Living in multiple life existences in the universe through the soul, Extending life to 10 thousand years by draining the trigger point of separation from the soul through Gans environment, Explains the process of death and that we can set the time he set his for hundred thousand years, ILS and MS are examples of determination of separation from body, How we travel in space through our emotion extending the soul to encompass the physicality and then re-manifesting, The MaGrav was a system to expand the soul to encompass the physicality but you never understood and only looked for the cheapest weakest electron vibration, When you drink the Plasma Water, rub some of it on your skin, where your pain is, then the fields work, what you drink becomes the STM, and what you put on the skin becomes the physicality of the man, and then you strengthen the soul of the physicality internally to the outside and you create a balance and this is the reason you get rid of the pain and cancers, Today's teaching is so powerful it's enough for you to transform yourselves, I have taught enough that you can take the leap into the soul and through understanding the control and

existence of your emotion that with it you control the dimension of the soul of the man which carries the same emotion as the physicality whether inside or outside the body this brings the peace and the prerequisite for world peace as it will spread to the others, When you separate the physical soul it still exists in the dimension of the matter state of the Gans of the planet until it takes a new shape and new life it never dies, ** When you Nano coat the soul comes out and embeds the physicality and we have to learn how to create what we call a Nano layer field of the plasma that becomes the soul of the man in interacting the physicality of the man, , The "Black Hole" even though it's black is the essence of life creation and controller of everything, Then the skin of the Cu is that black hole which absorbs everything but we know through it that it is one of the best suppliers of energy when you can release it as a Gans in the dimension of the state of the fields of the environment, I have made a wish for the end of the Rothschild's and Vatican so peace can come to this planet, New education website for KFSSI all organized for anyone to study plasma, The sale of plasma products through something like Amazon.com is being formed, Photo of African man digging ofundation for factory symbolizes the essence of the Keshe Ofundation, We change the game those who make the weapons become the terrorist nations, UK was forced to leave the UE because they didn't share the gold stolen from Libya, Hip replacement is a death sentence by the doctors because they don't understand about the femur and the blood, To cut the femur in a hip replacement is a death sentence the man will die in 2 years of protein deposits in the organs, Stroke patient killed by the doctors with blood thinner, When you find fault in someone it means the fault is in you so elevate your soul then you can help another, The soul can repair the physicality, In space when we get a virus we go back into our soul with the physicality and that acts as a filter and makes the body perfect, All of us know how to feed ourselves through understanding that we can go within your soul and absorb the energy from the fields of the universe, Man needs to understand how to manifest himself in a liquid state in the universe and we'll start teaching about these floating souls, When we travel the depths of the space for thousands of years where are we going to except going and enjoying and elevating the souls of Gods creations then we are true men of space, Marriage of souls is like a twin star (twinity), Stars are always created with a twin, Children of a twinity become the stars of the future, If we can't elevate our souls through the system of the body we can use the MaGrav, , .)

(:11). This year is to show the first lift and motion spaceship program. We should be able to see the first structures. The power supply for the structure and lift that is not matter state is in the reach of the KF in the trials and tests we have seen in the past few weeks and months. **The level of the Pl to overcome the field forces of the planet has been achieved. They have the knowledge and will enter the test phase**. (:14). ... there are at least **10 different nations in different parts of the KF involved** in it. ... (:16). I got a lot of communications from you that you are beginning to grasp the soul and this is nice. This is what we need to achieve. We are pushing the governments to move in the same direction. .. you start to trust in your emotions and capabilities. (:18). We'll take the soul teachings one step further and we have to **touch 2 other dimensions for life of man** in the universe, without them man will not have the full knowledge to live, coexist in all

dimensions of the U. As man we breath air and take sustenance from the matter level entity of this planet. **This is what we call ourselves, horizontal people, a lion is horizontal, his brain always moves in a horizontal line in respect to the magnetic field of the earth**. Look at all the animals, a snake always moves in matter level physical horizon of the planet, and these constant one dimensional movements creates certain amount of intelligence, but not the collection of it. When you come to **the vertical people, the plants, they have rooted themselves in the ground, with their soul in tact in one position**, because of that they have created a vertical physical structure, but they **still live a 2 dimensional life, which means they live from the gaseous and matter state part, very much like horizontal people**. (:20). Man has gathered knowledge and has become intelligent and we see this with many of the animals that have gathered this knowledge, they live in 2 dimensions. We lie flat on the horizon when we rest, then when we get up we go vertical, we get an attribute of 2 dimensions, that's why this movement of lying down and standing up, and being able to live independently on the same direction in a long cycle of life, and we bend to pick things up, and we cross the border of the horizon. We have to understand that just because we can bend to pick things up and then go back to the upright position, **but that we are very much like the planet earth, that 5 degree angle has made the 4 seasons**. This being vertical, horizontal or perpendicular to the earth has created the same condition. **This brings maturity to absorption of many elements of this planet, be it gaseous or matter**. In the U there are **another 2 dimensions, actually there are another 6 but man can't see them at this time** in his knowledge, but 2 of them we are in touch with, but we haven't yet gone into them in the teachings**. One is the liquid state which is very common in the U.** (:22). This is the state of the animals which live in the state of the liquid life, fishes and creatures who can live not only in the water, but we have creatures who live within the lava of this planet. **The lava is not just molten metals, it is full of life, extensively a life which can live and survive more in the Pl state then in the liquid state. ... now we see a 4th state of life but the liquid itself is in a thin state like water or in a thicker state like molten metal composition level molten metal.** These environments are usually controlled by the MG field forces of the center. Then we **have a 5th state which is a state of life in plasma, the state of the life of man in the dimension of the soul**. We need to learn how to survive we have gone back and overturned all the past fallacies of the man, how we breath O in our lung and it goes to our blood, then we understand that there is also a misunderstanding in what we call the liquid state of life. What we call floating dimension life where we have the horizontal and vertical, (:24**). the floating life which is in the matter state which is like water** is very much the same as the mans life, but in this dimension it has limited itself to again 2 things, instead of the gaseous it has made itself dependent on a condition of the liquid which is created from the composition of the G matter state of the environment plus the ligthest. **Creation of water in the universe, the way we see it is very common, one of the most common in the U**. Solid state life is common but liquid is more common. When man goes into space one of the first things he comes across is liquid state. **Sometimes due to the gaseous compression they become matter state with a Gans, sometimes the liquid in combination with the matter state which are field forces that are entrapped within the condition of the environment of the Gans of the plasma**. If you look at **how water is made in the oceans, due to the interaction of the plasmatic field of the center of the earth. It has**

made a "cup" and that cup has made a specific MG field which allows the amalgamation of the strongest G field forces of the gases of the planet plus the weakest, which is O and H, which leads to the creation of the water. If you look further we have done this before, **the lung of the man repeats the same thing, it creates the same Gans condition through the breathing of the gases and with it creates the moisture in the lung**. (:26). We see the repetition of the micro in the macro, we see it in the oceans, the same repetition within the lungs. **Then we see that life has a repetition, if you create a Gans environment, or what we call MG field in the Pl state and not in the matter state, the G field strength then the body of the entity anywhere in the U leads to the creation of water**, or liquid condition, where the interaction can be sustained and the life in the dimension of what I call floating, that is different then the horizontal and vertical life can exist. When you go to the central line, in a way vertical MG field forces like the sun and other planets, **these kind of planets usually sustain a huge amount of liquid i**n a given or certain position in the solar system. We see these **kinds of liquid conditions across the U, where there is no entity but you enter an ocean of the universe,** The liquid of the ocean of this planet is like a drop in the ocean in reality. **They are so massive but they go nowhere because they are created out of the condition of the 2 heavier M fields coming from different galaxies for example and in condition of the interaction of the weakest galaxies, and they create these conditions of liquid states in the U**. If we come to the point that this liquid creates itself a central field force, then it takes shape, it's like you drop it in a swimming pool and it has no where to go. (:28). **This is one of the problems our space development has to look for, the next step after you go to this, it depends on the material field forces take shape in the strength of the Inertia of the dimension of the strength of the entity, then you'll feel very much like magmas. Liquid state doesn't necessarily mean to be so hot as magma, but it creates liquidity in condition of the matter state**. The **difference between the water and the magma is huge but we look at both of them as a liquid. One is created out of the G field forces of the field forces of the matter created by the G field itself of the planet, the other one is when the field matter has reduced enough that it has taken the state matter but it can't release itself to what we call to solidify**. Solidification of an entity is an attribute of when the gaseous and matter state needs to interact, it creates a friction point that leads to solidification, we call it the surface of the earth, the continents. **We have to understand the true structure of the creation in the U, then we'll understand the difference of a liquid as a water and as a magma and why when magmas come we call it, volcanic eruptions, take the shape of the matter state. This is a huge conversion** and we look at it so easily, but in the space we have dimensions that are just like this, and we have to be able to submerge in it, and to live in it, then it comes to understanding **of how you can live in these conditions. (:30). Living in these conditions are very easy if the man understands the STM, then it brings you to the 5th state of life in the U. There are other states and as the man matures** understand that then he can expand his existences across the U in multiple dimensions in different galaxies**. Multiple life existence in the galaxies is one of the most favorite ways to live if you understand the life of plasma in the U, its motion, strength, conversion, where it operates in one dimension as a soul and in another as a physical matter, very much like the body of the man, we have the soul which we have contained through the physicality of the brain, and then we have the**

physicality which can be contained in the dimension of the STM. In the teaching of the past few months I have brought you to this point and many of you might have thought about it but you couldn't understand or comprehend what it means. ... **When we die, go through the process of aging and come to the point of the separation of the physical body, the man from the STM, this process doesn't happen by the flick of a finger, we call it aging, from the point that the body reaches a point of strength then it is like an automatic triggering**, which means the physicality gets ready to separate itself from the physical STM (:32). This is where see the aging slowly beginning, **at a certain time in the later part of our life we age very rapidly, because the conversion and separation has set in. This is one of the pitfalls of the physical life.** When **we reach a certain age there is a field strength level which triggers the separation of the soul from physical life, and when the trigger reaches the balance between the soul and physical strength at the lowest common denominator, this is when the physical death**, separation of the soul from physicality happens. If we, for example want to extend the life for 1 to 10 thousand years, is **to keep this ratio higher on the physical side, keep this higher on the soul side, so then you live on the soul level or the physical level. Drinking or using environments which are heavily (saturated with) Gans M field forces creates that dimension that the switch point doesn't come into operation. All that we are doing is draining the trigger point of the physical separation**. This is why I said that in the coming time man will live to a thousand years plus, because now you understand that in being able to absorb balanced fields in the need of the physicality the point of the **triggering of the separation of the physical soul and the STM just gets delayed. (:34). That's all we are playing with. You can delay it for hundreds of thousands of years**. It doesn't matter how you look, you can keep that balance, because the age look doesn't count anymore because in the space we don't age the way we age on this planet, because the condition of the aging is very much like the structures we see on this planet, if you go to place where there is a steady or very little difference in the bandwidth of the temperature, buildings last for centuries, but if you go to the poles where the temperatures are extreme the buildings don't last that long. The high heat of the summer or the cold of the winter, creates corrosion or break up of the structure, so buildings are more they are going into different cycles. **It's the same with the body. If we can create the Gans' and the field forces which the Gans' create or in the span of the U, that we can sustain the feeding of the physical soul which with it creates our matter state of physicality, then the physical condition of the STM in the matter state will last for centuries**. It's us in conjunction with the field forces of the environment that triggers that switch. It's like a central heating point, you set the temperature at 19 degrees the minute you go to 18.9 the trigger comes on and the boiler starts up. It's the same thing in the strength of the soul of the physicality which triggers at the point of separation of the physical soul and the strength of the physicality. (:36). **When the separation is complete the 2 entities take shape, the separation is complete without pain, it's just natural**. We see that, oh he died in his sleep. Because that **separation in the last hours and minutes is very much like when have hypothermia, the extremities get shut down until the point where the brain and the heart have to kept, the brain has the central STM embedded in it and the heart which is the central soul of the physicality, they separate**, then we see that each one takes its shape, most **of the energies that are at the soul level, have already transferred to the cells,**

what you call the soul level strength, those that are of the physical matter soul stay with the body, that's why when we die we see the physical entity on the table, we see it there and say good bye to it, but in fact the soul has already left the body, **but still has a connection with it because it was created out of its manifestation of the creation of the interaction of the fields of it, then we understand for the first time we are, we become, we extended our knowledge to the point where we can dictate, determine and control the point of separation, then we allow the trigger point to come. I set my time at 100,000 years and in that time I hopefully have enough to know what to get, what to sustain, and that allows me to separate the physical matter from the point of interaction, not the soul of the entity, or be it me. If you understand this, it brings us to the space technology very (:38). rapidly. This is a dimension of the existence of the STM in non-dimensional physicality**. Go back and understand the teachings about ILS and MS, understand the paper I have written called, "ILS it's the wish that comes true". Because at that time I could not explain to you as KS to understand. But **if you read what is ILS, it means I decide the point of separation, I wished for the end of physicality interaction at the level of the soul within the STM, and I decided this is what I want to do, but because I have cut the ribbon it doesn't mean that the rest have to also do it.** I am cutting my relationship but you are still my mother but I don't want to talk to you, it doesn't mean that you don't exist anymore. So you start cutting the telephone line, no letters, no visits, everything else is the same. When you decide in the emotional level that I want to separate it, have nothing to do with my physical life emotion, soul, then you have to push the button with the finger, we call it ILS. **If man has such a power within himself to switch off, then he has to power to do even a further thing which is I give more on the physical level to the soul of me that my soul encompasses my physicality, which means I live within my soul. For 60 to 100 years I entrapped, protected the soul to be seen with the physical existence now I transfer so much of my energy to, (:40). so much of the field strength of my soul, that I expand the soul, this is what we teach, and you have seen in dynamic systems**. This was the only way that I could teach that you could relate to**. Very soon we'll show you dynamic systems that you can see the fields,** you will see that, in a dynamic system like in the STM**, if we increase the field strength, which allows the expansion of 1/10th of the soul, which will encompass the physicality of the body of the man. Then we can travel the depth of the U, not with the physical condition outside, but with the STM which is the sun itself, but this time as we have the command of the emotion in the physical dimension, we can dictate the position in the U**, in a way we take the emotion of the man, as we have developed within the structure of the physicality to control the strength of the soul and the dimension of the soul in the depth of the U. **It's like a car, we get in it and are cocooned in it, when I go out that car is on its own but we have in it, it's a tent, we decide if we put the tent inside or if we go inside the tent, then we put the tent in a pack we call the physicality and then we can open through the energy which we give for the extension of the tent to cover our physicality which we go in it. There is no other simpler example to explain it with. But this sits within the emotion of the man**. Read the most powerful 2 papers I have written, "Unified field theory" and then the understanding of the ILS. (:42). my wish is my command. It's the wish which comes true. **Man out of fear of not understanding that he can reverse the position of the soul in respect to physicality, has never crossed that point. But some people**

have. We know we can do, it's a point on the extreme level just beyond the end of the spinal cord and the beginning of what we call the small brain. At this point we can switch. We go through coma, but if we feel past the field strength of the physicality, which is what coma is, **then we can allow the STM to expand to cover the physicality of the man. This is what all the teaching has been about. This is what I taught that you can expand your soul to accept other passengers, I explained that you trust the soul of the captain (of the spaceship) and you gave your soul to him**. Now you understand what it means. You become passengers of my soul which expands beyond my physicality and in trusting that I carry your soul with me, then I can give it back to you that you can manifest your physicality in any dimension. **Now you see all the teachings over the past years is taking shape in different dimensions**. In fact if everyone of us could **become detached from the physicality of the existence of the soul of the existence, that we can give from the soul at the level of the STM not the soul of physicality, then we can carry the physicality within the womb of the fields of the tenth of the STM**. We don't need to demolish or destroy it, or to leave it behind. (:44). **Now that physicality gets fed from the STM, internally** where up to now it was getting fed externally**. It comes to the very simple cores we saw before, when the soul comes into the center and the Gans goes to the edge, now it's the visa versa, but in this process, now the STM feeds the physicality but this time it's controlled and it's timeless, limitless, and becomes the life of the Creator**. Man needs to be able to understand this to become a passenger of the U **and this is where we are going now because with the development of the new plasma systems we can feed the STM at the strength that it can take wings within the space of the U according to the strength of the delivery of the Pl**. Many of **you never understood when I put the MaGrav system on the table, you looked at the physical electrical current, but I looked for you to understand that the physical current of the Pl of the entity. I gave you gold and you dusted it to nothing because you never understood**. And as you know I am a good actor, I pretended that I made a mistake, but there was never a mistake in it, it meant that my students never understood the totality, and when you don't understand, when you force feed a child he spits it out. You always spitted the most beautiful knowledge of the U because you looked for the current flow in the weakest, cheapest level of the matter, electron movement and then you said it doesn't work. **Now you understand that you have one of the most precious powerful tools in the U in your hands if you understand the work of the Pl, (:46). and the existence of the Pl and the life of the Pl in the U, which is another dimension, an extension and the dimension of the STM.** I gave you a system to extend your souls and you busted it to nothing, which means you never understood, which means you are not ready for it and a teacher who is wise never pushes but waits for the time, but the time has come for the man to understand this beauty, but it is for you to understand. **You look for 1 kw of electricity but I gave you a trillion watts of plasma**. I gave you the most beautiful ?? in the world but when you are blind how can you even understand the beauty**. I gave you the most beautiful creature in a MaGrav system but you were all too happy, it doesn't work. None of the MaGrav system you created ever failed, it's you who failed in understanding the concept of the technology which was given to you as a gift.** Go back and re-study, I gave you a beautiful sun and you looked for the crumb. It's not my fault it means you didn't understand. In the agreements we made with the

governments it pushes us to show the beauty of the creature. The KF will open negotiations with world leaders on the delivery of technology on the existence of the plasma and not on meager electric current 1 or 2 kw, because if that is all you value yourself at then that is what you are worth. **If you understand it then you can use the MaGrav system to extend it in conjunction with the STM (:48). to create a dimension of the structure which can take man into the U within seconds**. I made **man in the image of Myself to be my soul and not the physicality of my soul**. The teaching has taken different shape and some of the KF researchers are reaching that point. You are looking for kilowatts and I can show you megawatts with the same system, but that is meager electron vibration, the cheapest thing in the U. I gave you the Rolls Royce and you are happy with a donkey, you are quite welcome to it. I gave you the fastest flight system in the U ... It's no use forcing. .... Those who understand will create the condition to travel in the deep space. 2018 is the time for man to take into space, because **those of you understood the operation of the MaGrav system many of you should have already achieved the flight system, but you are looking for a vibration, I gave you the knowledge of the U**, now you understand why you got angry with me when I tell you that you don't understand.

Maybe now you understand that you never understood, and that you understand that (:50**). the condition of the strength of the knowledge. when you transfer and you give enough to your soul that, in that process you manage to encompass the physicality in the process of the fields of the soul passing the body of the man, which becomes purified which means it comes to the point of no disease, perfection from the point of creation.** It's like Dr. Rodrigo made a medical system with 20 MaGrav and tubes that you walk inside, **what do you do, you extend, in a way the tentacles of your soul's M fields to the dimension of these systems, but you don't see it**. **Instead you look for what I put in it, but you don't see what I have given for the soul to expand its strength to me and the physicality of the body, so now everything in that environment becomes balanced and you walk away without your disease**.

But still our medical teachers don't see it, they are looking for a rotation here and a Gans there, so many times in the teaching I explained it in a very funny but direct way. You drink the Gans and think it goes in there and gives me something, and I do (this), so many times I have told you that **when you drink the Plasma Water, rub some of it on your skin, where your pain is, then the fields work, what you drink becomes the STM, and what you put on the skin becomes the physicality of the man, and then you strengthen the soul of the physicality internally to the outside and you create a balance and this is the reason you get rid of the pain**. This is how you eradicate the cancer. What we see with the many doctors who work with us, I did this and I put that (:52). but none of them understood the totality of the knowledge. It's time to move (forward). In English they say, If I can't take you in a friendly way then I'll kick you and take your hand and you can kick and shout as much as you like, but I am taking you with me. **To get man in the space in 2018, if we have to take you we'll take you by the hand, but we don't force feed you, but we take you to a place where you understand the knowledge, which is within the STM**. The **teaching of today is so powerful that if any of you understood, you can change, create, develop conditions when you can**

manifest your own soul and see the transformation of the soul within the body of the man where it takes hold. What we'll see on the street are the shining stars and not the physicality of the man. But man prefers to get physical and get in the rain, hunger and everything else, **because he hasn't learned what he is carrying. I am a wise teacher, but I have taught you enough for you to be able to the leap, not of faith, but that of understanding the control and existence of your emotion, that with it you control the dimension of the STM and then you allow through that process, which is, the STM has the same E as the physicality, it doesn't matter if the soul or physicality is inside. In the physical dimension of the existence of the man we have entrapped the soul. In a way we protect the soul through our (:54). physicality, but now the knowledge of the man has reached a point that we have to entrust that we can let itself, show itself, as a STM, the man at that point becomes a shinning star. Then you get to the point of peace. This is the pre-condition, prerequisite for world peace, when as we become a star we shine and we enligthen others**. In fact, this was the condition of the **prophets of the past, they didn't see the soul of the Creator, they became the soul themselves and through it understood the field strength of the U within the depth of the creation in the Unicose**. That's all it is, now you understand. This is when Moses passed the physical condition of his own soul **and interaction of the fields of the 2 suns, one then reached the other and became what you call, changed the position, the Commandments.** What you call the fire is in fact the interaction of the soul of the physicality of Moses which passed the boundary of his physical existence and interaction, interacted with the soul of the Creator, because he was at that dimensional strength, which is the STM. I made man in the image of Myself, the STM carries the same as me, as the Creator. **In time the scholars of man will understand the teachings of today and we'll weep in how much we have wasted life. So simple**. Because **we have to cross this line, there is no choice the time and place for man to join the UC is now** (:56). and not in a thousand years. **The maturity has to come through the STM to understand that it is time to release the beauty** which we have held inside for too long. We send our children to school to get educated and they learn and earn ... and come to show the most magnificent systems which came from the elevation of the knowledge, now we have enough knowledge that we can allow the elevation of the soul of ourselves. **Thy shall not steal. We are stealing from our soul and as long as we do, we will not see the STM encompassing its physicality of the man. Thy shall not lie, we lie to ourselves because with it we find safety to stay within the dimension of physicality and not to face the facts, that within the structure of the STM is one of the most powerful souls, what we call the plasma in the creation**. Now it is for us to understand, how many human beings are happy to sit in these cars and take work for 48 weeks a year like a donkey, for 4 weeks for the pleasure of having a rest, **or we take to the STM and we have rest at every second of time in the U, as the time is timeless**, this time of 24 hours is manmade and the most ridiculous things we have ever seen. If you can get fed from the fields of the U, 80 years of a man's life is nothing. It is you who has put the time limit on it. (:58). Man should have understood when the physicians tell you, you have ILS and have 6 years, it means he gave you 6 years to separate the (? soul) body from physicality, but in that process you have elevated the soul to be separate, but what happens to **the physical soul when you separate? It still exists in the dimension of the matter state of the Gans of the planet until it takes a new shape and new life. It**

never dies. Man has enough knowledge now that if he finds the true ??limits of the creation of the life of billions of years ago. You can create dinosaurs anytime. All it needs to understand is to find the soul of physicality, embrace it, feed it and with it, it will create the soul of the creature. **This is what is needed that we elevate our understanding, that for us to become detached from the dimension of physicality**. I tell you something, many of you will now run to make these MaGrav systems where we missed out, and I feel pity for you, because the whole teaching is for your soul and not creating an energy system. **In the process of the development of the knowledge we have created a sense of mistrust within ourselves, and this is the biggest pitfall for all of us.** The physical language. When I started a life with Caroline, she said, then why are you here. I said, **we come here because physicality has a pleasure that we don't get in the other dimensions we can touch and feel it, we can lie and deception in it, and see the beauty of ?? in it, and then we know how we can handle it.** Now you understand how and what you need to do to progress. 2018 has to be the cycle of time when the man will take in the depth of the U through the understanding of his own soul and not through the spaceships. Those who take to spaceships it means they still need nourishing, to be given confidence to go to the next step. It's very much like staying in the nursery and refusing to go to school. (1:01). Maybe now you understand how and why during the past few weeks we went this way in the teachings. Any questions.
Q: When you talk about dimension is it the same as when (new age) people talk about us being in the 3rd dimension and move to the 4th dimension? No, no when I was working as a nuclear physicists at British Nuclear Fuel we were talking in 7 and 8 dimensions, those are matter states. This is the condition of existence, in dimensions of **physical life we talk about the time, temperature, pressure and everything else. In the dimension of the soul we speak about the strength of the soul, each strength creates it own dimension**, if you reduce its strength it becomes the dimension of physicality. Bahuala spoke about the 7 dimensions of the STM and even that just brings you into power to understand the next cycle. It's in the writings of Christ, or with the people who **wrote the true part which is with the Jews, he spoke about 2 dimensions, as he saw with the STM. Mohammad never came wise to it, because very rapidly he got into the tangibility of the beauty of the woman**, and then he choose himself 40 wives and ?? Q: In the MaGrav blueprint (1:04). the way you talked about the N coated Cu, **that actually we didn't need that N coat, the way the energy moved from the Gans state, to the N coat** and we come to the center of the Cu, ?? because our body is the same way, because we are a Gans, it is almost the same thing, am I correct?

Yes, I taught this before, you are the first one who understood it. I explained this many times, when you N coat you encompass the physicality, in a way the soul comes out and sits inside the physicality (? the physicality sits inside), where the physicality up to now was a total holder of the energy. What we do in the N and Gans production is the same as what we just spoke about today, **embedding the physicality to the field forces of the plasma, what we call the Gans**, or in a matter state, or what we call an intermediary state, or want we call N layers, it's the fields now embed the Cu, where the Cu is the manifestation of physicality of the existence. We don't see the Cu anymore, which is a real physical life, where it was outside and it was holding the M fields of the elements, now itself has become shielded, it has become super passed. If

you look the N coating of a Cu, and a Cu the way it was before, it is the same as what we have been talking about just now. **We have to learn how to create what we call, a Nano layer field of the plasma, that becomes the STM in interacting the physicality of the man, then when you have that field and you see why the N layers are so dark, which means they can absorb all the fields (1:06). then go back to the very first paper I published called, "The creation of black hole" ... (creation of physicality of the man and then you have that field and you've seen why the N layers are so dark which means they can absorb all the fields. Then go back to the very first paper I published called, the creation of black hole), where I say, the black hole even though it's black is the essence of life creation, and controller of everything, then the skin of the Cu is that black hole which absorbs everything, but we know through it, that it is one of the best suppliers of energy when you can release it as a Gans** in the dimension of the state of the fields of the environment. The state of the STM and the physicality of the man in a simple way has been shown through the N coating and the structure of the Cu**. If you trust to see a Cu to become black, (1:07). and then you create a Gans by taking its fields and then you understand in the process that we have shown we can use these fields to create the matter in the interaction. Why don't you trust in your soul that you can do the same. It's the fear of greed** and not the fear of existence, what can I do if (my thoughts are) how much more can I take, not what I can give that it can elevate the soul of the others. **As long as man always looks at what am I getting from it, man will always be at the bottom of the pit. When a man goes to the point of what I call love, what I can give unconditiona**l, man will move on.

(1:08). Any other question. **Q: Elevating your soul to incorporate your physical soul, is it done with the help of Gans or can it be done with time and understanding? Understanding the strength of your soul, that's all. If you need help you can use a Gans** but you have to understand how to use it. You got busy with making cores, MaGrav systems for energy and as a wise teacher I let them play, they are not ready for it. I gave you gold and you decided to play with the dust of the earth and that is your problem. Not my teaching **it means you are not ready**. The Australian government has announced that it is entering the production of arms, and spending billions for arms manufacturing technology**. I said, that is the end of the world, the time when the humanity has reached the bottom of the pit. Look at the history and you see who is behind it, those who use the soul in the name of religion**. (1:10). The **devil sits within the structure of the physicality of man and not within the STM and maybe that is the time when man moves within his soul**, that doesn't allow the misconduct of the physicality to take shape. I have another wish, in a way I have made a decision, I say, my wish is my command, or what I feel what is needed and it will be done. **We will see the end of the Rothschild's family very soon. And with it shall come peace on this planet, and those who connected themselves to it (Rothschild's). This is the end of the Vatican operation which is another arm of, kingship through the soul**, and we see the kingship which is through the physicality what comes through what we call ?? Boniface. These processes have to be met that man finds peace. **It's a prerequisite, when everybody sees each other as equal. Those are the abuses of the soul, the finances, and abuses of position**, all 3 ?? I wonder if they'll weep when they sit in front and beg for their lives, their ancestors which they carry with them. **We know that in the**

Vatican they said that this will be the last Pope and it's true. We shall not see another. (1:12).
Constitution is read in Farsi.
(1:33).
Jim from Australia created a new education website (kfssi.org) for Plasma Technology.
(1:54). It's **absolutely fantastic this is what we have been waiting for. One of the biggest problems that will come is when we don't transcribe these into our own language, then our nation as one of the languages of this planet will fall behind by not understanding**. Never look at yourself and say, my translation is not good enough. When you translate you carry the soul of the knowledge and not the writing and what we transcribe will be correct even if you make a mistake, the one who will read it will understand the totality in its own way. **Fear of failure is the failure, fear of making mistakes creates mistakes and this is what we have to overcome**. We have always been so frigthened of ourselves making mistakes and doing something wrong that we will be punished with it, that we don't do anything not to get punished. There is no punishment, even if you use a wrong word it means that someone down the will get inspired to create something good. (1:56). Maybe this is the reason we make mistakes in transcribing, it means we reach a soul that wouldn't have been reached if it had been the correct way. Making a mistake makes a man to think and when he thinks he sees a different light. Translate it in every language that the burden of missing someone because of language doesn't fall on us. (1:58). **By creating patents that prevent other from reading deprives man of that knowledge. Now that we have done away with the patents the only thing that will deprive another man is the language translations of the knowledge. It's the responsibility of every one of us** that what was hidden in patents is not hidden in language. .. what we just seen by Jim breaks all the rules of the present time that uses the patents to prevent others from getting the knowledge. (2:00). something going on in the background, **something like Amazon and Alibaba.com but for plasma technology to sold worldwide**. We'll leave it to the individuals and the company to create parameters. .. (2:02). As of 2018 we'll break into the world markets in a big way. We'll off shares to the public. We are working in that direction, it's about 12 months to 2 years down the line. It will become a publicly owned with shares. Our ofundation will be based on One Planet, one currency and the knowledge, no weapon, and not on BDP but on how much peace we create. In due course you'll here what is happening. (2:04). I was touched by this picture, Rick put it on. It's a breakthrough beyond understanding and imagination. It is soul breaking and changes many things for humanity. (2:06). It's a photo of a black man in Africa digging the ofundation of a KF site, production, research lab and everything else. (2:08). **It shows a black man digging the ofundation for the knowledge of man for the future. If he knew what he is doing, digging to educate the white man in Africa and the rest of the world irrespective of color and race, this symbolizes exactly what KF stands for. We are literally building the future on the back of Africa. It's symbolic of what is coming. The technology was given freely in the West but we didn't appreciate it, we made enemies out of it. Now in Africa as we have seen we support it, through the production** systems in Italy and in Ghana and back to Italy. (2:10). Every time we open one of these research centers we invite leaders because this is the path to the future.

(2:15).
When a leader produces arms and when that bullet kills someone then that leader has to pay with his soul for that bullet. If he understands this and he has respect for his own existence, he would demolish it. On the other hand to fight is too difficult and takes too much energy. (2:20). I walk away from these kind of situations. I was with a master at the diner table and when I explained to him what is about to take place and what we are doing and want to do**. He said, everything within my power will be given to support this, because we have to teach the STM to elevate the soul and not to get in touch with the physicality**. Many world leaders will move towards the KF in the coming time. It's what we have done. .. **we see terrorism with one man with explosives in his back pack explodes himself to show what has been done wrong to me or the other people, and then we blame the other nations for the attack of that backpack. The way we think at the KF is that any nation involved in arms manufacturing becomes a terrorist organization. We changed the game, if you don't make the arms then there is no one to use it**, then you don't encourage to use it. Because you made it now you have to sell it. Terrorism moves from the man who shoots the bullet to the man who makes the bullet. (2:22). Later on in the life of Al Capone he hardly ever shot a bullet, he just gave the order and they shot the bullets. We'll get rid of those Al Capone's that there is no bullet to shoot. The terrorism has to be shifted to the nations of those who build it (arms), if we eliminate it at its root there is no need to see terrorism at all. This is what the world leaders are becoming wise to. We are putting financing and developing a nation against peace.
Benjamin said to me that those youngsters who we are paying so much wages in our factories, they have started spending ..
(2:25).
(2:28). **Q: Is the Gans made by someone who serves others as good as the Gans made by someone who only does it for profit? At the moment we are making certain directional developments that we have to ofllow, we have to be able to use the present structures to infiltrate into the present structure so that we can dismantle it**. At the moment we are talking to militaries to get them to put down their weapons.
(2:31).
.. **The UK was forced out of the EU because they didn't share the loot of stealing 140 billion in Kaddaffi's gold in Libya. The British Monarch are planning more wars**, they didn't make that much in the WWII. The politics needs the new knowledge to make gold you don't need to kill to get it. If we value the STM as gold then we truly have achieved because the STM is there to be respected as gold. Not the physical gold that has no value. If you can hold your hand out and create gold, we are getting to that point.
(2:36). **I wish all the best for humanity, we have a rough road ahead**. ...
... you're so humble and patient, it's not human.
(2:38). **Q: When we say or think that this man is intelligent or these flowers are wonderful we are not just observing with love**, we are already making a value judgment and in some way assume a difference and even if a positive judgment ... E is present and it connects the soul of physicality, the STM, and soul of plants, can you explain? **We always judge ourselves**, if we like a plant, but we are not supposed to judge the others, but we appreciate the beauty of something. When we say we don't judge and when we look at something we have to close our eyes to the short comings of the people,

this is a judgment. To see our own faults and to praise the beauty of the others. If they fall in the process of praising their beauty it means they haven't matured. It doesn't mean that we have judged. (2:40). This is something we have to learn**. I get told lies right in my face and I just say yes, but in the background I elevate the soul of the person, because it means that he hasn't understood what I mean**, he gives me a physical word but in the background I see the soul. If you understood the teaching of today**, I become inside the STM that I see their soul and this seeing the STM which covers the physicality because you don't see the soul you see the aura, has put fear in many world leaders** in how I see the work and explain it. This has caused a lot of shaking inside many governments because they are looking for spies, but they don't see the spy is their soul. (They say) we would like to be peaceful but underneath we sign for arms. We see the soul, then you find a solution for it. The solution at this time is to not judge, just elevate. **If you judge a beauty it means you give to it so you are a lover. If you judge and are demeaning it means that you need elevation, so you judge yourself and not the person**. From a Persian poet, when you judge that there is something wrong with somebody, (2:42). you understand it because it is in you and not in them. When we judge that somebody's wrong it means that there is something in ourselves that is wrong that we have recognized. **We don't judge and we have to be a giver**. I don't judge, I understand and then **I make a move according to that, that the soul accepts its own misconduct**, its own shortness of understanding. **It's very interesting the more mature we become the more we'll see. It's very frigthening for may world leaders at the present time, how I know what they are up to, and it puts fear in them**, they simply look at what I explained in the last teachings of the last year and look at what is happening in the far east, there are words about peace, because I opened the hand of war. But this is only mirage, a façade. We have to promote peace through self conduct and that is all and the rest will ofllow. When you sit whether with an ambassador or layman it all has to be the same, when the physicality is different but the soul is the same, then you see the soul. If we take a picture of the aura of a man and now with these machines they can photograph the aura (2:44). **put a man in the Plasma Medical machines and take a picture of the aura, you see the light of the STM**. In trying to feed the STM it's much stronger then the physicality of the material we use, in trying to feed it, the STM reaches beyond physicality and in the process if the setting is correct then we'll see a change in the physicality or eradication of the pain or disease. I was asked by one official to help his dying father. ... it turned out that the operation to save the man is in fact the cause of the man's death, because the doctors didn't understand the process and it's the only process left for us. This goes back to the medical teachings. When I share knowledge with one I do with all that all stay equal. (2:46**). They have gone through the hip replacement and after a couple of years the patient is dying of massive deposits of proteins in different organs of the body. The present science has no word (definition) for it because they can't connect it to the hip operation. You never cut a bone, if you change the hip you do that but never touch the bone. The femur is a sacrosanct part to the life of the man**. If you touch the femur you have sentenced a man to death and no doctors understand this. **The doctors have amputated the head of the femur and replaced it with titanium and at the same time put a titanium hip** to help the man to walk. For our understanding having deposits of protein has nothing to do with the operation 2 years ago. But in fact it does. If you look at it the way we teach and

understand the totality of the operation, it does. The doctors have to become wise to this. They have cut the top of the femur and replaced it with Titanium so they can have something to screw into. But do the doctors understand their training or are they ignorant to the work they do. It's total ignorance. By cutting the femur it's like cutting an army and destroying its kitchen, how are you going to feed the army to fight. (2:48). **They cut the femur on the top, now you have to understand the bone structure, as in our teaching is absorbing lymph through itself (through the micro channels) to create the AA with the addition of the Ca and different strengths depending on which part of the bone marrow this AA goes to, becomes part of our immune system, becomes red or white blood cells and everything else, without the femur man is a dead man, because it's the production factory. Now they have cut the top of the femur but the bone is still absorbing, converting lymph through the structure of the bone into protein, the only thing left for it is to go out somewhere or to stop working. But the whole process of the heart is sucking on it, and one end of the femur is gone so the other side has to do the job of both sides. So the femur is changing, sucking the protein out of the bone marrow, but the bone marrow has no capabilities, just like a blood washing through, you create a dam at one end and now you opened a hole on the other side, so the protein is getting sucked our of the bone marrow on the end of the femur, at the bottom end of the knee, and then a protein without a destination is created. So what does the body do? It says I have it so I keep it until I need to use it and then it deposits it in the organ, which eventually creates the death of the man through kidney failure, heart failure, because of the saturation of protein**. If you teach the doctors to not cut the femur, and then teach them to support ?? like the ?? and everything else that comes through the femur (2:50). you will not kill the man 2 years later. The actual death sentence came with they cut the femur. It's not for us to try and find a solution for the protein, because now we understand what happens farther down the line. It's for our doctors to understand. It's the same with the STM, look to where the soul has been hurt, understand it and elevate it, not just go in there and cut the flower that it looks good, because when you take 1 petal out of the rose it will die. How many petals can you pull before it dies. Unless you sort out the plant, feed the rose that it can hold its beauty. And this is what the present medicine doesn't allow us, because we understand the totality and can work with it, because then there is no use for them (they'll be out of a job). ... **Someone asked me to help with a stroke patient, but in hearing the story I realized that there is no choice, the damage is already done**. When I start analyzing what they tell me, I realize that the doctor has killed the patient and it has nothing to do with the stroke. The person was temporarily loosing their eyesight and temporarily becoming dizzy. The doctors didn't understand that there was a blockage in the vein on the side of the neck that needed opening. This was going on for too long. the brain has parameters for ?? , (2:52). the ears and muscles of the face, continuous blood, and in that part, part of the blood circulation is needed to transfer blood out of the brain which allows it to work, to carry on the work of the STM to the physical condition. This is why we have such a heavy blood flow into (our brain //), our skull. As there is a blockage the heart is trying to overcome. **The heart has to change its position of the amount of energy it takes from the blood which comes from the lung, so it has changed the condition of the lung. They told me the man had a flu, then it became a heart problem, and now he has a stroke, what can do? I said, guys, your doctor has killed**

your patient, and he'll be dead in every condition you look at. It's because he never understood that there is a blockage in the system. **The brain hemorrhage has come because when they took the patient to the hospital, he was given an injection of blood thinner, it thinned out the blood and opened all the blood clot in the brain, the artery (means the neck), so bit of the blood that didn't open (or thin out), with the blood thinner have shot themselves into the brain and caused the paralysis, or what they called a brain hemorrhage through blood**. If the doctors are wise and they understand they can take a right step, but our present physicians are not taught the totality. Instead they are shown the end product and told to find a solution. The Pharmaceuticals have the same problem. This is the first time in the history of the physicians, pharmaceuticals or medicine, that we change (2:54). the source of the problem and not the end product (means not the root of the problem). When a man has a brain hemorrhage through stress all you need to do is to elevate his soul, the emotion, then with that you reconstruct, you allow the body itself to build its own brain cells to recover from what he has done to itself, all by accident. We understand the process, this is how we changed the life of Naomi. her brain doesn't show anymore that there has been an accident. **Because the technology is used in its true sense. It's the same with the STM in pain for the acts of its physicality, it radiates, but it is blocked by the soul. If you manage to elevate the STM to bypass, to encompass the physicality, you will not see the physicality, unless it is in a perfect condition and it would like to manifest itself in the physical dimension. It all goes back to the same teaching. Do we judge or do we understand the judgment which is us. Do we elevate or when we see wrong, it's our problem, not theirs, it's us who has to elevate because if we see it, it means there is a fault within us that we see such a fault**. (2:56). if you don't want to be standing out become part of the same. If you can change to become part of the same it means you understand what the same is doing, which is not what you want it to be. We are past of the point of telling or preaching, we go back to the source of understanding, the essence of creation. This is the difference between the KF and all the teachings of the past. **The emphasis is on us to understand, only on us. Will we see a beautiful flower, it gives me such a pleasure, in turn I give back, I love you, you are gorgeous as a flower, which is the only way I can give to you through my emotion. Why do the flowers change their color and shape to become more attractive. they are literally like western women with all the makeup on, enjoy me, I am here for pleasure.** It's the color, nectar, they give us, it's the color combinations, how they position their petals. It means the flower understands, that it needs to give the beauty to receive the appreciation. Why do we need to judge, we just appreciate the beauty. It's for them to correct themselves**. I see many people around the KF doing wrong**. I sit, I get angry and frustration, but at the end of the day, I say, I have to elevate their souls that they see their own mistakes and wrong doing, it's not for me to judge. It's me who doesn't understand, who has seen the fault because within that fault there is something inside me that sees it. **I need to elevate my soul and with that elevation I can elevate theirs. (2:58). The point of all these teachings are for us to understand our own soul and nobody else's**. And how we can become ?? givers and not just to take. Then you can judge and as it says in the teachings, thy shall not judge, you judge only your own soul and conduct of your own physicality in respect to your soul. You will find out that the Judges are the most guilty people in the world, because to judge you have to understand the crime and you

only understand it if you have done it yourself, ???? Any other questions. Move to understand, there will be no judges or police force, we don't have it in the U why should we have it on this planet. **... the black is the physicality of the man, it absorbs everything and doesn't give much. (3:00). If you allow the soul to penetrate it, it will shine. We are not preachers, we understand the totality so we can speak clearly about whole thing**. Q: Stella from Argentina. i understand everything you said, I am confused if we need to learn everything then why am I for example allowing a doctor to kill me, for being asleep or unconscious? (3:02). **Why would my soul allow it**. Can I reverse anything the moment I am awake. **The problem with physicality is that it takes course of action with other physical entities and we can decide to go through the whole process if we like, if we want to experience it again, or we allow ourselves to be judged by a doctor because we forgot the use of our own soul. Christ elevated his own soul and the physicality walked, it means the soul can repair the physicality.** But we don't want to accept the soul because then ... we choose the path of the separation of the soul from the physical soul, because we don't see any end to what we call the suffering. Any of us who understands how to go through a transformation of the understanding of our own soul. **In deep space when we come across an injury, absorption of the filed into our physical dimension (3:04). where we decide to manifest our physicality, then we see the problem. What every man in the universe who has been increased to this level of understanding does, is to go back into their soul, it's a hiding place. In this process of going back through, the physicality which is a matter state has to go through like a scanning system, it receives energy, and gives energy that is in too high of a balance for its soul, when the physicality goes back inside the soul it becomes perfect**. You don't find an injection ??? of a virus, you send somebody to earth. You use the dimension of the strength of your own soul to achieve what you call life, for the protection of life. So the old man knows what to do. If you go back into the understanding, **the biggest problem has been the creation of religion. They have brought man to the point of not trusting himself**, and then those who understood the religion put a science next to it, and now they say, show me. You are ignorant, that's your problem and not mine. You said, why can't the man do it. There is a trip of the Pope into your area in past month. If I was there I would say to him, you say these guys are lying, show me the proof, so it means you are one yourself. The whole structure is that we have allowed people to abuse us and create doubt in ourselves. This is the problem ... even at the point of death, the separation of the physicality from the STM you can return yourself, if you understand that there is a need for you to be here that you have a mission to carry out. Babs did it (Bahai), (3:07). **Christ did it when they put him on the cross, so why can't the rest of us do it. We can all change even on the death bed if you can understand how our soul can change**. A lot of people do it. You **have the cancer and you say, oh, I ate the cabbage and the cabbage was. No, it's your soul that wanted to change the condition because you understood how you created the cancer inside your soul**. Physical damage we can't change, even that with the knowledge we now have, now a days we can do. But what we do emotionally in the physical life, if you are hit in the ?? and you are in 200 pieces and they are just keeping you alive, you still can change the soul and manage ?? the physicality. It's been done many times. (3:08). How many people have had the cancer and they cured it. No, it's because you elevated your soul and you understood the mistake of how you created your

own demise and now you don't want to do that. If our doctors go for the STM any of these gimmicks, rotating motors or Gans this or that, it means they haven't understood yet. I just go for the STM but when I do, I want to know if that soul is happy to be in that condition, otherwise I force the condition, I force the condition. I make the totality available. Anybody can walk off the operation table without the need for it, we did that with Naomi. Q**: If we are here in an environment natural, political or violent that makes us see things**, I mean to not see the beauty, how to elevate when the environment is so difficult. Is that the lesson we are supposed to experience now, discovering all this knowledge , it's difficult to see the beauty because your emotions go of because there is so much injustice, it's difficult to make a living? **Yes you are correct, but go a step forward or 2 steps backwards, either way you want to look at it. Partially because we are teaching science at its root, (3:10). partially because of what we have been taught, our prejudices about what we are receiving ?? let the past go**, but in reality, if the economy is based on gold ... you can create enough gold to buy every Rolls Royce, but how many of us are prepared to do that. Because we haven't understood, or is that machine, the STM. So who created this poverty, because they took the trust out of us. The same is with our health and everything else we have, we are all rich but we don't know how to get to the money we stored away which is the knowledge of the STM. It saddens me to see people going hungry on the streets, **all of us know how to feed ourselves, all you need is to understand that you can go within your soul and absorb the energy from the fields of the U. We don't do it because we lost the knowledge and with it came the fears**. No one needs to go to bed hungry, but with physicality we have to show this or that. ?? because we supply it. (3:12). The speed cameras on the street, the same system could be used on the street to feed the man. The camera has to send something to receive the physicality to absorb. ... we abuse the knowledge and then blame everybody else. In these cameras it's the same field, if you can absorb and take a picture, it means it receives it and it has to send something when it comes that it can receive it. .. it has to detect you ?? All these military satellites that are continuously beaming down to take pictures why not fit them with the systems that can feed the nations. It's very simple and requires only a little adjustments. we have to teach how wealth can be appreciated as the wealth of the soul (3:14). and not the physicality. ... we are build a natural plasmatic field .. I feel that I am not strong enough I always fall down in the game again. No it's not that you are not strong enough but **you have to find a way to allow it to shine all the time. None of us fails, it just we decide how much to allow it to shine. The STM is like a sun, it is a sun and it shines, we put filters to block its ability to shine**. Q: I put all these heavy emotions on my body to block my soul. **Why do you put it on your body elevate your soul, work the other way around, then the body becomes part of it. (3:18). Try to interact with your soul and not with us or humanity because then you reach everything**. In the coming teachings we'll start teaching about **the floating souls, the fish in the liquid, because that is a different type of living and way of understanding. It's different then in a gaseous life but in principle it's the same. Man needs to understand how to manifest himself in the physical dimension in the liquid state**. It's no use having a parachute and jumping out in the water if you don't know how to swim. As part of the teaching we have to understand **do we change our soul in the liquid to become a floating soul, or change it to be protected by the physicality and to what extent do we allow the physicality to**

interact with its environment that it exists within the liquid state of the water, or liquid anywhere in the U, it doesn't matter if it is boiling water, boiling CO2, or something else in another position in the U. (3:20). Q: (man talking about himself ..) (3:25). There is so much shown by Jim on the new website. It says, where science meets the soul of the man, **through the knowledge of the science of creation we understand how our soul is created from inception. And now how it ends which we never before understood. And in this process it's for us to determine the time gap between the 2. In that time gap, what we call the life of the man, it's what we do with it in the depth of the space that matters, not what we do in the physicality of this planet**. In the space there are no factories to go to work etc. it's ... we have a training for it, but we never understood the training. When we go to sleep and the soul is free, then where does the soul go. **When we travel the depths of the space for thousands of years, where are we going to, except going and enjoying and elevating the souls of Gods creations. If that is our purpose then we become true man of the space**. It's not just to go and see another sight, a another Niagara Falls. (3:28). Rick says that is an interesting topic, that there are things to do in space. Exactly, because it's timeless I can't wakeup for breakfast because there is no time for breakfast, no sunrise or sunset. **Isn't it better to travel in the space with his own soul, because traveling with the physicality would be so boring, how many times can you walk around the SS, then you would become a mental case.** This is why we teach the conversion of the physicality to the STM. It will become very boring in the space if we attach ourselves to the condition of physicality, but a lot of people will do. .. It's easier to travel with the STM in space, then there is no time, as there is no time in the life of the Creator so why should there be with the time of man. (3:30). ... we have to gain trust in our knowledge that we can create anything ..

(3:32). (man continues talking, about partner not understanding ..). (3:36). ... about getting along with your partners and other knowledge seekers ... **all these MaGrav etc. will come to be part of the elevation of the STM. Would we go and buy a water for say a diabetic or would we create a condition so the soul elevates that he can transfer itself through that there is no need to have a system for diabetic. This is the ultimate goal** which is freedom of the man from physicality and openness to space, but we have to go through these intermediary steps. Every man knows even the man in Amazon. (3:40). **Q: About the freedom of the soul then what about marriage?** Don't go there now it's a bit too early to teach that. **The marriage of souls is the most beautiful marriage but sometimes it takes in a position of the strength**. In English they say soul mate. But in the universal language it's like when you balance, ?? **it's the strength of the soul of the partner you find in the space. The easiest way to explain is a twin star. You never have a single star, it's impossible to find a single star**. At the moment of inception it is always 2, even **a neutron has a twin,** but because we don't see it. (3:42). we only see 1 atom and not the other (invisible). **When you have the interaction of the fields, say the earth and the sun leads to the creation of such a beauty as a man, you can imagine what happens when the souls create from their interaction. It's beyond imagination, but you need to bring them close enough that they can interact**. We see daylight on one side when we interface with the sun and dark on the other side, and when you bring 2 souls together who are of the same strength, it **becomes a marriage of 2, a "twinity", and the children of this union are the stars of**

the future. It's **beyond explaining because I know this feeling very well**. It carries all the attributes of the physicality in the dimension of the soul, and man has no understanding of this, it creates a lot of jealously because they don't understand. Q: That's a beautiful knowledge**. I think everybody is going through a feeling of isolation feeling lonely, because we don't have the sharing knowledge aspect. Talking about this I think opens a door to every soul** (3:44). to take responsibility of liberation of the limitation of what is given and receiving, because we are limiting ourselves to give. It's like keys, opening doors for more Pl to flow. ... the joy of experiencing because otherwise what's the point. Let me explain, when I hear your accent it brings me a lot of joy .... we love somebody we have no connection with, but through the person we love (his cousin) we share the love with (the other, lady). Amazing how the voice brings the love back. (3:46). **God said I made thee to have children that through their love they may love me**. ... It's us who needs to understand, we create the limitation, even the limitation of our own soul to pass the boundary of our physical self. This is very hard for a lot of people, if I create the soul of giving then it comes back and becomes one. ... **Now we understand how to elevate our own souls through the systems we developed (MaGrav), if we can't do it in the direction of the physicality of the system of the body**. ... .. would **we join an Internet match making sites to find partners for our souls for the universe, it's one of the problems of the space, I have seen it before (other planets) and I am sure it's going to repeat itself with the mankind, where we love another because of the level of the strength of the soul created from the dimension of the AA of this planet, and then we fall in love with another dimension of the strength of other creatures of the universe which has the same.** (3:48). then **trying to match the 2 where one is physicality and the other is a soul, is a horrible time because they won't be able to understand the other**, unless they are light and educated to understand them. It's not having mistresses, but understanding that the loving is not creating ... we look at it as a physical interaction, rather it is being able to give unconditionally to elevate the other, and this is the beauty of the creation, and then ultimate goal is for those who **elevate to the ultimate point that when they see, feel the field of the Creator they give (themselves) entirely to the Creator that He shines better as part of them. This is the ultimate, not sacrifice, but the maturity of understanding. Not many creatures in the U have this level**. They reach so high that they touch the sky, that they touch the soul of the Creator and many when they reach that point there is no need, you become the lover of the Creator because by His creation it has lead to the creation of so many things, to be loved. **Man one day, in thousands or millions of years will understand these words. I have been there and it's beautiful to be in that position**. There is a certain position that I came across very recently, that by looking at a picture it brought me back (3:50). to want to be home and I said to Caroline **I want to go home I have had enough of humanity, because one physical picture (showed) what I have sacrificed to come here to get mankind through, and it's enough when you see it you remember the past and understand what you have left to be here to change (earth).** For a second an image is there and a feeling and emotion is, I am not home I want to go back. But it is worth it because you take the whole humanity with you and all the sacrifices mean nothing. **Then you understand that it is the love of the Creator that allows you to withstand such a condition.** We have to love and to understand that is why I set out to teach from the beginning to the end. **It's not the end but understanding**

how you elevate yourself further because there is more to it, now you have understood that the soul is created from the beginning and now you understand it is the soul that has to say what you created with it, at the end. Are you ready to sacrifice what created you, has the physical matter lead to the creation of you as a soul, that you give from the soul to protect what created you, and then you go back to the same question, would you go back to give to the Creator whose love lead to your own creation that you become part of him that you can lead to more loves to be created. This is not theology anymore, now we understand the process of creations. **How much of our soul are we prepared to open up to become part of the totality**. It's us who lie to ourselves, because we have all the knowledge to become**. It takes man 1 second to achieve the light of the Creator if he understands it**, and (or) man can travel millions of years and never reach. Thank you very much. (3:53).

(3:55) Quotes by Mr. Keshe. (on the Forums, community, quote quest) "The plasma of a single H atom covers the whole square meters". The secret is in your brain". Now he says the secret is your souls. ... how to search for quotes ... (4:14). The book of the soul. (4:16). Q: You said, later you would teach about the memory of the man, is it time for that? No, to teach that requires a lot of strength in the STM, because why do we go back to the memory, do we have enough strength to face the memory of it and to be able to handle it. I can take you back to seeing the memory of the Christ, if you were present at the time. You do it yourself. I can take you back and I promised that you would be able to do it, to see the condition of the soul of the Moses. It's very easy because it's within you. ?? what would be the reaction when you would see the true essence of say, the crucifixion of Christ, many people were there and the genes has carried the knowledge across. What if you are a Moslem and you are a true ??Saihid, then I can take you to what Mohammad promised must be done, how would you feel, are you strong enough to be able to do it. (4:18). It needs a lot of understanding to understand the whole totality to be able to search for the truth within the physicality, and that can ??? Q: I think we already know, especially the K Seekers who have been here for years, umm, in a way. I hope so. There is a path to the memory which you go through the soul. It's written, it's there which we gather. The physical brain disappears in the dust and as we understand more and more the time will come that we'll do, you will do. Whatever I have taught is within the capability of the man and his soul, it's just for the man to be knowledgeable to be able to do it. Quote: The captain is the STM and the spaceship is the dimension which the soul decides to manifest itself. (4:20). We choose our SS to be our physical manifestation, we can make any ?? our SS as we can do in the space. The next 2 weeks we'll answer only questions, but Dr. Alzar is only allowed 3 questions in both sessions.
.. I promise I will make Africa the shinning star, that way we'll all be equal.
End

210th Knowledge Seekers Workshop - Feb 8, 2018

(For questions, Global warming is a fallacy warming is from coming being drawn in to the sun a natural process, The more CO2 you have the more O the plants create and that combines with the H and this is how water is created on this planet how the oceans were

created, The planets 5 degree tilt lead to plants and to the water earth started out a dry planet, ,)

(:11). **We'll try to answer your questions this week and next. Africans are bypassing west in what is happening there in Pl. KF has entered a massive change in next 5 weeks**. (:14). An international KF research center to open in Arizona, scientists from all over the world invited, including , Iran, Israel, Russia, and China. **Salaries will be $250,000 per yea**r. this is very important for our work, 2018 is the year for our entry into space. (:20). Some scientists will be half a million. We can meet all the demands this year. .. the documents were signed this morning. (:24).
(:29). Any questions. **Q: What is happening with global warming throughout the solar system? Oh my god you believed the lie. The greenhouse effect was the brainchild of a Dutchman and he managed to sell it**. It doesn't exist, what we see is part of the cycle of part of the planet and just repeats itself and at the same time we are continuously on the move toward the sun. The temperature of this planet over time will go higher anyway .. a lot of people made money out of having people believe it. It doesn't exist. **Q: I am asking about the rest of the planets they all seem to be doing something? We are continuously on the move, it's dynamic. It has a heartbeat**. We are all moving closer to the sun. **From the time of the inception of a planet from the far corners of the solar system, there is only one destiny which in the end is merging back to the sun**. It's like saying the clouds in the sky will never come down, one day they become moisture and they rain down. **It's the reality, you have a G field mass of a planet when it becomes a planet, and then you have a MG field mass of the sun, you get pulled in, and as you get pulled in you get warmer**. It's an ABC and nothing you can miss in between. Unless those who are Dutch and they can call it global warming and everything else. There is a much truth about global warming as about father Christmas. If you believe in the physicality of father Christmas, Coke A Cola managed to sell it to you so beautifully, then you believe in global warming. **Scientifically it doesn't exist because there is a balance in the whole cycle of life on this planet, and the changes are needed for a planet to be able to carry on with its work. (:32). The amount of energy we are burning is nothing compared to the amount of energy we absorb from the solar system, galaxy and universe, and internally from the heat of the earth.** If you understood the teaching on the horizontal and vertical beings, in the past few weeks, you understand **the more you have CO2 the plants absorb, the more O you get into the system, and having O with H you increase the level of the seas. This is how most of the water on this planet is created.** The water didn't come from nowhere, or the earth didn't cry to create it, the process of what we call the breathing of our plants allows the **further increase in O, which in interaction with the fields of the other ways which the H occurs on this planet leads to creation of what we call the water**. Now we understand the process. **Just ask yourself a single question, where did all this water in the ocean come from.** One drop and 2 drops or did someone suddenly pour it in from planet Zeus. **Part of the process of the plants, those that we planted herbs, grass, whatever, was for the production of O, but there aren't enough animals on this planet to breath all this O in. (:34). So then we should be O saturated, the extra O is converted with the H, in the interaction of the pull of the system, as you pour in more AA to feed the plant, it itself leads to creation of vapor, or what you call water**

molecules. This is how water was created on this planet. if anybody can show us another way we just accepted these oceans but where did the water for the oceans come from? **Earth was a dry planet, with space debris billions of years ago, in a creation of, just the tilt angle of 5 degrees has (lead to the) creation of the whole system which continuously produces vapor which is water**. Ask yourself a single question, there are only 7 billion humans, this is nothing, do you know how many trees, grasses, weeds there are on this planet. There are only a thousand lions left, do the ants breath so much O that they need such an amount. The process of life on this planet leads to creation of water moisture and the more CO2 put into it the more O it creates and more water. What we extract from the ground and burn is nothing compared to the whole system, it's a nonsense. When I work out the equations for the balance of materials on this planet it doesn't make sense. Even if you have 7 billion cars it still doesn't effect that much (:36). the balance on this planet, because do you know how many trillions of trees there are on this planet. The guy wanted to sell some trees to cash in on the idea, ... the whole lies about it surfaced... the sun has a heartbeat, the same as the earth and a man has, and that heartbeat creates a balance of fields and the distribution of the fields (:38). across the solar system. the solar system is not the shape of a ofotball as you think, it's all twisted and crooked and where the fields from other galaxies and planets and everything else, exert pressure on it. It's not clear cut, the pressure is not always the same, it's like a balloon and 10 of us pushing on it with our fingers so it goes in all kinds of directions. The simple idea of time and position is gone because now we see and understand more. We accepted all the rubbish we were taught in one go, just look at the map of Africa, all of Europe can fit in the Countries of Sudan and Zaire, but we liked it so much that we accepted it. Where is the rest of it, Ghana etc. do they fit into Europe. We have accepted a lot of fallacies to fit those who wanted to rule. Now that we are all equal we can accept the facts and the reality. The more CO2 we create and the more plants we have, then the more water we'll get on the surface of this planet, this is a fact, but at the same time as we come closer to the sun there is a conversion ratio of the fields, not the matter state, which creates new conditions. We'll see the creation of new heavier materials as we go closer to the sun. Because the ligther materials will literally dissipate into the background to be captured by the next cycle. But these things take billions of years and we don't have that time frame to watch. Maybe now that man has the opportunity to live for thousands of years he can observe the difference but 50 to 100 years is nothing in the cycle of the solar system. (:40). Without expansion 01

(:49). Q:

(1:00). Q:

(1:08). Q:

(1:14). Caroline reads Dutch version of Constitution. (1:34).
...
Q: Do viruses have a soul? No virus is a field, it's an energy transfer, whatever it attaches to it has the soul of that... that leads to the life of the entity. (1:36). Q: Is it like a MaGrav? A MaGrav has a soul ... but in a way, the fields of it if you can contain it that it

can interact, they do. Viruses are usually mono-energetic or at least they have the combination of the energies of the AA that they attach themselves to, or what we call the functioning system. Because viruses are free field flows in the U, that if they match yours they'll attach themselves to it, they don't fields ?? traveling transfer ??/ in a way, of packages. There is some misunderstanding in the existence of the viruses on this planet. We say such a virus has taken over and we have this virus flu and that one. We have to understand how viruses replicate themselves, this has never been understood. It's like when you have dry land and it rains and then you fish forming out of nowhere, there has never been a fish there and then they appear. It's a combination of ?? transfer of a MaGrav system that we see, a condition created, then it replicates itself. A lot of you who work in the MaGrav and Gans production systems, you must have seen this in your Gans productions. Once a cell finds a balance energy which is crossing or passing at a given time, or it can repeat itself in a given position. (1:38).
(1:46).
... Boniface wrote to EC but Mr. Keshe said, it didn't apply to the mandate of the EC. Don't just write something, but think about how it applies to the whole. The EC doesn't vote , it goes through the soul. Mr. Keshe you said, that if we have something to say and we don't say it we are stealing from our soul. (1:52). Yes, continue writing. You have a specific way of writing. Some of it fits with the UC mandate but not the EC, people will gradually begin to understand the difference. The EC is set for the mandate for humanity to be kept in balance and to provide humanity with equality in respect to the totality of residents, from birds, ants, the trees and the man. The UC has a different part, first they cover individual parts of this planet which are common in the same language, but they extend their strength beyond this planet. In the future we'll see more of their work then we'll understand more. If you write to the EC, anything to do with the structure has to be totally with what is to do with running of this planet. It's the new government in the order of governing according to the covenant of creation and not there to suit mankind only. It's for energy ?? in every dimension, being created here or resides here to accept the condition of peace, (1:54). and then the responsibility to accept. One of the major governments have signed themselves into this program in the very recent past, we'll explain very soon. We are on track to introduce a lot of things, but it's what to do ?? what you have written in some of your papers doesn't apply to here. I don't see it, but as I said, I am only a temporary member filling in for the European position. We are still looking for a member of the European council to fit in. ... I had tears in my eyes with the reading of the new constitution in Dutch. (1:56). The same with the Persian, Arabic .. this is why we choose to read it in the universal languages. It reaches the soul of the totality of the same language 26

(3:03).
(3:10). Q: (Nicolas from New Mexico) How does one share ones skills that they have developed with others, he lives in a rural farming community? it's a beautiful question you have put and it comes from the wisdom of loneliness, you becomes more spiritual in trying to find a solution, what am I doing here. .... then I start elevating their souls one by one and it's amazing how they changed, when you see them the next time they have changed. I wasn't invited there to take ofod, but to elevate the souls, I don't need to be speaking their language (to be a part), being an outsider I see a lot. It's part of our growth to understand that we are part of a totality and we don't have to see to know, if it is our wish and we are there to plant or whatever the soul of the bird that uses the plant, or the rabbit that comes and steals a carrot. It is all part of it, (3:14). but when we wish to elevate it, it reaches to where it has to go. ... the openness is that it is there to take if it needs it, because some of the energy that you absorb in that remote place is what I need, but you don't see it. ?? you have the warmth which I need to feel internally with my soul. When we look and expect to see that is the time that we block what they are giving. It's not, I am sitting here take from me. When I stay open and they can take from me as they need, it's not for me to throw everything out the window and hopefully some of it will land ... where it's needed. As we said with the twin star, the ?? flu ?? balance and it just transfers. If you have opened yourself to be a giver, we don't need to see where it is going. If somebody needs energy and you have it and even if you're in the middle of the Amazon they'll receive it. The point is to be open to give, not what can I do and how can I give. It's a beautiful question. If you go to Dr. Quata who is serving day and night in Kenya. He sends me pictures every week, how is just teaching unconditionally in Africa. (3:16). and gradually the position in Kenya changes. (pictures) The beauty of it is that he doesn't look to see who comes he just teaches. He goes to farming communities and universities. These children are there for decades and gradually he changes the nation. You see faces, but I see souls and in time they change. And they are happy to be there. Africa is very rich in the elevation of the STM, and we have taken so much from their physical condition (west has exploited), but their souls still have the same shine. To me there is no black skin, it is beautiful souls that they carry. They are there to learn how they can increase their farm production and save their lives and malaria is a big problem. The solution for Africa will come out of their souls. The white man had a chance for centuries but he did nothing but rob from their physicality and souls. If you live and work in Africa the way I do you see nothing but beauty. I see the same in China. The harshest things I see are in Europe and in America. One day it will change. (3:18). The heart of the black is so white, the same as their soul. It is just the skin that is N coated and it absorbs all the beauty of the creation. ... we have the same kind of work, day and night across Africa, Paul, Benjamin, Alek, the team in Nigeria are extensively working in the background. Angola, Central Africa, Uganda. Dr. Quata will have 100 students this week. (3:20). What do you teach them and what do they take from these teachings. I teach them everything from beginning, how to N coat and make CO2. What does it do for them. I started with wounds, high blood pressure, skin illnesses. Now that they know it works they come. more and more people come. Find a land. (3:22). or a premises like this for a teaching center and the KF will pay for it. We'll cover you up to 100,000 dollars. Build a proper center. you don't need a factory, you need to teach. .. you have served Kenya well since you left the US (Yale university). This is how I started in Belgium. (3:24).

(3:26). Global teachings in French/Polish/English on Sunday.
... someone asked, why do we need a 1,000 shares to set up a company. I deliberately choose that number because some of us might need that level of support, others might not need as much, ... that we reach a level of satisfaction to make the left over available to others, (3:30). we don't condition we leave it to the level of the soul. This will serve us when we become One Nation and start to move to other parts of the world, we'll all become equal it doesn't matter where. .. 40

Q: Are you for solar panels in the space? Your soul is the solar panel. ..you put something else on it. .. the body of the man is that panel. .. How many of you have ever been cold and sat and asked your soul to warm you, to see if you can do it. The way you made the Gans' and cores, it's time to start (3:34). practicing ?? of all limitations, of educating the trust between the soul and physicality, then you'll feel I am hungry but you need just enough energy to repair what is needed to be able to exist, ?? you can do it.
... Shandor says he learned (a yoga) to heat and cool his body when he was 12 years.
(3:36). Keshe says, he knows exactly what he's talking about, ...
(3:46). We signed something this morning that will bring the change, we'll wait for the governments to tell it.
(3:48). End.

211th Knowledge Seekers Workshop Feb 15 2018

(Questions this workshop, a lot about setting up factories, ,)

(:11). This is the 2nd week for asking questions. Today is the beginning of the Chinese New Year. .. (:17). We have set up a management team across this planet, like a franchise. All our factories are becoming standardized. Pre-fabricated factories made in China. (:20). talks about setting up factories worldwide ..
... we have only developed 5 or 6 Gans, there are over 200 to develop. When we come to make the feeding stations for disaster areas, we can't just give the body CO2 and some ZnO2. We have to developing the feeding technology for disaster areas and for space where you can get from Ph, K, and everything the body needs. (:30). When you go into a feeding station you have to receive everything otherwise you'll have deficiencies in the body. We are in the process of developing them. They have to be developed by all of us, this is the only way we can make mankind independent of finances. 17
... talks about KF factories, Brazil, Mexico ...
(:52). Q: About how KF is going to setup management? We don't have a problem in that area. All the best managers don't come from the US.
.. our bottom line is not profitability it is peace, if you try to explain that to managers they walk away. We teach the managers in the KF way. Q: About where all the funds are coming from. We don't disclose ... we don't have people who have given 100 million to the KF, people who have very little contribute all they have to the KF. (:54). One thing for sure it doesn't come from the British government, no blood money or wealth stolen from the murder machine. the main thing is that you carry the ethos of the KF. We have

to learn a new way. (:56). This is the only way to guarantee to look after those who need looking after not just financially but in other ways. 19

(1:04). The minimum age is 18 years below that not allowed, but if we have a genius in the world of Pl at the age of 5,10 or 200 they should all be respected for knowledge, this is a big difference. A child should have time to be a child, and man should have time to mature his soul ... Q; What about teaching children about the Gans at a young age. We started teaching child and made it fun. ... (1:06). .. the KF is paying for 50 PhDs in the universities. the whole process of teaching has to change. (1:08).
(1:10). A lot of people complain that the KF is not responding. We respond to what needs to be responded to. .. (1:12). (1:20). Q: How to teach in Germany under their special system. .. there has been some problems in Germany ... 10 to 15 factories needed in Germany in next 10 years. (1:26). ... as you are hearing from the discussion, KF is multinational we have people from all over the world. ... we cover all the nations openly ... sharing freely is the key to our success. .. people are fighting to teach more this is the beauty ... this is very unusually. ... Are there any plans for Sweden, not at the moment .. a factory costs about 20 million dollars .. the base manufacturing is in Italy ..
.. if anybody becomes a competition we'll reach out to collaborate ... (1:40). Everything we develop is for space development the other things are byproducts. We hope to take man to space in 2018.
(1:42). Q: There are 2 souls, one in the vacuum space behind the heart, could he speak about this? Not really, we have clearly defined the position of the soul, we leave those who like to interpret for themselves one way, it's good. Thank you Mr. Keshe. (1:44). In the past few days we tried to explain the position of the soul, we touched on, how the incoming egg and the sperm lead to the dynamic division of the cells, and then they create so many cells when they come together, and together they create a central point of the central control that all of them can communicate and be with, which we call, creates, becomes the STM, then this soul communicates with all the organs in the same way and dimension. It's the micro(cosmic) in the Macro, I explained that this is the same as what we see in the school of fish, or in a flock of birds, this should give you a very good visualization of it. In the ocean when we see millions of fish come together and they all rotate in the same direction or they move in the same kind of circle, and we always think how do they know when they all turn in one direction .... how does it work. (1:46). it's done in the same way as what is done in the sperm and egg, they make this combination of field forces. These animals create what we call a central soul in the dimension, and they don't need to communicate, because that is the central energy they create, it transfers the energy right across through them, so they all put the bits of themselves in and the totality see what it needs to be done. Fro example, where the danger comes from, how they have to ?? , and this is very much the same with the operation of the brain in respect to the emotion and the STM. There is no better way to explain it. Then you see everything responds together, all the birds move together, or the animals suddenly take the same direction together. You press one place the rest move. In the liquid of the planet, what we call the waters, we have the condition of the Gans state and then the animals this way create their own central, what we call soul dimension, which they all connect to and they all receive from. There is nobody shouting, go this way, then that, it's not an army. If the men of science understand this then they can localize it, it becomes very handy, in the

space dimension, when we travel with a huge number of spaceships or souls in the depth of the space, where this thing becomes zero communication, where we put from the strength of the soul, (1:48). which is the emotion of the trust in everything responds back to. The process of where the soul is, a soul can be created anywhere where the collective strength of understanding of the feeling of the emotion come together. It happens in the division of the cells in the womb of the mother, flock of birds, school of a few million fish, it doesn't matter whether a few hundred of millions. This is the beauty of understanding the totality of the work. If we understand and develop this knowledge then it becomes very easy to control flight systems, the whole structure within microseconds of the decision to go left or right or the whole flock decides to suddenly turn backwards. Collective numbers or what I call souls, irrespective of being the heart of the man, the brain, school of fish, a bunch of spaceships who understand the process of interaction, creates a zero time response through the dimension of the STM. Those of you in the space technology and are looking for zero time communication you should have learned a lot from these past few sentences. (1:50). Don't create a fiberglass 06 .

(2:05). Do you need someone else to love? Rick can we confirm love ourselves. ... how many of us on these planet are aware of Valentines Day? very few. (2:10). We have created this Day for us to confirm to ourselves that we are loved. That is all it is. We want to confirm that we are loved,... it doesn't matter what games we play with it. It only applies to the Western world. It comes to what does it give, make us to be that we need someone to love, that through that love they confirm our existence. There are different ways to look at it, in the end it's giving by emotion and not by physicality, we buy flowers, whatever the commercial world has told us to fit into the image of being loved. A woman told me I buy myself something because I love myself, I don't have to pay for the rest of my life for loving someone. (2:12). As we say love is giving and we would like to have a confirmation that someone accepts what we are giving, that our effort is not wasted it's a confirmation for us of the work we have done. Today's questions are very different then last week. Q: Zero time communication in space is instant, why does it take 6 minutes for the sun's rays to reach here? That is a matter state conversion. (2:14). not the actual totality of it. I explained in the book, in a very simple way, the ray of light, what reduces in the strength , from the sun to the earth, 8 minutes. But in fact the higher strength rays, the second they reach the surface they have passed through the galaxies and universes, according to the strength they have. The brightness of the light we see on the surface of the sun, it's interacting with the earth's atmosphere, we see it. We would not know that the sun existed, we see the star, the interaction of its light, which is at the strength of our position of observation, in the liquid of the eye we recognize the star, otherwise we would not see it, but the interaction of the fields of the central MG field with the matter state of the sun itself creates the surface light. This is the light that takes 8 minutes because it comes to the matter state to get to us. No scientists have ever measured the rest of the lights, energies which comes from the sun. It's instantaneous (2:16). The strength of the soul of the sun passes through this planet the minute it is created in the center of the sun. It's the same, the soul of physicality or the soul of the existence or what we call the STM. It's what the scientists call neutrinos they try to create a condition upon the water or kilometers under the ground that when it slows down enough by the mountain stones and when it hits here we can detect it as a photon. But if

you look at the stupidity of the world of science, some of these neutrinos slow down in the liquid of the eye, we don't need to go all the way to the bottom of the earth ... Because we don't have a filter that reduces all the fields that come from the sun so that it becomes observable to us. At the matter strength we can measure it at 8 minutes. We don't have the tools to measure the fields of higher strength ... it's not even the color, size shape.. What I see as a sun the man from planet Zeus doesn't see as a sun, he sees at the point of his ?? absorption, observation strength (2:18). The space scientists have achieved the speed of sub light space travel. They showed me the flight system. They said we have a problem we can't go over the speed of light, can you solve it for us. When I saw their flight system, they have traveled?? in the first second the flight takes place. The craft has been built in a special shape that, the problem you have and don't see, you are using matter state, if you develop the technology we use at the KF which we create the structure of the matter through the strength of the Pl then you can pass the speed of light. The barrier is the physicality of the entity. It's like trying to get a bullet through the bullet proof glass. These world scientists have reached the speed of sub light they can travel beyond then they appear (2:20). and create mayhem in places, but it's fun. I have seen their structures and whatever. Now they have understood that the knowledge has to be re-studied. Einstein created the problem that the speed of light is the ultimate speed, yes it is, but only in the matter state. We can produce any aircraft and fly up to the speed of light more or less. It depends what material we use because different strength materials have different speeds of light. Whereas with the Pl you become a chameleon and fit into everything, then you can go with multiple strengths of speeds of light in the matter state on this planet, because the speed of light on planet Zeus is totally different it could be millions of times faster then the speed of light here. So when we say it takes 8 minutes for the sun's light to reach earth, we are talking about in the plasma physics ?? they say light has 2 characteristics and we don't understand, sometimes it behaves as a photon and sometimes as a particle. But what they don't understand is what strength is the light traveling at. Now we can answer these questions because we understand that the speed of light is only to us on the matter level the maximum speed, or the freedom of the speed plasma can fly or travel in matter state, then we call it the speed of light. (2:22). ?? above or below. Q: Can you explain about floating souls ...? The soul of liquid life takes into consideration the field strength of the liquid and then the field strength of the containment of the liquid. The liquid is always contained, the same as a gas, but when you submerge or are an animal of that dimension you have 3 forces of fields interacting in the matter state (2:24). or in the field plasma state of the matter. This means that this is the soul of you as a creature, as a man walking in the air, our containment in the plasmatic pressure of the atmosphere, more or less freedom of the space. In the liquid state now you have the MG plasmatic field of the liquid, then the liqiud itself is contained within the structure of another MG field, it's like if you put a fish in a bucket of water and then if you see it, the fish has a soul which is in there then you have the condition of the liquid, then the condition of the ?? container, it has to adjust to accept the 2 plus the container is conditioned in the condition of the MG field of the planet. the fish always have control of the central gravity in respect to the liquid, environmental MG field strength that then we adjust our soul to fit that, the fish partially accept the condition of the physicality as part of the limitation to his existence in accepting transformation of the information the soul to its physicality. It like what I said with dinosaurs and coming down, if you look we still

carry some of the animals from the dinosaur time in the seas. (2:26). they are still there but none exist in the air condition because in the condition of the liquid there is a containment that has hardly changed at all, very little, this is why we see huge animals in the ocean. ?? which we can't sustain in the water, they go back in the history, look at crocodiles and the rest. Because it's a condition confinement, then confinement of the liquid, it's a double layer ?? system where we only accept the physicality, this is why most of us can't live in 2 dimensions, be at sea and the air, because we need to understand the containment of the 2nd layer which is the MG field of the earth itself and the liquid. If we adapt we'll survive adn in time we will survive because now we are learning a new way. Part of the teaching and books I explained double layering of the ?? fields, you can allow part of your soul to be internal to another, now you can live in 2 dimensions of the fields of the universe. It allows you to live in both the gaseous and liquid states, then if you understand how to live with the dimension of the fields of the soul it allows you to live in the physical dimension in the strength of the STM also. (2:28).

(2:33). Q: Hoops on the surface of he sun? That is from the interaction of the fields on the surface of the sun. the sun's surface it has 2 or 3 dimensional field flows, 1 is coming from MG field of itself, 1 from the strength of the fields that have reduced enough that they have become matter state at the strength of the fields of the MG field of the sun, now they interact back with the fields (2:34). that are coming through and this interaction of the matter state conversion with the strength of the field that are coming, which again acts as a friction (like I said, with the voice which is friction between the STM and soul of physicality) to the creation of the light of the surface. But some of these because of its dynamism and rotation create these features, the blackness of the surface of the sun, read the papers it's in the books I have explained this very clearly how we get black spots on the surface of the sun. they come from when the charges go , and trying to reverse the cycle, as it goes through its 360 degrees like its heartbeat, every 23 years it does a full cycle, ?? half cycle of it, change of M fields, The matter Pl state is going to get balanced then the field matter strength of the Pl center comes out and they create the charges and then when it gets to the saturation point at about 11.5 years, it creates a reverse rotation. This is why we created half sphere reactors to stop this rotation, the cycle of the reversal of the polarity. With circular reactors we always had this problem and we had to devise a new system. It took millions of years to understand this in some races, to be able to do it because there were so many loses. Because we always looked at all the universes and galaxies, everything was circular, but cutting it in half, taking out the ability of saturation of ... like a heartbeat of the Pl lead to the creation of the present half circles spaceships. (3:36). If you look in the universe you still see some spherical flight (SS) this shows primitive knowledge of primitive people who have just managed to fly, then you see the SS which is half circle flat, which ?? stops the rotation of the fields. The black spots on the sun is the same when the fields come in balance you don't create any lights, and this shows the time of balance of the fields which creates no interaction, therefore no lights, then you see spots on the sun. Q: when the STM creates a SS why is it not half spherical? because ?? it's the original. ... (2:38). the new half sphere is from the development of the understanding of the Pl, not to allow it to flip over. If you look at it we create the condition of half sphere through operation of full spheres, the 4 reactors are full sphere

shape. .. now you can position reactors in a certain place that you can bend the fields inward adn can make it half circle, and in that position the field forces can't flip back you take the heartbeat out of the system. Q; could you use a N coated sheet to cut it in half would that absorb it? You can't cut it in half, but you can suppress it to the shape you want, if you look at the 3 base reactors are suppression of the fields for them to go further down. If you move them all the way equal from the top, from the center, you can position them next to each other, you get back the spherical shape. The half sphere has a lot of advantages, first of all it allows you to travel much faster because the M flow friction is much lower (2:40). It allows the containment in the physical dimension of the Pl, it stops the reversal of the heartbeat of the Pl because you siphon it, you literally turn it back to itself. It has the advantage to allow a spectrum of the souls to be traveling in it. ?? you usually have mono M fields, when you have half sphere, it's like the 5 degree angle we have on the sun it gives us many different variations, these 3 base reactors coming up between forces, shape, allows the transportation of multi-races. And those men growing to become part of the UC can get a chance to enter these environments they see different creatures of different dimensions, because that change of shape in position, allows multi-dimensional beings. When the man becomes wise and chooses the path of peace and when the UC opens up the knowledge to man to rapidly grow into it, when you enter these SS you'll see the marvels of God, the creatures within them are beyond imagination. Their beauty, the way they exist and the whole UC is as one (2:42). because they work through the soul, there are no languages. Q: How to help someone out of depression? It's very much attention deficiency, "I need attention". 56

(2:50). Stella Argentina, long talk about her problems ...
(Klaus fell for her victim hood, Keshe stopped it)
(2:57). Can I stop there, such a discussion please do it outside. Keshe replies, because resonance doesn't exist within the STM. What is important for us to understand, we try to solve our problems in way that we see a solution for it and in a way that is something not much help. it needs a lot of understanding of ourselves and our position. Many of us move into these emotional conditions and the others, through the cycle of life we live, and the energies and the souls we have received in interaction. Those of us who look for an answer outside, we need to look for it inside (2:58). how this position has developed and with understanding it we can move out of it. Sometimes it seems impossible because we don't see the way, but sometimes when we elevate our own soul we can do it ad it is part of these teachings and we are trying to understand more and to teach more, is how we can elevate our own soul through our physicality that in return our soul moves the dimension which is a point of pain for us, don't forget that the physical part of our entity lead to the creation of our soul, that the creation of our soul lead to creation of the physical dimension as we are. We have to understand (how) to use this process, not by somebody coming and telling, I'll teach you resonance or something else, which puts us back in the same position as before. Finding the level of the understanding, I put it the right or maybe wrong way, finding the contribution towards our physical dimension towards our soul and then understanding that in return our soul looks at the physicality, it is the only way of survival in the U. There is no other way, because there is no pharmaceutical or a man with a resonance machine to teach you what to do. You have to

learn to love your soul and that in loving and nourishing it, you learn that you nourish your physicality through the dimension of the soul. Anything else sits on the dimension of abuse., because now you give it to somebody else to abuse, and then when it's not there you find another way to abuse yourself. We are teaching, approaching , learning (3:00). how to survive in the space, even though we are explaining it in the matter state. In the normal condition people develop the space technology and then whatever comes out of it becomes the byproduct, in this cycle we are doing so much to change man, that the byproducts are released before the man has full understanding of how to use the spaceship, even though the ?? knowledge is there. In the space there are no systems, unless understanding the process of ones soul and in the dimension of the physicality of itself. Yesterday there was something about love thy neighbor as it was in the Commandments. The closest neighbor to you is your soul, ?? reason for you next door neighbor, whatever ... The closet neighbor to your soul is the soul of your physicality and you have to love it and give from it to elevate, it is the only way. We have always said this, what we call love it means giving . .. we have misinterpreted all the writings that came to us because it suited us. When you love your neighbor, which is your soul, you give to it, what do you do when you are in love (3:02). with somebody. A lover in the language of the soul is a giver, you give from it. Why don't you learn to give from your physical soul, you can add to it because we consume things throughout physicality to increase the level of your soul and then through it the soul will increase the level of the soul of physicality in the physical dimension, and then the filter of depression is still there but now it doesn't fit in, it moves out. It's nothing but a skin anymore. Learn how to survive, to be the last man standing and there are no resonance machines anywhere in the U, I haven't seen one. I teach you to survive in the space, not to sell systems to man to suit somebody. Even though the whole thing is to start gathering people to understand more and more when they use the systems. To elevate the STM from the pain makes the man wise to see more. Try to understand, you are the last woman standing in Argentina, in the space, what are you going to do, you have the dimension of physicality to take from or the dimension of the soul to take from the universal to elevate the physicality its pain, that's all you need. (3:04). Q: I quit smoking 3 weeks ago, that what you are talking about makes me shake with fear and anxiety, the need to go to something ... Can I say something, I am not a doctor but I analyze the words spoken which is the easiest way, you have repeated 3 - 4 times the fear, what is the fear, why do we use this word. You can put it another way, this is my strength or limit. There is a fear when you can loose, there should be no fear when you can gain and you know your limitation. This fear is created in different ways in us to control us, and we have become master of ourselves to control ourselves for our own pain. Why do you call it a fear, this is the level I am. .. Isn't it the fear of success, of recognition. (3:06). yes. so why have the fear you have already recognized it with your own dimension of physicality, what are you afraid of? Q: I don't know it's like subconscious like a program, I don't know where it comes from. Can I ask you. We go back to the origin of life, you are the first Eve and there is one Adam and he has gone away, do you go through depression until he comes back. Or is life worth existing until he comes back. And whatever I have is there for me to survive and enjoy. If you were the first woman on this planet would the word fear exist. I don't think so. Fear has been put in us over time and we are nourishing it, and it has been a way for us to control ourselves. One of the biggest fears for man is to do something wrong that it

might end him up here or there. I have no fear and most of the people who ofllow the KF are of that school of thought. When you are afraid it is the time that they control you. Even you control your own soul that it stops you giving, otherwise ?? of yourself. I had no fear when I sat next to a king who threatened my life. What we see now in the courts is because I did not have a fear, unfortunately what was planned was not seen (3:08). there was somebody else who took pictures, they were so calculating that they thought nobody will see, we'll get him in a corner in a cafe in the middle of nowhere, we'll pressurize him and he'll squeak, but I already squeaked, I gave all my technology to humanity. I teach freely. Then incidentally somebody in the cafe took some pictures, because they never thought that they would be caught. ... they are trying to cover up, otherwise I have no fear. I can't loose what I have already given. Even a king can't shake me. out of their fear they set everything up. they didn't calculate a nosey calculating woman who took pictures and handed it over. When we released the pictures we got the cases. Man should have no fear when he is correct, nor even from his physicality. No king can move you, because the rule of the Creator is above anyone who calls himself a king. Thy shall not steal. When you steal from yourself you create fear, and then they create punishment, confession boxes (3:10). and the rest of it. When you start to create conditions of fear it means you can't give to your soul. Give to your soul and then you receive more back because then it collects. If you can't do it through the physical dimension then do it through the emotions, because then you'll receive more internally in your brain then you receive physically by your body. 26

(3:24).

End

212th Knowledge Seekers Workshop Feb 22 2018

(Internet connection problem, , ,)

(:04). People are using KF name to attract people and teaching their own things, we will shut you down. If you have your own ideas we are open, but not playing resonance games or machines you pick up somewhere and just start selling it. (:06).
(:10). (:20). photos of Mr. Keshe. ... there is a lot of interest since we started teaching about the soul and people have started testing their own strength and potential and what has been taught is within them, (:25). and they can reach it. Some are endeavoring to go further in understanding their own physicality and soul and the way they are structured. Some of you will start seeing the interaction of the fields of your body with the others, and start controlling the dimension of your own physicality. You can control a lot of things with these teachings. There is a demand for redefining a lot of things in the world of physics (:26). ... so that the knowledge that has brought us to this point can be put the correct way. A problem a lot of people have with Pl is that you can't control it nor understand the operation of it. .. the fallacies are so deep rooted that it is hard to change. We explained like a school of fish, that when a number of cells come together they produce a STM, and for the first time we understand when a flock of birds or school of

fish, they come to the same point, it's not their physicality anymore, it's a combination of their souls that creates a new dimension which ??then becomes the center for the rest of the flock or school to respond to, they don't need to talk to anything, it's instantaneous, the field is felt by one fish, let's say that there is a whale around, then it transmits directly to the center and everybody else feels it. This is how it works, if you understood this and understand how your soul works (:28). then you can see the emotion of one or any point, like in the physical interaction in the rest of the group, something we have missed and have to look into, is the next step to it. Look how human beings are, intelligence, diversion has been created. In fish we call it a school, or flock of birds, in the human race we call it a city, village or town, it's the same process. When we bring so many souls together in confined spaces as in a city, we do the same as what a school of fish do. This is why we see evolution and development in response to in different ways. Now we can understand more why each city or town has a specific characteristic, because now they are the same as a flock of birds, one emotion and behavior reflects in the soul, just because we live in different rooms or houses or maybe 10 streets away it doens't make any difference we have created that mother soul. The mother soul of the city then reflects on the behavior of totality. Now we understand more in the physchology of the man. This is important for us because when we go into deep space we become a soul part of a bigger block from different dimensions of the U, different races of the created of the Creator. Then what happens to our total soul, we become part of it (:30).

(:40).

extension of (:48). our existence ?? is the limitation of the universe. It's us who has to decide where we want to be in connection with our emotion. Then we don't need to say hello or shake hands, or be in any position if we want to, to feel another soul, and then through that soul find the response of physicality. It will become harder and harder for man to lie. The more we teach the more you understand, because then you feel the STM or the soul of the creature and this is how the Pl technology in understanding of separation from the matter works and we have to understand it. This will change a lot for us if the world decides to go in that direction, of the soul, if you point at the thing with your physical finger, you don't need to touch it, you can feel its emotion. By looking at someone you can see in their eyes ??body, nothing, but we see the soul. The soul says, I am sending this, but ?? Chinese whisperer there and there are a lot of lies in what I said. How to feed our soul. The secret of existence in the U is how do we manage to feed our soul (:50). that our soul can feed our physicality that guarantees the continuation of existence. the main point in the structure how to feed goes back to the Commandments which were given to Moses. Thy shall not lie. What does this mean in the Pl dimension, that you can't give while you are taking. There is a difference between stealing and lying. In stealing you take and go, but in lying you pretend to give but you are actually taking. The souls sees. The interaction of the soul is like what we do in the car driving everyday, we have a white light in the front that shows the direction of motion coming to us, we use the red light in the back known as a red ?? shift, that the car is moving away, we can't see if the soul is receiving or taking, only in the white or red zone. because when he says he takes but he actually gives, he's actually taking from us, we feel it. Why am I getting weak in that direction, where are all the fields I am giving, they're ending up ?? the one

who is supposed to give ... those who start understanding the work of the Pl in universal communication, they'll understand that there is nothing to hide. (:52). ?? they can keep on lying, and those of you who become more and more expert in it you see it. ..

(:56). ... when you create a religion you have to lie, because that is the essence of it. (:58).
(1:00). Then you can share from dimension to dimension, you can change position, you can change from physicality to the dimension of soul. To come to the dimension of physicality of the man is very hard, it's extremely an unpleasant experience. But when you are given a job to do, you come ot an agreement between the soul and the physicality soul to manifest yourself in the dimension of man, you take it because you know you are safe, somewhere down the line you know there is a pattern for your work, that you are there to serve, to elevate the soul, to bring the change to the others in the dimension of physicality. Many of you who manage to reach that point, as I said, the earth is the nursery of the diversity of the fields of the existence, then in time you become the prophets in different dimensions and positions in the U. Then if you get it right and get the message, you are like the fish on the end that gets the message to give to the center that a change is needed here, there is something happening, then you respond accordingly that it keeps everyone safe, then you work within the realm of the UC, then when you are guided to teach then you teach the correct way. You don't teach the lying or stealing way, because it's not ingrained or part of the soul which you accepted to teach, even though you manifest yourself in that dimension of physicality. Those of you who want to transfer from one position to another (1:02).

(1:10)

(1:14). Vegetarian ..
(1:17). Any Questions. dropped out.. (1:22). people start talking about killing vegetables that each grain is a soul. ... Nicholas talks about becoming apart of the plants .. we have become numb to the pain of the plant souls ... (1:33). ... what's the use of trying to cover it up when the truth sits in a totally different position, if we start looking at the truth ourselves then we can inspire others to start looking at the path of truth, and not to ofol ourselves that we try to make it better then the reality that is there. (1:35). Mr. Keshe in response to taking vegetables to the market and looking after them, and why do we feel this way or the other, it's not to promote vegetarianism or to be a meat eater, it's just being honest with ourselves, it's not to attack or to say that you are worst murderers then others, no. It's about understanding the reality, then it's for us to judge our condition and position, and maybe those who are vegetarians become faster Pl consumers. Maybe there is another point that it is harsh to understand, but the fact is very simple. (1:36). When you bite your child or friend as for fun or to try and hurt, it's a different kind of biting. .. . but they are still all bites, we have justified them in different ways, but the still all hurt the same. In the same way in this, it's not to find out who's killing more, we have to find a way to survive, it's not finding a justification, it's finding a way how to survive. ... if I walk into a place where everybody is biting and shouting then I become deaf to it, I create a threshold that I don't hear anymore. it's like you are talking to your lover in a noisy airport, you blackout all the noise to hear your lover, (1:38). because we have

created a threshold for what we are concerned with, the lover on the other end .. the rest we are deaf to. So it is with the way that we eat, it's not that we don't hear the soul of the cow or the grain, we have made a threshold and we don't want to hear it because we know we need it to survive, but it doesn't justify the job. It's because we don't hear. If you cross the light and hit somebody, you say I didn't se the red light. It doesn't matter you made the accident. It's not justifying, but understanding the totality and what we do. Maybe this explanation causes us to move faster away from consuming, killing another, or lying ?? you got to give it to me so I can survive. Why do we offer ourselves as a lover because we want to give. We don't care if you love back or not because we want to love. We want to confirm our existence, like with valentines now we can give. It's understanding reality and not trying to take a position, because once we do that we are blind to the facts and the truth. Justifying it and understanding it are different, There is no justification (1:40). for termination of a life, it doesn't matter how we do it. But as a human and other animals on this planet, we have ofund a justification, I have to eat to survive. Now we have the copycats with the Gans water, they say, now I don't kill anymore. Another fallacy on top of the other one, a justification of the same. Just because we have made a threshold in our brain, ears, soul that we don't want to hear the shouting and hallowing of who we bite, doesn't mean we haven't bitten. Being open to the understanding of it, is being open to what is next. Maybe that's why I said vegetarians will sooner take up the Pl, maybe that elevation of the soul needs more and it receives more faster. I know the answer. I prefer to stay silent. We are not here to blame or separate, but to understand the reality, the totality. If you are so concerned that, I am not killing an animal, and then if you accept that the vertical people are the same as the horizontal people, then where is your justification. Somewhere there is misleading of ones soul or playing with the color of truth. (1:42). That's why I said in this time there are no prophets. 08
.. because you have to consume energy to protect that lie. (1:46). When you consume energy you give from your life, you age, you have to always cover up. When you understand this the life and soul changes. We have deafened ourselves to the truth and then we try to justify it, because the reality is there, we can't .. if we can't discuss these things like this, now that we understand part of the truth out of the total reality until the other part opens up to us ... do you know when it's going to open up to you, when you open your ears, when you take that barrier of deafness away and you hear the voice of the soul of the grain, the voice and emotion of the dead cow, then you'll become alert. We are not preachers but a scientific organization and we have to understand scientifically what we are doing. Just because we close our eyes to it doesn't mean it doesn't exist. And just because everybody else does it, doesn't mean you have to do it. Just because everybody is a murderer you don't become a murderer. Then we don't need to justify it. If I don't do it I die, I am a beautiful guy I put the seed there so it grows. So does the bird, it eats the seed, goes somewhere and shits it out and it becomes a new plant. (1:48). This is what we have to understand, no justification and being honest in understanding in the whole process. Because if you understand this and you're in the space then you become the judge of your own behavior and not doing things our of fear. The whole part of these teachings is to take what has been put in the STM out of fear and punishment, out of the equation, then you'll think logically and take a logical procedure anywhere in the U, you won't look at something and say, oh it's beautiful can I eat it, but if you think if I eat it will I die, this is

out of the fear, or if I eat it will it eat me this is also out of the fear. Whereas if you think, I don't eat I just enjoy the beauty. Someone wrote to me i met the most beautiful woman in the world. I said to myself, she makes a beautiful presentation of humanity, KF face because it shows the beauty of the creation that we all can enjoy the Creator, but the essence is, is the beauty skin deep, we don't know the person, we passed them on the street, then do we hear the shouting inside. You want to understand the work of the U, do not judge and don't allow anybody to judge (1:50).
(1:54).

(2:00). It sits in our RNA, DNA, we still look at it as delicious to have, can we taste it, then something rings a bell, I am not that anymore, I have evolved, but it's still there, whatever experiences from the first man is in our RNA. Do you think you are going to get rid of it, rather being able to control it, on top of it, is much harder then actually getting involved in it. Then if you eat something that is a virus, you're done for. Most of the teaching is for you to be able to survive the environment of the U. If you want to go somewhere where the women and men are so beautiful but are afraid to go there in case you do something wrong, or you can go there just to enjoy the beauty of it, it's the same position, and being aware of it that weakness doesn't come because that could be your demise. That will be the time your soul of physicality can't operate outside the parameters of the soul, because now it's in position, not you as a soul of physicality. You are allowed to fall in love as many times as you like in the depths of the U with the beauty of the U (2:02). but you can't destroy it. Just because we opened the park and it has taken so long to beautifully arrange it, you can't go in like a bull in a china shop, we try to stop the bull before we open the door of the china shop. We are trying to civilize man to the way of the universe. In the U civilization is not like here where you just learn how to use a fork or drive, Africans without the fork and knife are more civilized in so many ways. Civilized means that this is my limit and I don't need it enforced on me, this is the difference between KF and men of religion, which is life by fear, if you do this you get punished. Fear should be out of harming and not being punished. This is the language of the U. .. it takes time we are going through a transition, we were not aware of, now we are aware of and you can't justify. (2:04).

213th Knowledge Seekers Workshop March 1, 2018

(MAN ENTERS THE UNIVERSAL COMMUNITY today, ,)

(:11). We setup a One Nation government last August with the Earth Council (EC), they are responsible for life on the earth and communicating with the Universal Community. The UCouncil is responsible to communicate with the UC and they remain a member of the UC until they decide to move out of this planet. We'll see many members of the UC take to space and at that time they'll hand over their position to another. Up to now these positions of guidance we given to what we called prophets. (:14). We become collectively the prophet ... The messages from space that people who go to space find will be brought back, as the explorers brought back information about Africa, the space will be the new frontier. Through the UCouncil we'll receive what is needed and what can be done once the transfer is through. Like with pilots and air hostesses without flying we don't need them, it's a non-existence job. When ... as we start feeding the soul so the creatures of this planet and other creatures of the U. (:16). In that process we need people who understand the dilemma of being in the body of a man or the physicality of this planet. The UCouncil is not an unusual process in the U, it's one of the most common denominator factors and that's why we set it up. 36

Universal Council charter will be read, it's the start of peace for the planet. (:29). Shows UC video ... (:40). reading of the UC Charter ...
(1:23).

(2:07). Mr. Keshe continues. We made decisions on 2 platforms 24

.. the 99 names for God are in fact the attributes of the STM. For the first we have known our own attributes (2:10). What we thought was of the highest order we see are of us, we are the STM of the highest order, equal to all other souls. Now we understand more and I thank you for al the work which has been done. This was brought out in names centuries ago by those who believed in the same path but they didn't tell the man that was actually the STM. There is a message here that I would like to pass on. The human race has written its Charter to become part of the U Council as part of the Universal Community and is allowed to enter the UC upon completion of the Charter.

WE WELCOME THE HUMAN RACE TO THE UNIVERSAL COMMUNITY.

Now that you have chosen the path of peace we open the arm of unity and prosperity for the human race and the planet. We welcome you to the UC on the basis that the STM has matured to understand his dimension of physicality. We welcome the human race in the steps he has taken to start the entry into the UC. We support you and salute you. (2:12). It's a glorious day for the human race, not because of what was written but with what the STM has accepted to be part of, to be peaceful and be a member of UC. In so many ways we have been waiting a long time to welcome man into the UC, you'll see rapid changes and the progress for man to be welcomed by the UC. Thank you very much. (2:13)

End of THIS SESSION ....

(2:15) play video of the U Council. .. (2:24). If you were blind and just heard the voice. The terms of the voice in conjunction with the noise of the sight with what we call the vision of the man. ?? the emotion will ?? and what's interesting is that maybe for the first time man understands that the voice is the emotion of the man. Many times we said it's the E which is between the STM and the soul of physicality, when the soul feels it the man speaks it, not necessarily in the voice of the box, but in the voice of the E of the brain, ?? but he gains the strength of his own, which is his sound, his interaction with the STM, creates the fall out which is the physical interaction, physical response of the man. When we see the earth and the sun interact with each other in their fields, we see the daylight, the creation of new matters, so is the E of the man in the dimension of physicality when he interacts with the STM, the fallout is the physicality, the behavior of the man. Everything makes noise, has a music, the creator of ... it's us who has to find the instrument to listen and detect that sound of interaction. If we rub a hand we hear what it is and does. (2:26).

(2:32)

There were no deaf amongst us, (2:34). it's just that we didn't have the instrument to be able to understand this interaction between 2 people. If man goes further he can control the soul of physicality in position and strength in respect to the STM and make noise without any voice box being used, that's how we do it, because when we detach from our physicality and we become the soul, this is how we communicate with the others, from the interaction of the soul of physicality (STP) and the STM itself. Many of you have had a dream of their old dead relatives, physically they are not there, they left the physical body, it is the interaction of the soul of physicality with the STP with the mother or sister, that in rubbing against each other creates the noise and voice of the soul, ... we already know that we don't need the physical dimension to be able ot communicate (with other souls) but instead we say, I had a dream of my mother and she spoke with me.
(2:36). because at that point we don't use the voice box, we use the STP because it is all of the same strength. Now that we start traveling the U. A question many of you have is how come I can see my mother who passed away a long time ago or they are living in another part of the world, you see the STP of the person and not the person, when you recognize that each one has a given strength that even controls the eye color, then you say I saw my mother and she had a red eye, I wonder what was wrong with her. We have become so good in translating the sounds of the rubbing of the noises of the creation of motion of the fields within the structure of the STM and the STP that we have totally confused ourselves because we are entangled in the dimension of physicality. Today we bring the humanity to join the UC, now you have to understand that every point and interaction has a sound and it has a strength according to ?? and it has a color also. (2:38).

(2:46).
(2:58). Any questions. Q: Is there music or sounds in the U that elevate all souls that hear it? Yes, you have to find it. The noise of the soul of the child's heart of the physical dimension, with the soul of the child in interaction with the soul of the physicality of the mother and the soul of the mother dictates the time of the birth. (3:00). When the child

can't take it any more, it doesn't get kicked out it moves to find a new ?? passage that it can take what it needs because it needs more, and you call it a birth. I hope you understand. Q: ?? one of my communications was with a stone, very clear. Can you explain how that works. The writings of Bahuala says, even a stone has a soul. You have managed to reach that point where you hear the voice of the soul. (3:02). ... the guy in Beretta who wanted to move the cup with his soul, if ... at the strength he can reach the cup. it's so simple. ... (3:04). the Bahai start fasting for 21 days until beginning of Spring. The Jews, Christians fast at this time. What noise does this fasting do to us. .... to hear his own weaknesses, connection between the physicality and the soul. (3:06).

(3:08).
(3:14). There shall be no prisons or killing. Have you ever heard of a soul leaving a man without the agreement between the physicality and the STM, why should we commit such a crime. Those who use these apparatuses have to stop because we don't hear the STM. Now a days if they can't get you for what they want they make you a terrorist, that is the easiest way, now everybody is a terrorist except the terrorist who sit in the throne and do the ?? to take what they want. But do you hear the STM, the cry of the man who runs from these positions, because now we have to hear we have no choice. ... the man from planet Zeus doesn't do wrong because he sees everything coming from the strength of his soul. We have done everything to stop ourselves from listening to the music which is the fields which radiate out of the STM. In time you'll see something very strange where the field strength of the STM radiates it has some ambiguity in the noise, very clearly the fields are not the same as the others (3:16).
(3:20).
(3:28).
(3:36).
(3:41). Don't renounce violence, promote peace it will come. We lost the English and French members ...
The UC members will receive help from the U Community for peace.
you signed yourself into it now you have to act on it.
... Mr. Keshe had a stroke, brain hemorrhage at the age of ??40 on the plane. The consequence of having it at a young age is it goes to the bottom of your brain, and you get paralysis etc,. one of the side effects of this is that your brain goes through an emotion of not having enough time, its subconscious, you speak before the others finish. (3:50). ... the physical E takes over the appearance of the soul. When you hear me jump in before other people finish speaking is because of this premature stroke. You find a way to walk out of it. Fear of not having enough time to achieve what you have to do. (3:52). .. we have to be aware of our own conduct. .. we get stressed when the physicality doesn't match the physical life. when the strength of the soul doesn't match the STP and the physicality itself. (3:54). we come to this planet to change .. what you learn from it helps you to put it right. . it can take 10 years to discover what you're doing, you didn't know that you walked this way. "why do I do this", I didn't know. (3:56). When people come for help I have them hold their hands out, I can tell by the position of the fingers what is going on with them .. the STM is the palm, the fingers shows the total E of the man, radiates from the soul. the thumbs are shorter if they bend backwards when you open it means you're a very high giver. When it bends in, taker. (3:58). When you put your

hands together you bring the energy of the STP together, the gap is like the friction between the sun and the earth, so I can create light between my hands. (4:00). 85% percent of men who are shorter then the wife are unfaithful, then they find a women who is shorter then them. ... (4:02). It's very interesting how we shape ourselves, how we stand. People with fibromyalgia stand with shoulders 5 mm above the chest, a position of protection, like when you have been punched in the stomach, because they have been abused that shape takes over, then abusers pick them up like nothing, that's why people go from one failed relationship to another because you have marked yourself. When you elevate their soul they change their partners and their body posture changes. Their clothes don't fit anymore because they have grown by about 2 cm, but they don't see that it is only the posture that has changed. You have to look at the STM and what condition creates physicality. When you shake hands with people it can tell you everything about them, even the emotion and what they are thinking. Also by which finger they press. Q: Where do you learn that? I brought it with me from where I come. I carry the knowledge of the U, darling. But somehow you can't teach all of it, but then you go and find out how humans have done this and then you can go to it and say this is what it is (through observing the humans). ... (4:04). Now the scientists that they can't get their technology they issue them as terrorists. ... they want to carry on with the abuse. We have documents to present to the European Court. (4:06). We allow people to abuse us. .. You know by the handshake, you feel the emotion of danger and you know .. we have built systems to protect ourselves this is how we assess ourselves. We hear the noise of the soul, it's puzzling for a lot of people, how do we know what is going on, because we hear the STM, we don't need to be there, and when you are here to serve they bring you in. It's just having the self confidence to know that you are here to bring the change for the better. When you do it for yourself you are the loser, when for others to be better you always win because we carry you through. We always look at the physicality but we need to look at the E of the fields of the souls of the others. Why do you think we are in the position that we are in, we receive so much blessings from so many of you that I don't really care about the physicality because the souls (4:08). are there and they adjust everything else, my job is to bring the condition that I have accepted to do and then the rest is in your hands. ... I am here to serve and I know what my soul has to do, it doesn't matter who comes with what money and where it sits because at the end of the day there is no money in the U. If money is a way to bring peace on this planet, and through it, then those who have will service it because it means that their soul has reached the maturity and they want to be part of it. Us as human beings have to understand when you read (about them) what was their detachment, I am detached from everything, but I am here attached to what I came here to do. But I had to learn a lot about the man, this creature is an amazing creature, it's a chameleon even with its own soul. e have to understand the operation of the soul then in the U we'll survive according to the strength of our own soul and not dependent on others, knowing that when it is needed it will be there. Now there is a time and need for peace and we'll achieve it, you'll be amazed by every possible way. Understand why we are pushing for space technology this year. I am not interested in taking you in to space because you can go with your soul, because when the space technology is developed and the way it's getting developed ... it will mean there won't be any borders, anybody can go from America to Canada, anywhere. (4:10). And when you have people do it this is how to get rid of the borders. It's not fighting anyone, it's

delivering technology. Technology for peace. We don't talk about what is going on behind the scenes and the way the governments are working with the KF. ... We continually embark on creating knowledge and the knowledge brings the peace, and nobody understands how it works. I am changing things with knowledge. Many people are on the verge of flight this year. I don't need to do anything. ...

(4:12).
(4:16).
(4:21).

It's the day man is welcomed to the Universal Community .. END ..

214th Knowledge Seekers Workshop - Mar 8 2018

(,)

(:12). (:14). (:16).
(:27). KF "peace" coins will be backed the 300 KF factories and all the KF supporters. (:32). KF coins and how it works ... (:43). We have established a government, a parliament, banking, ... (:45). break in connection .. (:48). break .. (:49). ... (:51). Some people don't like what we said, .. (:56).
... we will not allow you to speculate on the coins. ... 1 million coins released, 5 million shares, on the open stock exchange. Any questions. Q: When they join the KF they have to sign the World Peace Treaty? This will be part of it, these coins can't be used to harm any being on this planet. (1:02). We will monitor that no organization take shares that are involved in any kind of Defense Technology or killing and the rest of it. We will monitor this very carefully. We are talking about tens of millions per day income, the way we are laying it out. Those funds should not be used to harm anybody, but it has to be for the elevation of it. This is why we made it a thousand that the others who need it can have use of it. We'll be transparent. We are not giving as charity, but we need to share the resources of this planet which are a human effort. Factories are where man and the planet put their efforts and knowledge and the entire being for the product to manifest itself. Q: Is the KF coin dividend is that 3% annually? Yes. (1:04). will this increase as it becomes successful and will there be other benefits? We'll look at it as we go along. Don't forget that you are buying into a company or organization, this is not a coin outside in the banking system. So when you buy the coin you become as part of the team at the KF. .. you become a member of ?? KF. You buy into the efforts of the KF factories. Most of these returns at least the first 10 years, will go on giving back and bringing the whole humanity into balance. At the moment the 3% is guaranteed, you don't buy currency, we are not bank exchanging. When you buy a coin you buy a share in the structure of a company. You become part of it. The company has become international in the market that we can all benefit by it. We open the coins today... (1:06). .. we don't extend the coins for speculation that some people loose their money, it has to be that we all benefit.

Like in Europe the governments have taken the speculation out by taxing the gains and the profits go to everybody. .. you sign yourself to peace... (1:08). Shows the photos of the factories in Nigeria and Ghana and Mexico. We have committed ourselves to peace and there is no way to turn back to the past. (1:10).
... Q: Will there be a limit on the number of coins that can be purchased? Not at the moment. Please don't go and buy up coins because you have money. Buy one and give to others.
(1:16).
(1:18).
... at the moment the MaGrav are still giving 30 to 50% reduction and we're still selling them from the factories. We have sold thousands and nobody is returning.
(1:22).
(1:26).
(1:34). You have to get use to the new conditions...
(1:36). Q: About power ... Nobody carries any power, we are proud to be there but we are not arrogant. These are the fears we have, some may not be able to take it, but we will ... Q: I hope humanity changes their ways. We don't hope we are already there it is just growing more. Q; But the same people .. Why don't you look at it in the way that the people become better and they contribute more, why do we put the seed of negativity, we have had enough of it for centuries. These thoughts start negativity and create division, if you are waiting for people to betray you, just pray for them, it will to your benefit. Your love will go to them and it will grow. ...
(1:42). Q: Is there a model? No all the models failed. We are creating it.
(1:44). Q: This beautiful river of kindness can I put my family name in it so they can also benefit? (1:46).
(1:54).
(1:58). A tribute to Armand and his wife Sara and family...
.. you are worried if you'll get 3% but we sacrifice our family to get world peace, there is no bank to pay for it.
(2:00). Alek from Nigeria.

(2:06). Teaching. Where does the heartbeat come from, the change when we go from G to M and M to G, that switch over creates a pulse we call a heartbeat. 46

... the speed of conversion gives the rate of the heartbeat, if you can understand the work of this it is very easy. Why does your heartbeat suddenly change when you see your lover? (2:12). It doesn't need to do a thing. A certain telephone call brings a massive change in the heart noise. Our emotion is the controller of our soul in the dimension of physicality but we have never understood, but if we do then we can dictate the process by which the structure of the STM interacts with structure of the STP of the man, and how the heartbeat of one creates the motion and heartbeat in the other, that one can't exist without the other, the more clarity in the STP and the STM the more pleasurable the transition shall be. If the STM sees in the conduct of the physicality as ?? one has been as part of its ethos, you find ?? at the end of physicality, is not so harsh as one imagines, it becomes very pleasant, it is something to look forward to, I have done everything there and now I am going home. A heartbeat exists with every plasma entity in the U and if

you can adjust to it you can enjoy the pleasure of existence and then you can control everything. But does the STP through the beat of the heart allows the release of certain amounts of the fields which is the essence of the STM (2:14). to be released from the soul to confirm its existence, because one triggers the other and it allows the STM to absorb energy of a higher order from the universal fields, then if we can change the rate of the flow and the strength of the higher order from the STP into triggering the STM to extract more ?? from its environment then man will reach the point of ?? .. in joining with the U Community, because at this point it's the height of the strength, is at the highest of any being on the planet or in the U. None of you have understood but soon many of you will understand. Q: Is the switch over between M to G in the heartbeat, it comes to something like the black hole, that point of switch is almost like it's not there, (2:16). the point between coming into existence and going out of existence? If you look at the rate of the birth when the egg and sperm comes together, somehow gradually they create their own heartbeat and that beat is transferred gradually into a muscle we call a heart. The heartbeat comes when the collection of the souls of the physical matter of the entity combine together and in that process create a give and take, or take and reject, and it creates a center of life what we call existence. Any of us can live in that dimension, have a heartbeat. Anytime you put the Gans' together in a very dynamic condition they create a heartbeat. The teaching of today what I just explained in the last 10 minutes, if you can grasp the whole concept, the idea, essence and knowledge of it, should make many of you man of space. (2:18). Q: When we elevate our soul does that mean we also elevate our emotions and stop feeling bad emotions? Emotions don't ... why do we look for emotions of negativity, sorrow and pain, why don't we look for positive E to give to be happy to rejoice, (2:20). to share give , and be able to justify to our own soul and nobody else. How many have walked next to your wife and said I just love looking at you, or to your child, or family. Loving is a privilege and the man has never appreciated it. Loving is the gift to humanity and man has abused it against himself .. why don't you look at that when you fall in love you learn how to give, to be generous to your own soul because you give from the soul. Why do we always look at the negativity and that people are going to do wrong, that there is going to be sorrow and pain, .. if we change it, it's not there, it's in another position. It's amazing when I see detachment, I am getting there, not quite there. ... I crossed another detachment. .. now serving humanity is the priority. We need to come to the conclusion that there is no need for sacrifice, very little of that, because when you give from your soul you have already given, there is nothing left to sacrifice, .. it has given everything (2:24). Q: we are all connected through the creation .. (2:28). ... if I understand that if I hurt another soul, it really is my soul that is hurt by it, would you like ot hurt yourself, unless you are a maniac, you see pleasure in pain. Q: I don't have to worry with a man holding a gun at me, if I ?? his fields he'll drop the gun? In so many ways but we have to mature, it's the time of maturity. Q: How can we help ourselves and others with addictions? (2:30). It's possible but we haven't had much time, now the ofcus is on the factories. You can get rid of all addictions, except one, in which it is embedded in our RNA, which is the cornerstone of all the structures of the creations of the man, is the addiction to reproduce, because we doubt it, it doesn't exist. Even those who don't want to reproduce, in totality we always see the reproduction always leaving its fingerprints, it's part of our responsibility ... and the pleasure we get from reproduction ... (break in connection).. .(2:35). ... why the physical anxiety, the detection .., it's the soul

which needs to be satisfied on the physical level, ?? and if he can't satisfy it, it becomes addicted because the soul is aware of it, but the soul of physicality is not aware of it and they try to match, and that matching needs additional energy, because it's on a ?? matter state, it's a Gans matter level so you can subdue it or increase it like a physical matter like sugar, or a chemical ?? because it's a rapid release energy in the structure in the body. Every addiction is reversible. ... I have had cases of people 20 years addicted to drugs, within 24 hours they can't even stand the smell of it. (2:36). because the smell is part of the E of the man in the dimension of physicality and the soul of physicality. If you have been a smoker for 40 years to stop can be too dangerous, and if your in your 50s or 60s you write your own death sentence, because the body has to reverse back in and then the body creates mayhem. Addiction is coming from the STP to the physical soul, one is what creates the body ?? , and the other by what is created by the matter state of the body. ?? then you can overcome anything. Why some drugs (herbs) are so effective, you just put some nettles leaves next to your body in that dimension ?? Doctors don't understand. Satisfy the STM, the STP, and the physicality, when you control 2 out of 3 in the right way the other ones will fit in. Then there'll be no addition. I am sure you all know how to do it. (2:38). We missed the first part of your discourse. Ah, it means God didn't want you to listen as usual. ... Every word has a meaning for you to learn from. Addiction has nothing to do with the E or the soul's side of emotion. It has to do with the STP and the physical soul of the man. They try to match and when they can't, then we try to create a match for a short time, the more strength you have in your physical soul and the STP, understand that they are separated. The soul of physicality and the physical soul are totally separate, one has to do with the physical body that we leave behind, and one with the soul or collective (effective) life of the physical life the man creates, and addiction has to do with this part and has nothing to do with the STM. The minute you go into the soul business you'll find that the addictions are lost. If you can go in the direction of improving the soul, the energy of the both sides, the physicality and the energy of STM, or the physical soul (2:40). then you'll be able to walk away from the additions. It can be reversed in seconds. What we look for is that matching ... if we can't match our physical soul to the STP so we try harder and we look for the energy, which is drugs, sugar which is the alcohol. A drug raises the level of energy. And that is what we are looking for. It has to do with a physical entity matter and not with the soul matter. Souls don't get drunk. If you want ot see one, you're quite welcome. Drugs, sugar, adrenaline, why do we go after these, dopamine and the other things we get when w gamble. Because it is the energy which pushes the neural system on the physical soul level to the soul of physicality, we want to bridge it to make it one, and it doesn't happen. You can help a little bit from the soul side, but you can't do much for it because it's the interface between 2 different levels of entities of energy. This is why addictions are so hard to reverse. If you understand it, why do we get addicted to sex, why do we do it regularly or get involved with another partner, what's the payment, that adrenaline, that giving, that love .. which creates ?? and it's all physical, ?? your soul (doesn't say) it's time to make love, or go and find another soul. It's your physicality and the STP and physical soul, .. that have to confirm each others existence. (2:42). we confirm with another physical body ... to satisfy .. but to ?? it . (2:43).

Mr. Keshe says good-bye... Danish Constitution ...

END

215th Knowledge Seekers Workshop March 15 2018

(,)

(:11). Sharing all assets on this planet fairly and equally ...
(:15). Shinzan Lab in China I closed immediately when I ofund that they were paying the people only $150 per month.
(:18).
.. it has to be understood that we set a new ethos a new way ..
(:25). A new catalog for only KF products, something between Alibaba and Amazon.
.. our plan to support local cottage industry ..
(:32). .. can use Keshe Coin ...
.. convert your testimonials into scientific papers ...
(:38). .. this is the first time a coin is backed by industrial development. .. a video to explain the coin. Each coin will be embedded with a chip and long term connected with an ID or One Nation, passport. The physical coins will be released in the future.
VIDEO Keshe Coin. (:41). Exchangeable only within the KF structure for products.
(:44).
(:48). In the old days it used to be gold backing the coins, now we back it with intelligence, knowledge .. Please be prudent. .. it's only cashable when the Keshe Bank decides. (:50). all the factories and products we produce, become the backer of the coin. Keshe in the English language (cash) means money ... (:52). Any questions. Q: How is the Keshe Coin secured, block chain? It's something like the Krypto Currency but in a different way, but there is no mining because it involves the assets of the KF.
(:54). A blueprint factory in Ghana. Shows the animation of factory. It backs its own structure and ethos ... (:58).
(1:04). Q: Can we buy a fraction of the coin or with multiple people? Yes, this is the purpose to bring people together. People can buy collectively. It's a donation to the KF, and we'll share what we received with you. (1:08). If we don't see donation on the receipt we'll turn it back. Q: What will the coin be made of? It can be made of ice. In the space when they see these coins they'll recognize you, it'll be with an embedded chip and connected to the ID card, passport and banking system we set up. (1:10).
Q: About the line between Defense workers and Army? We always said it is the man who makes the bullets not the man shooting, then man who designs weapons to kill, to separate nations. Armies are there to keep and create conditions of peace not to fight.
(1:14). Look at the Great Wall of China, we were always told it was to keep the enemy out in fact it was totally different. It was made by leaders who were peaceful and could keep peace inside there nations, and keep the ones who were wild out.
(1:20).
... it should not matter from where our soul came together from the fields of this planet, but what matters is how mush we can elevate the others on this planet and beyond. We celebrate it because the fields of it are peaceful and loving. We will not allow the K Coin

to be used for purchases that are not within the structure of the peace work. We'll set up an organization to monitor. (1:24). We'll give the Coins to the nations to buy goods to set up factories for their nations.
Going back to out teachings. For those who are trying to create fields fro space travel, There is something very simple to remember. (1:28). It comes from maturing in the knowledge. The process that there is a reversal at the point of the maximum M when it changes to G and then it becomes like a heartbeat, the ?? speeds of the M field transfer, suddenly while you are traveling away you get pulled backwards, ?? switched at the strength to be pulled back and center. This is very similar to what we call Alkalinity, which is G in the science of chemistry, change that to G field forces and then change Acidity to G field forces of Giving, you have surplus energy to give. Most of the Alkaline material produced with the Gans', carry very funny things to them, it's called O, Cu on its own in the Gans state will be heavily giving or absorbing, but the minute you connect it to the O it becomes Alkaline (1:30). In the matter state of the process, the alkalinity is part of the process of absorbing energy. This means that in the matter state the M field balance of the energies of the matters of this planet stays at the level of Fe, in the matter state, and in the gaseous state it is O. Look at the structure of the Pl of Fe, and that of O in the gaseous state, find the balance field of M and G of the planet earth, then you'll understand why Fe is G and shows pulling or what we call magnetic field effect, this is part of what we need to know, then it makes the science of understanding very easy. Why anything connected to Fe is magnetic and also O becomes magnetic, because the balance fields in the distance from what we call, the space of the plasma (1:32). of the center of the earth creates condition of balance M G field, which means the behavior of giving and taking, M and G effected. 17

(1:53).

(2:09). .. you have attached yourself to the planet through the liquid Gans level (O in the water).

(2:14). Q:

(2:26). (2:29). Photo of dust, matter created in one of the KF research labs, would it be the same if it clockwise or counterclockwise, would we get white or yellow gold based on direction of rotation. (2:30). We now can create matter in space.
(2:32). 22
.. we can change the fields so only boys are born.
(2:34). Is it the love of the mother who is a giver creates a girl, or the love of the father who is a giver creates a girl.
In the Spring earth becomes closer to the sun, the field strength of the sun has more say, but at night the earth has more say, but it is just in the balanced position. (2:36). Balanced brings happiness which brings reproduction because we can do what we like, the emotion changes according to the change of position. Why do some animals go through that cycle in the Autumn so they have the children by Spring.
.. how come in some tribes in Africa the sex is determined by the needs of the tribe when the child reaches puberty. ... everything is calculated through the field strength of the soul

and the plants. (2:38). in the spring means more receiving from the sun, now you have to fulfill what is missing, you create the fields which is the dimension of the life to find balance. Why do women and men go through the cycle. Have you heard that if you eat this you'll have a boy or girl, they change the balance of alkalinity, or the balance of giving or taking. Mother always gave more so it's a girl. The boys are actually the givers, because a man is more of a giver by the nature of his physical structure, a woman is a taker or G. Is it clockwise or counter. You'll find all the answers in the U, in the structure of the man and if you understand it you can fly. In any dimension of the U, redefine the physics and stop calling either G or alkalinity, it's just all pulling, Acidity is M is giving, it's surplus energy that has to go out because the guy can't hold on to it, he's too much in love. (2:40).

(2:50).

(2:54). We are responsible ... the faster we move on. The strongest gives to the weakest. If you have a soul of a higher order you give so much that the weaker becomes the same as you. The question is how did you become strong? It's like the banana, the more you peel it, the more energy comes out, the more you give from the skin the more flesh you have to give, stronger more manifested. But does it mena that because it's of the higher order it taps to the end of the banana, ?? the little chap gets from the beginning of the banana. (2:56). We think that by giving away to the weak one the strong one gets drained, but in fact it has create more to take from the fields of the U and it changes, then it gives to the next one and next one. This how do the viruses grow, packets of energy it gets from one to the next one and this is why they grow so fast. Once you use something that can take the energy away from one of them the rest collapse. We speak about alkalinity, the energy that can attach itself to the entity is through the strength of its O, otherwise it can't do, because O is G. All the viruses on this planet or in the space attach themselves to the strength of the O of the body ?? majority of the time, ?? condition of the earth. That's why when we showed about Ebola in Africa, they immediately confiscated all our work. All we did was put the element in there to drain the ?? protein. Now we know that the virus can only mainly be attached to the O level, so anything with O, CO2 ZnO2, the higher the element you have, (2:58). the higher strength O you are carrying within the structure. Nobody sees it. Both ZnO and CuO have O but the strength of the ZnO O is much higher then the Cu, then the energy of the O in H2O, is very low. ... why some elements never get oxidized, because within the structure of themselves they carry energy which the O can never be attracted to, because they carry the balanced energy within themselves ?? O balanced. the field Pl condition. If you understand this you'll understand most of the work of the Pl. In the U change the O to something else ??/ planet Zeus it's something else, you can only attach to something that has that field spectrum. Because O on this planet is not mono-level. (3:00). We have a spectrum of the MG field of O, in one place it may match Plutonium, in another Fe. And nobody understands this. 13

(3:06).
(3:11). Keshe wiki is completed by Klaus of Austria. Plays video.
(3:21).

(3:23). Something happened in the KF but we have taken action as soon as we learned about it.
(3:35). END

216th Knowledge Seekers Workshop March 22 2018
(,)

(:11). (:14).
(:16). the Keshe Coin will only be for KF Supporters and not at the moment to the outside. In time it will be the new currency of the world. We see the European currency becoming unstable for those who are in the background, and we Chinese currency will go out on its own anc become the currency of the world. One of the hardest parts of BRICK is India. It is not free and is still part of British colony and this is one of the reasons BRICK has been promised but it can't take shape. the British sit behind India, the Indian government can't make any concrete decisions without their okay, and this is the major weakness in the whole structure. (:18). Whereas China on its own can dictate a new currency and it has the power to do it. ..
... the open market will merge into it. ..

(:26). continues about coin.
(:30).
(:35). ... all the MaGrav's work, it's for you to find out where and how to deliver the energy. .. (:37). He draws the MaGrav connections. You have to connect 2 MaGrav one for the refrigerator and another for lighting. In Africa because of how the house is wired to the Grid and that they don't use much resistive (electric heating) loads so they get 95% reduction.
(:43). Something about Smart meters. The car MaGrav don't see much reduction because the computer chips in the cars don't allow for more then 25% reduction in fuel, because most of the oil companies hold shares in the car manufacturers. Anything more then 20 % fuel reduction and the chip dumps fuel into the maniofld. If you can change the chips you can save 50%, but the governments won't allow they get a lot of money through taxation. The MaGrav clearly does work. As I said, we didn't bring out the MaGrav for the purpose of electricity or the car. It comes from it. But what does it mean. Plasma Power Unit, to be able to travel the depths of the space we need to create a condition. The matter state ??
... the only way any of you can create motion and lift and full control in the next (:46). coming time is to understand the work of the Plasma and MaGrav units, not as an electron flow but as a plasma flow. This is the key. You are converting Pl to meager electron vibration, but none of you are pushing with it to go into using it as a Pl flow, voltage potential difference in respect to 2 positions of the plasmas, in which 1 sits on the top and 3 on the bottom to create condition of lift and creation of the matter state out of the fields. I can't be any more clearer then this. You have always looked at matter state. We are not interested in current power production unit. You are still looking for crumbs and are missing the cake. Now that you have create the Pl, you have used it in water to eradicate cancer, in Agriculture, increased power production. We have to go towards use

of the Pl and not the conversion of it to electron vibration, which is the most end of the line before death of the motion below the matter state. Now we can step up to the next step. It is your understanding that has blocked you in the space travel. ... If you have understood the work of the KF should have been able to cretae enough Pl flow to lead to the creation of any matter. Remember the sun radiates, the earth opposes, part of it reflects back towards the sun, part of it spalshes beyond the earth and part gets through because of the G pull (of the earth) of the matching strength and becomes gold, O, H, and whatever else on this planet. (:50). Now for those of you who have understood this, I have given you 3 stars (SF) that continuously work together, they bring in and they radiate ... understand the structure of the waterfall and water jet, with a water jet (nozzle) you have a flow and the water falls as far as it can, but if you put a piece of wood in front of it, it splashes back, then if you stand underneath it you become part of it. With the SF, all you need to do is to block the flow from the 3 base reactors towards the top reactor, you are adding a field reflector that is stronger the the flow that is coming towards it you'll get your spaceship. The slowing down has to be continuous enough that the structure of the physicality can hold, and anything that falls out below will be attracted back in at a higher strength to reach back up to the top reactor. The final answer is on the table. unless you want me to spoon feed you. The reason we are going very fast is, (:52).

(1:02).
(1:08).

... Any questions. (1:16). .. those that live in the air don't see the air, those who live in the dirt don't see the dirt. We have to see the O? You already see the CO2 ... you have Gans' in your reactors, these are massive amounts of energy, if you can feed them the right way, 2 things happen, those who receive energy try to position themselves to create motion, the energy that is released is according to what the atmosphere can take, but this is a higher order. you might get it here or there .. we don't create matter state anymore, we create the energy of the balance of the matter (1:18). when you create this cascade you need to create an energy that has all of it. A lot of you have tested a lot of combinations of loading, but the only thing that you haven't done. .. thousands of years ago the Iranians channeled air through certain channels in their houses to create ice. What puzzles me is my students don't understand what the Iranians did thousands of years ago. You create a flow and in going up at a higher speed, that you change the heat to a strength of a field, to pushing it up, is there any difference with that and the process of MaGravs. (1:20). We bring high speed of the field flow, ?? Inside our systems we have everything, inside the Gans we have a spectrum of what this planet can do, if we can convert the energy inside these Gans with the amount of fields ?? giving to convert them to the total Pl not in the Gans state, but the free state of fields, you'll have your reactor flying. Because now the condition of Gans is total Pl and PPU, and MaGravs are the only key to it. The problem with all of you is that you looked at the coils and how you connected it. You missed the biggest point my darlings, each coil has a hole. How else can I teach you, Iranians did it thousands of years ago in the deserts. Look back at the introduction to the UC, I put that picture in deliberately for man to maybe understand. (1:22). Shows the UC video. Stops at the first reactor. Look at this structure, you have the reactors in the base. The Pl is fed back down. In fact they are feeding fields from all the dimensions of the whole U. The 3

are creating the same kind of flow as 1 will do, but when the 3 hits 1, the 1 can't hold it becomes a barrier, but the 1 has to be strong enough to withstand what is hitting it, otherwise it will push it back. In the space by pushing this one back you create a bigger size dome. By flattening the 3 base reactors and lowering the top reactor you create a larger SS diameter. What you don't see is the funneling of energy here, this is your problem. This is exactly where the problem has been from the beginning. None of you see it. The field flow from the 3 base reactors to the top has to be strengthened. When you strengthen it and when it hits the top reactor, 2 things can happen, the top reactor will disappear and it converts automatically to a plasma condition. As it is a Pl condition it will start rotating, a higher speed rotation will start moving the plasmas and you'll start flying. (1:26). By the dropping of the weaker strength you'll create the structure you have been looking for. .. the only way you can do this is by Pl flow and not by the wires. (go forward to the next picture). (He stops at the photos of the UC members). These are the messengers, we couldn't put them in any better place. you are looking for Buddha or Christ to return. This is the soul of what you see, it is a collective soul this time, it's not one any more. The collective soul of the UC in interaction with the more powerful EC, delivers the unity of mankind. This time in the video I have chosen this wording to fit exactly what it needs. (1:28). (1:30). Stops at 2 circles of coils as a reactors. I put this picture deliberately, look at the position of the holes and the center. This is what you know as Alek's Beads, it is the structure of what we have seen in UOFs. The bright lights you see shining outside a UOF comes from these beads, but they are dynamic. The dimension strength field between 1 inner and 2 outer will give for example O, between another 3 might give you H, or the dimension between this the flow (of the Pl through the holes) might give you the medicine you need. As your reactors rotate by the speed of the flow of Pl, (1:32). and they block, they constantly release the same energy. So you have everything you need within the atmosphere of the system to fly. But this center core brings all the fields together, that can give you the condition of the flow. What you see in the center is where the plasmatic wind should come through. This is the secret of the space technology flow. We need to understand here that everything is on this table. there is no need for matter state. If you create that field flow you decide what it becomes, a chain, a H or an O. What is sitting here is the full understand of the space T and I don't know any other way to teach. The kids want to play with something else other then what is being given to them. (1:34). if you stand in the middle your soul becomes the blockage of the fields, then you can go anywhere in the U. (1:36).
(1:40). Li Ofng award to the KF by the Chinese Government.

(1:43). Photo of Naomi, she is back with us and this picture shows the power of this technology.
(1:46). the Gans swimming pool in Nigeria. Everything is in it, you can take from your soul. (1:48).
(1:54). .. about Shinzan Labs and why they closed it ..
(2:01). .. the same with the EC and UC when you see wrong you have to put it correct, you are the messiahs, who write the books of the correctness of the man. You released your charter and it's time to come into action. Walk around and see what is wrong and how we can put it in a correct way, not to harm but ot correct. Don't be afraid of it. You saw what we did with the Belgium's. We want them to report it ot the Government so we

can put it right. (2:02). It should be the job of all of us, not to fight, but to observe and ot block. Be a creator, a developer, bring the technology that is helps, saves, and develops. And let everybody else to do the same with us. All the Council members your job has started. You came and when you see what is wrong in your language, or country, how we can correct to change the position. We are not in a position to change the governments, but we are there to start changing the souls ?? and we are supposed to do it the correct way. We have all the financial needs for the factories. ... (2:04). become ambassadors of giving time and changing. You don't need to be a member of the UC to bring this in, you all can do and bring the change, not by fighting but just by doing the right thing the right way. ...
(2:06). AZ is the center for space development. and we want to set up a factory in Texas.
(2:08). Q: Do we use a Cu plate on that SF in the video. (2:10). I will leave it to your intelligence. .. if you N coat it then it will absorb all the fields of the Gans. Cu has a significance in a way, under that plate there is a rotating reactor hanging, that's why it's there. (2:12). my son used to say, Papa what you tell me goes over my head, what's the use of explaining to me. .. this is the same, I keep on telling you, do not look at the matter state, the Pl state. In the picture of the Caribbean garden the Pl field is so strong the hurricane winds don't even count to effect it. It can't penetrate it. (2:14).

(2:26). Q: there is a problem with the water in the Gans?

(2:28). Let's say you make a pile of wood. Nothing happens to it until you put a match to it and then all that becomes energy, there is no more C or wood, you have to add ignition or light to it. You have all these Gans' you need to put a match to it in the form of plasma energy that it changes to a Pl, but this time because of the dimension of the rotation it becomes a star. I can't explain it any better. But there is no use putting water on top of the wood and hoping the fire will start. If you look at it in similarity, in essence, not exactly, the water in the Gans is part of your problem. Or can you have enough fire, energy to overcome the water, that your Pl converts into fields and not matter state Pl. I can't put it any better. You need to ignite it. I keep on saying you need to make a tunnel, the Iranians did this ... (2:30). the 3 base reactors need to make an upward flow to the top reactor. You are so connected to material condition that you might understand this illustration. You need to put an energy into it to convert this to a total Pl, then what happens is the first one starts and it starts the next one, it creates the dynamism and the Pl starts moving. When it does the other plasmas start moving and as the try to find the balance with the 3 base, they give you the shape and you are flying. I want you to fly this year. I did it 10 years ago, thank you Iranian government who allowed it to happen for the scientists in Iran, the same as the Chinese scientists who are doing it, the same as the Russians. We have to respect our scientist otherwise they become nothing. They made one of the most important scientist today into a terrorist to try and terrorize him to get something out of him. We have to understand the T, oh it's a Cu plate ... this is not a fashion show that you have to repeat that you have the same dress on when you go out. This is understanding, if I wear my dress short it gives pleasure to men, women, or whatever. (2:32). ... with a BBQ you put a little match to it and it glows. The same with the Pl you have the PPU and MaGrav systems, and you have this pile of wood there but you can't ignite it. Find a way

to ignite it, that it releases itself and becomes a star. How many of you have ofund a real UOF in any of the videos they have shown, you look underneath, even through the structure of the body you see the lights shinning underneath, 3 reactors in SF, and the top reactor you don't see because it reflects its energy back into it. Find the matchstick and the clue is that the PPU is the answer. Condition of create .. one of the research centers has created it and they said to me, we wanted to see the flow, put some ?? dust to see how it moves. It's a M field flow, you feel it, you put your hand in it and it disappears and pull it out and it's there. In the past few weeks I have been targeting the space program because we are there, we are on the verge of it. But we have to do it as the KF so that we can force One Nation. (2:34). The Russians launched a new system, I said, this is a KF system, they can go ??? it creates heat, .. there is a Pl reactor in the front so no radar can detect it. We don't have a metal that can withstand 7,000 degrees. ...
.. sugar in Iran, religious people called it dirty ...
(2:38). they brain washed us to accept the fallacy and we accepted it. The same thing is with this Russian space system, or what they say the missiles can't detect it. In front of this missiles there is a KF nuclear reactor plasma technology. It blocks everything, no one can see it. I told the Americans when I gave them the key that we crossed your country without you knowing. Because when you create the shield it's exactly like when the leaves didn't come through, it blocks everything. ... They can't tell people how they are using Pl propulsion, which doesn't create any heat, that's why it can't be detected ... the Americans don't know how the Russians work. He draws the missile, .. but you need a propulsion system that moves it forward, the rotation in the condition of the reactors creates motion in the direction of straight forward motion. (2:40). The propulsion doesn't come by burning of the fuel, but by rapid positioning that it gives you forward motion in consideration of the forward reactor. The Russians are so advanced in Pl technology and it belongs to us as KF. Asks Rick to post the article. This is the latest space T, if the Russians push it a little further it goes beyond the speed of light. The Iranian man who convinced me to go to Iran, ethos ?? was the ambassador to Russia for 8 years, the Russians fully have my T. I respect him and he is one of the top scientists in Nano technology. He understands it fully. (2:42). The Russians have more the means then the Iranians scientifically to develop the technology. As I said, the technology goes directly to the Chinese gas a government of peace. I have committed myself to it and I keep to the ethos. Don't show it to be safe. Go to their website and read it. Don't read the text otherwise they can do all sorts of things, just give your understanding. Rick, it shows a video of Putin discussing their new technology, (2:44). 'a new system that has no limitation on range, it can attack any target, north or south pole, it's a powerful missile that no missile will be able to withstand it. There is more to come, we have a small nuclear powered energy system. and a nuclear missile that can avoid all interceptors.' Mr. Keshe says, they have developed the reactor with a small amount of Alpha nuclear, it's very effective, instantaneous. Now what I teach you with the wind side is the same... you can't start a fire if you don't put the right light to it. The advanced systems the Russians are warning about (2:46). is a simple KF reactor. It's totally Pl it has no matter in it. ... it creates a zero time, no friction. this all part of the KF technology. Rick says they want to lay claim to this new system. Mr. Keshe, no it's their innovation and this is the beauty of it. You have to understand Russian mentality. I highly respect Putin. deterrent has never worked, but the ?? fear to do something. When there is a deterrent

there is always a match above, but when there is an iron fist, that's it, it has to be done. And nobody dares to touch. This is exactly the story of the Iranian sugar, because they tell you it is this or that, but in fact it is a very simple reactor. All of you carry it at home if you made the dynamic systems. (2:48). Q: Do we need to use the radioactive smoke alarms to ignite the plasma? No, I have already given you a more powerful system, with the Gans' that are safe and every man can use it. You don't need to use any nuclear material that you could have a hazard with it. (2:50). Learn the creation of motion, how to use a wind flow to fly an object. It should be easy, I gave you a trick, the switch but you don't see it. Even if you create a dynamic wind flow that you create a certain absorption level on it you can fly any matter. Tesla understood but he couldn't deliver it, he had the fuel but he couldn't understand where it comes from. One day I discussed this with professor Miles, I wanted to know if he understood what Tesla didn't, Miles didn't understnad the return of the fields and Tesla didn't understnad the forward motion of the G and M. If you put the G and M together, add on, you won't get a clash, you'll get the emergence of the balance, which is matter state of that strength of the field. If you put 2 ?? of H facing each other, they don't balance each other, the balance of the G leads to the creation of the matter state of the H, depending on the environmental G field forces, on planet earth it does. This is how you create H in the space to receive energy. We don't need breathing systems in the space because we convert energy directly in the body, we loose our nose and mouth. I have already explained these in the teachings (2:52). in the past. Because the field is so equal to us that we don't need to put it through the lung to convert it, we convert it through the space of the body. We will loose most of our organs in the space. The biggest problem for those men who have left earth, coming back with the DNA of a planet is conversion to the human body. The people we see who are not from this planet, the eat and breath in front of us, but inside there is no such system. They developed such a system to look human but it's a mirage. For men who come back from the space it's a huge problem. It's misplacement of environment because in the space you loose mouth and whatever you don't need, because it's a different environment. Then when you come back here you have to talk and live the same as what you did before but the organs aren't there so you have to get used ot it. Something like a decompression chamber is needed for men who come back to earth to adapt back. Most of the time when you convert to a new environment you go through a transition. ... When I accepted the mission to do what I do, when I received a new soul (2:54). my body was strange to me and in the beginning it was frigthening me, the soul of higher order but the physicality of the man. I could see fingers, it was frigthening, but not mine, but I got used to it. The second time when I received the highest order of the soul, it was frigthening but I knew there was a reason for it. I received what I wished. This is why when I teach and when i am a man, it is 2 different souls, but in a way the 2 merge together that I understand the physicality and speak the word of man. It's absolutely torturous to change into a new dimension of physicality, for days you feel, this thing is not mine, but I know I have to get used to it, okay it's called a cup. Even my breathing system is different. When I die and if you open my body you'll see something very strange from everybody else. In my throat when you go down there is a small chamber which is not normal, it's before the lung where all the conversion is done, because conversion is very difficult, it's one of the biggest problems of mankind, to comeback to be in the conversion of the dimension. Very soon those of you who go into the space dimension you see the true soul, because

that is the only thing that you pump into source in physicality ?? ?? the wind go over it, nothing can touch it. (2:56). Those of you who will receive the condition of the elevation of the soul, if it is of yours you'll know it, if it is of what is done you will ?? experience a strange thing, the body doesn't belong to me, I have to fit into it. I have been through this process twice and conversion to human body is horrendous. Learn to work in the dimensions. I work, I teach and do everything that is needed to be done as a man, but understand the dimension of the totality and then you work within the field of the Pl of the U, not how you are going to create it, would it be Pl or nuclear or whatever. then you can ?? fly in any dimension across the U. Understand how you go to sleep, dream and you see everything and you awake, ??? you can't see it, but I died, how is this possible. Can I while walking down the street be with my mother and understand what she wants. We can do it, but we have filters, like the guy says, why is that Cu plate there. Isn't the Cu plate a field to resistance or filter, instead of water there is Cu so anything above it can go through it. I push you to the limit that you open your eyes and you take over, then we'll achieve world peace (2:58). because man has to accept it within his own DNA structure and then the RNA will deliver it. What I said from the beginning we can force you to disarm, but if we can't change you in the space you'll find another tool to kill with. It is you who has to change the DNA to it's origin condition RNA, which is I take what I need. ??? that this is the same, what music you put on it. Q: Can you explain when you said when you come back to your body? No you don't come back to your body, it is a state of receiving. It's like when I explained when you have a weaker and stronger Pl, as a doctor you put a double strength to a single strength and then you move what is inside and the other one becomes second. You receive the dimension of the fields of the higher order, and your soul in a way, matures to a level. This is what I said about he UC and EC members, we give a higher order to them that the soul receives higher in the dimension of the creation. It's not that the soul changes, but when you receive the new elevation, the new soul, your body feels it. it's like you were working in the water and now you have to work in the gas, you feel you're going to float but actually you fly. Or you have the same plane running along the runway (3:00). and now you have to trust that it will lift into the air, ?? looks, and I am still flying. I am a Messenger but through the STM and not the physicality, and I have to teach for you to become, this is what we do, we enligthen, we give from our souls to your soul. We carry so much that even the fish receives what we have, but as I have always said, man accepts it according to his maturity. And those we have seen, you needed conditions for transmission, or intermediaries, or what you call prophets or whatever, now instead of having one it is all of you knowledge seekers. The same is in the dimension of the animals, you shall see. What is very hard for mankind is the understanding of it because you have gotten so used to physicality that it is hard to let go. The told me that a study has come out that Viagra reduces cancer by 50%. I said, of course it does because its main ingredient is Zinc which is known to touch the emotion, (3:02). in increasing the E and of the excitement of what comes with it, it touches the emotional level which converts into a Gans condition and if the E is satisfied the cancer disappears. Now we have scientific proof in what we say is correct and we can show it because it is the Zn component of it which satisfies the E which is causing his own cancer, I want to get cancer because I have a problem with my son, but now that I have received the energy of elevating my soul now I understand that it is my problem .... (3:04).

Q: Can we consider that the first soul of this planet starts with the first H atom? It starts with the first neutron because the size of the neutron on this planet and in this solar system (3:08). and most of the galaxies is dictated by the field forces of the central line of the U. This is what we produced at the minimum dimension has a given size at this structure and it depends how close you are to the center then this dimension changes. Mr. Keshe says good-bye. then they read the Romanian version of the Constitution. ... you have to read it with pleasure, calm down. (3:12). ROMANIA slowly and calmly from the soul. This is the STM. (3:29).
END

217th Knowledge Seekers Workshop - Mar 29, 2018

(,)

(:29). ... when the first shimmers happen immediately broadcast it on the internet so that others around the planet can duplicate it. This is the key to world peace on this planet. Sharing the knowledge without patents. Nobody can patent the knowledge of the Creator. This development is very rapid. Two of the groups have reached dynamic toroidial shape field flow. (:38). This is significant because with a toroid field flow. He draws it. They have managed to create the fields, but the flow is too wide. They were told how to tigthen the fields. Remember the 3 layers of the skin of the man. ... 3 layers of MG fields will lead to the creation of silver ligth. (:40). As the skin has 3 layers and it manifests the man to have a containment. As soon as the bring the one it will connect to the other 2 existing and the SS will manifest itself. To bring these together depends on your understanding of how your system works. As soon as you see the shimmers, go live. Every second counts that we can keep the knowledge open and to not get stopped. (:42). You'll get excited but don't get arrogant. Once a number of these systems start solidifying then the ones that others have made will also start solidifying. This is the beauty of it. It's like when fish start spontaneously to manifest in places where there are no fish. Turn your system on and try to replicate, adn in time you'll see. We have no choice as the space technology rapidly advances it will change many things for many of us. To the research teams, keep a safe distance and do not get carried away trying to touch. You have created a dynamic field flow which is like a soul. It doesn't cut you but it has a field capability of the conversion of matter. (:44). This is a condition of plasmatic and it will effect every one of you who come across it. Emotionally it will satisfy you and at the same time in reaching flight many of you will be excited upon seeing it, and you see it as the freedom of man, but remember the responsibility becomes harder and tougher and the obligation becomes much harder for all of us to keep within the ethos of the KF. When we get used to it we go back to the present structure of life, the process is how we can speed up and sustain life the way it is, and correctly manage until all aspects of this technology gradually opens up for flight and the usage of it becomes part by part and can be used by everybody else. the life will carry on, it's just because we opened the space doesn't mean that everything finishes ... (:46). We need a large number of Spanish speaking people for the factory in Mexico. .. (:48). we are looking for a large property in Dallas, Texas ..

our choice of Texas has a specific reason especially in agriculture, as you know the water bed in Texas is drying up and this will revive agriculture in the USA. (:50).
(:52).
(:57). (1:00).
(1:02). Alek from Nigeria talks about new research center.
(1:05). We'll come back to show peoples work again. Please prerecord your work without music. If anybody makes a threat against you, ignore it.
(1:08). The swimming pool is empty the MG fields are in it and you walk through it. You actually feel by walking through this pool without any water, how you'll be treated in the space. (1:10). There is no water in the space. .. or do we understand that the M field radiates to free the body of the man. As I explained in the teaching last week we are gradually walking away from the water. If you could eliminate the gases or what I call the Gans' then you should be able to achieve much better results then the liquid water in your cores. You have to learn to use M fields irrespective of the medium. It is the medium that has ofoled man up to now. the medium which is the MG field of this planet leads to the creation of the physicality of the man. If we change the strength of the MG field of this planet the whole of the human race, other animals and plants will change very rapidly to fit into that. For those who understand this and work in the section of the creation of matter of the KF you should have understood exactly how the condition of the environment that (1:12). you create leads to the creation of the matter by the interaction of the fields that you use. It's the environment that leads to the creation of matter when the fields interact and not the interaction of the fields that lead to the creation of the environment. When you are mind set to create matter state or any other state. Those who work in the space lab you have to move away from working in the matter state into working in the Pl state. This is crucial for those who are in the space research development to understand this and by understanding this you move away from the liquid Gans and walk into the Pl condition. If you can increase the speed of the flow of the M field to the position that the friction between the matter state and Pl states in interaction with each other will lead to release of the fields, and once the fields are released it will lead to the creation of the SS condition, needs very little to maintain, because there are hardly any loses and there are always more gain. In the process of developing space technology (1:14). in understanding that there is no need for liquid or the Gans state it will manifest a new science in the world of science of man. This is the next step in most of the KS to understand the creation of the fields becomes more important then the creation of the Gans and Pl. We went from the matter to Gans and now to fields and from the fields by release of the interaction to the state of the matter. You have to realize how much speed and in what direction, of 1 matter or the other you want to create or maintain or sustain. In that process the energy transfer is more important then the energy itself. the bag of flour on the table means nothing unless a master knows how to add a little water to it can make a bread. (1:16). It is important that we start working not in the state of the Pl of the matter state but in the Pl of the fields of the state. Then understand that by the interaction of the fields in the dimension of the matter strength leads to creation of the matter itself, this is the secret to the creation of matter, and then how you change the environment according to the strength, the same matter will change its property and its characteristics, because it has to respond to its environment according to the field strength of it, it will change from gold to platinum, or mercury to gold, or water to H or He. For

those of you who take into the dimension of the space travel, for the production of the materials and energy this will become a vital understanding. You can change the environment and you get the same product, if you keep your fields constant and change your environment in a MG field strength then you start creating any matters you like according to your need. Our research teams in matter production have not understood this and it looks like they are lost, because if they would have understood there would not be chance for them to do this or that, (1:18). they would target exactly what they need and by changing the environment they can achieve the matter state which they need. At the same time it goes back to the operation of the STM if you understnad how you can extend the energy fields from the essence of the creation of the man, and how you can block this energy at a given point will lead to the creation of the matter of ??? of the man. In the process it is the fields by interaction you get the conversion, this should be very easy for our space development people to create the solid state of the body of the aircraft. The simplest way will be to understand the field strength and direction of the motion and the spread of the fields before and after interaction. Are there any questions? Q: How can we determine the outcome from the interaction of the fields so we can consciously create the desired outcome (1:20). be it from Gans or coils, how can we understand the fields even if we don't see or feel them. the thing is do you desire the physicality or the intention and then do you know how to control the emotion or the fields from the STM that partially will become physicality and partially satisfaction of the desire that you see it but doesn't need to be there. Those of you who go down the space path will have this very strange feeling that you would like ot have gold but you don't want ot carry it, you want ot have the feel of its ?? and you are carrying it. You can create that emotion. Those of you who become expert in it can change a diamond ring to any color at any time, from any material from platinum to gold. Because you have not change the matter but you changed the environment of it through your E, the strength of which your soul releases in the environment of the ring. (1:22). Q: How can we fill the reactors for solar flares? This needs a special understanding. it's amazing how these question s are coming up, it started about 2 or 3 weeks ago. You have to learn how to create mirrors, M field mirrors are different then normal mirrors, they are created in a way that they absorb fields, solar flares, or deep space oceans of fields that it allows you to work, it's like an umbrella you create where you don't get wet but it doesn't stop the rain. (1:24). You make M field reflectors or absorbers or systems that can reflect M fields. Tesla has done a lot of work on this, if you combine my teachings with part of the Tesla teachings you might find a system that works for bending the radio frequency ???for creation of matter, then you can use it the same. Q: Is Bismuth something that work. No, because that is M in matter state and not in a Gans, which is O and then in the state of the Pl of the U if you work, there is no O so what you call diamagnetic field in the universal dimension of motion is Deuterium. But you have to understand how it does it, most of the reflection of the rays of the sun for man on the upper layers (1:26).

... creation of field reflectors is one of the ways to converge (or diverge) M fields (1:30). I hope I answered you, there is no other way to answer you because in the space you need this, something to create Deuterium reflectors when you go into high speed or you get hit by high rays coming from deep space. Q: would this crystal state be dynamic? Of course. Q: It wouldn't be the crystals we have on earth? When we say crystal structure we mean it

behaves as crystal. It manifests itself, but it is not in fact .. in a Pl condition in a crystal condition. It's the behavior and absorption of the fields ?? hand and you see how the rays break off depending on how you put it, reflect the light in it. We are talking about pl reflection and not matter state, it's totally 2 different things. Think of it as a hollow ball which is shaped by field strength and nothing can get out of it. It's as if you bounce off the wall on the other side and up and down. You don't go into space that you can get out of it. Crystalline structure energy systems are one of the best (1:32). ways of transportation. As we enter a new dimension of teaching more of us understand the work of the soul and everything else, new products and new materials will appear that we can see. Then we'll see crystal structures. Q: Do these crystal structure around exist all the time or is it a special circumstance? They exist all the time. ... because of it we do not see a lot of things which are in front of us. Partially our eye works this way, the little hole in your eye is working in the Gans liquid of the eye and the Gans matter state of ?? entities behind the eye, what we call the wall of it, creates this condition. Q: They are talking about proteins in the crystal state in the eye ... No this is part of the structure, we always refer to things that are in the physical shape. When we talk about the crystal structure in the Pl dimension it reflects anything that comes to it. (1:34). They call it crystal lattice structure when it comes to matter state. You could not have bread if there wasn't any wheat seeds that it allows to grow to have the bread. It depends on what part of the process you want to ?? , you say no there is nothing like that exists, but I know there is a field of wheat behind the wall and if you push it you can have a bread on the table ..?? We have to be able to use everything we have in all dimensions because they all behave the same. Q: Have you ofund a way to measure field strength and give it some kind of meaning convention to associate these with the strength of emotions? ?? laugther. We are the best converters but we never seem to understand it. We convert the energy of the STM to what we like with the filter of E. Q: You mean if we are overwhelmed by a certain E then that produces the laugther? Yes, if you look at it in reality (1:36). He draws a circle, this is your brain if you have any left working, ??/ and this is your soul in the center. .. the E in one may produce 10 Tesla and in another 9 T, the only difference is that the Gans environment is slightly different from each other. ?? the strength needs a barrier, we call it emotion, and then it discharges. The strength of the E hits the barrier here we call it pain, or here laugther. (1:38). We have to find the strength of our soul and then we can understand how our strength can be given to the others that they can grow. (1:40). Jalal reads the EC Constitution in Arabic on behalf of UC Jamila. (1:42). (2:06). (2:08). Thomas from Winnipeg presents a plasma pod. He started KF about a year ago, for his mother's brain hemorrhage. He built a tubular structure about 7 feet long, with 72 plastic tubes coiled around it and a DC pump for the Gans water. About 30 people have gone in it and have had amazing results. He can feel the fields a block away from his house. He wants to convert it to reactor technology and asks if tubular is okay or it should be circular. His mother started having minor strokes, blacking out and falling down and was in a coma for a day. It's an intersecting brain hemorrhage, any time she got stress she would suffer from these episode, it was 7 years ago. (2:12). She could only go inside the unit for 45 seconds and then she wanted out and hasn't gone in it since. She is sensitive to the energy and feels when he spins even a ping pong ball. What have you put in these tubes. Ocean Gans with CO2 and ZnO2 and some others but hasn't experimented with anything else. He would like to do more with energy, flight and matter

production. Mr. Keshe says it is a very interesting system (2:14). I used to make a miniature version of this but with a different usage. It depends what you do with it. He put sprouts inside it with pump on, about 200% difference then the control groups. (2:16). He had an experience with field transfer, a child in hotel was crying without anybody to help her and put out his hands to help, about 6 feet away from her door, and he felt the room spin, the bottom half of his body one way and the top half the other way, like he had in the pod. (2:18). story about his dog in the tube. (2:20). ... the beauty with this T we all can try and create a new dimension with the knowledge. There is no limitation. People are moving in a new way with the health application. We bring a new knowledge for the change. The beauty of it is to share. (2:22). I have seen this hundreds of time, people come to you with the most horrendous illnesses that they see an end to their physical term of presence and they want to have more of the same suffering. I hardly see anyone come and say, if you can make my passage peaceful, they all come to get extensions with any excuses, I have grandchildren. I never heard anyone say, I want to stay for extra time to be able, now that I know I have time where I come from, to add to the level of my soul, to strengthen soul that I can create a better life, to give back to those. They all want one more breath one more day to be with physicality. This has been a puzzle ... (2:24). you become a creator. 08

(2:30).

.. it's a criminal offense to save a life ... I feel what you feel but unfortunately I can't help you. (2:36). It's not that I don't want to, but if I do most probably your government will make it a criminal act. This is the strangest thing when knowledge to save a life has become a criminal offense. ... to do it is very simple. Every cell of the body, even if it coordinates in the RNA and DNA are missing can be adjusted and corrected. You have to understnad the position of their fields in the body and where there is a need for interaction. You thing you should understand, you have gone very big with this system, you should have gone very small and you would have allowed the tissue to grow. (2:38). You have to understand how you can grow the plants. You have understnad that the cells of the brain are not destroyed, or the blood vessels, or the neural system which comes from it, but they can be strengthened and they can replicate, it's just that the fields have changed that have manifested itself in the new condition. And we should be able to walk your mother out of this situation. It's not the lack of the knowledge but how to apply it. You are looking at the after effect but you need to go to the source of the effect and the reason for it. You have opened the field too much. When you have a headache you don't bandage your leg. In your talk you said exactly where the problem is but somehow you are not aware of it, but that is where you have to work. And you can walk your mother out of it in no time. It would take me 2 months, but unfortunately ?? (2:40). I let the man suffer because that is what he wants. We choose our rulers ?? A video about a car. This is the first flying car ever developed. It's an old car of Caroline and I made it to fly. The engine, fuel tank, central column have been taken out, and everything else because there was no need for anything that goes with a car. To withstand the cross wind you need 200 kilograms. This car was to shown on 26th November 2011 in Einhooven. (2:42). On the 25th the Belgium officer they came to arrest me, they put the radioactive materials in a box and left it in the lab to humiliate me. they said do you have a flying license, I said no

.. I never seen a nation lock down the technology. (2:44). the show the video of the car. (2:47). They eventual crushed the car. One of the most advanced cars in the world is blocked because of the greed of a king. There won't be a nation anymore. (2:48). The way this car flies. On the back of this car the German government supported us to take over the Antwerp factory to build cars. The flying system sits in the shock absorbers. The central shock absorber column is fitted with a small MaGrav system, nuclear based which allows creation of MG field plasma, there are 4 of them and then 1 just under the gear box. It sits there because it brings the balance to the center. In this process the driver drives through emotion, what he feels. This was 7 years ago. Many people came to Einhooven to see the flying car and they got disappointed. They wanted to embarrass us. (2:50). Seven days later we announced the capture of the drone by the Iranians. And now the Russians announced there systems last week. Maybe it was too much for the human race, they weren't ready for it. Now we are paying for it, getting matured for it. Because of this delay more people understand. We see the developing of the nourishing of the STM which even bypasses the car. it is obsolete to what you have learned that you can use your own soul, in understanding the field of the STM for space development. (2:52). In the place I had my lab, I tested flying objects, I could fly through the walls without restriction. there were complaints that so much light was coming from our house that Caroline put double thick shades. The lights would shine down the whole area. I could go through the matter state of the roof of the garage. This car was to become an antique but all we have left is this video. This car lead to the capture of the most advanced aircraft in the world (drone). (2:56). This video was taken a half an hour before they came to lock it up. The Drone was captured, the Russians have shown technology, and I am sure the Chinese government has develop more powerful uses or are still testing. Our own research labs haven't yet reached the ability to make this car let alone a spaceship but they are understanding more. (2:58). If that drone had not been captured Americans wouldn't believe that we have to power to cross their nation freely. We have to use this technology for the betterment of man and the peace. It puzzles me how the most advanced technology has been blocked by one pedophile king. I will end up the kingship.

(3:00). (3:01). Video : Cycle of Creation

End

218th Knowledge Seekers Workshop - April 5, 2018

(,)

(:11). We are resolute in changing humanity. I walked you through as K Seekers, it was not just to make a Gans or core but to get you to start thinking on your own. The Gans and things was a game for you to start thinking that I can I am capable. I don't need to be told by others I can judge for myself. It is written that independent investigation in the sciences is the obligation of every man. We have to and I created in a very small way that everybody can participate, the young and old, man or woman, every path of belief got involved. As a teacher I taught according to your capability of knowledge. Everybody

takes according to his intelligence, but one thing I didn't tell you is that you are all intelligent and the same STM and it doesn't have a ?? level of intelligence. (:14). It was to get you to understand that you have a soul and you are the decision maker or your own physicality and destiny, not only what has been predestined meaning my shape and physical body but in my future and what is to come. In so many ways I took all the blame for the failures so my students would be proud that they have done nothing wrong. In many ways we all have been successful in developing and doing things. ...
(:16). The success in any teaching is not listening but participation, especially when it's scientific. Many of you made Gans' etc.. in the end it was for you to understand that you are the creator and you can do what you want. In 201? I gave the blueprints to the governments but their greed caused them to not share the technology but they did a lot of research in the background. Two years later I opened the key for all of you.
.. we opened the medical side and that brought a lot of problems for the KF
(:18). I never promised you heaven, but I said I would take man to space.

(:

.. when we opened the space technology we shared even though they made a lot of threats against us. (:22). They poisoned me, blew my car up, high speed chase to kill me in Belgium all has been part of the excitement of this life. We shared with the governments and gave them a flight time lead of 10 years. That flight time lead is over. On the 14th and 15th of April, 10 days from today we'll open the patents in the same way we did it with the health and energy. That will be the Spaceship Blueprint day, part of it we know and part we don't, then all of us will race towards flight. Now we become the controller of our lives in the space. The KF will provide the facility that everyone of you can produce a SS, we share knowledge openly and you share it back with us, this has been the ethos of the KF. We'll start at 10 AM Saturday and we'll look at all aspects, to fly and be hungry is no good, so we'll look at all (:24). ..

... we need to take this step because of what 3 or 4 governments are planning to do. Through opening of space in this way what we said is fulfilled. It was a promise, a deliberate act to eradicate the borders. For those of you who can fly, then the governments will have to accept that there is a need for a common ground universal balance. It will take 6 to 12 months to see the first departures from this planet. (:28).

(:34).
(:36). We'll start interacting with the U Community. ... We'll continue teaching at the level of the soul. Those of you who have reached the level can switch and you don't need a SS and you can expand the dimension of your life according to your own position. Every soul has the capability to become a sun and position itself accordingly and then manifest itself at that point. Not many will reach this point because it needs a lot of clarity of soul. Our date for the freedom of the man is April 14th. A number of people have been trained to be Mozhan, your time starts, you have been taught and now is your graduation. You have to be shoulder to shoulder with EC and UC members. Reflect on what you learned while you were with me those weeks and now you teach. What you

teach those who want ot go into space will complete the whole structure. (:38). There are 5 of you and you support 5 members of the EC, now you understand your position and in that process you learn how to guide mankind from what you learned from us, during the time you were in Accra and then when I flew you to China to stay with me. The trip was to show that the nations don't exist and I hope you understood. Even though we learned a lot we realize we know little because the knowledge of the U is ?? ongoing. Many of you who became specialized in certain aspects of the T, use that and bring it out. If you have a flight system we'll allow you to show on the 14th. Some have managed to achieve torrodal wind flow which (:40). is the backbone of completion of the knowledge. How you change the M field will give you structure, energy, ofod, medicine, material, as you need and wish. This was the crucial point the ?? variety and diversity of MG field flow which gives the plasmatic wind, this is why it was so important. When there is no variation there is no movement, when there is a gradient it creates a wind flow and you need that Pl flow so you have a combination of all the strengths of the M fields that you can create everything you need from it, energy, matter and speeds of light and beyond. Now you understand why it is so crucial. As ?? some slow down or we force it to slow down it will come to the visibility of the matter state Gans which ?? the physicality of the SS and some will come at the speed that it will create protection, and some ?? will become low enough to create energy that it can be absorbed by the STM and not by the physicality. The space feeding time is very much different then what we are used ot in the planetary system. When you travel in the depth of space through the conditions of the Pl transformation you feed the soul (:42). and not the man.

((HERE)))

(:52).

(:58). ... the biggest breakthrough is the creation of M field flow, this is how the U is created, with the flow of M fields in the Pl condition where they slow ?? the conditions to created life, but with us we have a control mechanism so we can dictate what is created all the time. It's very much like a factory that makes cake, hundreds of cakes a week and each one tastes exactly the same, because we have set the recipe and have understood ?? for man. The image, feeling, soul, understanding will al be the same. (:1:00). Join us and please take the letter that is released and invite every world leader and scientist. Release it to the mass media. They have to know what is to come. I have asked each team to show what has been achieved. Doctors will show what they have conquered, Agriculture etc.. We dictate the condition which is very simple knowledge in exchange for peace for the opening of space, no other criterion. ... The end for the physical matter state of the man has come. Any questions. (1:02). Ruthi is one of most powerful woman in the Chinese KF. (1:04). We rely a lot on her for what is going on in China. (1:06). Q: Jay is worried that someone in their backyard may accidentally take out a 747, after the Blueprint will all other aircraft have to be grounded? No, we will conditions and situations and it is something that world leaders have to figure out, as long as they don't make the technology criminality and understand it is something everybody can do. It changes a lot of things. (1:08). there should not be fear but we have to find a positive solution.

(1:10).

.. when the first flights occur governments will have to find a solution, One Nation is forced upon us. (1:18). it's checkmate for the world leaders, it's over.

(1:22). Once we accept the condition of peace we'll see the U, the only pass you need is to become peaceful. There will be accidents, we have lost trillions of people in the space, as we say due to weather conditions, hurricanes, but in the space it's a different shape or form, but we know in the path of universal belief, we believe in one thing, the existence of that accident was for our fields, or souls, to be given or spread across the U to become the seed for another life. It is rejoiced and not shamed or sorrowed. ??? man hasn't understood that ?? he goes no where, and doesn't even know he is the STM. In the U Community the belief is different, as is the life, the field of the U never diminishes and is everywhere (omnipresence), then your soul becomes part of another which could be higher then you. It's rejoicing that counts and not being worried about the losses. We will have accidents we see them everyday across the U, some of them horrendous but there is not much that can be done about it. It is the condition that is created. We have it on earth, we have hurricanes, earthquakes, all kinds of eruptions. The same occurs in fields, not in matter state, in different parts of the U. There is no exceptions. Don't be afraid of damages, be afraid of the joys and freedoms it brings. There are always collateral damages, always. We haven't ofund a means for controlling it, it means there is a need for a new conditoin. (1:24). Q: Can we find a way to speed up the information sharing for this purpose? It is as it is, open teachings, there is no other way we can do it. Most of what you need as a blueprint is released in the patents. Rick says the first paragraph of the patent pretty much sums up the whole concept of the energy and G reactors. Mr. Keshe asks him to read. The thing is the whole knowledge is set in my patents, the knowledge of the freedom of man and beyond in the space is in the patents. It's just that you have a knowledge, you see it and you look at it with a new light. The principle behind all our teachings is the freedom of sharing knowledge. (1:26). You'll be amazed that after next week so many researches and weapons technology will be obsolete. We don't negotiate, we dictate peace through knowledge. You have to negotiate when you have somebody who is in opposition, with this technology there is no opposition. .. we'll dismantle the wrong leadership from with inside themselves. World leaders will decide how to spread the knowledge, but the knowledge is already spread. We have made only 1 condition, T in exchange for peace and sharing it among all of humanity. Who can fight it, unless you have clandestine activities. The way you look at it, all illegal activities of groups like the Illuminati controlling the finances of the world, Mafia structured work, this all become irrelevant because the new money makes them obsolete. People who have everything don't yield to pressure. You'll see resistance, especially you'll see the Masons will vanish in no time. (1:28) . ?? because what they thought, there will be nothing. the day we announced the opening of the Keshe F Coins, 2 - 3 weeks ago, just look at what got wiped out of the Stock Exchange, some 60 odd billion and they started an enquiry on a Saturday of that week after we launched the coin, because they realized that now there is a financial value behind the Coin. It is the first time we secure our Coin with financial means, which is the income from the worldwide KF operation. Science has become the backer of the currency and not thieving. Imaginary digging of what, people's life, loosing

that. And we see the change, it's a solid base on the effort of those who want to participate. ??? You saw the peace with N Korea and US and China, just go back and listen to those last teachings of 2017, you see how much knowledge was released about those who were creating the war. I dismantled it. (1:30). Look at what happened in the first week of January, because we took the backbone of those who are trying to create war, because they thought nobody knows. The KF is very powerful in security and structural security 18

(1:32).

(1:36).
(1:38). Rick reads the patent application 2007 ... Mr. Keshe goes through it step by step. If you now change (wording) to Gans' which create ... it fits perfectly. Q: Where it says gaseous matter you would put in Gans. Yes. Q: would it be the Gans matter without the water? We have shown a trick of how you can do it without (or with) the water, it's still in the Pl condition. If you remember the water we drink the minute it enters the body of man becomes a Gans or plasmatic state. Q: but can we get the strength of fields to an G effect? (1:40). Yes, you will see, but you don't need a Gans, there is a new technique that I am teaching because one of our teams is going in that way. Armand knows all of it but he can't put it together, he knows exactly what I know and I have taught this man. He just has to put it together. There is a condition, you don't need any. Let me explain very clearly. In the Iranian nuclear reactor base, which the Russians has used in a different way. We place the radioactive materials along the wall, and then we had a second one which is again nuclear materials based on the side. We have to explain that nothing the Iranians did was harmful, it is beautiful what has been done. (1:42). We created a dome condition. There were a lot of concepts then, about different things a 2nd reactor inside, rotation. We didn't go with the rotation. We placed a number or radioactive materials both on the inside dome and on the floor of it. We vacuumed it and introduced gases in 2 directions, 2 ways into the cylinder, 1 comes in from the top and the other into the inside reactor. We had a condition of a motor running inside so it is self-contained, gases here, H placed a high level (underneath) that as it was needed it became a fuel tank. The inner reactor was rotated but the other one stationary. The inner reactor rotated in direction different from the outer. In this way we created the 2 fields, (1:44). Now you have the platform which is the earth's MG field, by a speed of rotation and a change of the gas in any chambers we could dictate lift or landing. You'll see the Iranian space reactor. At that time we don't know the reactor needed cooling so we added it in the Belgium one. The vacuum wouldn't allow and we used to get a matching of the fields and had problems with it. In one test we went from 7 kg down to 6.1 by literally adding 1 mg of gas. Here there is a dome outer and inner chambers, we created a M field flow, but with interaction with the outer dome which is fully N coated with deep n coating. (1:46). The fields have to break and create a thermal shield, and this is the problem our team has at the moment, they can't break it. By a special way of N coating I created a dome that these fields broke and the 2 fields could interact. You had G field, if you could add less than 1 mg gas and loose 15% of weight then you see we achieved full lift, with the military conditions they were wishing to develop. But the next step is, this is a dynamic field, what do you do with a rotor, generator, you create a dynamic field and then you have matters like Cu

brushes and coils and you collect the energy. so this system is automatically a generator. It depends how you slow it down. It has become like the STM and then these (fields radiating out) become the emotions. It is all the same. At this level here you eradicate cancer, here Alzheimer's. We have to understand this now. This is the body of the man. You have your chakras. It's no different. I have replicated it, but you don't want to see it, it's your problem not mine. I know the secret of the creation of the universe. I am the beginning I am the end. And man is very lucky to us this time, it shows our love for mankind that we spend so much time here to get it right. Everything is written in a language that man can understand. (1:48). Iranians couldn't, now the Russians have developed it in a further condition. When you get lift, how many km of walls do you want to make with Mexico, what a shame. That's what I told you, the American scientists have no clue, as we say, they have fur coats and no knickers, which means they think they are wearing a fur coat but they have nothing underneath. They are as hollow as an egg which is rotten. Now it's time to change. Read the rest of it. If you change the same thing as a Gans you have the same position, but instead of needing those nuclear materials in the reactor, you have brought in the condition of the Gans, it's the same but it's a higher spectrum of strength. With Gans we have a greater strength but much more open, you have to squeeze it to get it moving, to open it up. It's like when you have a plastic bag and you fill it so full that it erupts, you need to do that with the Gans, and it opens up and you create ignition adn ?? you do the same thing. Those of you who complained that you lost some balls, you reached this point but you never understood. Armand has been on the verge of flying so many times (1:50). and I just let it go, I don't say anything because I am just the monitor, I have done and delivered and made a copy. Now other teams are reaching the same point. .. you'll see next week. I will show the Iranian reactors. I thank the leader of Iran for allowing us to take the reactor out. No nation does this unless it's peaceful. I came from Iran in 2009 and made the tests. The Belgium's, Americans were watching that no information would leak out. And every time they saw us close they planned the next murder. They thought they could steal it, but they never understood, they thought the key was in there but it was somewhere else. This patent is a total patent for any space (program). When you go to deep space you'll see these kind of reactors, very simple ones. Because it is used for the creation of matter. These kind of physical reactors that are fixed, that matter in that condition will be fixed. Our scientific team will show you have they have been making materials the same way. The research centers are owned by the KF. None of contribute a penny to the KF, you come and take but we spend everything we have on developing the new T. All of you who come, in a way you become a thief in the night, you just take and don't put back. ... but I want to see how many of you every passed the point, you don't even share with anybody else. We have a situation in Austria and Germany they came and stole from everybody else and now they are begging for their bread. learn with this T, if you don't share it is taken away from you, because you are taking from the Totality and you can't do that. (1:53). Rick continues.... introduced gases , He, Ne, Ar, Kr, Xe. Now change these gases to H, Deuterium, Tritium and you get exactly the same, you get due to the interaction of the fields which due to the atomic strength mass create different conditions (1:54). 1 is a slower and 1 faster and the interaction between the ?? 2 which G and M at the same time in the same Pl in the same Gans energy. But you put in your Gans rectors, where you put your Gans, an empty hollow ball. You always filled all your reactors, go

back on the teachings and I referred you to put an empty ball in. What is going to happen? (1:56). He annotates on the patents page, so now let's say you put the Gans' in this one. Put an empty ball in here. Remember when we did high rotation and in created that empty hollow center. Now that center you create from the empty ball here becomes matter independent fields, this is just what you need, but the beauty of this independent field is because of the variation of the Gans' you put in, it has its own layers inside. You come back to the same independent field flow. Those of you who lost the balls, who could see fields flowing, if you put field flow internally, empty one, now it's not the Gans' which do the work, it's the fields which get created in this cavity which becomes. You become independent of matter and none of you have seen this. And it will still be in layers and you dictate how you want to fly. Nothing has change, here you used gases and whatever, and there you change it to the Gans of H, deuterium and Tritium. It is the same. I couldn't do it with the nuclear (they stopped him in Belgium), but these guys didn't know that I come from the origin of the creation in the sense of the U. I know every way to do it, so I went to the Gans. If you stop me with the Gans I will sow you something else, which you will kick yourself about. Much easier then Gans but much more powerful. In your Gans balls you put an empty ball inside (1:58). the material stays outside but the center is hollow with fields and is the same as whatever is outside, in layers by layers. Now change this hollow center in the shape of a man, now you see how the STM can fly. And you have this, it's called the brain of the man. You don't need a SS, man needs a gadget to show. You have a ?? there is no difference if you look ?? of each other. This is why we taught you all 3 levels matter and Gans state and the STM. It is exactly the same. You have to understand this, then you (it) can work. I said to those who work with the space system, drop an empty ball in, they said why an empty ball. This is what it does, it becomes your reactor, independent, matter energy. We have the same thing in the center of the earth and the center of the sun. Centrifuge doesn't mean only for matter state, it's the same the Gans and the gas and the Pl, but then the Pl dictates its own field. I said to Armand you lost 2 of your balls because you didn't understand what you did with it. Then the same when you do a space reactor T (Star Formation) where you put the H in the top reactor, and Deuterium and tritium in the base reactors, you need to (2:00). you need to put a spot of one of the Gans in the other ones that they all have a line to connect, otherwise they have no where and go everywhere until they find (a place). You need this 1 spot or drop in each of them, that you line up the connection and they ofllow. Then you have the 3 layers of the fields and it gives you physicality. The space T is so complete I don't know why none of you see it. The SS is there, but then you have the field flow, how do you want to cut it. 1 angle gives you 1 kw, ?? satellite on the top in this pattern ?? go further down. One city needs 1 satellite and the rest will cut. You put a cutter in your frig and freezer. You make a field that as you walk your soul receives the energy it needs. You don't need to eat. You don't need to waste your time to slave to live to survive, you go on the beach, if you are happy to make something you make something. Nobody can take it away from you. From next week on, even if you understand what is here on this page, the borders are finished, we have become One Nation. We have no choice. (2:02). I can fly in the center of Washington, and a lot of you can do, fly to the Oval office and let the President tell you why he is killing. (2:02). This is the potential, respect out of equality not out of fear.

.. if the interaction of the STM leads to the physicality of the man, why shouldn't it do it in your reactors. It is the limitation of understanding not the facts. Rick continues to read.. (2:04).

... this happens in the upper atmosphere .. Our factories are hidden sources of space fuels (2:08). but we won't disclose it until the time is there. They are the space fuel centers. I developed it that way. I have disclosed everything to Armand he knows exactly what it is. We are creating space fuels that you can tank anywhere. The knowledge is shared they can't destroy anything anymore. Rick asks about the empty ball. Even if it has air in it, it is in a vacuum. Q: what about the interference of O, because I am confused. Are we still trying to create a H plasma or is it only the fields that will be in that center empty ball? Only fields. Q: so the H is only in the gaseous reactor? Yes, it is only the fields. (2:10). Q: with the Gans' there is still H involved? It doesn't matter, it's irrelevant it's only the fields of it. When you deprive it ... this is part of the teaching you forgot, he draws a spiral, you put a filter so you go deeper in the strength, now when you put a hollow inside (empty ball), you filter up to here. this is your filter point. You haven't filtered the rest of it, so this sits in the ball. It's the stronger part you filtered. When you have a ball, even though to you it looks empty, but to me and the U, this is very packed here, very strong, then you have the next strength, and the next, do you understand? Q: It makes sense to me, but when you have other things mixed in there? It doesn't matter, the matter states get pushed out, the matter conditoin of the Gans gets pushed out. In reality what's going ot happen is this layer disappears, you open the reactor and say, where is my ball. You haven't lost your ball, the composition of the ball because of the pressures of the Gans' and the fields has dissolved this into its energy level and not the matter level. The ball hasn't passed through the walls of the reactor, it has converted into plasma condition field strength. (2:12). Q: if o were in the center it could combine with the H to form water? No it can't be, it's a centrifuge condition which has the same effect as the vacuum, the heavier mass goes where. this is why we use centrifuge or vacuum, or the combination of the both, we use them for the creation of the interaction of the fields. When you create a vacuum on its own it's just layering, when you mix vacuum with centrifuge you force the conditoin of the interaction of the fields which gives you G and M. This is something that scientists don't understand. Maybe for the first time you understand why we use both in these reactors. And rotation, it's very important. You can keep this reactor totally solid, you just need to rotate the center. If you rotate this (outer reactor) you get 1000 times force, but if you can rotate the center column you get 1000 to the power of 1000. Nobody understands this. One touches the center and the other plays with the boundary. (2:14). This is why in all the tests, when you put wings on your balls when you are rotating you are mixing of a higher order, whereas if you just rotate the outer reactor you are getting a weaker order. It's a higher order of magnitude. I tried to explain this before with the chili and by mixing it the odor gets stronger because you go to the center of it. When you mix from the center you use dynamic field flow. A 1000 to power of 1000, now you se you create a M field flow pressure. These are the principles we have to understand. If you put a "free ball" and Gans' around it and mix it, my god the power is unimaginable. In the coming weeks, what we are developing, it's in the patents, transportation of a box in which you can put anything you want in it and transport the whole box. For example, a village woman in China makes a Gans and you want to buy it, we can deliver it directly

to you for a cost less then 1cent. This is zero time communication transportation. You just have to understand that your envelop is not a square anymore, it's the hollow center (in middle or rotating reactor). It's so simple. This is the biggest disaster for shipping lines. Who wants to stay 5 days. Sailing will be for pleasure and not for shipping anymore. (2:18). Amazon is looking for a center in US, but this is now obsolete. Let's start working together from next week as One Nation, and you can carry a pencil from the factory to the point of delivery, cost zero. It's in the patent, it's the envelop you deliver and it has no mass restrictions, it sits inside and outside you carry. the game has changed. The conditions you create will force us all to become One Nation. You were a amazed at how long it took for the computer to take over, you'll be shocked how long it takes to change the plasma, everything for all of us. I can show you how to make a shoe the size and color you like and you can go out everyday with different shoes, it can change (color or whatever) every second as you walk. I opened the door, the cat is out and you are the cat, you carry the knowledge, not me. I kept the cage for the cat to be tamed, now it's tamed I open it, all of you. If you understand my teachings, it's not about me, everyone of you becomes man of space. (2:20). ... we can all go to the North Pole if any of you delivers. Understand the T and you can play with it the way you like. If you have an O in the center you can't, if you have a H then it takes over, or unless you want to create and envelop that carries that O and then you play, the game delivers. Q: then there is potential to create water from the reactor. Oh my god why are you worried about the water, you feed the soul and it creates what it needs. You are not getting the message are you? Well I was thinking about creating new materials in places where there isn't water. You can do. Q: It's that empty bubble in the middle, that's the important place where the fields are, and the key to the soul also exists. The systems that we have, Armand has devoted his life to developing different flight systems (2:22). and he gets more disappointed because he doesn't ofllow the path, if he would he would have flown 4 years ago, he keeps jumping. It has to be learned by many and now is the time. Then it can't be shutdown. Man is ready to go through that phase because we had to establish everything in that position. The most essential thing for mankind was the establishment of the EC and 2nd was the UC, the 3rd is that humanity is so tied up with money that we had to create a Coin to link it to them so they are happy that they have something of the ?? that it comes from their soul. Now the government is ready to go, we just need 10 days of building it up and you'll all the knowledge has been on the table. the top people in the KF will present their cases. They will shock the world leaders. We expect to be shut down, but we'll find another way to teach or they accept the new condition and it can't be hidden. That's why even today I teach this way. It's my intellectual right and I have the right ot share it freely. You can hide your millions in the banks. (2:24). I share my wealth freely with all of you. Shame, nobody understands, the one who has less shares more, the ones who have more are afraid to share. Now they become a slave to it. From Bahuala, We test the world with fire and man with gold. And many of those who ?? got the gold have failed. We just keep on testing. You will see the development of new materials, systems, I am expecting news any moment that we have broken through the Pharmaceutical beyond imagination. The data is getting checked ... it becomes part of the total understanding where pharmaceuticals will have no more power over mankind because you can do it yourself. The centrifugal forces dictates that the heavier elements goes to the outside, and then the conversion comes into it, then you'll find out why water becomes irrelevant because it

goes to the outside of the empty ball. (2:26). If you put a drop of your blood in each of the reactors then the E of your soul and perfection of your soul will dictate the motion of your craft. 'I want to send a cup of tea across the world to Katmandu because this is exactly what she likes' your E condition of the system will carry it through and she'll have her cup of tea as if you were sitting next to her giving it to her. And if you understand more you can transfer it through the soul, she would say, 'oh who gave me a cup of tea'. This is exactly when they say I was thinking about you and now you phoned, this is exactly how you do it. Rick continues... the interaction of 2 M fields. This is what I call plasma field flow. ... if they can bring it down then they can control it, then you get your dome. In the Iranian system we created the dome with the N material of the high order. When you create N layers you have to understands the order of the layers M field absorption. (2:28). Q: Where is the MF2 , one gives you the mass and one the reduction. The point where the M field finds balance it becomes the layer of the surface. F1 is in the center and F2 the periphery, but the strength varies as it moves out. Q: Could there be a barrier between them .. they created themselves by an order of magnitude. (2:30). As you go between a different order of magnitude you interact. It's like going from a liquid to a solid you have an interface, and because it's dynamic it creates a friction, G, if it's on the opposite side what is common between them is G, and what is dissimilar creates repulsion or M field. There is something important. A lot of you use very funny terminology. Make 2 pads at a 2:1 ratio and lay your leg in between, pad #2 is stronger and a giver, #1 is a taker but at the same time it gives, what the other one needs. You get an IL interaction. 2 is 7.0 alkalinity and 1 is 6.9, because you created the ratio. (2:32). You increase the ratio to 3:1 the PH goes to 8 and 6.5; then you increase to 14 times more in #2, then the PH goes to 14 and 2. Then you increase further to 24 times in #2, then #1 goes to near 0 PH in acidity. (2:34). the order of magnitude determines the alkalinity or acidity, because you define it, that #2 becomes G and #1 M. The more you give faster the less (#1) can give back because it doesn't have time to process. SO it moves toward greater alkalinity and the other to acidity. Now you know how to load your reactors, then by change in field strength you can ascend or descend. You use the same mass, you don't need to change fuel. Then at that point in change form alkalinity to acidity you get a friction between the 2 field strengths which is like a light. Like when the sun's rays hit the earth you get that condition. This is why when they video the UOFs they just get a flash of light. those are real, it's there and a millisecond later it moves, because they changed one reactor from alkalinity to acidity, giving and taking a change in direction of flow, and heat up the flow, and then by ratio if you change the mass of H or Tritium you create lift or descent and strength. You go beyond the speed of light by thousands of times. Very simple, the interaction creates a flow and the conditions the same. You will see the rotation of light, I have asked our team to demonstrate this (2:36). From next Saturday teaching, we are not showing you a flight system, we are showing you a system that you can make to fly, the whole purpose is to get as many as you who can to fly. We are not creating copycats. We are teaching you to do what we did with the MaGrav and the Health system. You went to the ocean to make the Gans for your wife with cancer. Don't expect to come next week to see a flying system, I will show you the Iranian system which leads to the flight. When a nation is peaceful it has no fear of abuse of its technology and this is what we see with the Iranian nuclear reactors. The nation is peaceful the knowledge is shared. The Iranian nation was made the devil because the

devil sits in Tel Aviv, they had to make them look bad, so they could destroy whatever they could. Unfortunately I come from that blood. And those in Tel Aviv are not the masters behind it, they are only the game players by the others. (2:38). We force peace through this knowledge. Very soon we shall see Iran and Israel sitting at the peace negotiation table together. It's not a dream it is my wish. With this new T Moslems can land in Tel Aviv, there is no choice but to talk of peace, unification and the whole lot. There are only 3 million Jews and 300 + million Moslems. ... let's see who puts the hand of peace out. (2:40). Q: Has the Pl fields have any shape, or are they like clouds? It depends on what shape you produce it and what external conditions you put on it. The Pl in the environmental condition is the shape of the body of the man, it depends on what strength the soul has and what dimension it has taken, The STM and the lion is the same 51

(2:44).

Q: Can we connect this to the AA? Why do you need to connect to AA, why not use your soul which has no AA and it can feed your AA. Why do you always like to work with the soldiers when you have the general in your hand. ... (2:54).

(3:10). video

END

219th Knowledge Seekers Workshop - Thursday, April 12, 2018 (,)

(:11). A lot of things are coming to fruition. If we get it right we include the whole planet. This Saturday is the Space Blueprint. It's not that we are going to show a flight but we show the process of life in the space. With the space station if the ofod delivery is late the guys up there go hungry. (:14). The difference with this space T is that we have everything, we have developed everything. Space suits and the question if man landed on the moon or not, all goes through the window because now we do it collectively as One Race and you'll see the governments will join us, there is no alternative. They don't have anything to match and they never brought all their divisions together to work as One Nation. ... (:16). Today our team has achieved the conversion of the fields into matter and this creates heat. They are feeling heat around the spaceship, which is like the sun when the fields hit the earth. Now this heat will convert into matter. they managed to convert these fields downward. Now they'll convert the torrodal fields into splashing fields that we'll start seeing the next step that is called the shimmers and the physical structure. They can feel the heat and then it's the compaction of the fields. (:18).

(:36).
(:40). I will explain why we chose 14th April as day of Mozhan. we will free the man from the shackles of physicality of this planet.

... I have come to change humanity for good and I will do, it will be changed totally, by the time I leave the physical life my soul has delivered to elevate all the souls of humanity and the others which are on this planet. There is a secret nobody should know except the human race because (:44). fish, cats and dogs and birds are not supposed to know that we managed to get to space. It's a very secret organization and secret launch of a new dimension. I invite all the worldwide agencies to attend and be a part of it ...
... 5 years ago NASA cleared me to visit them but the politicians said no. Now the knowledge went elsewhere and historically NASA will be remembered as those who used to lie to us. In the space technology there should be no secrets, because keeping secrets in the space can mean the life of another man or another being. (:46). From now on those who patent knowledge, keep in mind that the knowledge can be the cost of the life of another being. Would you like to be a murderer. At the moment that is how the patent (system) is, we keep secret everything until we get paid and we make everything to kill everything so we get paid. At the moment it is I take as much as I can and I run with it as much as I can and you think you don't have to answer to anybody, but the souls do have to answer for that. The process of life is amazingly easy and we have to learn it because in the space there are no factories ... .. we go back to the truth about the man was taught by the man, but now we go back to the origins of the Zoroastrians, talk good, think good, and do good. This was the message given to mankind by the traveler of space by the name of Zoroastria, but in time it was changed by those who abused the physicality of the man. We go back to our origin, think good because the thinking comes from the STM, do good because if you do wrong you suffer, (:48). and the other one you know it's a combination of the 2. When we all become men of space we back to the origin of Zoroastrians origin of Iranian blood, where most of the world comes from. ... think good and do good otherwise you'll be annihilated this was the message to mankind and we are here to re-emphasize it. Am I Zoroastrian? In soul yes, in teaching yes, and in act without a doubt. Maybe we have to understand where and how our origins come from. Where did the man come from and where will the man go and how did we build this culture. In the new technologies which is getting developed by all of you will tap into the RNA memory of the man and we will see the evolution of how we changed and who we saw and what happened. We will learn that when our souls are traveling these, what was the animosity of the man has been erased from the CD, it's part of the life of the man, because the AA will be according to the environment we manifest ourselves in, but in depth we'll carry the memories of earth, these things will come to man in the time to come, what I said it will take man thousands of years to understand what I have said and you'll say a man said that one day how did he know. (:50). I am the beginning and the end, I am the voice of the Creator as the creation is part of me. Teaching mankind has not been easy. Living with mankind is the worst thing that I have ever done. Do I want to live a physical life again, never again, if they are like mankind, they are very kind and very, very unkind, lying, cheating, adultery, betrayal, stealing. Never seen in the U. Now we change the course. As it is in the writings thy shall not steal, and the most things we do is to steal from our soul. This is where the problem starts and if you steal from your soul why not steal from the others, then why not extend it to the other planets and universes. Is there going to be a police for mankind in the space, yes. You are going to be policed heavily by the understanding of your own soul. The original men who go to space by doing wrong will find out that the people who are with them, will not be with them physically to know

their souls are freed and in the dimension of the soul is expanded to the other dimensions that they can never integrate to work as a soul. This is a very harsh thing to say but soon people will understand. Initially people do good out of the fear of it but in time it will become a natural process to be good. Not to do wrong. (:52). What we will see from the beginning of next week is the establishment of One Nation and the establishment of an Army which becomes the police force and the helping hand and not for policing. This will take some time to mature and as we conduct ourselves outside correctly we'll live by the ethos. It's like an African living in Germany and then go back to Africa, you still carry the behavior of Germans but you're and African-German. When we go to space we become a spaceman, your still a man but we bring the ethos of space with us, don't lie or cheat, do everything , there is no need to produce clothing, if you want to wear a suit for a thousand years in the space it won't last, and we have no cheap Chinese manufacturers to buy nor are there supermarkets. We have to learn to live naked from the natural physical but understanding how we decide to evolve to loose hair, we use our soul to cover ourselves in what we would like to seen. The clothes of the man will go and not exist and when we come back, those who we want to see as we are will manifest themselves to them if we want to see, we can, but we'll not force our position. One of the worst and hardest things for those who are used to abuse like the kings of the present time (:54). is that the soul of the children will not allow it to happen and they'll suffer. Those who have the habit of raping, it will not happen because the souls learn to condition and position. All of these things will gradually disappear out of the vocabulary of the man. Kingship will disappear because we'll all be equal. We'll accept people to look after our affairs and we'll call them leaders of districts or whatever, because they have time they enjoy serving and we'll spend our time serving the others. There will be some of us who will abuse the system, we call them the couch potatoes, but you know you get fed up after couching for awhile, 10 or 20 years then you'll say now it's time to move. The history of man has to change, showing the history of the man through wars has to be abolished. It should be a shame to show one murder, showing any killing should be stopped. the present movie arena of the American mentality and the games will change because nobody will like to watch it. Why should I watch this when I can watch something else. They have forced injustice on man through the new media like ?? .. all will disappear becasue we see the soul of the one who reads the news reads it wrong ... better not to do even if he is given a piece of paper to read. (:56). ..

(1:02). Q: When we go into space are we going to see the UC or go individually or as One Nation? You have broken the condition in the first sentence. When one of us goes we all go, we are connected through the soul with each other. ?? We haven't built Noah's Ark for 7 billion, if we don't go together we don't go. Q: So are we peaceful? Are you? I am. Then why do you ask the question. Of course we are peaceful. ...
...
.. the governments have asked me if I can join with them in their space T, but what they have is so backwards, the biggest problem is if the guy will take any of our secrets to leak to the others (1:08). guys, the Americans, Russians, or Chinese. How a man who has nothing and he is protecting nothing and it's so backwards. Then i go to places where people are using the T I brought for humanity and they want me to pay for my own T.

You steal it from us and they want to charge us, I told Caroline to just pay them. There is a lot for man to evolve to be man of space. (1:10).

(1:14). Origins of modern man.

.. president Zhi of China has with care turned North Korea to be part of his protection zone and back to the rank of other nations. (1:21). We'll see Korea open up in a short time after the meeting with Trump, then one of the first things they are going to show us is how poor and poverty stricken this country is, I tell people take a flight to AliBaba and see how the people live a fantastic life compared to the people of the US. You have to understand how propaganda works and we are now entering a peaceful phase. When we do these things across the U we bring the souls which serve us the best, and the soul of President Zhi is one of them and we have president Putin with us. We don't work through their physicality but through the soul and it delivers. This is our wish. A lot of us don't understand because to change the man you have to start at the top and work your way to the bottom. (1:22). And we'll see the changes, Iran will not be touched, Syria will see the time of peace. It's sad to see what has happened there. The worst thing is that where are those people who created this mayhem going to hide. I have a suggestion, those world leaders who caused all these problems because they wanted to be higher then the others, let's put them all in one SS and give them the key to get out into space and let them lead the way for man, they'll make a lot of mistakes. .. we'll start teaching the interaction and language of the UC. (1:24). ...

(1:28). Q: Syrian lady asks if there is anything he can do with KF technology to stop this invasion? You see there are 2 parts to it and 1 part is we have to learn something from this process, It's not a correct thing to say but it's part of the history of Syria in the past 40 years, and talking the truth has created many enemies for me. The story of poisoning with chemical we saw the same thing in Iraq. (1:30). ..

(1:32). ... there is a technology in the KF to protect the cities, but it is your job to deliver. Asks Rick to put on the video of Hurricane shielding from the Caribbean. Tom Sellers talks about it as, I wonder if it is the plasma, but I am not talking about the plasma. This video clarifies a lot about the technology. We will teach technologies to protect the cities this Saturday and Sunday. (1:34). Please ask as many Syrians and Iranians to ofllow what we teach. I will show you with the videos. ...
you don't see any debris from the destroyed trees that have landed in the garden.
(1:38). This shows the potential and power of this technology. The cities can be protected with this technology. Q: But will it protect against bullets and bombs? There is a technology that can protect against these things. .. we are working on certain systems that by dropping them they can protect... this is what we'll build in the space that will have the zones and atmosphere in it for us to live. these will be plasma houses. (1:40). We don't get involved in defending we get involved in changing conditions. If you make it dynamic even on the boundaries you can stop even the rockets. It's been done. One of the reasons Israel is so afraid of Iran's air force is that it can deliver such a punch that it will never takeoff from the ground and it is possible that they might do so. There won't be a State of Israel, they'll wipe the nation flat if they want to. It has puzzled me how much

Iran is holding back out of respect for humanity. ... a thief calls somebody else a thief to cover himself. (1:42). The problem doesn't sit with Iran, Syria, Russia, Israel or anybody else, the problem sits with the UK and nobody else, these others are just lipstick services. But we don't get involved in politics, but we have the technology to deliver and we'll deliver. The Syrians can protect themselves very easily, teach them to make from the wires of their house, just make the dynamic system and it will work, whatever you call an electronic system it will collapse, you don't need to throw anything at them. How did we capture the American drone. You disable them. I will make metal birds out of the aircraft on the runways of the nations. Maybe it's time to deliver. If Iran is touched I will do. I will make sure there is no state left to damage another state. I have the knowledge, technology, the will and I can deliver it. Unfortunately there is a big problem and that is we don't understand the potential of this T. I can make sure not a single aircraft takes off in the Middle East forget about Israel (1:44). ... it's the responsibility of those who live in Israel to protect the humanity and place these systems across Israel that it changes it to a peaceful nation. We just deliver the T which doesn't allow electronic systems to work. If you look at these pictures it creates a shielding, it's very simple. I wish I could have been there to see everything bouncing off. This makes a space development where you actually cover the earth and above. You just need 1 core to 1 property and it will cover it. Damascus can be protected very easily. (1:46). If the Syrian governments decides to spray the whole country with Gans water, it can be done with thousands of tons. My services go to the nation to be free from being murdered. If the Syrian government asks us to participate to change we will change and we'll shower Israel with Zn water and what we know to change the leaders position. Q: Do we have time because it's urgent? We have plenty of time. It is for you as Syrians to inform your people inside that this is the way to do it. And it will be done. If Israel ever touches Iran I will retaliate directly that no flight will take out of Israel, we won't touch no man, nobody, we just make the tools of war obsolete. The Israelis know that we have the knowledge to deliver. Submission to peace through friendship is the only way. President Zhi has protected Korea, it is my responsibility to protect the Iranian nation not the government. I make it so they can't fly a single airplane or move a submarine and god help them, they know we'll deliver. I don't think the Palestinians will forgive them. It's time to step down and talk peace, because Iran is one step too far to touch. We are men of peace. (1:48). It is my responsibility to protect not only 1 nation but humanity from the smallest nation. .. the electronic systems in all the tanks will be obsolete, I will show how it is to be done publicly to do if need be. So let's talk peace, deterrent is better then acting. We need to push peace with science, the scientists in Iran and Israel we could live out the most beautiful space technologies ever existed. Why are we using it to kill each other. ... it is the responsibility of the Arab speaking UC member to take action that is why they are there. Teach in Arabic directly so they can do, even the ones who have been chemically damaged can be washed out in no time. Enough is enough it is time for peace. .. these words go directly to Buckingham Palace in UK. (1:50). and Tel Aviv.
You will learn how to make gold next week so what are you fighting for. (1:52). This is the job for the members of the Councils. ... the traditions of the religions has to be kept and we respect the paths of beliefs and the others. ... (1:54).
... there is a sequence of how to develop a system that will destroy military electronic systems. (1:56). the way the American drone was captured. We will release the T

immediately. Those who live in Palestine just drop these in any Israeli airport. we thank you for it the peace will come. It's not jamming the electronic, rather the Pl prevents all electronic circuit with C in it will connect to the Cu, they become of the same, you do it with your Gans' and Pl. Very simple. It's not a hope it is what you have to deliver. The KF Arabic people have to start working on it very rapidly. The only restriction is that our own nations should be able to use their own T, Airlines should be able to fly and all the amenity Services should be able to operate. Everything should be correct, naval forces should be able to operate. (1:58). you need to understand the use of Gans' not only it changes the structure in electronics but changes the combination in the soul as a soldier, they won't fight. .. the combination is very specific, when you transmute the C to a diamond there is no line of communication. You just need to stop one chip in the aircraft for it to not work, not all of it. Q: It's what happened to the American battleship in the Black Sea? Exactly, we are not doing something that is not doable. (2:00).
(2:02).

The Iraqi man is told to deliver the T to the Syrians. You don't need permission, you can deliver. (2:10). Look at the point of launch not at the point of delivery.
Jamila of the UC speaks. (2:12). We are willing to start delivering the technology. It has to be delivering the knowledge in a peaceful way that not even a single Israeli soldier should be harmed the same as no Syrian. These systems that you deliver have to be able to elevate the soul of the Israeli soldier and the Palestinians and the Syrians and the rest. .. (2:14). .. the way to do it is to develop dynamic systems which work in a triangular systems, a heavy lead content and a very, very heavy loaded with one thing and it has to be .. most of these aircraft are made with a specific steel and they carry a combination of C for the microchip with a gold combination. If you can change the combination of the 3 together the craft can't takeoff. What happens is the C converts into diamond and the gold becomes the barrier condition between the 2. Most of these aircraft have as part of the fuel for high delivery lead content, it's you responsibility that these things are looked after internally in your systems, it creates a condition of no flight. This is a combination of fuel structure and electronics, it paralyses the systems to fly, but it can't damage civilian airlines. It has to be set up in a sequence directly when it moves to one, then the next one traps in the second one. (2:16). The ratio has to 100:1 of lead, it's important, psychologically the pilots will not move. ... those of you in the KF technology will understand, it takes a few days but it starts taking its toll. There is no contamination or any other thing, but it will open the eyes of the military that none of the aircraft will fly. You make a dome to keep in that nothing can fly out, that's the difference. This is for aircrafts. This is the job of every Palestinian give a kiss and cuddle and respect the Israeli soldier and give them a ball. And the worst thing for the Israeli soldier is to drop the ball with a Gans of lead, C and what the aircraft body is made of. .. if you can deliver high speed rotation of it, it will totally paralyses the whole structure. But one thing is we need a commitment from the Syrian government for peace also. (2:18). The biggest problem is that these people will turn it the other way around. It is not one way. We need both sides to work for peace. It's not just that the other ones don't fly we bomb them to pieces. This will not serve the peace, there has to be an agreement. Why President Zhi is not moving here.. they tell me there are others involved, the Saudi's want the end of Syria because they are Shia and not in line with their beliefs. The problem is complicated. with the KF

T the oil is good bye. (2:20) . A lot of European nations don't see what is happening with China ... it's the correct way as they invest in other nations, as they become more advanced it's not another America where everybody wants to emigrate to, but they stay in their own nation to invest in it. The KF is investing in the totality of nations. If the world would recognize what Zhi is doing the world would become a peaceful place. the Americans have the World Bank and IMF that make countries bankrupt. (2:22). Robbing and killing and talking is over. This is a statement of peace and we deliver. The hand of peace is extended. (2:24). Q: Daugther has broken her arm. What Gans should I use? I don't give any medical advice, ask the Health Section. It's a crime now to save a life. ... Kevin Devanoe doesn't represent me or the KF, he should not use the KF structure to bring Coins for exchange. The Keshe Coin is not for exchange they are part of the assets of One Nation. (2:28). He is disgracing the KF. The KF Coin is not for international exchange. ... Q: I ordered 2 Coins online but it wasn't clear if I am supposed to pay for them now or make a donation. the Coin is added to the KF reserves, it can be added to the national reserves in the coming time or you can keep it as your assets. This will be handed over to the EC. (2:30). .. This means the Coins will never loose their value ??
(2:40). ... we have everything we need and don't need to go outside where it is corrupt. break... when you conduct yourself in the right way you have to pay taxes for what you take (2:46). In the future many of us won't pay taxes we'll cover it by efforts. We'll work only a few hours but we'll enjoy working and being a part of the civilization. ... it's your job to build the space reactors to fly. Not only fly but how to make ofod, medicine, materials. (2:48) . Can we live on our own and don't pay taxes or live on an island, or on the moon and travel back and forth. Q: Can you buy Coins for the nation? Yes, that's what this is for? Q: So I can buy Coins for Iran? Yes, but it can't go more then the population. Iran has 70 million people so that many Coins.

Teachings Start HERE:

(2:50). Q: Can we hold the center reactor and spin the outer reactor? Yes, it has been done before. It creates certain conditions. When you have a reactor and make it dynamic, if you use 2 different Gans' they interface between each other, but if you leave the center inner core empty (2:52). you receive a new concept, understanding. Your Pl now is a pure plasma without any material, because it's a combination of these Gans's and a common denominator of the water which is in it, then these 2 Gans's behave as a mass Inertia. If you remember the earth has a core which creates a field inside it and creates the G and M field and the matter state, and the matter state of it creates the Inertia. 42

(3:00).

(3:13). ... Q; How do we get the (field) strength coordinates for flying to the destination. We need a system for that. The Russians and Boeing have been working on it for some time. The MG field forces of the planet according to its Inertia is constant. This is why I taught you the Inertia. The mass ??line of the planet doesn't change that much. The Inertia stays constant less the G field forces adn less the magma fields ?? generation of the current. (3:14). Every inch of planet earth is fixed it has a specific strength. Q: So if

the G is more constant we can already measure the M, is that the rate that we see them putting up the data for? It's a matter of development of technologies to confirm position management strength, MaGrav strength. So on planet earth this position has a given MG inertia, and a given Plasma M and G, and because of the earth liquid content inside which varies continuously it has a certain fluid, magma G and M. Very soon scientists will measure this and it gives you a specific point in a given position. It depends how far the magma is from the surface, the thickness of the crust and everything else. It depends on everything, these new systems will give you that. Q: what happens if we get the wrong strength, do we have a runaway and leave the earth's atmosphere or stay within it? What happens if you push the accelerator instead of the brake, you end up somewhere else, so what's the difference. In the space you know where you are and you get yourself back in again. It will fun to see how many underage drivers end up on Mars. (3:16). ... there are a lot of variables in it. I have shown you the car, but I haven't given you the key. Q: So you are not giving us the key? Maybe on Sunday. .. (3:18). Q: is there a materials list for Saturday? Yes, bring your soul. .. everybody us in the space can do it, mankind is just learning to do it. The recipe is a very strong powerful soul. Q: If you fill up a ping pong ball and rotate it that also gives an empty ball inside? Yes, but it can be used for different purposes and applications. (3:20) . That is one way of doing it but in fact you still don't have an empty ball, you still have material, the air of that empty ball that makes its own fields. This is a very easy way to do gaseous flights. It's one way to do deep, deep submergence into the core of the planet, but you have to know what you are doing. We'll see you on Saturday. (3:22). Q: What percentage of Gans's in the production of Gans.. ? Rick that is your division. Rick reads it Q: Are there ... (3:24). Mr. Keshe says to wait a few months until after the factories start up and we'll have an exact answer..
(3:26). (3:28). ... the MaGravs do work and reduction is about 30% depending on resistive material.
(3:30). We should have systems for making materials available at KF.
Q: How to use salt to separate Gans's? There is no salt in the space. The Gans's separate usually on there on.
... come in with a lot of joy and hope for the change of humanity and come to know that we have achieved what our ancestors hoped for millions of years. ... we all can become the soul of the universe becaue we can all learn and do what the stars do. And if you understand a little bit more from Saturdays teaching, you can tune your soul to the soul of any planet and fly within the U without any spaceship, but that needs a lot of understand of knowledge and how well you know your own soul, then you become a twin star for that soul. (3:34).
Video ..
End
(the Blueprint for Spaceship next)

220th Knowledge Seekers Workshop - April 19, 2018

(,)

(:02). they made a new video about space travel for humans. (:15). I would like to say thank you to all who participated last Saturday and Sunday for Spaceship Blueprint. .. the

love of Giovanni for his daugther .. (:18). We have seen some international reactions in respect to the teachings of Saturday. We have seen some radical movements by world leaders in trying to understand what we showed implies and what will be the implication of it. We have shown the Iranian lift system and the reduction in weight from 7.1 to 6.1 kg and below, so you have ofund a key, a pattern. This means that the nation is in control of system fields by plasma without propulsion and this gave rise to immediate reaction. This was done to shock the governments that they are behind and that there is a need for it and what will be the ultimate goal. My wish and hope is that governments understand and take the next step for peace from what we have shown. The production of the space system flight multi-cores is not an easy one. The Iranian reactor that was shown was a single reactor you have one running system, they are very easy but also very troublesome in some cases to control them. (:20). He draws the Iranians reactor, we all have seen inside of it, it has a motor underneath, double and triple cores and full of Alpha radiation inside. This creates a lot of new conditions because we produce plasma inside both cores. If you get it right and cause the right amount of M field pressure. The pressure from inside goes one way and the other one goes the opposite direction, it causes the lift. It is very seldom unless you are on a mono-magnetic system that you can create 2 similar direction system that can lead to interaction, lift, or separation. Mono systems are very hard to control. In the deep space mono can help. What we did with the new dynamic system, in your reactors with the Gans balls, all we did was to take the fuel away, as now the Gans carries the fuel, we have withdrawn the radioactive material and the fields that were released by the radioactive materials have prevailed to a new way. What we did with the nuclear material was to create a Pl, that was the whole target, we wanted to produce H. (:22). and then from create a Pl. With the Gans material we are already in the Pl condition because when we create the Pl we can use the fields of the Pl to interact with the fields of the planet or the universal entities that you can create motion. The Gans's become the creator of the fields that we wanted. We have given up radioactive material, high pressure and rapid control, with the radioactive materials there are a lot of beautiful controls, because within these materials you can also withdraw them, the plasma density changes. We can create like screens to block the radiation to enter so you can create the Pl density. With the Gans you don't have that freedom, it is constant so you have to find new ways to control the speed of the rotation of the Pl either way, or the strength of it that it gives you lift or motion. It's a compromise between the Gans or the radioactive material. Some of you who achieve and understand the next levels of interaction can create double core Pl systems which are pure Pl and then let them work against each other and then create the lift and motion. This is important in production of the M field position. In a reactor that is closed sealed and single we literally pinpoint where we want our Pl to be and we can just go for it. (:24). This is where I want you to be when I shift it a little higher. In your dynamic systems with motors. In the dynamic systems you buy, you have a very big problem, the Pl fields created in this Gans dynamic is of a lower order field extraction, this means that to be able to create very strong fields with them needs a knowledge. With radioactive materials we start very high and have an input. It's not just the field of the Pl that is playing the game, but the environment of the Pl you create has an effect on the Pl strength also, so if you can accumulate it you can reach a higher order strength to get faster motion. We reach Pl condition in hundreds of ways. to understand how you can use the fields of the Pl is totally another game. (:26). If you

convert the Pl to heat it's a different ball game. if you create an interaction of plasmas becoming a material that's a different ball game. If you bring a Pl in interaction with another Pl that leads to the creation of the conditions and environments is different application all together. When you start making these reactors, I have seen many enthusiast building and making formations, they say they don't see anything, but in fact, are feeding everything, you are creating the fields but leaving it open for anybody else to use. From now on try to imagine yourself as a magnet and try to understand where the field would go and bring that into the dimension of the Pl, then any of you can become part of the space game or anything you like. When you have a magnet in your hand without interacting it's just a metal you don't know that it is a magnet, when you bring it to a piece of metal, if it is a magnet ofllow its fields and try to imagine where these fields can go. If you have iron dust you can see the fields going out and coming in. He draws the fields. What you have noticed is that there is a reason for these space gaps between the field lines (:28). Do you remember MG field positioning, you'll find that these fields are coming in, the space gap you don't see is opposite to the space gap that you actually observe. This is where we have to close this knowledge gap. You have a 4 field reaction, it is no difference then what we explained about a Pl. It has the same characteristics and same fields, the same proposition. What you don't see but you have is what you get. In the space gap there are fields either going in or coming out. (:30). If you can see the iron dust as lines, is it the field going down into the magnet or coming out. 14

(:37).
(:40). How to get in and out of SS.

(:46).
(:48). .. you have a soul in the center of the body in the brain, so you have a soul. Then we said, the soul in reduction in strength and interaction with the physicality of the environment in, leads to manifestation of the physicality of the man. Wherever I send my soul, whenever it gets cool enough or short (weak) in the strength then it becomes my physicality. Now that I have a physicality how am I going to feed it, control all the cells. I need to feed my physicality because now it has a strength of the environment that it is in, but what will I need to be able to feed to keep this physical entity in the physical manifestation on this planet. I hope you know by now. He draws a head, the totality sits here, in the middle of the head, a shinning star, then this star has strange dimension of physicality, we call it a brain. (:50). There is something else a part of this physicality that radiates out and it's called the fields of the brain, but it has a big problem. It comes across motion and its fields reduce. ... so in reduction in strength brings control in the soul of the physicality, now the problem is solved. You have to make sure that you take charge and the emotions are controlled that when the fields get to here it manifests itself. It means if you can control your E you can manifest your physicality. It means you can feed physicality through your soul, there is no need for all these dimensions of the killing, and not eating because killing .. . (:52). we have to find out the answer to where we are going wrong. It's very simple, it says I don't want to eat anymore, I don't want to breath because I am killing, when I am walking I am killing, and even the stone is alive and the rest of it. Now you don't even need to inhale some bacteria's for life that you don't kill. I have taught you how you can feed yourself and bypass your emotion, if you know what that

means. It means becoming detached. Because when you are attached you react and you have E towards it. Shall we become as cool as a cat and don't show anything. Or understand that the energy I need to maintain my physicality in respect to the environment I am in, is a condition control of the fields of my soul to the strength of the interaction of the manifestation (:54). of matter state in that condition. I can become totally invisible when I want to and be very visible when I want. that I can control it through my soul, the emotional strength of my soul. To feed the man in the space you need to get energy to his soul that then you decide how to manifest yourself. These are part of the rapid understanding and development that you need in case you get trapped inside your own SS. What if my partner is fiddling with the reactors and suddenly I am half in and half out of the SS what am I going to do? Or I am in and he is out and he can't hear me any more and he is panicking. Don't forget we are working as a team. Or solidification comes while half of my arm is in. How am I going to get my arm back. As I said there will be many funny accidents for those of you who are testing for SS technology. (:56). We'll see many SS hanging in the sky and nobody knows how to get them down. As they say, just getting a piece of cloth doesn't make you a tailor. Now you have the cloth, to be a tailor you need to learn many tricks on how to handle and cut and sew the cloth. Mr. Lin is making a fortune selling motors. (:58). In the video people tried to fly by jumping off castles, castle jumpers. Now we have plasma jumpers, then after a thousand years the plasma releases and you come out and there is nobody left that you know. ... because you can't all get the same strength out of the reactors. Some of you make reactors on 90 degrees. In Beijing there is a UOF that landed on its side, it was trying to go through the earth but it didn't work so it got stuck halfway up, upside down. They don't know what to do with it, (1:00). so they decided to make a radio station out of it. Because if you solidify when you touch the building this is what is going to happen to you. These are not the fairytale, but the reality which is going to hit home very hard, very soon. Now that you have a SS at home what are you going to do with it, so do trillions of people out in space. We know people who are testing are creating a huge new phenomena known as plasma balls in space. A number of people are putting reactors up and are literally changing the environment, highly plasma charged, and they don't know what to do with it, and every now and then they get a massive explosion. The explosion goes as an energy down the high tension cables to the power stations, free energy you created and the government charges for it. I told you lot that if you were dreaming to see a flying machine, oh my god (1:02). you are going to see it, and you are going to understand it. Rick will show photo of Chinese UOF they made into a building. This is an amazing building, we don't know when it will un-solidify. We don't want this to happen to you. He shows the photo of SS stuck and can't go anywhere. It was in the shape of a plasma, but now it solidified, the field of the earth has given it physicality. If you think this is a joke, many of you are going to have this. I have seen hundreds of thousands of mistakes like this. A UOF which doesn't calculate or mistake of the field strength at entry changes and your physicality changes. Even though this is a building built, it looks like a SS, but very soon you'll understand what I am talking about. .. when your space reactor solidifies halfway stuck into your dining room table and you can't touch it. (1:04). This is what we'll have to understand. ... sometimes 2 or 3 million years before the plasma balances, an old man with a know how or a kind of animal walks out and says, oh I saved this from something, but he doesn't say I made a mistake. ... now the fun starts, be aware of the

direction of the field. We had someone say, one of my motors wants to go the other way. It means you loaded your reactor the wrong way, ofllow the motor because he knows where you are going. (1:06). but you don't know. .. if your motors stop, change one of the motors speed and see if it starts going, it means you are draining from it. You are experiencing what I call a lock of M fields. Don't worry .. ... because MG field has locked to the earth, you can't even turn it. ... your M or G matches or locks into ... many of you have missed one of the biggest things about the flight systems. ... look at the Iranian space reactor. you see a small and big reactor, when you have a big one sitting the small one flies. (1:08). We always talked about "twinity" but because it's a dynamic twinity both can fly, but with the earth condition you have a lock, you have to open up another one. It means you need 2 sets, if you want to work very easily, or you load up your reactors with a twin set. You don't need any motors, you load your base reactors like 128 to one ratio in reactors and then you make the top reactor 124. The stronger trying to feed the top creates a ?? and trying to catch up it creates your field. You don't need a motor. This is how in space rotation is created, feeding with a large difference, if you can go to 1 to 500 or 1000 ratio, which means you are going more acidic or alkaline, or more G or M, then in feeding it or capturing it, trying to feed it creates motion. This is the secret of motion in the U, now you got a free lesson. By the way, the court in Belgium will decide on 25th of May if we are going to prison or whether we can take it up. (1:10). our doors are on standby and we know exactly where we are heading for. In that case we have 2 SS on the standby, there are no courts or judgments in planet Zeus. We are hoping if there is a good judge to carry a minimum 5 year sentence on DL for deception and lies to the court. But we'll see. there is no shame for them in killing scientists... understand how to load up, double loading, and many other way of field control .. it's amazing how you don't see the field control.. (1:12). repetition of the Iranian space T in the hands of the Chinese government. It will be beautiful to see the flight from China. We'll show the next dynamic flight systems most probably from Beijing and it will be a great honor to set the nation. You have to understand the play, motion, direction, ratio of the fields. Listen to every part of the Spaceship Blueprint days, Dr. Rodrigo showed something so important to understanding to the understanding of the Pl, I said to myself, these guys don't understand. Then Giovanni brought home about balancing fields to the direction of the field of the soul. What he did with those patches, he didn't do anything else but in a way dictating how much of the soul he wants, where he wants to correct the physicality. You are looking at everything upside down 13 36

(1:18). Very soon KF will release its own cores and Star Formations at a very cheap price. It will be the same price for Chinese and others. ... When you load your reactors be careful you don't load half up and half down, that half of your SS is going up and the other half trying to go into the ground. It tips, many of you will see this tipping. When you see the leg of your SS is broken, no it's not an accident, your reactors went the wrong way. One side is trying to dig in and the other side isn't going anywhere so it breaks at the reactor base or whatever. These are all do's and don'ts of the space of playing with the space program. (1:20). We gave you the blueprints, but from now on you enter into a different dimension of testing. Up to now you were in the physical matter you could see and measure and feel things, now the feeling is very much different. Now it's part of you.

... how we can manage to create fields. (1:22). Test how you can make products so if you get trapped you can at least make a chair to sit on, or try to run some tests from the teaching how to make some ice cream, bananas or whatever else. We are opening one of the KF forum and I'll try to guide if you show me that you are serious, not just curious. I will guide you to the flight position. 23 03

(1:32). Any questions. ....

(1:36). What we have to understand is MaGrav is M and G, this is exactly what we said from the beginning, M, G, so magnetically it sits within gravity, the minute a system manifests itself, as we call it M, it is already has a destination because there is a G somewhere which is given it a sign, come here I need you, my partner, otherwise it has nowhere to go, it can't manifest itself. When you become more mature in understanding of the fields, you'll find out sometimes your field gets saturated and you can't work with it, your reactors get saturated and they just become clogged up. It means the fields within the reactor are not called upon by another system. This happens quite a lot. Every now and then you have to clean up your system. It's a very natural phenomena because we are tuned to (1:38). use certain strength fields but in the process of using our reactors these are there field strength come in that they have no destination to go to, but they sit within our system, some of it becomes the energy part, because in decaying in their fields and strength they become part of the others, but generally you see this done frequently when you travel in the depth of the U, you see some huge SS do regular cleaning up of their fields, because it has no spectrum to use it so it clogs the system up. The way to do it is you understand the spectrum which is blocked inside, you set up a system away from your SS, you leave it like a moon millions of km away and you trigger it at the strength that you have clogged up, so everything gets sent to the one which you have sent it ot, or by the time it changes the fields that it comes back in what you can use. Because getting useable fields in the U is a commodity when you come from a specific strength and you have and you have to use a specific strength. Sometimes you can use your inner and outer reactors to cycle it when you are on a stationary condition and you aren't going anywhere. Many times you learn, this is partially the reason we showed the Iranian space reactor, you switch off the 3 bottom ones and you repair, in that process you run your top reactor as a single space system. It can be done, you do a conversion of the systems and sometimes one of you base reactors literally disintegrates or losses its boundary, so you don't loose things, you go on a standby and you restructure. (1:40). then you share fields and you ?? the boundary, like the 18 balls into the ?? hollow (hover) position and then you repair, you establish the reactor which is not functioning. All this will come to you, it's inevitable, man's system is no different then the rest of the universal systems. 25

(1:46).
... there is law in the U that you'll soon come to understand. Things can only be done through the wish of the soul of the one who has done it has asked for it and no more. (1:48). This is one of the things you'll soon understand especially in ?? space. Q: Based on spiral, and the Pl interaction, where does time find its place in the representations, could it be that time finds its place in the past as well as the future is the same, takes

place simultaneously .... ? Do you want ideas or reality. ... it depends on what is reality to you, what is time? In the dimension of the speed of the transportation of a given strength time doesn't exist, because it is of the same line, the time only exists when there is a difference in the boundary and the strength of the plasma, when you go from the stronger to the weaker or visa versa, there is a time of transition and transmutation from one to another. It depends on where you are sitting. I can hold my life at the strength of the field of this planet, which gives me the closet minimum loss and live here thousands of years, many do. In the space we don't have time because the losses in strength are more or less not existing, so it's life ever lasting. On this planet you have a tree, wall, floor, water and everything else, so the strength ?? is always continuous and a lot of consumption of it, so time exists for one to degenerate into the other. If you are a man of space and understand where I come from there is no time because I live on the strength of the full strength of the spectrum of the U, everlasting, omnipotent. (1:52). But if you are a human and you live in the dimension of ?? direction of the field strength conversion day and night, because the field strength continuously changes, trees and shrubs and everythign else, you have a time, it menas a span of conversion. You call it time. There is no future adn no past, but if you live at human strength ?? you are always there. From the time of the inception of the universe and Unicose the time for the Creator is zero because he owns the totality of ?? it is from Him. But for a man who just comes in and uses a part, trees and other bits , keeps on ?? then he can extend it if he can do it. Why is our life span extending a little bit, a few years. Why don't the Chinese who are so short receive ?? getting taller ?? energy is put in, so it reverses the process and doesn't ?? the G field which has been on the ?? level of the soul and the physicality. This is exactly what happens to your vegetables, are bigger and thicker and heavy, but in fact what you have done is to change the atmospheric conditions around them and they growing in the atmospheric condition, they don't live on the condition of the present, they have created a field strength which is a million ago when it was this size, but because you don't know it looks like magic, they don't tell you. So time has changed or the fields strength has brought such a conversion. Anybody who says they go time traveling ??? unless you are the Creator. (1:54). Q: Does the Creator live inside or outside the creation? Both. Q: Or is that a wrong question? The third option is do you want to speak to Him for Him to tell you. The reality is that life across the U is created out of His, but at the same time He is all. It's like the ocean, all of the fish are created out of the water they don't come from somewhere else, but still the ocean holds the fish. There is no better description of it, the Creator is the ocean, and within the strength of it manifest the fish, plants and life. Is the ocean the creator or are the fish within the creator. That should answer it, it's the same. Now we are in the ocean of the fields of the Creator but as ?? small beings we are created from it as part of the reduction in strength of the given time and position. If you consider the creator, which part of it, to be the ocean of life, we are the life which lives in that ocean. We are part of it, through its existence we exist. (1:56). Was there a past to it or future to it, yes, because some other fish, the ocean has always been there. But some fish appear this year and some next year, or no fish last year and this year there are fish. Because of the process of the interaction of the fields of the Creator has lead to the creation of what it is to confirm His existence. In a way by the existence of the fish we confirm the existence of the ocean, but if there were no ocean there would have been no fish. the ocean doesn't need the fish to confirm its existence. So shall its my life. Q: ...

(1:58). Q: what about those who lag in T and don't have internet? In the time of Christ there was no TV or radio but his voice was heard through the STM and this is one attribute of the Messengers of God, we do not need the Internet, we reach the soul but the time of maturity ? when they hear. those with TV have already heard the voice and they understand and many of them in time will come to be part of the whole structure. The knowledge doesn't belong to those who can get on the Internet, because the main stream media doesn't publish things about it. If you have understood that it is your soul which controls it, so through our souls we teach, we have already reached the STM in Amazon, he is already aware of what has come. (2:00). Q: I really feel that something has changed people. How did Mohammad travel from Mecca to Jerusalem in one night? You have to read the scriptures there is a reason which is in there. We explained in the last teaching to the Islamic world in there own understanding there is another ?? and what they are capable to do. Anybody is capable to do it now that you understand the operation of your own soul. (2:02). Q: You talked about having an "anti-reactor"? You made that word don't put that in my, there is no anti-reactor. Okay, an inner reactor without anything, and if we have an outer reactor with dried Gans in layers then inside we have all the fields we need and if we can control that? This is the question I put to other scientists, what do you want to do with it. This has puzzled me for months and now that we have got to this point we can ask the question. What is your objective, what you create as a Pl as fields where you can house it in an empty place where the water was. What do you want to do with it, you brought the bucket of water what do you want ot do with it, wash the floor, feed the cat, do you have a purpose for it. A lot of KF people have these reactors, they know they have an energy in it, there is a Pl in it, but they don't know what to do with it. And this covers 99% of the people. You are just like helpless chickens. You have everything, but none of you stand still and ask what am I going to do with it. Let it fly, but you don't gather it together to fly it. If you want ice you have to put it in the freezer, a tea you have to boil it. How come we know what we want from the water but not from the Pl. (2:04). This is the main problem with all the K Seekers, you don't have this with the government scientists. 'What are we going to do, create plasma, but it's a box of water'. You have to find an application for it and then you make the tools for it ... find a purpose for it. 40

(2:09). 57

(2:20). One of Core member is a beautiful people, schizophrenic.

(2:26). Video of Gans making with coils. (2:28). starts. ... (2:35).
.. where was the CH3 Gans ball on the first one, was it put somewhere to the of the room.
(2:38). .. Do another test with the Gans ball completely out of the building.
(2:40). Check the Gans balls for how much is still in it, whether some went to the water container.
(2:42).
... our people produced material from an open space. Okay now cage it, cover it, we know there will be something from outside. (about how to test) (2:44). ... I think about something and then you talk about it. Because the souls are all getting connected. Many of the UC wanted to see proof of the strength of their own soul. Now they have seen it's

good. So that's the strength of the soul. ... in space you'll see so many strange and beautiful things that you could not even imagine.
(2:46). ... those of you who do a lot of work at home have a lot of fields around, you have to know where the cat was or this or that (2:48). or where you left the last Gans and the rest of it. Be very careful when you do tests at home, analyze your results and what you had in that place before, what it is close to, and then you have to start learning how to take all the factors in the work, then you come to better conclusion. He closed the fish tank and sealed it. N coated Cu coil and a Zn coil. (2:50) . CO2 appears on the N coated coil and CH3 on the left side (Zn Coil). Yes that is correct because logically you have 2 ways, CO2 gets loaded first and that's pure CO2 without Zn is very hard you always have a factor of Zn in it. It depends on how you set it up and if you created the right current flow between them, if you don't put a load you only get ZnO2, if you put a load you between the Cu and Zn you get CO2. (2:52). Can you put an LED between the 2 plates that an energy compensation is there and see how the reaction changes, when you don't do that you create a ZnO2, we know that and people just connect the wires without compensating for anything. Unfortunately it doesn't work that way. This proves what we said all the time. And hopefully you can show us again. You have to look what is in the room or was in the room or behind the wall, that it forces it to react first on one side. (2:54). This is the problem with research of the Gans. He draws ... next time put a N material underneath, or wash the floor with N material. you'll see big changes. (2:56). (2:58). Q: long question.
... Part of the system you can do is creation of motion in the U is not done the way we usually do it. (3:04). The motion comes from the rapid gradient difference but in respect to the third position, on one side you create a very strong material and on the opposite side you create a very weak material in the same dimension, the middle one becomes the rotator. .. the two on the ends are field rotators but the one in the middle physically rotates. You can do this in your dynamic reactors to create motion, and it's very simply done. You can use this in loading your space reactors. In the system for 129 Tesla we had one very strong and one very weak ... they create a motion in the center. We used a SF. (3:06). ... people expect others from the space to come and teach this, but humans developed the motor so you are a step further. ... I plug it in and leave it for 30 days and come back, maybe it's working. Then 6 months it just starts working, then a year later yes it's rotating. .. you are playing with the fields. .. we detected the flow coming in at 129, not going in. Then in reverse we saw the same. (3:08). Of course you can create motion without motors. In a SS they don't see the Pl rotating they know. The Pl is controlled by the speed of another Pl and not by motors. What you saw in the video were all M fields pulling each other. It was a beautiful demonstration of the field forces. .. a part of it has slowed down enough to be in the matter state and you can see it. But how are you going to use it. There is a force there so use it to get a backlash and the Gans's to rotate. Now we see the motion is there, but we have to find a way to get it to build up. (3:10). base reactor have to G and the top absolutely has to be M. You have to know how to load it. You have to put a drop from each in the others. You need a diamond structure so you need Deuterium, if you arrange the D in the right way you get a physicality. .. I'll get you there but I won't do it for you. I spent 2 to 3 hours in the lab for the Chinese development. It has to be done by the Chinese, I think they'll be in space very soon. (3:12). How you convert field forces to the matter state. In John's video you saw they can feel the heat,

they have learned field conversion. Why do the y feel the heat, when you have a Pl and put a Cu plate underneath, now it has to chagne into the matter state, but it comes as a radiation of the field, not as a heat of the heat and then our body converts it, this is how we have 76 degrees. Now we know how to convert matter to energy and energy to matter. Then you have your reactors and you have to create a funnel for it. You need an extremely heavy G field but when you collect it, in the end it has to go out. Read the papers, creation of matter .. creation of gravity, black hole. That's the way it is, you can't just bring it in, when you bring it in you ?? coming in 200 and when you push it up 600 (3:14). a massive order of magnitude. Try to understand how fields play and not what you like them to play and you'll all move in that direction of light. Q: can we leave the Gans out and just use the fields? That's the whole purpose to put the empty ball in your cores. .. I explained that you need an empty hollow base. (3:16). then you have to have a Gans. Rick was one of the first to show the hollow center from spinning Gans. 13

(3:18).
(3:30). ... this system has been used of millions of years, but you have to understand it. Where do you want to go. .. the neutron is the feeder ... it's not just a single Pl there are multiple Pl inside it ... in the dimension we travel is above this. When you travel within the Pl of the Pl because the neutron is a Pl itself (3:32). but if you can create the Pl of the neutron and understand the subdivision of it then you are in a different world of creation. I said, I teach man everything so he doesn't fall behind or become a slave, but man chooses a slave, at that level. You push the boundary of the science, I can teach you everything about the U, but when you don't understand what is the use of teaching. 35 .

(3:36).

(3:38). Ofur people can form a SF with their souls and create a SS. I have seen this many times.
(3:40). Many other populations have done this earlier (on this planet). Of course, I have witnessed many of it and it's beautiful to see. The vessel ... the way it's done when you witness it, ?/ the candle diminishes and it turns into a light. Because the soul is the controller inside of it, it has a conscious he's aware of the other souls, in that process the other souls decide, I am going to be nowhere that I can create the condition. It's not that I am going to be higher to give, and that process starts the whole circle, as you say, rotation of the Pl fields without motor. You see the stronger is actually the one who is a more powerful giver, it has no condition to give, it gives unconditionally, you see that soul moving to the top core, and then in the flesh the system is made. Where this comes in the dimension of the field of the totality, man has not yet matured for that. Q: When the need arises for man. Man is so selfish I don't think that he will come to that. (3:42). Please donate for rapid progress.
(3:44). Video.
End

221st Knowledge Seekers Workshop - Thursday, April 26, 2018

(,)

(:15). A lot of questions and interest have been raised since the Blueprint Spaceship. ... some of think we have to go with our soul in the space. (:18). Every soul has a twin. If you can expand inside you can create a condition, but don't forget you are attached to this planet, your soul is made of this planet, so as part of the soul whcih has created you there is a twin somewhere in the space. The key is to find the twin and with it you find a new position and condition in the U. This is very hard for a lot of you to understand, gradually as we become masters of this T all will understand, that we need a twin soul to be able to travel the depth of the U. ... at the point of inception we become a satellite to another satellite, we have a parallel. We ignore it because we don't understand it. 19 18

(:22). The Chinese space program will ... every effort has been made that this process will mature in a short time. ... this is a tool for peace and not for another condition and position. The reason I have speeded up the space program for KF China to go for test and trial, is 2 things we hear a lot of rhetoric from America in respect to Iran. I said I respond and I am responding. My direct call goes to the President Trump, your Excellency you are invited to Theran for peace talks by the Iranian nation and not the government. This is a direct talk to the Administration. If Iran gets touched, a single son of Iran means a single son of the president's son's soul. An eye for an eye and a tooth for a tooth. One daugther of Iran means one daugther of President's. An eye for an eye a tooth for a tooth. I do not touch physicality, I take the soul. Peace has to come by means of understanding and not by means of war. Any naval or air force attacking Iran, we don't touch we take the soul of the families who fired. (:24). The man who makes the bullet is as guilty as the man who fires it. The man who gives the instruction for sons and daugthers of Iran to be killed for whatever reason, we take the soul of the nation, we leave the physicality. This is a peace talk, your Excellency Trump you are invited to Theran, as a brother a friend, to talk peace, the same goes for the French President. We are men of peace, I have the gift to give as I gave to Naomi, but I also have a gift to take for those who do wrong. And by an eye for an eye ... 1 son of Iran for 1 soul of American. we do not kill, we show how the soul can leave the body. Before anybody touches any bombs towards Iran, marines, submarines, American Army or Navy, think one thing, we are not going for the soldier we are going for the whole family, because if the blood is bad it runs down all the family. This is not a threat it is a direct act of loving mankind. We are not killing we are moving souls. The .. (:26). The time for war is over. We move the soul not by bullet but by the power of the understanding of the universe. All these rhetoric's have to stop. I was involved with the peace talks with Iran, we have seen the woman who put me in prison for 11 days in Canada, she is still paying for it with her brain (problems). The acts of KF are for peace ... .

(:28).

... Q: The field plasma only reactor, how do I know if it is activated and ignited, what are the signs, light? (:30). Questions. You have to go back to the first 40 teachings, those days a lot of people used to show things, somewhere in the archive you see that the Gans's float at very high speed around the square box. When you create such a dynamic

situation, a Zn, N coated Zn plate, Cu and N coated Cu, and if you put an Fe, you create a potential difference of the strength of the M fields and that itself creates, a trying to reach balance, motion in the Gans's and in the fields. In the U we never see Gans's or motors, it's the potential difference in the strength of the MG field in trying to reach balance leads to creation of motion. The one that has the strongest power of the 2 dictates the direction of the motion of the weaker one. This is very clear in the researches that I have reported in the past 4 years. We see in dynamic reactor that are going clockwise stop and it becomes no use. But then it starts moving in the opposite way around. (:32). It's the same motor but the only difference is that the motors have to be influenced by the field forces of the plasmatic condition and which one is the stronger it moves (in that direction). In test when we have seen other conditions of reversal is when the proximity changes positioning, then we understand that these plasmas and Gans's are dynamic and the more plates you add the more you increase the potential difference between one layer and the other and this creates the condition of the speed to become faster, and it depends which one is the opposite way because it causes it ot go slower. This is how you control your reactors in the high speed travel, there are no brake pads or clutches. By condition of the layers in interaction with each other you create a motion of speed for your plasma. And if you have by chance put AA in one of these Gans's or left it in the water in your box you will see the interaction of the STM, that is yours. Then it is locked to you, it's what it is because it has to it. If you remember that we said that when you are testing something put one drop of the other one (Gans in one reactor) in the first one (each of the other reactors). We are in a very advanced development for the SS in China. I am directing this myself that we will reach flight in the fastest way possible. (:34). This is needed for application of peace on this planet. The reason I have shown you different angles and understanding is so you can create motion adn speed. Your soul dictates, and is dynamic even if you don't have a water in there, the plasma in there floats. People say why do we need this or that. In a plasmatic condition if you can hold on to the center and create a dynamic flow inside the ball, when the Gans's (gases) outside collapses, the inside has nothing to do with the outside because it's of a different dimension, it has made its own center, once that rotation within, inside the Pl takes over it has its own dimension, its own life. It's the same as we see in the womb of the mother, (:35). gives life to the physicality, of what we call multiplication of the cells and to the point when the multiplication of cells reaches a critical point that they create their own dynamic center, called the STM created, then it becomes independent from the mother. You have to ofllow the same procedure, you keep the system until it reaches a point of rotation and when it reaches the appropriate (speed of) rotation that you want it to reach, then you withdraw the Gans's and physicality, and now you have a plasma. The condition of creation and the holding of a Pl is to be able to create field flows inside your hollow ball. It's not just because it's there. Some people think only to ofllow that they were told to put a ball in there. No, you have to create a dimensional field flow that the soul of the system is created, then (:36). now that ball is independent and now you can move to the next step to the creation of matters if you want to, or fields, or position. Understand the principle fully and exactly what this means, there should be no ambiguity. Go back to when we showed the swimming pool in Nigeria. I said to Alex, there is no water in it, you don't need water you can walk in that empty space and you'll still receive it (the fields). When you walk in that space (empty swimming pool) you still receive all sorts of

fields and radiations, there is no water in there that it stops it. Any other questions. Q: Please explain the reconfiguration of the plasmatic fields within the neutron that lead to the creation of fields with the caustic method, and in reverse (:38). the creation of Gans in the saltwater solution, it would be nice to understand the process in detail so that we can play with the 3, 6, 1 cores to achieve similar effects? He said in the next one (workshop). Did you show it yesterday in your workshop Rick, yes, then no, I am sending you customer .. (:40). reads again the question .. Mr. Keshe stops him at the "caustic method" if you go that way it means you haven't understood, you don't need caustic for a neutron. Q: He's saying the fields within the neutron lead to the fields of the caustic method? What does it mean? Does it? where? Maybe he has to rephrase the question and ask it again. (:42). Lawrence comes on. (:44). Q: I explained to the people that the fields that are created by the soul in the middle of this setup is, if we create multiple of these souls then we can use them as scafoflding for higher levels of fields, you said in an earlier teaching we can create fields from our own emotions if we had 4 different emotions at the same time. My question was about the caustic, that somehow, I don't understand how, the caustic creates an interaction with the N coated Cu and turns it from a metal to a plasmatic field energy, and that plasmatic field is used in combination with the other different metals to create separate plasmatic fields self-contained soul, as you explained just now. And in reverse we can use the same metal with the Na in saltwater solution to capture the fields into Gans. And there is some magic I don't understand in relation to the earth's M fields and the Na (:46). that creates the process in one direction and the other direction. You explained that the neutron contains also plasmatic fields, it's a combination of the matter and antimatter fields or as you call them the dark matter fields in your book. Since it's a fractal of the star tetrahedrons that we are working with in this creation setup it's always the ratio of the different fields that we interact with to create the different appearances, whether it's a plasmatic field or matter appearance, but it's the same process we need to understand that the caustic soda does with the Cu, and the Na solution with the plasmatic fields, to create the SS and have it go into the plasmatic field state, or later emanate from the fields and appear somewhere else where we want to be, this is the question? I haven't understood the question yet. Maybe we can answer the question, then we can understand the question. You referred to Na and caustic and the other things, the reason we choose Na for separation of atomic and Nano and then separation of the N to Gans, is purely because of the atmospheric condition of this planet, purely, purely. Yes, but it does something with the Cu as matter it reconfigures it to behave .. (:48). No it doesn't reconfigure the Cu. You have understood the whole thing the wrong way. The reason we use caustic and you have to understand this very clearly, the top layer of Cu has a very weak melting point, very weak, it separates but sticks to itself, like oxidization, and what we do, due to the rapid heat we separate that oxidized atom to move out, but when it comes back the layer below it has already taken the first position MG field, so the atom can't come back to create the molecular structure, because now it's free, this is why it's called Gans (gas in Nano state) because the material has Nano sized, it means it has become individualized, but as it separates to evaporate then it comes back to connect but the last layer has cooled before it, because it has a central point out, then it can't attach itself to it, the only thing it (can do) has is a M field positioning of itself to it, (it like the Arab's say about the ostrich and camel, they say to the ostrich you're a camel, it says no I am a bird, then why don't you

fly.) When the first layer moves due to rapid heat of oxidization, then the next layer and the one underneath move the same way, (:50). because that's why when you N coat, the initial heat on your plate has a direct effect on it, on a lot of things, when you make Gans's it effects the quality and quantity. It has nothing to do with what you explained, at least not to my understanding. It's a physical separation and then it can't attach itself, it's totally separated. It becomes like an atomic vapor, on the other hand the cooling temperature is so low that it comes back itself, it's elastic like a chewing gum, then the layer upon layer aggregates themselves into positioning themselves. Now they have lost .. there is a terminology in chemistry called valent bond, it's not there anymore. A valent bond means that G is connected to M, and M has balanced itself with the G of the other 2 atoms. This disappears and now it's just MaGrav positioning. That's why you get it, it has nothing to do ... The reason we choose Na as a beginning for the N coating), and we use Na again for the Gans, because the MG field of the Na is enough to create a separation within the atomic structure of the systems on this planet. This is why we have Na in our blood and body. (:52). It just happens on this planet with the 22, if you multiply it you come to a figure near to a lot of things. What is Na, can you look at the periodic table. Don't forget we are speaking about 10 to 15% and then as you pass O up to 20% MG field because then the Inertia doesn't count. When matter is in a condition of matter state, Cu, has a MG field of the totality of the Cu and then it has the Inertia mass of itself, but when it becomes a Pl it's just the MG field, it looses the Inertia when it becomes N, structured more or less to become a Gans. When it becomes a Gans more or less it has no Inertia. In the N state it still possesses some Inertia. You have part of the mass Inertia which is not with the material. If you look at the atomic numbers of Na, and then at the atomic mass and all the combinations of it, it's 22/23, if you put this and look at the other matters like Cu, Zn (:54). some Isotopes of Iron then you see why it comes into operation. Look at AA they run 33/34, then you see why salt was chosen. It's MG field but it has the full spectrum. In these kind of conditions we are looking at the MG field spectrum of any element. It's not the physics of numbers. It's the physics of strength, MG field balance. Look at what you have Na, K, then Ca, look at the numbers, how close they are organized around 10 - 20% then you see there is an order of balance with all of them. YOu have to walk away from the matter state and move into what we call the field strength, then on this planet Na shows to be a very good structure for (atomic Nano) separation, coincidentally. Sometimes when you can't get a good N coating in Gans production, look at it and what the ratio is in respect to Na, ??you get a good indication. It creates a MG field strength which pushes the ratio from 1 to 2, 2 to 3, 3 - 4, then you understand why we choose these things. (:56). People create N coating with heating with gas. Rick says, it's interesting that the Na Isotope 23 is created in the C burning process in stars by fusing 2 C atoms together. Yeah, but we know that this is all fairytales. Elements are created in the space out of the conversion of the destination otherwise they are in the Pl condition of fields. This is from an old physics which was imaginary, everything we couldn't understand was done in a star so we accepted it. Now with the KF research labs our teams will be able to tell you how many grams of salt they can create by plasma and then creating a condition of the matter state to it. The whole proposition is the ratio balance and the MG field strength. Na on this planet has such a factor that you can play these kind of things, it has near enough double structure of crystal bonds of the C, which means it creates, forces the condition of separation. When you have a C that is 6 you have

a conditoin of (:58). what you call, playing it depending on the conditoin of the environment, as a diamond, the best insulator or you become one of the best conductors if you want to use it. Carbon is not 12, it's 11 something, it just happens to double up as Na, so it's a double atomic mass, MG field, then you put 10% on and off of it, then you jump into 40, which is K, Ca, then play another double 10% which triple 10% is 66/68 10% down to 60 you come into the realm of Cu and Zn and Fe more of less, on the ratio division. These ratios one by one on the strength of the ratio lead to the creation and attachment to each other. This is why the human body contains these elements. C then you jump to Na, then to K and Ca, and then to Fe and Zn. We did this in one of the teachings, if this is the conditoin then what is the next step Zn, the emotion. The next step to the STM. Q: Would you allow me to go back to the box where we have a self-contained soul? Yes, everything has a soul. Let's see the box. (1:00). the 6 sided box where we used the N coated Cu and the different metals. The G center, H to outside, and the field ??glue between the G and M so that the D and H start to move as layers and then we created this self-contained Pl field inn the previously empty plastic ball. My idea was if we have multiples of these Pl field balls in a SF, if we can feel how to interact with the field in the center, the 6 and the 1, we can then manipulate those and use them as a scafoflding for another layer of dimension of fields as souls in SF. My understanding was that since we created the first dimension of plasmatic fields at the strength of the C and the H on the outside and using the N coated Cu and metals ... The reason I brought up this Na thing was because since we are changing the Cu to N state we are doing something with the heat within the atom so that we create the positioning (1:02). of the N layers, so something must be happening within the element that create the Cu the matter state and that it changes to N state and then Gans. Then similarly the Na in the saltwater solution in the earth's confinement, does something to the plasmatic fields so that they convert to a Gans state ?? and I want to understand what is going on within what we call the matter, atomic, neutron, what is being changed so that one state goes to the plasmatic fields strength and on the other hand it comes back to the matter. It's the same thing that the SS does, it convert itself into plasmatic fields goes to the destination and then comes back into matter, the field strength that is required in the environment. It's all done with the manipulation of the reactors. ... you see the field structure within the neutron is very much the same (1:04). as the field structure within a galaxy. In some galaxies we see this, that it is the same proposition as a spiral. He draws, the arms of the galaxy go like this (draws the spirals of a galaxy). As they build up, these arms of the galaxy are (like) themselves in the shape of the manifestation of one cell, which is a neutron. It's the only closest way to explain and you can see it. The galaxy is full of pieces, stars, how did the stars come about, as the fields closed loop, because the galaxy throws away as much as it takes in. It's like what I explained last week about a magnet, we look at it only in one direction because it suits us. If you look at it, these fields are going in but at the same time, if you look at it the space gap in between is not a space gap, it is what's coming out at a higher strength MG field and if this is a MG field it's different then gravity, the space gap is opposite to what you see in the sphere, the flow of fields are this way but in a way the flow of the fields in the galaxy are the other way North and (south) pole of the galaxy sits on top of it and not on its equator. When we see galaxies it's the equator we see. In totality it's more like this, oval (1:06). the field flow is this way (down through the top) even though we have a field flow of absorption and repulsion across it, so the gaps are the

same where the fields are coming out. As these fields are coming out and going in at different strengths they rub against each other, they create vortexes, conditions we call them Solar Systems, more as it goes out and comes back into itself plus what it absorbs from its dimensions. We have to look in more depth and see if we want the real structure near enough the Pl of a neutron look at the stars and galaxies. We speak of the clashes of solar systems, which is the destiny of this planet which is like every other planet, but when you have 2 galaxies that hit each other and what mayhem they create, there are universes that hit each other. When you are in the Unicose and see the entanglement of the universes, they just push in, it's unbelievable, we say there are hundreds of trillions of stars in this U and now imagine that this U is one of the smallest ones when you look outside at the twinkling stars of the Unicose, then when they hit each other and merge, the MG fields, it's totally a new cycle of life starts. (1:08). Unknown because each U has its own strength of Inertia of its neutrons, as we call 1 cell, now the 2 have to mix and a neutron balance has to be created. It's horrendous. It's like 2 juggernauts, forget about juggernauts, it's whatever you call it. We literally meltdown when we see these things, it's literally impossible to comprehend what happens inside because each one carries a cycle of souls. (interrupted ... on a small scale we use 2 rotating reactors for creation of matter) ... We can do, but what do you want to do. It's usually doesn't happen to. You have to introduce the third condition of position of the matter. Some times you get, but whatever it is when you interact the 2 the core receives the balance of what is the interaction of the .. it's like if you go inside your core and look outside you see a lot of lights coming in off the strength of it. If you can see the light created by the interaction of the fields of the sun and the earth from a distance, such a huge light you get, you call it a daylight, can you imagine when these 2 rub against each other, what light it creates. And then the creation of new plasmas until the condition in the U ?? change of Pl to the matter state strength of what they have to be. (1:10). Matters appear within the solar system in the galaxy out of nowhere, that is when the MG field strength compared the environmental MG field strength .. creates a balanced fields which leads to manifestation by the strength. It's the condition that materializes and not the interaction. If you have 2 reactors and block it and change the condition here (on one side) so that it produces Cu and then change the environment again to produce Zn. It has a strength in comparison to the Pl, it doesn't mean the Cu is gone, it's still there but it doesn't have the strength for it to manifest Zn ... This is how you create matters in the U, you change the environment according to and you produce what is ?? in that position. Q: Would the 6 sided box be the best? No there is no best, try 16, there is no limitation. It depends what you want ot create. The more you add the more complex it becomes. (1:12). Estella asks Q: when the core is spinning you said it will stop go back the other way, during that cycle the core has interaction with the fields of others around it and the condition is going to change, and when it starts a new cycle the configuration is going to be different, stronger because ... Not necessarily it can also be loosing to its environment, it's not always absorbing to hold, sometimes ... if you watch these reactors when they go into a physical plasmatic lock they are amazing. then after awhile they just release themselves. Then they have at that point to find out which one they are in balance with, will they go clockwise or anticlockwise. (1:14). Is the M stronger to pull it in or G to pull it out, and then they dictate the condition of the rotation compared to the environmental balance and not totally of themselves only. Q: But we change, evolve and expand, if we evolve then all the fields evolve? Everything (evolves)

.. that's why they say the cycle of being in love is 3 to 5 years. You fall in love and after 3 to 5 years you say, oh my god, how did I fall in love with this guy. Because we eat different ofods, the plasmatic M field of our blood changes. Now it's a different strength and the other is different, so now it doesn't match. Q: No, the love is different! No, it's not, just because you want to say it is. No. It's MG fields, It has a strength darling, it's a living thing. You want to say it's this because then you can justify I am a human. Have you seen aliens falling in love, my god, they move galaxies. It still has a strength. Emotion carries the interaction of fields, but when its strength in the blood matches the strength of the heart, and then off the other side the twin, that's it, then god help you, the craziness starts. Until it falls out, until the balance comes to a halt (1:16). then it has to restart, then you say my god why was I attracted to this one, it should be the other way. Q: Is that why they say we are always looking for that twin? Yes, but is that twin one that we can love. That's why universal twins are everlasting because they are of a different higher strength compared to the other levels. The weaker you are the easier it comes and goes. And man's ofod is the line of the emotion of ?? his. They say if you eat oysters you get this, eat that you get that, be with lead you get depressed, because it effects the dimension of the emotion of the man. Matter state Gans's are very .. different. Man will feel totally different in space, our behavior will change beyond our imagination in space. This is one of the reasons we are pushing to take man into that direction. Detachment, I don't have to worry where the breakfast comes from, or the when it's daylight, or whether there is ofod, or whether my child goes to school, there are no schools and you get your ofod and everything else. What are we going to teach them in space, which country ... . Q: but what would be the purpose to be in space, you can go to new places see new things? (1:18). Of course we can, we do it on this planet don't we. In the cities you see people from all over the world, In Rome people come from all over ... tourism will be the best part of the KF. .. when we become men of space on a peaceful direction and achieve detachment and attachment to the UC a lot will change. Q: I like emotions but I think it's almost like . (1:20). we are in this learning stage where we are starting to recognize and experience elevated emotions that fit your soul and you are like happier, I think emotions are good, it's like learning to experience things in a different perspective that's what's good about human ... ? The STM is the collect of the emotions of the man, in so many ways, because when the fields of the U comes towards the man they pass the E first, so soul carries E from the dimension of physicality, it's something you learn, a knowledge you come to it, not something which goes out. Then when it radiates out it carries that part of the E. .. Have you ever listened to people and say, where did you get this knowledge from, where does the brain think up the next word. Someone telling a joke, how does he know he is going to end up with this point when he starts the joke, where is it analyzed, planned. You can't put word by word and not to get there. (1:22). ...have you ever stood still 1 second and think, where did the E come that I have to move my hand, what decides it. ... that it has a sequence , a fish to suddenly turn , where does the essence of that decision come from. is it from the soul or the interaction of the motion that makes that noise. ... Q: when your quiet you hear your soul? You are never quiet, the brain of the man can never be quiet. ... when we are asleep how come the computer keeps running, but no recording of the noises or anything. Start thinking a step beyond that because you need it in the space T development because by the time that step comes to your head you are 1 million (1:24). down the road in the wrong track. It makes it

necessary for the man to start thinking where does my thinking come from, we have to go 1 step deeper. what makes our decision, where is the next word planned, the next emotion come from, then we'll know how to handle our own SS. Q: (interruption ... sometimes you receive the answer without thinking.) Where does that answer come from. (the connection you have with your soul) Yes, now I come ever week here to teach, has anybody seen me come here with the notes or reading from the notes. Rick says never. Thousands of hours of teaching from cosmology, biology, medicine, energy, anything you give me and I give you an answer. You can go and check in years time you'll see what I have said is correct. Where does the knowledge come from? (the field). (1:26). No it goes far beyond that, this is what man doesn't understand. Even if you type into the fastest computer you have wait a few milliseconds for the information to come out, then you have to read it to understand it. I am like a button you push it and get an answer instantaneously. Where does that thought come from, it's beyond the emotion and thinking. It comes from the essence of the creation. The essence of decision making within the structure of the STM, because by the time I think, I want to go to planet Zeus I am already 10 million lights away from it. So my mind has to be set so that I am going to planet Zeus. Is it predestined, but where does it come from. How do you think the next word comes in your life that you speak it. (is that why we have the core at the center of creation and then you have your twin and your 3 SF). We have to understand the interaction of the STM with the interaction of the soul of the unity. (.. the U uses the same structure for everything). No, man see a structure for everything, the U balances the structures. It doesn't see, the balance of the fields leads to (1:28). creation of it. Man likes to create a structure for everything then it has a meaning to him. The beauty of working with men over woman, men you can't give more then 1 task, women are multitasker. How do they multitask? They can use different parts and everything is sitting working at the same time. Where does it come from, even the thoughts to be able to do it. We have to go 1 step further where does that thinking come from that leads to the world that comes out of the matter of physicality, world of action in physicality, even though you haven't thought about it a millisecond before. In that process, is there another system running behind our present system of life, that is aware of the physicality dimension that it is already set to come. We have to have the answer to this if we become the man of space, that by the time we think it, it comes to our physical actions, ... (1:30). then you have to tell the NASA guys I went outside the U and came back, by the time you are counting it takes so many mille years to come in. (.. to become a navigator .) you don't become a navigator, It's a process that is beyond the thoughts of physicality of the man and he'll soon come to understand it. Because now that we have opened the depths of the understanding of the U for the man he has to understand the simplicity of the operation of the U. We have made it so complicated. (basically I recreate myself in point B). (1:32). We have to open the seeds of thought for man to get to know the inner thoughts, structure of himself. Now that we have opened the space in a very rapid way with everything else. Last week we jokingly talked about trying to get into and out of a SS. We answered a lot of questions on how to get in, do I create the field that matches where I can go through but the other ones who don't have the thoughts can't come. Do we have a key and a door we get in? Or do we create the balance fields within our soul that allows us the passage through the fields. I said before in the teachings, fields of the U come in past the brain and gets absorbed by the soul, we don't keep on opening the doors for the things to come

in. For those who become the true man of space do they need a gate to come through the wall or do we understand the field strength that allows us to go because it matches from where we came, but the others who don't have that can't go through. We have to mature very fast there is not much time, rapidly fast. In understanding the truth in the operation of our own life in the dimension of the STM and the dimension of his physicality and where is the interface between the two. (1:34). John from AZ comes on. Q: I was playing with sending my consciousness to the field of the SS and becoming one with the SS. I saw your video with the fan it's fantastic. We showed this with Dr. Eliya in understanding the field strength we stopped the motor twice. I have done this many times. I do it in different ways, those of you who have been around me I ask you if you want ot see a shooting star. I create a shooting star not only for you to see but to the others also. .. I wished for someone to see 10 shooting stars, is it my wish or is it the condition of creating (1:36). that condition to create the wish become reality. If you stand in front of your reactors and see if you can become one with it, not necessary to create mechanical rotation but you can control the speed of the fields inside the reactors. You have to do this, it's part of the test to become a pilot of a SS. How many times have you tried to stop the motor John? We have actually influenced the motors. Yeah but can you stop them? No. We came to this point because the core carries the Gans's and the motor carries the physicality. When you can stop a motor it means you have access to reduce the Gans flow fields that they do not block, or they block as much as you can interfere with the current flow, because it's magnetic flow, these are usually brushless motors that you can change the condition. ... (1:38). ... how far has any of us been able to control with the soul the Gans systems which run within the motors. Because if you get it wrong the other one runs away, you have to get it perfectly right. Then you understand you need a twin soul where the motor becomes the center and not the second soul. It needs a lot of deep understanding. You become like that pad on one side and you create another pad on the other side where the motor is in the middle, you take from it and give to it, like the way Dr. Rodrigo removes cancers. It's the field transfer that creates the motion or removes one of the energy fields. Not my thoughts. The field transfer comes in 2 ways. Try to see if you can, don't put your head in it, try to give to it with a joy and then you'll see. This is the way you feed your soul, the key to feed ones soul without the ofod. (1:40). One of the Mozhans wrote to me I haven't eaten for 4 days I don't want to be attached. Eating nuts doesn't do it, rather understanding the feeding process through the STM which comes from giving and not from taking, because when you give you open, as we taught last week, the G field forces of a higher order, which means the ofod you receive, and by giving more you open the higher strength to receive more. So you don't actually need to eat ofod. This is the reality about the creation, this is how you live in the space. You become a cycling process for those who need and then you receive that you can give. It's that empty space between the M on the iron dust on the table, the matter state has shown itself in the dust shape, the one that is above matter state is the empty space. Q: So it's a process of bringing the twin flame together with your soul? Very much. Q: and uniting them as one? You don't need to unite, you have to allow them to work that one gives enough that it doesn't take more then what it needs. Q: Do they both go in the SS together? More or less you create the G's Okay thank you. (1:42). I have done these (stopping the motor) because it gives you a lot of confidence and joy, insight to be a giver not a taker, those who push to stop they never succeed. Those who give for it to satisfy

the STM succeed and it needs a lot of understanding. I think we have brought in the best teams in the world, and it's the soul of them. The Chinese are working to bring peace. ... Q: Can you explain about the twin? We call it a twin but in fact it's the essence of creation of our own (1:44). It is what we are made of that lead to what we are created of. The STM on its own has no dimension and no motion, you need another dimension of the field to create the dimension of the motion. In the dimension of physicality of the STM even at the point of inception, the soul of the mother is the initiator, but we pass that very rapidly because we find another to be ?? us. Sometimes when the twins multiply into twins that you have too many it leads to "beautiful people" (schizophrenic) or when they position themselves in different positioning in respect to different field strength because of the condition, you lead to the twin which are separate and are born separate. When you come from a different dimension, when you come from a higher order strength, you carry your twin soul because there is a need for it to take what you don't need but in the process you both benefit by it, otherwise you get clogged up. When the soul of physicality and the physicality come together to balance is the time when we die, physicality. Q: that's why we feel separated? Separated because there is no need, it's complete, done. (1:46). When you travel the depth of the U you have a twin soul that travels with you, for centuries, millions of years. It's the structure that without you don't exist because it's the part that confirms your existence from it and visa versa. In the physical dimension we have the STM and the soul of physicality, but the STP is so weak in itself, that the totality is needed to be able to hold down, to be attached to the STM so that it becomes the totality of it, it's like an electron and a proton but that proton itself needs a neutron to confirm its balance. Alzar asks, Why and how the twin soul was created, if I am existing on this planet what is my twin doing at this time? Ask it. I am asking you. Sorry I don't live at your address. (1:48). So I can ask my twin where it is? You have to understand you are in the dimension of physicality, you are always aware of it. Most probably it's laughing at you, look she is asking and I am always there. We are aware of it and it is part of our existence and we need the confirmation of its existence for us to live. If you are single sooner or later the fields you give to the environment, most of it is not needed and then you get clogged up. You have a process that it absorbs all the fields that you don't need, some on the strength of it which allows the others to release themselves or be manifest ??? Every creature in the U has to have a position otherwise it can't give to confirm its existence. We have to become aware of it and if we can use it in a correct way we can do everything. Q: Why do we have a twin soul? It's not a why, it's a process of creation. I put you there with the fields coming out of you and if it has nowhere to go, what will happen? A traffic jam. Q: Can I say the reason we have a twin is that one is G and the other M? Or it's M and you're G. But we have created this condition, it's a condition of creation. (1:50). Q; Why do I need my twin soul to travel in space? It means you haven't understood you still need to go back to school. Q: Is it like I said, 1 is M and 1 is G that's why we need it? No, you missed the education. Why you are M and G from the North Pole, the same as you are M and G from the South, but it doesn't all happen in the North or South, it's the totality of it, that's what I said of the galaxy, we collect in the center. Something interesting for those of you who understand geology, if you look at the geology of this planet and look at the line of the deserts, start from China go down to Iran and the other side you see deserts. Have you ever asked yourself, why are these in that position. And it runs perfect with the dynamic field flow of the center of the planet,

because the field flow is slightly out of line, it sits at an angle the way it is across, but the reality of it is, how is it created, isn't one of the reason for it the position of the moon. We always looked at the moon in regards to how it moves the seas, we got the high and low tide, but isn't there moisture, water and everything else on the deserts and the other positions. We have never studied the effect of the moon on the deserts, because we thought that they are what they are. (1:52). Is it the effect of the twin soul of the earth which is the moon. If you understand these steps then you will the next, the motion and the STM. We interact, we need to give to take, at the same time how much we give decides how much we can receive. We need a source that we can give to, we give a lot of our fields back to the sun, it's not all going away, the sun is one of the main structures of the field flow outwards, it's not just what we see that comes as daylight, but it goes through the planet, N or S Pole whatever you want ot call it, it then comes out to be shared with the sun, this is how we are getting pulled towards it (the sun). It gives more of the higher strength so it becomes ?? one, this is why we increase and shorten the space gap (with the sun). The more we receive of the strength of the G of the sun, the more we become like it so we become part of it, we come closer. Man has not understood the simple reality ???? ??? Q: Is the space open for us to go right now? (1:54). It has been open to you from the time of your inception, you chickened out and wanted physicality. Q: so when we go to space we become a free man, free of the earth's AA which is controlling us? What is a free man, Madame, you are a free woman. We only become free from the shackles of the gravity of this planet slightly, because we still have a connection. Q: Can you tell us about the thymus? Go on the medical teaching. .. (connection problem ...) ...
(1:56). Shares work a box with coils, a twin ?? . (connection problem ...) (2:02). This 4 sided box can create anything I want, I have a Gans in the center. ... How does a 6 sided version differ? (2:04). You have to build it and see. Actually you should have 1 up and 1 down, if you have it 6 sided then you have 18 sides to cover. Do it and let us know and tell us what the effect is. It's nice to see. The coils behave different then the plates. There is a myth, people think that just because they created the CH3 they are going to produce H3 and it will be a gas and it floats. No way in your dreams (2:06). How come you expect the gas of Zn, CH3 and CO2 to be at the bottom. Now that you made the Gans of CH3 and then you came up with the preliminary idea to make H3 as a gas. you put a bottle to collect .... I do it in a specific way because I collect gases and not Gans's. When you collect CH3 in your containers, if it this color, then after your process the majority of it , you'll get a ligther CH3. If you can convert all your CH3 to H3 you'll get a cloud at the bottom. It doesn't become a gas and float away, it means you haven't understood the process. then you see a residue of Ch3 and H3, then you have to go through another process to separate the 2 from each other. None of you have gone there yet I don't see it. (2:08). ... extracted the C from it to be an H3 as a Gans, it looks like a floating cloud. Your H3 is mixed in your CH3, now you have to go through a second process to separate. Only 1 man has achieved it. Q: Can it be done in 1 process? Yes. Q: so you use a bag? You have to try it and let me know. Q: I have. If the higher content feeds the weaker, you have a stronger on side and a weaker on the other ... It doesn't work that way, it means you haven't understood. The Pl created by the Gans of H3 has such a massive power that it can span kilometers. I have to go and see it myself to confirm that it has been achieved. It has been done by 1 man from China. (2:10). As I said in my past talks the Chinese are

2 years ahead of the rest. The creation of the Gans of a gas is a breakthrough in the science of plasma technology and I have been waiting for it for years to see who can make it. It has been achieved in China by a man who understands fully, but he doesn't know what he does with it. When you go to a Gans of a gas then you go into the next step after that. I have to see it, the effect of it, see what it does. When you reach that position space flight ... that's why we are pushing ahead with the Chinese space reactor because they have achieved that position. It's one race to complete. (2:12). (2:14). Miguel from Mexico City has some reactor motion from the fields. I am sure with the knowledge he is giving us is raising the consciousness of humanity. He shares his SF. (2:16). (2:18). (2:20). First you need to do is rotate the CD without the reactor to have a zero point base line, use the same disk ... then run with the reactor empty, and it has to be in the same position. .. (2:22). We have to take all the questions out. this is beautiful, the simplicity of it is amazing.. Have you tried to do it on the vertical axis. (2:24). I am excited by what you are doing, we have seen this in China. ... (2:26). Plays the Video from beginning to end. .. (2:30). ... We are opening a factory in Mexico adn a lab. It would be nice if you can teach there to other Mexicans. (2:32) .. (2:36) .
(2:40). Levitation video. Rick takes over and shows video. . (2:44). reduced the weight from 900 to 350 gram. Mr. Keshe says the fan can cause the weight reduction. ... Mr. Keshe says you need to zero the test so we have an accurate base line. (2:46). There should be able to count the rotation of the motor. After that test the motor stopped. ... The process has to correct so you can repeat it with the rpm's recorded. (2:48). you also have to do the tests before sunrise or after sunset. Always do the test at the same time of the day. It's difficult to tell with your hand held scale, too many variables. They are not very precise. (2:50). The important thing is with what you showed with the CD. KF supporters around the world should try to test this and get back to us with your results. ...

.. I had a dream with Jesus and he said you are working with this technology to bring Jesus back to this time in the heart of humanity. You're work? No, your work (Mr. Keshe). ... (3:00). You were working with space to work with the energy of Christ to bring that energy to humanity. I would like as many people as possible to test this CD. Maybe we have ofund another way to test plasma and Gans by the Gans's . I search for the simplest way that people can see the fields. 31 27
(3:02).
(3:08). Q: about making H3 Gans.

(3:12). I made an appeal to the American President at the opening of this teaching, it's fundamental as we are men of peace and it stands the same. It's not to create fear or threat but to create condition that life has value and it doesn't matter where. We have to respect life it doesn't matter what position we take as a government or individual. 37

(3:16). Donate Video and Cycle of Creation ..

222nd Knowledge Seekers Workshop - May 3, 2018

(,)

(: 16). Today is limited to 2 hours and topic to spaceship technology. .. the knowledge of space is unlimited and anyone who claims that he knows all, it shows the dimension of their life and they need to learn more. We carry the knowledge as totality because we are born with it. It's part of us, the sooner we learn this the faster we can travel the depth of the space. (:18). Some communications have brought up that there is a need for a police force in space. It shows that people who talk this way have not understood. In the space there is no police force and mankind will not be allowed to introduce one. Only those who understand with their souls will achieve space travel. Man has to police himself through the conduct of his soul, not by the sign. this shows the short sigthedness of man. In the long term man will not carry any weapons and in the short term he won't be allowed to carry any. .... we travel through space through the soul, star wars is in the brain of the man and not in the reality of space. On the other hand we have to understand more about our own creation to be able to travel in the depth of the space. The race is on with all KF around the world. Show the video. (:20). (:22). Tomas explains his experiment. .. Gans of gold ..

... one of them is gold Gans but you say that you can't make gold Gans out of gold so I don't know exactly what to call it? Some people can and others can't. It depends on how you make it. It is easier to make the Pl of the gold and then convert it to gold and try to make a Gans of gold from gold. If you have a gold then you can measure its resistance ... There is a specific way to N coat silver or gold. You know you have Gans of gold is that when you put your ohm meter on the gold you get Zero reading, this is the best gauge. For any of the heavy elements (:24). the only way we can say it's N coated is through a zero reading on the ohm meter, which means there is no conductivity. Then to produce the Gans of it you have to have 1 N coated gold and 1 non-Nano gold, then you start making Gans of it. Sometimes this is not easy it depends on how you push it. I showed that it can be done on the archives. I N coated a gold broach. When you put a (special) diamond detector on it, it shows it's diamond. On normal gold it doesn't respond, but on N coated gold or silver it reads it as if it were diamond. This is a second process to test it. You get a pure gold Gans between the plates because gold hardly oxidizes. (:26). so gold is the nearest you get to. Silver does oxidize. Then when you get gold Gans you can make the water of the Gans. This is the easiest way. In those days I even N coated zirconium and took it to the diamonds burs and showed them, they tested it with 3 different machines. But I said the only thing you can't do is to weigh it, it was 5 Karats. I N coated it in a special way that the top layers presented themselves as diamond. It's a crystal structure. They show the pictures. You can produce diamond structure and it literally tests as a diamond. (:28). You can also do it with silver and gold that they will also test as diamonds. I made a promise to the diamond boors I would not release it for the time being. Now that you have developed that technology, you can make a zirconium to test as a diamond. What should be said is that we don't need heavy elements to make Gans's from and it is not really recommended because the more powerful G systems go more towards the higher power of the Pl in the direction of plasma strength. Those that want to make gold and the rest of it means you are still stuck in the matter state, where

you think the heavier you go the more power you have. The true space technology you go down towards the neutron in that direction towards Tritium, then you do not get effected by the change in fields in the U. This is important and part of the structure (:30). we try to show. Don't forget I understand that there is a lot of misunderstanding and miscomprehension about the technology by a lot of people, but in a way it has brought a lot of good things and insight but we have to teach everything. Rick asks would this be an actual N gold coating or a C coating? It's a N gold coating. Q: but with a C type tetra 3 D structure? No, it's a crystal structure, structure and matter are 2 different things. Diamond structure and diamond in the matter state are 2 different things. Diamond structure means that it behaves as a diamond, it's become ?? But with all diamonds if you exert a certain amount of pressure on them or in a given position, they become superconductors. A Belgium scientist proved that if you put diamond under pressure that at a certain point it becomes a superconductor and switches back to ?? super resistor. (:32). .. it's only for a short time. they ofund an application for it in the super fast trains (magnetic levitation) in Japan. The Belgium's asked us to find a cheaper way with N technology and we did it. You create a MaGrav system on a Nano structure. (:34). Picture of different metals he N coated. You can convert them into any Gans you like. ... the Cu wire is a strange thing you can connect (only) one end of it to a battery and the other to a light and it lights up. ... this is very important. Vince asks, you described it before as, 'it's all in the knife you use to coat your materials', could you talk on that on the different ways to N coat? There are different ways to N coat, I use different techniques, don't forget I have 20 years of experience. I sometimes use very high temperatures (not pressures) in a specific way and you can literally N coat anything. I became good at it. I can N coat a N coat itself which a lot of people don't understand. You can create N layers that they become the N layer of their own N layer. These are needed for superconductor transmission and space travel. (:36). We haven't taught a lot about the process 03

(:42).
... you could just move the object one way and we knew which way it was going to go because we knew the field from this point. This is what you do you decide from which planet you are flying and which way you go in respect to it but how much can you change. In the space travel and the technology to come you create direction within your system that you always travel in respect to. This is how you make a control system. You don't control yourself about another planet. It's a knowledge to be gained and very soon we'll bring all this knowledge together through the Chinese government space program. We invite the Americans to join us as well as the Iranians and the rest. The way we opened the Insano we had Americans and (:44). everybody else on the table of teaching and learning. It's the same again, but this time we work with protection we don't let the Belgium's come and kill. You'll see the new space reactors that are getting developed which are a collection of what we have taught. Q: I have an empty gap between the cores in my system. I understand that anything between the cores is in the Gans state. .. this is a 4 core reactor, this is what we have been talking about. He draws 4 circles, hollow in center, then Gans, then hollow and then a Gans on the end. You have to understand at what level you are pushing it and at what level. There is a lot which has not been understood. I sit back until somebody comes up with an answer for it. (:46). We expect a full flight system with the new non-radioactive based in a short time. Because you have

to go through all the knowledge and not just picking one corner. When you make a flight system it has to be the totality of the knowledge understood, positioning, field forces, transmission, field and Gans structure, because one thing you'll find out, the second you start creating the right fields your Gans's will disappear, because they are in the Inertia matter state, when this takes over the fields go back, even the plastic separations you have created become nothing, nonexistent, it's the field flow of the plasma which will hold itself. Rick asks will those things come back into existence when the reactor shuts down or are they permanently erased? It depends, most of the time they do, because you are on the earth's G level, you have distorted ?? gone to the higher level. This is what happens, you don't destroy anything. He draws a spiral, you operate here in the matter state and then you go here, then when you go back to the matter state ?? of the earth, it goes back. In most of the cases. It's the way you manifest your body according to your body. (:48). Q: I did find the system wanted to spin one way? Let me stop you. This is one of the biggest problems you people face, the minute you see the system is trying to go in the opposite direction to your setting, let it go. It means you have loaded that sequence even though you thought you loaded another sequence, then remember when you do any tests, find yourself the habit of scientists, write everything down, like Gans's, which ones, how you loaded, produced, and everything else. Then you can more or less always go back to your point of reference. Try to take pictures. Try to record everything, because sometimes you are not in the it might fly and go down again. The field forces create rotation. (:50). In the Insano we used bungee cords to hang the reactors on, it goes down and comes back up and it rotates itself. Try to detach from the ground and when you have legs make sure they have a N coating. Because now you are independent of the matter state. Now you are on a bed of M fields. if you go through the references, no SS ever touches the ground very seldom unless they know what they are doing. As long as you are separated you can detach, one of the reasons you are getting these vibrations is because you have a massive plate on the table. When you reduce your 2 legs you don't see that much. Try to make a bigger space gap between your plates bottom level and the table or the ground, because you need to allow the field forces if this is your SF with your motors you need enough gap with your legs that you allow the field forces to come in, that they carry enough that they can build enough. (:52). When you test a system do not stand there waiting to fly, if ??/ When I test a system, 20 seconds is the maximum to wait especially with nuclear material. You need for the fields to come and then to build up. It comes up and hits another system and showers back to itself. These fields need to increase, you have to find a way to increase them, that they build up, while at the same time these other fields are building up, you get your 3D structure and your lift. In the past we said the real plasma is here (between the base and the top) in the SF and not inside the reactors. It's created by the total mass rotation itself. It hasn't got a boundary. If you go back to the original teaching it was a single reactor. It has been extended to this mainly for the control. When you go into space you'll see this, it's like a museum piece, they used to effect the fields by other fields trying to create lift and motion. But over time the SF has proven to be mainly (:54). what is reliable to fly and with this you can use mono elements which are very safe. The less materials you use the less possibility of you loosing physicality, because when you have 2 elements, Zn, Cu, gold or whatever, now anytime any of the fields can hit one of the 4, so the possibility of the loss increases. Rick asks, would there be radioactivity in these reactors the way you envisioned them or is that

not part of the process? It's not part of the process, ?? dealing with fields. Cosmic radiation is part of the process. My SS is in my brain. We have to open up our understanding, and understand the structure of the Pl. (:56). If you understand its structure we don't need to create the Pl to use its fields. So we are limited by our knowledge. I tried to explain last week, you can literally fly on one plasma. The whole U works on 1 plasma. He draws a circle with a dot in center. If you look at this whole U in fact it is just 1 Pl. (draws a spiral to fill the circle) The fields of this Pl have been interacting, and here it makes a galaxy because it has MG field forces from here which is going in, and you have the M of this one that is coming up, then at the same time MG of this one going that way, then this one coming this way, so all these interactions create something, then because of the space time gap then these two separate ones interact adn create something else. The whole U is made of 1 plasma and even the Unicose is 1 plasma. The way we see that a star is made in the dimension of the galaxy is the same with the galaxies made in the dimension of the U, from the interaction of the fields of it. When you look at the picture on the back of Book #3 it's the structure of a plasma or you can call it a . It's us who has to understand and take it a step further. In reality a single Pl can take you through out the U, but it depends on what strength of it you want to use. (:58).

(1:07). power unit in Washington.

.. some them said the palm was warm and the back of the hand cold and others said the reverse, that should have given you massive information. (1:14). That tells you the fields are coming (from) internally out, which means the fields are expanding, you have to block it that you can change the heat to the matter condition and you'll get the structure. I wonder if Keshe is still wrong or the students haven't understood. If you become expert at it and good at the way you make plasma you can stand in front of it, literally through the fields of your system with your soul dictating what you want to do with it because it interacts with you, becomes a part of you. You can respond to it, you become another layer in the process, (draws an IL). If you go a higher order which is the small ?? ring inside you can control the control room, if you can interact with the physicality you can find a way inside. (1:16). Any other questions. Now you understand why I taught you the MaGrav systems, why I explained everything and a ot of you worked 2 years on it, because you need an energy system that you know what it does and it works in the Pl condition. The electron system you are doing, rotating, it has a limitation, it can't go it is just putting a crumb in a big pot. This is why you were taught about MaGrav, PPU, and the way the system works. If you need an AC to trigger the Pl you can produce it in your own system, where you always trigger your own Pl. Q: Does the temperature play a role in triggering the SF? Yes it gives you a lot of blood pressure. Temperature is the position of the physicality. Have you seen any galaxies boiling with all the stars in them. Rick says they say that because of the vacuum and space and so few that you wouldn't feel the temperature. Do you want ot hear the biggest joke the man has believed himself into, that the surface of the sun is so many millions of degrees. (1:18). ... You can walk inside the sun as much as you can walk inside the body of the man. I have explained in the teaching that the heat comes from the matter state of the surface in interaction with its fields.

Inside a star we don't see that kind of heat. Rick says, they did an experiment with sapphire plasma where the inner electrode was only a few thousand degrees but the outer edges was in the tens of thousands. ... what about the core of the earth is it similarly cooler? Yes, very much. You were the first one who saw this but you didn't understand. remember when we saw that hollow center. It doesn't matter how much temperature is around the outer core, in the center it's the temperature of a Pl which is none. (1:20). I call it like the Chinese system of counting zero doesn't exist. Heat doesn't exist because there is no matter, it's just field interaction of a higher order and they don't convert to an order that creates friction and heat. Rick says, this is the core of your whole teaching, this void ness where the most intense comes from, it's hard to conceive, it's more potential than anything? Do you remember those Gans's you put in the core and rotated and gradually we saw this hollow ball , which is the interface of the water and the Gans's on the boundary. This in fact in the center is so tense, tightly packed that at the point of not the matter but the Gans level state manifests itself here (edge of hollow ball), the strength of the Gans at the periphery is equal to the strength in the center they have collected to create it. (1:22). This (hollow ball) is the soul of the system. It's like the STM in center and the Gans around the body, you are a being. But now you dictated it with the plastic (core) you put around it. I think today's teaching was a collection of teachings of how you race towards flight. People come around KF to learn and then when they learn something they call themselves god and deny the father teacher. You shall get nowhere. We have had this very recently with a couple of people with governments. They realized the knowledge comes from somewhere else, it doesn't matter what you play. Try to be transparent that what you learn goes back to where it came that more people can learn from. Arrogance of a little tiny knowledge shows the ignorance of a man of his own existence. When we teach we teach everything as I said, energy, space, material, ofod ... When you thing you know everything it is the time you demise yourself. We have seen many people around the KF who disappeared. (1:24). .. Q: We have the oceans with salt water and our Gans with saltwater, what role do the oceans play between the sun and the earth and possibly all other planets? No the oceans are for this planet and this is where life can move freely, it's a dimension of matter state for this planet. They interact, the H with the O which we call the water. Look at the dispersal ratio of the fields G and M in respect to earth's MG field, this is where the G of the gases which is the O has to find a compromise in balance with the MG (1:26). with the center of the earth's G field forces, the 2 meet, H is like the 2 wings for what I call the O to find its balance in respect the G field of the center of the earth. The earth creates MG to the plasma of the matter state of itself where the earth condition which is the O, which is on the gaseous side is above the matter state of the earth. When the 2 compromise they have to come together, it needs a balancer so you have 2 H, so it's interaction balance between the 2 G of the gaseous plus the matter state which gives you the liquidity of the planet. When it is only used as the structure of this planet. In some places (planets) you find uranium as a liquid, because it's the same principle again but you have to see what Uranium ?? planet itself with the MG field of it. What actually happens is very simple for those of you who have understood from the beginning, (he draws an IL interaction). If you look at it, it's very complicated but very simple. You have a field that goes down, and through, ... and comes back, it's the loop of the balance of the 2. But here the G field force of the gaseous part in respect to the MG field Inertia part of the matter side (1:28). so you get liquidity or the balance of

?? one in respect to the other. If you redefine liquid then you understand exactly what it does. If they let us teach the true essence of physics all the physics books of today will become a very good fireplace. There is so much wrong that has been taught that even we question now what is correct and the rubbish we have been taught. In a way we question our own integrity as to why we accepted this rubbish, so we prefer to ?? so it doesn't show who we are. The people who move to Pl and Gans T are those who understand what it has been and what it could be, and what can I add to this that I learn more that I can use it. Without the past there wouldn't be the future but in that process a lot of rubbish has come in. We are still waiting for the Royal ?? Society to answer us. Anything that has got oil on it is nothing but ?? false. Q: What color would the Gans of gold be? Try it. (1:30). It's very much like Cu it depends what current you allow to flow through it, it goes from green to orange to black. It depends on how fast you release the N structure into its environment. Q: we need to get to the flight system by giving to the neutron which is the common denominator ... ? Don't understand. In today's teaching I have explained a lot of important key conditions, positions, and knowledge in respect to the space travel. A lot of understanding is needed to be done. (1:32). Learn from the process of creation of life, you bring 2 Gans's together and in absorbing energy from the womb of the mother, they create a dynamic system that the rotation in giving the fields to each other create a STM and then the STM runs the physicality. So your systems have to be the same if you want to live an independent life in the U. There is no difference. I am not teaching you anything different at least now you understand more about your own creation. Maybe you understand what your system can create. Go back to the word of creation: I made man in the image of Myself. If your soul has managed to make you as a man, give you a dimension of physicality, you can do the same, bring down ?? the structure of bringing matters together you can create a soul that then you can create his physicality. Matter to energy, energy to matter, that is all you have to do. I don't understand how none of you understand this simple process. You are created out of it, how come you have a problem to create from it. Q: how important is the hemoglobin in the control of the flight system? How important is god in the flight system. It's just words, it's a collection of fields. What is hemoglobin, you have Fe attached to protein you make it in your system. (1:34). It's more of the fields, correction of the interaction of the fields. Have any of you reached the position that you'll be able to fly soon. John in AZ says he is getting close. Be careful you don't get your leg in. How far are you John. We've made some breakthrough understanding. How far are you in creating a fuel that you are happy with? That is exactly where we are at now. We are going to test it out tomorrow. (1:36). When you get it we'll call a green meeting. Armand is in Mexico. (1:38). ... chatting ... if you make a system show it, don't be afraid that it is wrong ... Q: Can you please give a clear procedure to make the H3 Gans? A number of people have developed there own procedure. (1:40). .. any structure can be used. You can use a flying carpet. Once you understand the procedure or technique, you can use anything. (1:42). Q: What could the cabin for the earth to be made of ...? What do you mean. In the universe you usually use the structure of the diamond and it depends on what field strength you use, you create floors and partitions if that is your point of reference to have something. This morning we were talking with our Chinese team on how to make partitions, walls or floors. Once you establish your dimensions (1:44). or characteristics of your fields. This is something a lot of you have problems with. I would like ot put your mind at ease. Once you establish this

field flow. 1 kg, 10, 1 million kg has no ? with the earths because now your system itself is the dictator of the weight it carries. The fields which you have produced are important not the mass which, mass is so low compared with the fields you have created. A thousand ton is nothing. .. because now we have a balloon and inside I can carry what I like. Like I said before, when I have an envelope I can carry a million dollars in notes or I can write a check for 1 million, it's all the same. It doesn't make any difference the envelope is the envelope it carries whatever is inside. It is how the envelope is created. A lot of you have a fear of mass within your system. It means you haven't understood. Do you remember we released a picture (UOF) in Italy 3 days after we did some teachings. 3 years ago, and there was a hole in the center of it. (1:46). This is that center in the SF. The light in the center is the FP in the SF, it is so strong that these 3 (base reactors) we don't see. Rick shows picture. The Italian air force was trying to capture it. (1:48). This is of a fully operational UOF. there is a second one we took later on. (1:50). .. It's the same position but a half hour later with all the files (fields) changing, it's the central line of the FP condition. (1:52). (1:54). Shandor reads in Hungarian. (2:12).

223rd Knowledge Seekers Workshop, May 10, 2018
(,)

(:16). Next week is 1 month of the race and we ask you to share with us what you have done. ... I have put all my efforts to back the Chinese spaceship. (:18). The Chinese who are developing the patents for space have been given more details of the patents. No one has ever developed this system, (:20). it will be a combination of lift, motion, new materials, health system, everything integrated into 1 spaceship. We will succeed without a shadow of doubt. Through this we will enforce peace .. power of the nation. The Chinese space system is so comprehensive that it will bring shock into the world of science in every aspects and it will bring the space development 2 to 300 years ahead. This is a decision I have made in response to what is happening around the world. We literally develop the space T to such a level that we make every machinery, aircraft obsolete at the stroke of my pen. This is my decision and I have decided to do it, and we will show the power of the space T. .. many systems will be released through the Chinese government. I have committed the work of my KF to the Chinese nation and I stand firm to it. .. one of the biggest problems for the new development will be time and space. (:22). There have been many discussions in science about time and space, can we change the time with space, or can we with time bring new space dimensions to us. In so many ways space and time do not exist. Space and time only exist in what we call gradient, depreciation, loss of energy, or time for the loss of energy as what we had defined before. But does time exist in the world of the U. No it never does or did. The beginning and the end is the same, the structure, the process of coming back to the origin. In one dropping from or in reducing in strength creates space and with it, it creates time. Time doesn't

exist in the realm of creation because it all is as it is, and it's no more and no less. Time has become the dimension of existence for man. When the man opens the new dimension for space as we are doing so, we come to understand that there is no time limitation. We can ?? cause the boundaries of the U in no time if we understand the process of the creation. This is what is very much puzzling to human beings. He can't understand that you can change the dimensions of existence through the strength of the fields and not through the loss of the strength. This is what has determined the life and duration of the man on this planet or beyond. (:24). When you achieve the dimension of the STM this will not exist as the soul travels or reaches the point of what we call, the pivotal point, the point of departure from the body of the man. We can give or take from it, we can give more if it needs more to elevate itself, but at the same time it has no time. At the point of separation of the physicality of the body of the man, the time stop for the STM, because it joins through the dimension of the systems of the U which have no time and no dimension. This becomes important for our travels into space in a very short time in a rapid way. How do we travel the spans of the U when there is no time and space, no dimension, but in a way we see the U in the eye of the man and everything on it is physical, there are galaxies we observe, clouds, human beings, other entities we observe and we put a time to it, 40, 60 or 100 years, a thousand light years. This is in the dimension of the existence of the observation of the man's understanding. From other strengths of dimensions this is irrelevant. It's the life of a butterfly, one day only. If you want to consider it that way. What you call billions of years for this and that is literally the point of inception of the creation. (:26). Then we understand for man to be able to create and exist in all dimensions of the U he has to understand the essence of the creation. the essence of understanding what makes one to be created, and what makes one ??? ... we have to understand that the dimension of existence belongs to one thing and that is the Creator. Once man achieves flight and once he understands the handling and the process of the development of the fields and the conversion of the fields to other fields will ?? lead and develops new plasmas not necessarily matter state then man will become mature very fast to understand the rest of the processes. At the moment with the Gans's and any other thing which we have shown and has been shown in other research centers of the KF, we are converting the energies of the plasma to the matter state, but the maturity will come when man can convert the Pl to another Pl, or by the conversion of the Pl which is the point of the creation. This means the elevation of the STM to a higher dimension and if one day we understand this process then man can elevate his soul to the soul of the Creator to be in touch with, to be part of, but not ever become. Those who understand the words of wisdom understand what it means. (:28). In reality for us as human beings in the dimension of physicality of ourselves. Now that we take ourselves into space we find out this physical body of man is nothing but a mirage. It has no existence, no tangibility, no dimension and no time. Because once we create systems that are more powerful then what we know, we get diluted within it, become part of it. read my papers adn books, I have written about plasma ?? technology, maybe now you can understand more. Inter-atomic fusion is what we call diluting of the plasma ?? when diluting, the stronger power comes in the ?? trans?? of existence means nothing, becomes invisible. It is very much like if you have a sugar cube and drop it in a cup of boiling hot water, the tangibility disappears but the essence of the sugar, the sweetness of it is in the water, that will be what the man will come to understand. Man in the first flight systems

will loose his tangibility the way we absorb, but at the same time if you let the water dry again adn evaporate, you'll get the sugar crystals back, not necessarily the shape you want but you can shape it the way you want, even at the beginning it was a cubic, now that you dry it you can allow it to take the shape you like. this will be the essence of the recreation of man in the new dimensions. Many of you will expect to travel in the space with the same physicality as you have but you'll find out that this mirage (:30). of thinking shall become another fallacy in the understanding of man in the dimension of creation. The dimension of the reactors, the space dimension is so much more powerful that in it to be able to achieve in reaching its destination the physicality of the man becomes that sugar cube in the water. the powers are so immense that ?? the physicality of the man in the dimension of the ?? And then at the destination, the same as drying the water, evaporating it you'll find a new dimension in the crystal as the sugar the way it is ?? position and conditions apply to it .. then you understand new features and new dimensions. There is a big question, how we always see what we call people from outside dimension in the visually of ourselves on this planet, because they do the same thing in essence in their ship, they are that cube of sugar, which is dissolved but exists. ??? the condition of the man, now we condition them in the atmospheric condition of this planet, and the fields from this planet, so they take the nearest shape to the man that man can relate to and understand the level of their existence. So shall it be for the man. In the coming time many of you as you experiment you'll find out you still carry the physicality of the man when you walk out into the space, but within it you have no physicality but he tangibility of the essence of the STM, as the physicality is higher dimension in strength can not exist as a super ?? energy of the field strength of the entity of the man ?? (:32). There are going to be a lot of new understanding and a need for new ethos in how we handle in the conditions. We were merciful to show the captured drone, next time we'll not be there to ?? reach. Because by saturating it becomes dissolved in this condition as it has no soul it can't replicate itself. This is how we'll enforce peace on this planet from now on. When man doesn't have the tools of killing he can't kill. This is a tool and one of the reasons we are speeding up the new process of the development of the space reactors. The new SS that multitudes of them can be developed that every single tool of harm by man will not be there to obtain and do. This is my response to those who claim any war. Now the new war from KF is total disarmament, absolute ?? The way we see the sugar dissolves in the matter state in the hot water so will those crafts and ships in the high Pl ?? released and controlled. But as the STM has control over the physicality of the man, (:34). man can re-manifest himself. Guns, bullets, and ships have no soul, so we end with the whole process. This is my wish and it shall be done. We can take the dimension to the STM but it needs guidance and then the souls are committed. Man will understand more and more. Now that we have committed ourselves to the new generation of the development of the SS, we make it pocket size, the new system is pocket sized. It can be carried in a child's school lunchbox. Anyone who is a man of peace can set it up and develop it. Many of you have been looking for energy systems, these new space reactors create so much energy that any of you can tap into it from the source. The way man gets his sight and energy from the sun these will be adapted that they release energy according to the physical matter state of the man that he can do what he likes with it. Now we understand the new development. We can land, takeoff, do whatever we like with the new systems that man could never imagine (:36). As my team is learning more and more

I ask more control systems that it can be done, it brings slower understanding but completion of the system. Lift and motion, creation of materials, condition of the STM, creation of energy beyond the imagination, full comprehensive disarmament through the earth MG fields and Pl condition that no matter can stand it. Now the war is on those who are warmongering not on those who are peaceful nations, ... we'll disarm any systems created to harm mankind nuclear and non-nuclear, without sanctions, without harming we just take the tools out of the game. I have made a decision in the past few days that the Chinese Space systems will be the most complicated and most complete system man has ever seen and we'll deliver it through the Chinese military forces space systems, and no others. (:38). We'll enforce peace through the knowledge and then you'll understand and we'll make the tools of war of the past obsolete. We have shown it with the drone and we'll show it with nuclear weapons. There shall be no nuclear weapon to harm man on this planet to be an excuse for the others to create war because of it. But we warn those who carry nuclear weapons, stand a chance of themselves ... if I was you, being Israeli, Iranian, American, Russian, work very fast to get rid of your nuclear weapons because they'll have no use. I disguised myself under the name of nuclear physicist, so I know what the game is. A nuclear warhead can only launch if the system for it to detonate works. But when it doesn't work what use does it have. War by threat, lion with no teeth. We push T through the understanding of new science for peace and we have the knowledge and power to deliver it without a single bullet. (:40). As I said to a military leader, the Court at The Hague will be full of world leaders of the present time. I wonder what they'll have to say, we saw the ex-communist leaders line up, now we'll see the Western leaders to line up in the same way... justifying the murders they carried out on the name of whatever. Abuse of power at the point of the seat of power. And by return we deliver the space technology to all the nations equally through the digression of the Chinese government and what they see as peaceful nations. Any questions. (:42). (:44). Q: I want to know what I need to make the C Gans? What do you mean by the C Gans. (:46). Q: I want diamonds. All the teachings are in 220 workshop. He wanted the gold. That's why I asked who is it for, maybe for the lover. (:48). We have to explain something coming from this discussion. When we produced the CO2, one thing which a lot of people don't remember or comprehend that we created the field of C in the water and not a C. If you go back into the same structure but in the dynamic reactors and you put in CO2 you have created the fields of CO2 (in the center hollow ball). Many of you can do 2 things you can take an empty ball and place it in the center of your CO2 box, what you'll capture is the essence of the C in field strength without any water. This is important for a lot of you if you understand what I am talking about. (:50). When you put the dynamic cores into motion and then when you stop your motor, you see the Gans's collapse, but if you have left this empty ball in the center, the fields in that ball have not collapse, or in the empty ball in the CO2 box. The ball carries the fields of the Pl of the totality of what has been collected. Because in the cores that are rotating you have the Gans's and they collapse, but not in the empty ball. In the empty ball it is literally like the creation of life. They don't have the same entity as the field forces from outside. As these fields have been interacting (draws a spiral) with a different dimension of fields among themselves, so the fields inside this empty ball are different then the Gans outside, because some have slowed down out here (draws spot further out on the spiral) and some at this strength, some have crashed at this strength. In a way this empty ball due to the

man's eye of physicality there should be nothing in it, but if you have taken it from the center of a system .. and allowed it to create these interactions, it is a SOUL on itself! If you understand this you can use it to confirm which is correct ... watch the field interaction between the 2. Do you remember when we had the discussion with that Minister in Accra. (:52). I suggested to him when he couldn't understand and accused us of selling (plain) water, I told him to add some of my water to his water and measure the alkalinity, he shut up for good. It's the same here, take the 2 balls and let them interact. You will se new phenomena. Up to now when it (the Gans's) collapsed you thought it was just an empty ball, because you are so physical and you don't understand or don't want to comprehend that you have created a new life. An egg and a sperm in multiplication create ... that soul doesn't die because the body has died. This is what a lot of you working in Pl T have to understand. the longer you allow the system to stay (run) within the dimension of rotation, empty or whatever, it creates more in-depth field interactions. It has a new life, a new dimension. But because man is so physical he thinks, oh I switched the motor off and it's gone. Does the STM finish when the physicality of the man is gone. When you have an accident and loose part of your body, does it take part of the soul (:54). ?? created. and if you understand this you can even use the STM to recreate the amputated part of the body. If the physicians understand, now if you remove a kidney now they have to go out and find one. No, now create a condition and the kidney will grow in there because it has its MG field in that part of the body. You don't need to transplant a kidney from one body to another, you just have to bring the essence of the creation of it and ?? base it, it will develop a kidney. Why do you think the kidney of the man always places itself in the same place, because the field interactions dictates that this is the place for the kidney or this is the place for the liver or heart. Now that we take the dimension into space travel we have to understand how we can make elements, organs out of the interaction of the fields of the Pl of the U. I want to make gold or diamonds .. no problem but I give you a very bad warning, from some years ago, if you come up with a diamond you have to come up with a birth certificate for it, otherwise it is called blood diamond and it's a criminal offense. (:56). Now every diamond has to have a certificate, it was born a human and now we can love and put emotion into it. ... (:58). Q: If I have 2 MaGrav then I have a field flow between these 2 plasmatic fields and when I make a connection with N wire between them I make a kind of street for the Pl to travel. Does the Pl always travel the short way or does it travel through the N wires? First of all you are talking about the fields of the Pl and not the Pl, am I correct? Yes. With the fields of Pl you can use the N materials (wires) then you restrict it to the field strength of the materials you used to make the N coat. This is the filter point. On the other hand you have to remember that the fields move by matching, so you have to have a match (1:00). or nearest to it of MG field strength that you can travel or be able to move from one to another. If you have 2 MaGrav systems you have to consider, which and how you made it, if you made it the same there is hardly any transfer of fields from one to another. Whenever you want to create a movement or motion one has to be in one way M or G, weaker or less than the other, or by trying to match up you create a current. Current flowing Pl is the cornerstone in ?? our existence. If you have made 2 MaGrav systems exactly the same you'll not see much transfer because it's in balance. If for example you coated one with Zn and the other with CH3 then you should be able to see some transfer, some flow. But if both are made of CH3, the same thing, there is no flow very little. And

if you use N materials to conduct them, we have shown it in connecting space reactors in testing .. but you have to have the gradient of flow. (1:02). Q: I use the 3 Gans's CO2, CuO and CH3 and place them in a triangle and put a plant in the center. .. I noticed that the CH3 completely disappears within 2 months and not the others. I tested it 3 times. .... each time CH3 disappeared. CH3 doesn't disappear it's on the order of the energy giving so it gives its energy to the environment. It doesn't disappear. It's a Pl so it means the environment around needs that energy. Don't forget CH3 is of the weakest, so it gives of a higher order to receive, so it gets its own energy faster. This is how the sugars work in the body (1:04). Q: I means the particles disappear there is only water in there? Yeah, it means the environment takes the energy from it, it is sugar. If you have a plant that is sugar based it is of the same, it's feeding it. CH3 is the essence of sustaining life on this planet. Because it links up with the C then the H has a common denominator to feed. It's like you have 2 ships you throw an anchor over then you put a plank over and transfer ofod from one to another, C is that plank and H is what they carry from one to the other, which ever one needs to be feed. With the AA, COHN connection, and CH3, the link is the C which is ??? for balance, and then the sugar which is H3 in the order of plasmatic compared to 1 H of the AA is more powerful, so it gives to it to make it ?? H2, to loose one for the other one to gain so they both become balanced, this is the time when the protein stops taking energy from the sugar, (1:06). but if the protein itself is in a dynamic environment so it cuts in and takes from the, H3 CH3 part of it. Q: If we look at the COHN, the N is what sustains life on earth or is the origin, and C is the link, and the O and H is what gives the equilibrium, the force between the O and H, that's why we got the Acidity adn Alkalinity? The alkaline-ness, I was explaining this, is the level of the conversion of the energy of the H to O, or the energy of O to H to become acidic. The same water depending on the conversion of its energy in its plasmatic condition becomes alkaline or acidic. You don't need to add anything to it, you just have to create the condition for it so that it starts giving to or taking from. The alkalinity of the water doesn't change because you add something, it changes because of the field transfer becomes changed. The alkalinity is the amount of energy you can receive, you can do it by the ratio difference to make the condition of alkalinity but not the ?? of the water, in comparison to another source. (1:08). Q: ... someone in Europe puts a bottle of water next to a plasmatic water and the PH changes ? Of course it does, because it means the Pl is giving or taking from it. If you want to change the PH there is one metal you put next to it and then the PH goes way down, then there is another metal that sends the PH up to 40 - 50. You have to understand the plasmatic spectrum of the field strength of the H or O, if you add to the O you become more alkaline, if you add towards the H you become more acidic, the environmental condition can change acidity or alkalinity of the water, or any liquid. I thought this was understood a long time ago, but nobody understands this. You don't need to add chemicals or whatever, you can mimic it by ratio difference or (1:10). or change a condition by MG field to deplete or add, ?? or O ?? condition of alkalinity. Or what you call taking of G towards. If you understand this you can fly any system within ?? The knowledge has not been understood to be translated the right way. Q: You are saying that we can have an alkalinity of over 14 then? You can go to the highest level you can ever imagine, it depends on what you are talking. What do you want to gravitate to. You're alkalinity is a condition of the H interaction with O in this planet. When you change the G field strength of the planet, then you want an alkalinity

of 2 or 300, or do you want to go -50. You have to understand the knowledge. ... It's the speed of light situation, you know the guy who said the maximum speed of light is this and everybody accepted it because nobody understood the concept and principle behind the speed of light. It's the same with alkalinity, there is no limit to it. It is a unit of taking. The U takes and then the center of the galaxy has an alkalinity of 1 million. (1:12). And on the edge of it, it has the acidity of -400. Why do you have alkalinity in the center and acid on the edge, you haven't understood the principle. You are still lost in the maze of knowledge. Q: It's question of grasping the concept? No it is understanding the principle. Grasping, it might fall and you loose it, but through understanding it, it becomes part of the knowledge. Comprehension is more important then remembering and grasping. Any other questions. Q: How time do we have to keep the hollow ball in the reactor to build up the fields? It depends on what environmental conditions you have created for the fields. If you have a bucket of lead near-by forget about it. Q: The center core is held by a N rod within the ball, am I missing something this should also be within the ship .. What, What! (1:14). Which ball ?? Q: In the patents there is always a N coated center rod? Yes, that is a feeding line, you can bring it to a minimum, it tells you that it is adjustable. Q: if you put a yellow ball in the center of the picture you drew, and if you put a N rod in the center of it, isn't it going to ?? Nope. It could be pulling it out of the system also. It can give as much as it can take, or is it a position that you get it exactly right. Q: The reason I asked this is that made some (empty) balls and handed them out ot people, there is nothing in them, except the field interaction that I created. These people were non-believers, adn now they believe because they hold the balls in their hand and they get so much energy that they can't believe it. (1:16). Some of the empty balls I had to move out of the house because they were interacting with my Gans making, because I put a plate of titanium on the outside of my coils, There was so much energy inside the balls that I had to actually move them out of the house. Now you can understand what I said the balls are not empty. ... In the understanding of the totality of the field forces, man has to close his eyes to physicality. If you stand between those 2 balls and hold your hands (out), and move away you'll still show the same energy. That's what I know, you don't need to find, it was explained a long time ago in the teachings. It's just that our people are deaf they don't want to listen. Q: I always had it in my head that a central plasma should have a central pin. So even the Pl in a SF should have a central pin there. ... (1:18). ... I am confused? You shouldn't be confused. Your confusion is in understanding that space has energy. You don't need to carry a matter. You are so connected to matter that the space has no meaning to you. John says, one doesn't have a pin in ones head to hold the soul there does he? Most probably. Q: Is there a way to isolate the SF from the nearby fields, can we use magnets, Gans's or N coated coils to isolate the reactors and the fields inside? No, the only way you can do it is the way I did it with the American Drones. (1:20). Build a more powerful fields that encompasses everything in it. It has to be homogeneous otherwise it doesn't happen. ... if you have your MaGrav system here (in the center) you need to create a homogeneous system that super passes the one in the center, then you can do whatever you like, and it is homogeneous in every direction. Rick says, that on some system you have used a N coated Cu shield. N coating creates a field barrier strength, if you use a N coated Cu, it means you block up to Cu, if Zn then up to Zn. It's a filtering. (1:22). This is why we tell you when you use these reactors, especially for space flight to put a N coated base on the

legs of your MaGrav, that you create that separation, isolation that you are on a bed of fields and not the matter state.
... Is baby blue Gans is it H Gans? I don't know. . (1:26). ...Q: After we create an empty ball inside the Gans core can we leave it inside (1:28). and it can interact with another one in the SF? Yes, I showed that Pl doesn't need a container. It's us because we are so physical need it. Caroline showed how you can hold cold Pl in your hand. You can transfer the inner being of the body of the man to that and you can place it within a dynamic system it will fly, .. In 1 of the medical teachings we referred to this that you can actually place a Pl for the elevation of the STM. (1:30). If you put your hand on one part of the body and the other on another part the transformation of energy is there, you can do a lot of things. But man has to learn this. In the space we don't have pads and whatever, the pad is your hands, it's you who decides what energy or fields will go from one hand to the other. But the confidence is not there, the man doesn't understand it. He hasn't realized the power of his own soul. I can remove the brain cells of a body without you even seeing the body move, it still functions, but not necessarily the way .. you can influence its line of thoughts. You talk about putting a (Gans) pad on both sides of the body, my god have you ever seen a more versatile pad then the hands of the man. If you understand it more have you ever seen anything more powerful then the STM. You just say I want the arm to be fixed and it shall be. .. what I said recently I can take the life from the soul or the soul from the life. (1:32). Either way, we have the choice of the ones who want to try it. What I said about the Middle East, the American president said, we love the Iranian nation it's the leadership, you don't touch a nation, ?? you don't touch a nation. So deal with the leaders of a nation if they are wrong and you yourself are not wrong. We have the power to interfere either way. Understanding what I say is the principle I have written on the screen. If you love a nation you don't bomb it. Ands if you bomb a nation you bomb yourself through the STM. That's why I teach this way, so blindly and so openly. ... you have to adjust you hands (pads) your body, your soul, according to the understanding of the function of your physicality and this is what it is. You are so physical so we have been going around the merry go round. (1:34). Because man is not mature enough. You make Gans's and you put them in patches, but what is the body of the man made of, Gans's. And are the 2 Gans's the same, is the body different, it's you who has to decide which way to flow. I wonder if I can find plastic bag in the space ... He draws 2 souls and bodies, what I need to understand are the 2 field interactions of the 2 souls, if I allow my soul to be lower then I take the whole soul, goodbye. Because this soul has (been) set at a given function and a given strength for this body to operate. This is the problem with man he thinks that he always has to be stronger to give, (1:36). but in fact if you are weaker you give more, because what is needed is taken and given ??? what (? is not needed) which is a higher strength. I can take the life of a president with the flick of a finger, the body will be there. And I can give life the way I did with Naomi. It's just people don't understand. But we still teach the science, you are in a nursery and the child needs to know what is a strength line and what is a bad line. Can you hold a pen, it doesn't' matter if you are a professor and you know all the riddles of the U that child needs to be taught how to hold a pen and taught how to draw a straight line. ?? languages from teaching a child to the professor. And the president hasn't even come to the point yet of even knowing what to hold it. My knowledge is complete and if I take revenge I wipe out, I don't know the ?? I know the science knowledge of the U. You

created all these pads and you put them across the body, then you have this pad which you can control it how you want, the difference is this pad has 5 fingers. (1:38). Do you remember when I spoke about the peppermint leaf and it has all the fingers (fibers) coming out, each one absorbs a different energy. So does this (your hands), you decide what energy you want to put in the pad, make it a brain, make it a space time of this planet. So what is the difference. You believe in the pad, oh it's medical and cures cancer. But the pad that you have full control over you don't consider because you don't understand. How you position your fingers on the head, or touch it flat, all these things count, and you have no comprehension of them. Those you have been through the process that they want to achieve, I just put my hand on the back of my head, directing directly to the STM, and you can make any man to see, it takes me a second for me to (make) a blind (man) to see. I have done it and shown that it can be done. I believe in the creation of the man and the power (? within him), and secondly why do you need a pad if the guy is too far out and sits in the Whitheouse. He's very powerful, ?? meager he feeds me, he draws 2 souls and IL connecting them. Bye, you can tune to a satellite I can tune to a soul. We enforce peace through the knowledge. We don't talk and then we love and we kill them both (1:40). then we just take, even if it means to make an example. Don't push me I will show it. There are no kings and presidents in the U we are all equal we know how to serve. It's the same process, I keep and teachings it and you keep on forgetting it. The guy says, I can take the ball out and it still ?? , it's exactly what we have been touching all the time. I was explaining to Armand how we can use our factories for space T. You have a lot to learn. There is no magic in understanding the totality. Q: Mrs. Keshe, (1:42). You teach the knowledge at certain levels, we all understand and grasp that we are all equal. But those who are developing the MaGrav, Gans etc, but they can't go higher because something is missing. I know you told us that everything is in full display but you just can't yet connect it. It just a matter of it all coming together. What would be your message to the people who have not gone beyond the learning and the acquiring the knowledge for making the Gans's, how can they work through, .. how can they add for the world peace, can you explain so they don't feel left out because they can't go higher to making MaGrav and SF. How to make them feel they are a part of it without having to show something because it's not within their grasp. (1:44). We have a lot a KS but they have nothing to show? The strange thing is the whole process of the teachings, complete from the beginning is to achieve peace and through it to achieve the ultimate goal of becoming part of the UC for the man to evolve. You don't need to make anything, you already have everything. Actually the ones who don't make things but understand the technology are more far advanced then those who have to have their physicality of the Gans's and the rest. The tool of the man is the hope or wish to achieve world peace is within the STM. Understanding the message is the point. Q: Can you repeat that message please in a simple way? peace is to give from ones soul, that is all. But those who are more physical and have to have something to show, they keep on making these reactors and Gans's and we have to show that it can be done. (1:46). But those who have never made the Gans's the process of understanding is more important then the process of making. You don't need to make Gans's or have a reactor to understand the power of the STM or the physicality. You are a container of the Gans. The body of the man is 50 to 100 kg of Gans. ??? the factories produce this amount .. and secondly the totality of the existence of the Gans's to create that dynamic nonphysical entity, which is the STM. The

ones who haven't made but have the wish for peace they already have everything within themselves. You don't need a pen and paper to understand what is 2 + 2, you don't have to write it. It's the desire to achieve, to give which creates the condition. There is a problem when they have to do and what's in it for me. (1:48). At the end of it when you make the Gans and create that hollow center, or the soul of it, you already possess that soul. Your soul interacts with what you made. The new Chinese space system is very much designed that way. It's so elaborate, so complete that it replicates the STM. If the desire is there to be, it shall be. And you don't need to make Gans's, this is what people so to confirm to themselves that they know. You have 50 kgs of Gans's which you have full control over it in all dimensions and all the materials on this planet, called the body of the man. All the field essence is within the STM. Because you want to dictate (?? take) you can't control. If you learn the language of love, in which a lover always put himself lower then the loved one, this is the essence which the man has to understand. I have so much peace that I am below those who are not, so they give. No one has understood this. We don't take by forcing, we take by being receiving. It's one of the attributes, humbleness. (1:50). What always falls down to a lower ground, you have to be that lower ground. When the water comes from a dam and it reaches a lower level it gives its energy, the dam at the top has lost it because the bottom has received it. This is what man doesn't understand and it's within the grasp of every man. Thy shall not steal, but thy can be lower then the giver. From the beginning of the teachings about Pl the stronger always gives, but if you are lower ?? it has to give so much that it has nothing for itself, to balance with you as you are. Become humble until the water reaches the ground then you have the same river. So do you need Gans's. Make 50 kgs of it with every element in it and call it the body of the man, ?? then within the STM. You don't need to (make) it's understanding, but somehow nobody understands, we keep on playing around until somewhere somebody understands and one at a time graduates. (1:52). Listen to the story of ?? , and of Romeo and Juliet, and all the lovers, the lover always puts himself lower. In fact it is not that, because by being lower you receive the attention, the energy you need to elevate to the same (level) as the soul of the other. When the other one gives it's not at the same level as the ?? Which President would like to play with me. Q: Can we compare it with a beggar who sits on the floor and offers his love and extends his hands? You don't need to extend your hands. Some beggars are very rich and have millions in the bank. Q: yeah. It's understanding that counts. Those who are all physical we have to show all the games because somewhere they might see something. This is part of the structure of the teaching, giving man the knowledge of the U. .. I said when I take man to space it will be as equal to others. (1:54). ... and serving comes from humbleness and not from arrogance. Any other question. Q: I made a C Gans with ??? and sprayed it on a plastic and tested it with a diamond tester and it showed a diamond structure, do the Pl fields travel through the diamond structure of the C in the plastic Gans ? I think your English is good enough you know what you are doing. Q: Alzar. I have tired to use my body to go to space. ... (1:56). ... salt bath with Gans strong energy between soul and heart . how can I improve on that? One of the things we that is part of the evolution of understanding. It may be farfetched for 99% of our listeners or people, is you can position part of your souls outside of your body that it becomes part of your existence, like a twin, it sees the tangibility of the physicality, (1:58). but it is aware of the existence of the soul. And the same with the tangibility of the soul with the physicality

itself sees the soul. You can sit outside your existence and watch the behavior of the physicality, to be detached from it, but in a way you give more of to be able to see the lesser of, which is your physicality. You become witness to your own behavior, then you can separate the physicality from the STM, in a way it still carries a soul, but in the dimension of the control outside the physicality outside the body. I do this a lot. You are aware, your presence to the presence of the physicality but you are not part of it, but in a way you are not that either because you are still involved in the interaction of the physicality. I have said many times to Caroline, I sit outside my physicality and watch what it is doing. You can do this in any shape or form, be it making love to your partner, writing or making something, (you can ask) am I doing this right, I sit outside it, I watch it. Is what this body doing correct and what is the next step, what do I want to do with it. This is what our soul does when the physicality is asleep. It's nothing strange, it's just knowing how to do it, how to reach it. (2:00). When you become mature enough you don't need to let the body to rest, you can still do in the presence of watching your own. Is this conduct correct, is what I am saying correct. You become listener to your own physicality and then you change through that soul which is there, you change the physicality. The Day of Judgment, you judge your own physicality's conduct through your soul, it can be done. Just because you think you do it in your sleep, where the soul goes somewhere else, you can do it if you are mature enough to ?? You can even manifest yourself in 2 places (at once), because the soul manifests itself in that position according to the environment. I was listening to Trump's declaration, what excuses he's using to bomb Iran and I sat outside and watched and I listened. I thought does this man know what I can do with him. I can make him come to his knees and pray and beg for life, that he never should make such a mistake. The same with the Prime Minister of Israel. I just take their soul, sitting outside their body being aware of their misconduct. (2:02). You don't need to be somewhere, you can apply it. These people don't understand the power we carry and we can implement it. When we bring the head of a nation down, the whole nation goes. And this is what they are asking for, maybe this is what we have to show. I can bring world leaders to their knees, those who claim war and conflict. And you will see. Because we are not creating war, this brings peace, against humiliation that it leads to peace. I listened to the talk, he gives 3 to 6 months for the American companies to stop all the contracts of what they have started. But does he say that there will be another 10 million jobs gone out of the workshops of the American government people. Will the government support 10 million jobs because that is what it created. The Boeings economy comes out of the Iranian contract. Now take 10 out, in 4 years time they'll be back begging why should we let the nations suffer again through it. So the misconduct has to be corrected. If I have to interfere I will and I know how to do it. But then there will be no mighty powers, there will be equal powers. (2:04). Don't touch me because I will take everything out. This is why I started the teachings today, that there is no time and no space. .. there is no time for war and no space for killing. And I have bent backwards for peace. Any other questions. Q: How can we help you? Understand the teaching and act upon it. I promised that no one would be harmed from this technology, but I didn't promise that I will take everyone out of the harms way by those who create harm. New time, new space, that applies to the soul as well. There is an interesting point with the new development of the SS systems. (2:06). Because it doesn't carry any matter of the C or what I call gold, but it carries the strength of it, if it is expanded to the

dimension of the gold and C, it will paralyze a lot of things in the world of electronics. This is a weakness in the structure of the present science of man. It's very easy to implement peace, but man has to become peaceful by nature, and this is what we need to do. Q: I begin to understand the power of field strength as I go about my everyday positioning and repositioning myself as matter and sending and directing my packages of love to others, the outcomes are immense joy, trust, and confidence in this, the soul is truly eloquent, wings growing in my matter state as I position and reposition in loving intent. Thank you Mr. Keshe you are loveliest of teachers. (2:08). Q: Let's assume that all of us around the world start to rotate Zn reactors, is it possible to obtain a grid of Pl fields, is it possible to answer better to our synchronized intentions, for example cleaning environment, soul cleaning and becoming more peaceful? You can do this is one of the effects that scientists are noticing in the past few years. Things are changing on this planet, we see a lot of reports coming, but it has nothing to do with the structure of the planet. This is partially and in an effective way, from thousands of people who made a lot of Gans. You say you wash your Gans's and plates, etc. where do these Gans's go to? (2:10). Even if you do keep them in bottles you still create positioning. In a direct way we are changing the environment and the energy system. We are talking about global warming and all the problems from exhaust, we are creating the same only as a solution through the Gans's production but in a more effective way because it actually is the essence of it. The more people make these things, millions of gallons are being made. Gans water goes down the shoot (sewers) and it's all Zn and Cu. We are changing, what do you call it, Gans contamination or Gans cleanup. Q; ??? We are involved in a massive way ... (2:12). ... KF is involved in land reclamation on a massive scale, but we won't touch the geophysics of the planet, we need every kind climate otherwise the cycle of life on this planet can't exist. We can't make all the deserts green because they have the function ?? the trees. The trees ?? but look at the forest fires ... (2:14). Caroline was asking me if I can do anything about all these plastic bottles. You wait and see what they will do in the time to come. Q: You have the 4 hemispheres of the brain, draw them as balls, in the center the soul lives. If we want to get a craft off the ground, if you were to draw the SF below that, if you put partly dielectric and N coated tube. ... (2:16). ... (2:18). Why not use one of the Chakras. ... man has to learn how to use plasmatic energy. Go back to proton and an electron, the distance creates , if you have a 3rd position we can dictate with it, we can use the energy of the STM and the heart of the man, with it you can move the body of the man. (2:20). It's how you can add to the totality. One of the biggest Chakras of the man is the heart itself, because it is the only one you can control very dynamic. You have an electron, you create a position of it, it is fixed so the only thing left is the body of the man. It's like this position. If that is your wish. Q: I was talking about a ship design to get off the ground? This gets you off much faster. With this you don't need anything, you just go to know how to ?? lean into it. There is a lot learn. You have to understand something that is so much a part of us that we don't even think about it. We have done this so much that we have lost the essence of it. He draws the body of the man, and the ground. What makes you jump. I asked before, where are our thoughts coming from? (2:22). Where does the initial essence come from that I even speak a word, because it is pre-dictated, predetermined and I just make the noise or the voice or is it predetermined by the emotional part of the body that gets the information from the soul. I referred to this before maybe somebody might understand.

Even if you go back to a single leg down and one leg up, what is the position of this leg, what has made you to put this ofot up here while the other one is still on the ground. How come we can create the energy muscle, because it's, what you call it, anti-gravity, to raise it up, and we do it through the essence of the soul and the physicality but we never thought about it. Even when you jump you have to be able to ?? create a condition that it goes opposite to the strength field of the planet. (2:24). So we already have this in our structure, but now it is how much can you use it that you stay up here all the time. Now you see we know everything. As humans we know everything, it's just that we have done it so much that we are not (aware of ti) we don't want to understand now that it is us who is in position of it, and in position of it. If you can raise your ofot a meter off the ground and you decided then you already know how to create a G system. But where does it come from. You contract a muscle but that contraction has to create a field strength against the pull of the earth. These are the things you now have to answer. Then do we need the shoes, if we know we can already hover, because we can do it for a few seconds. The decision made in the physicality part of the body, gains such a field that is less then the G pull of the earth. We need to extend and understand this further then we can fly. You get yourself up but then how do you make the directional motion. (2:26). This comes to the position of what and how. We already know. You are a SS standing in the air, how do you turn this body, can you use the soul of the physicality of the ofot to the STM and change and turn, or do you go like when you have a dog in your arms and you near the water and the arm just pedals (automatically) before you even touch the water. We know all the knowledge, but we have ignored ourselves to it. Man needs to learn more about himself, then he'll understand that he is very strong and powerful. Q: I have 75 kgs of multiple Gans in my body, ?? star ship, my heart, brain and soul is it enough? (2:28). It's more then enough, you just need 1 gram of it. How much Gans do you put in these rotating cores, 1 gram. If you have totally 5 grams of it in a SF. 60,000 grams divided by 5, you can make 12,000 spaceships. Q: Alzar had a dream, in Iran they used to do "Kolsee" charcoal in a pouch on a string and swing it around to light it. I saw kids with N coated coils swinging them around and they were flying with just that? (2:30). ... so what are you trying to explain ... I don't know. Any other question. If you listen I taught a lot today, but you have to understand it. The teachings are not only in one part, they are a collection covering different parts. But in today's teaching if understand even about time and space and the creation of, what I call fields without dimension, this should give you a lot to target for the new understanding, new process. In a very short time the Chinese KF will show and deliver a full flight system in a very short time, as we are perfect in the whole T that they understand. We leave it totally at the discrussion of the Chinese leadership to demonstrate the power of the T as the Iranians did with the Drone. (2:32). Our work is heading in one direction, not to humiliate one nation and not to bring anyone to be more powerful, but it is to bring everyone to be equal that the peace prevails. I hope and my deepest wish is that I don't have to interfere. Those in the space know, that when I interfere I am merciless. One day when man opens to the spans of the U and understands the power we carry, when we have to interfere we have no mercy, because it has gotten to the point where it has to be written from fresh. Maybe I have to go as far back as Judaism and the name of Moses, before that name was ever believed. And maybe we have to go (as far back) as what is called, a new continent is discovered. Or we call it, back to the future, maybe we have to play that game, ?? erase the 2 from the history of

the man. Rick says, this is the ancient families feuding. (2:34). We have Trump as moderator of this TV show. Keshe says, I think the president has made a mistake with the TV show, this is real. This is the biggest problem. ?? Will it take those families to come together to create that peace? I was explaining to someone who was complaining about a Prime Minister. You have to see what these people have sold their bank accounts to and this is where the problem is, it is all to do with power, position and finance and it can be stopped very rapidly. This is power play and we just have the power and can show it. Q: But they don't have any support from China and Russia ... I don't get into the politics of it. Maybe this is the test to show the power that the time of the peace has come for man. You know the parent is watching the child and saying don't do it or I am going to slap your hand. We are getting to that slapping time, but when we slap we wipe it out. (2:36). Q: (Jallal from Iraq). That exactly what I am thinking about, that the father must act. Let the child play he might learn something.

(2:37).
videos

END

224th Knowledge Seekers Workshop - May 17, 2018

(,)

(:16). Today is the deadline for the 30 day challenge for SS development.
... a month ago we started a space program, there are as may ways to fly as there are stars in the sky. You can't distinguish or separate one system from the others as everything works the same way. (:18). In fundamental principle they do but each one uses a different material, slightly different field strength and they create themselves, position to be, to confirm their existence. It's very much the same as every cell in the body. You can't put the cell of the heart on the brain, because it has to have the right place for it for the strength it has. So 4 weeks ago we encouraged people who are able to, to start thinking, developing and understanding, how to create a new system, to be able to separate the body of the man from the physicality of this planet. Or to be able to understand the process of creation, how the STM can take to the dimensions of the U. As I have said many times but sometimes people do not realize what has been said, it is very simple. Your soul has managed to manifestation to your physicality and your soul has kept a space distance from the earth and it keeps its distance in a given way, and it uses the body to keep its separation point from the physicality of this planet according to its strength. then it should be easy for man to understand it and replicate it. Is the STM the height of the man? Why are some of us shorter and others taller? If we study MG fields positioning, you'll understand that the STM according to its strength and its features dictates the height of the man, dictates it self in respect to the central gravity of this planet where he feels comfortable with. (:20). But does that mean what happens to the other features of the field which radiates, it doesn't radiate in one direction, but in 360 degrees and according to the field strength and interaction with the other souls in the environment gives the 3D of the physicality of the body. If we ofllow the same principle and in totality

fi we start ?? , every U does the same then we understand, if God can create billions of stars and if the scientists say that every day in the U 1 million stars are born, ?? create another one ?? , but I have to understand how the other 1 million are being created that I can replicate at least one. This has been the challenge for all of us and it has been for the last 4 weeks. Let's create one, because once you have created a flying system you have created a star, because it manifests itself but what it shines, confirms its existence and its presence. In so many ways the life of a man is the creation of another star. It takes billions of years for specks of dust to come together that their field strength creates and leads to creation of one sun. But in the life of the man on this planet we have learned a shortcut, we create it in 9 months. That's all it is, we create a star and call it a soul, as does the solar system once the star is created manifests itself as a shell of itself, or as a shell containing a planetary system. (:22). There is no difference with the STM. If we have managed on this planet to reduce the creation of a star, which takes the U billions of years to create one, and as they say it produces everyday 1 million of them, man has become more clever. We have become more efficient through intelligence to do the same and we create 1 star we call the STM in 9 months. 30

(:30). John from AZ shares what he is doing. Shows video. (:34). Gans balls without motors. placing the Deuterium in the sun and it creates a grey substance possibly AA. (:38) (:40). Have you gone far enough to see rotation in the balls? I have played with moving the balls with the energy in my palms. (:42). The AZ team gets very easily diverted from their track. ... in the end the they'll have to go back to field flow.... (:44). for a lot of KS they can't go through this process of conversion and to ofllow the process of conversion. It sits in the background of understanding of the knowledge where you have to bring a very strong field into strength of it which creates physicality. There are 2 ways ot do it. You add to it in numbers to get to physicality, or you can reduce from. In some cases, the popular view in present science, what they call fusion, or plasma dilution, that is to bring weaker fields together that in the process they manifest themselves. Or use a higher fields but put enough barriers that it can manifest itself in physicality. In the U both ways work. Some cultures have come this way and they find it easy to handle. And some have come the other way, and they still find it easy to handle, it depends on the level of understanding of the science. The higher fields is the Iranian nuclear based, and the lower is the Gans based. This is the difference and where we are. In so many ways the nuclear based is much faster. (:46). because if you find the right reduction you can ?? the material state or interaction with the field of the matter state. That is why those of you ... you'll develop systems that are only MG field Inertia systems in respect to earth and you can't travel into space with them. We have seen development in either way with the KS of the moment. The understanding has to be that we collect enough fields from the environment and in the reduction of strength we can manifest physicality. If we can manifest field strength that we can touch we are nearly there. The AZ group went in that way and I never understood how they left such a beautiful position. Now they are wandering around for fuels and other things. If you didn't have the right fuel you wouldn't be able to create the wind. It's just like a mischievous child that likes to try everything. We'll have to wait until AZ decides to go (back) on the path that they have seen. ... It has taken a lot to get you to create the M field, and suddenly like a spoiled child, (:48). it was given to me, I didn't understand it, I put the toy down and try the next toy. If we target for

development we have to ofllow the progress. .. the Gans can create a motion, but you had a wind flow which is a collection of all these heartbeats. All of you have to do this, when you se the progress and then you have to build on the ofundation. And don't divert into many things. .... we want to slow that wind down and with it we can create matter state. Somehow this is lost out of the track with AZ. (:50). Video showing heartbeat of the Gans. (:54). .. you'll become expert in this and transfer the fields in so many different ways according to the need, process or condition. you created a condition where you could feel the fields going to the top reactor. You can create a condition where all the fields do not go to the top reactor, it can be spread for different jobs, it's very much like the physicality of the man, then whatever is left will come back to the 3 base reactors. Part of it becomes the physicality of the man by the conversion of the fields, or by conversion of the fields of the physicality of the space, what you call a SS. Anything else John. (:56). He shows another SS reactor. ...
(1:00). ... what we see here is some of the balls are half filled, this can lead to unbalance and non-homogenous fields. When you fill these balls up, because it is the mass ratio to what you have, to load them on the mass ratio with enough liquid that they are full so that you have a homogenous system. When you have a half full system then it creates an additional field strength in that in the other reactors don't exist and this won't create a homogenous system, because it depends on where the gap is, the system flows in that way. (1:02). We see this one (happening) in the MG field pull of the earth, ?? with the M flow patterns. We see it occur on the southern hemisphere, ?? left bottom ?? fall of the ?? in the Pl condition but in that space there is a Pl field, an empty space in the form of a Pl, that this gives the stability in the fluxuation of the M field of the earth, that's why it continuously moves, it's like having an air bubble in it, wherever the air bubble goes continuously the MG field pattern of the planet changes. When you test make sure your Pl systems are full. If you look at the NASA daily releases of the gravitational field pattern of the planet, on the day or the day before, you see that it has a very funny pattern, this is because of the composite material inside and then it's like a FP which is inside has no liquid or Gans content as a matter state. If you get to that point you get a fluxuation in the field creates most of the dynamic field flows of the planet, when the gravitational field flows slow down in interaction with the Inertial matter part of the earth, then it creates most of the wind and the flow of some of the patterns of the waters or combination of the 2. ... make sure you fill up to the top the Gans balls, unless you use Pl balls which are the next step up (1:04). for those who have already moved into it. Q: John did you include AA in the system? No. Q: Drain the system .. A plasma vampire .. You did say one time you need a drain? That drain comes by ratio balance or by difference in balance from the top reactor. That is the function of the top reactor, pulling to drain it and with that it created interacting with fields which radiates out. This is what is important. You have to get the totality of the knowledge to be able to get rapidly to the position we would like to. (1:06). He draws a SF. The draining of the system comes when you pull towards (the top reactor) then when it comes it hits a stronger field barrier, which it breaks open and then flow downward to feed more. So for everlasting the fields continuously feed each other. The principle of draining is simple, the flow of Pl says that the stronger always feeds the weaker, what you need is a field that is strong here and weak here. this tries to feed this, and in that process you create a shield barrier with a

stronger field here .. then by reverse of it, it breaks open. then the field that comes back has to be stronger then the weak one here. ...
(1:08). How you place the reactors determines the shape of the SS. In space large SS have a combination of different systems. Over time it has shown that certain systems fit certain applications.
(1:10).

(1:12). In this part of the U there is a specific field flow that allows the material in that environment to create such a condition. In many SS you see transparency because according to the strength of their ship, they have a structure, but to us it's at a level of transparency that we can see through, because we work on a different ?? The same with the SS made by man become transparent to the others. It is possible to make a common denominator of fields but you ?? have to understand the U is the same as the human race. There are different points of maturity in the intellects and the space travel, ... so we get everybody from the donkey's to .. when we say donkey when mean in the knowledge of traveling in the space. With what we are teaching is trying ot take man to the maturity that it doesn't need billions of years to learn and create many gods for himself as he learns something new. .. Your problems start when you have created the SS. (1:14). .. the new space T you can put it in a suitcase and build it up anywhere you like. This is how it should be. Then in the field that you master you decide how it is going to show. .. how far are we going to go with it. We can carry our vehicle in a handbag. You can have 4 cores the size of a ping pong ball ... that's all it is...
(1:16). you see different size SS coming out of big SS. .. once you get in you have to be able to produce everything you need. .. all we need to do to move the legs. Don't forget that once you create the dynamic plasma (not the rotating cores), the plasma always stays, there is a mechanism that you can keep the rotation and you pack it together. It's like putting 4 ring magnets or balls together, that is all you need to do. We have a lot to understand. The biggest challenge at the moment is how to bring this to interact. (1:18). and those who will create the first shape. I was asked, can we show them. I said no. There are those who want to help mankind ?? step up, but it won't help. We see people who make 1 meager step up and then they claim (to know) everything. We'll allow all the things to come together (at the right time) so these arrogances will go. 90% of the failures in because you don't trust in what you do. .. you open the lunch box and all the energy of the U is there and you set it up and it's your SS. Go back to the Einhovin presentation they open it up and said it is empty ... the fields of the universe . (1:20). the empty box with fields in it and 29 electrodes creating huge amounts of ?? energy. You didn't understand it at the time. We showed it 7 years ago. that box has been with me for 20 years, it was a box for butter. Shows that video. (1:22). from Einhoven 2011. This is the day we were to show the flying car. The American government went straight away and bought half of the auditorium tickets, they saw armed people with guns in their pockets sitting in the audience. We showed a lot on that day of the technology ... the ofllowing Saturday we showed the Iranian reactor. . .. we captured the Drone with hours of the embarrassment. Very soon the governments will show the power of the peace of this system and with it we'll stop a lot of wars. This is the empty box of universe, the energy sits inside, you see voltages and current, but it is empty. Each point has different field strength, ... that ball in the background if you energize it the right way will fly. you see

the torch sitting there, it has been shining for years. Caroline and I have decided to build the first space T museum in China, we have donated all our historical ( ) , (1:26). ... anybody else would like to show. there is a video that shows the spherical ball. 29 pins are connected in positions. ... we could see the field strength inside the reactor. these tests have revealed a lot of knowledge. (1:28). what fiedl strength we need to ascend and descend, it's a field flow within the sphere of the plasma. .. this ball was made to understand the field flow between the earth's gravitational point and the space, we wanted to see how the interaction of the field changed during the day and the night, radiated from the earth during the day, which over takes the G field of the sun or the Pl of the solar system, because there is no such a push from the sun's fields so now the earth's fields can rise above and we see a huge change, this is a hige development for the energy , we are looking for the solar system that creates so much energy. the earth's MG field ?? we need at night time, if we build system that sit just above the surface of the earth, so much fields comes up, we are looking in the wrong place, that's why our solar systems don't work at night, we need a solar system for the daytime. We need a earth's G system for the night time when they rise up. I used to wake up every hour in the night to take measurements from all 29 to se how the field changes, and then we released the information (1:30). It was 3 times more in the night but at 3 AM and 7 PM we see a balance of the fields and we get a flatness or very little one. This all leads to system control of what we develop now. How to charge the Pl, release the energy from one to another to create a flow. ... with this system we could confirm the change of polarity because we saw change in the current from negative to positive. It took me months to design and build this system. It looks simple ...
(1:32). (1:38). (1:42). Video how to control coils. Partially of what you show is due to the interaction of the ring with the hand, because you are a Pl and it interacts with you, what you call the aura. We see this frequently in tests. ... (1:44). ... when you show things we add to the knowledge. This is about the control. You showed the 2 coils. We teach the system control of the Pl systems. (1:46).

... takes a phone call .. (1:50). Look at Boris's system video ... (1:54). Mr. keshe comes on. The biggest problem with these systems is the flexibility of the balls, they should not move, they should be absolutely fixed, because the minute you have this you don't see any reaction, if you monitor these cores with a high speed camera you'll see them flicking, they might move just a fraction, this doesn't come from the base, but it comes from the fields in which they are trying ot build (up). It's like if you get a boxer and you are trying to throw a punch and he just dodges the fields, or you hit something and it moves. I have seen this, people put them on springs, but if you are trying to create a field for lift or show any effect, these should not be there. the cores should be solid based that they can't move a fraction, not a feather level. When you put these cores on vibrating bases, it's just a good decoration. (1:56). nothing else. Absolutely fixed, because you build a field and you push it away, if it can move away, so it's gone. And you don't see any reaction. ... if you load these kind of reactors for the production of a spectrum of materials and you can position it in the right level, that you can rotate different cores with different speeds and materials, you can produce composite matters. You have to understand what it is going to do and what are the effects of it. (1:58). Q: I built this system to feed myself and I can feel strong fields around it. What have you loaded to feed

yourself. Q: CO2, Zn, Cu, and corresponding AA. ... the body of man needs a spectrum of ofods. people who build these ... if you are missing the banana part then you have to make a banana. (2:00). Do you remember the Cups you made and you put a banana on top and got the taste of banana in the cup. Only a few people went a step further. Make the Gans of all the ofod you need and put it in a container and above the Gans Cup, then the water in the cup will contain the totality. ... when you fill the Cup with the water of understanding, then in this Cup you have to match the AA to yourself, that it matches you, and the condition you are accustomed to. Then in this water (in the Cup) if you put 1 drop of AA you link everything in. This cup is a Cup of life. (2:02). Any shortage in the need for ofod of man creates a craving or a demand for it and it puts you back on the track of eating. In this way there are no deficiencies and in this way you satisfy all the needs. You can do the same with the dynamic cores, but with them it's a slightly different process. When you have put the Gans in them and made the FP, (empty center), this free Pl inside (the core0 carries the totality, and you can take this one and add it into the dynamic system in the space and you'll never feel hungry, you're always conscious of what you need. It's the availability, This is the new satellite feeding in disaster areas. It's part of the process as I said we don't hold anything back. We teach everything that you can learn so you can expand the knowledge. A lot of you got stuck in the Gans process, now you have to go to the hollow ball, then when your body needs because it carries your AA, it has the link. The cell of my heart needs Ca, (2:04). and it's there, I need something else and it is there. Why do we eat composite ofod because we receive a spectrum of energies. Our body is a converting system of hard materials into field materials, and then delivering it to become a Pl of a Gans, and everything is a ?? meat and we eat it, there is everything in it. We have to take the knowledge to the next step. You have to put everything that the body needs in it. The body needs 2 kinds of spectrum of ofod, you have COHN, and then the Mg based spectrum of ofod (Mg COHN). The N still stays because you need the link of connections. This is on the plant side? We need to have it. In the body it converts itself and you have the whole AA spectrum. On the Animal side of COHN you have the Cu connection. The Cu goes to the muscle tissue, the common denominator is this (COHN) and then we have other elements that connect to it... you remember everything is in the plasmatic field and you see the (2:06). connection. When we speak about the Cup of Life it has to contain the totality of what the life needs. You have also to consider what is needed as the field strength of the different emotions. Be it for ofod, material production, or a spectrum of emotions, you still a spectrum ... these ? are easy for a spectrum of emotions. When we come to the next level ... If you are going for a holiday then psychologically you have accepted it. But if I am going for work for 2 weeks, from the beginning of the first day I am going to miss my child. The emotion of missing, now I am going ot put you in a SS, how am I going to handle you for 200 years. I have to put a strength of emotion in this box or ball that you don't miss. Missing has a level, an emotional strength. This is where the research and development comes in, we have gone (that far) we were happy to taste the banana to feel the E. (2:08). After 10 years I don't want somebody saying I want to go back home. 10

(2:20). ... you have everything now you have to understand. If you are taking a trip with car from NY and you get angry and cross a red light, that's it the trip is finished. You have to start learning how to do it, there are no brakes in your SS. Sorry you had the earth

you could create a friction with a brake and just stand on it, but in the space there is no platform that you can brake, sorry you're on a Pl field, not even on the water that it could stop you. But if you understand the friction between the Pl of the cosmos in respect to the body you can use the same field as you use the earth to create ?? friction on the water to stop. But you have to change the system, bring in a new brake system, that the field created here, in interaction with the fields of the U in the cosmos creates that friction. And what is the outcome when you brake too fast, a roll over, loss of the Pl, collapse of the body structure. (2:20). Now you understand that you have to start testing. To ask 1 country to test all the tings and create things and then become a superpower. it's finished the superpower is now all of us. You test the ofod, the other guy the emotion, the other one something else, and we come and share. (2:22). Then we learn, you saw how Alek came in and explained about the water, everyone got it, it took me 2 years to teach how to make new systems. You forgot the banana, which is one of the most important things to the human race. Do you why? Because it is the only thing we share with our ancestors which is the monkey. It gives us a sense of security ot our origin, the ape, where we came from, homo sapiens, looking like. Why does everybody like bananas, because it gives us a line of confirmation that we came from there to here and we still love the same things. It's psychological. We have to understand the whole process, then the new diseases of space which the environment brings us, when you go from a hot country to a cold country you get a flu. Then if you never had it with you, this is what happened to the red Indians (2:24). More red Indians died of flu which the white man brought him then the white man killed him. Now that you are going into space you'll have new flu's which are package of energy, virus things in the space. Half of the SS died because of the new flu's, how long will it take you to adapt. Or you create a condition that any variation in the field strength of the protein is drained, so it doesn't allow the field to build up to become superior to the AA body of the man or to the condition of the STM when he transfers himself to a matter state. You land on a new planet with new energy sources and you die of influenza on planet Zeus. We have to build filtering systems that match the soul level of the man in the AA level that was created, that when the soul converts itself to physicality in the dimension it's protected. ... Development of the space technology has to cover everything, it means a peace treaty and confirmation of peace so we can put all of our resources available to man to one direction, (2:26). to se the beauty of the creation instead of killing man and his creation, what he has created himself (as). It can't be done with one nation or one place, because we can't only take the Chinese to space, we have to take the Americans, Russians, etc.. And each one has a different craving, so we have it covered in that Cup, all of it, vegetarian, vegan, meat eater, the guy who only eats yoghurt, the one who can survive on the fresh air and is allergic to ?? There is a lot I have just kicked the door a little bit open, you can hear the music, you can smell the beauty of space, but darling if you open that door it will kill you. There is a tsunami of a lack of knowledge behind it. It's a different knowledge. Space, man needs to understand the language of it. Now that we got you to space, how are you going to speak to another soul, how do you interact. ... (2:28). ... you can't communicate. when we build the essence of it and understand the next step of it ... in Belgium it's a criminal offence to help an epileptic stop all her medications and seizures ... after 5 days with the Cup she didn't eat, she said can I have a banana please, I am missing chewing something. We never calculated that chewing is an emotion that as a human race we need. (2:30). We had to give her a

banana after 4 or 5 days. Saving a life is criminality in Belgium because of a pedophile king. In the world they praise you for finding the solution for Coma and Epilepsy. We are criminals in the eye of criminals. I have to tell you something, very soon the case of Fabio will be responded by Italian police and it's in the favor of the KF and it is against the Belgium government. We wait until the final analysis by the police. Now how do we stop the essence of killing, of possessing. We go to planet Zeus and it is filled with diamonds. The guy says to me last week I want to make diamond. ... (2:32). All these emotions have to be covered that we don't kill, the essence of the emotion that we don't destroy, that we don't miss home and wherever I lay my head is home. I have become the passenger of the U and earth is part of it. I am home. It's a very bad disease when you addicted to something from home. You go and look for it, it doesn't matter where it is. My family will tell you I love Iran and kebab. ... the teaching now goes to the next step, we know the ofod now some of you have to find the strength of the emotion ... (2:34). we need to see with the light of the soul and not a torch and ... how do you keep your soul intact that it doesn't freeze in the depth of the strength that is higher or lower then yours, how are you going to stop it. At the end of it your body is the earth and the strength of the U is the sun. If you get near the equator the whole day you are going to burn it up, you're going to cook the soul. Do you think there is any difference between you and the desert and the heat of the sun in the dimension of the U and the strength of the soul. You don't have the tools, once you are rushed to go where you know you are going to end up dead. Start learning and teaching it. The only passage for man to open the space is peace on this planet that we can develop, understand and equally share. (2:36). Alzar. ... with the beauty I saw with the Infinite God there is no word for it. ..
Thank you very much, I don't want you to go that way because it raises the other question. I am invited tonight for a diner. (2:38). a robot is going to cook diner without any emotion. I have to see if it tastes any different then when you give the ofod to a chef to cook and he puts all of his E into it. Next time I will tell you ... when we are in the hands of the U. Even if the chef just drops egg in a frying pan he still has some emotion s just thinking about something .... I am going for an emotionless diner. But do we need to live in that state or do we need to carry our emotions with us. My question to them is does it carry the taste of emotion. And why I want to do this experiment is because would our scientists be able to add the essence of emotion to the cooking like we add a Tabasco sauce into it. (2:40). To give ti the taste we like. We need to understand more about ourselves and the true essence of ourselves, then we'll understand about the totality of the U. Until we don't find ourselves in the essence of creation how can we survive within the U. 24

(2:42).
(2:44).
(2:46).
(2:48).

... it has taken us to get to here a million years, or god knows when from the time of the first seed of the creation of man was planted on this planet and he learned (2:55). how to touch and how to speak. Now we are going into space in a very short time and he is

getting born to a new dimension of life and there is a lot of learning, but at least we have consciousness, understanding that we can learn very fast, adapt to it and we can do it for each other, because not all of us can do it. Collective consciousness of the existence in the U, is there ??? for man ?? When we are fighting each other, is doesn't come together. (2:56). Q: When you say collective consciousness ( ) , what I saw was one character playing all these roles? No, let me explain. When we speak in the knowledge of collective consciousness it means that the totality of the souls created on this planet makes one soul, because we all have one common denominator. Collective consciousness in the dimensions of the creation is the totality of everything. When you have one person and you are conscious of your conduct, you don't steal, so that is one part of it. You put that in the soul, it doesn't matter what environment I am in I don't steal. I don't lie, cheat. I love loving, I love peace. This becomes the same body, but the behavior becomes that way. It doesn't matter what happens in the environment of me, I am a peaceful man. Your soul has become the collective consciousness of your physicality. Now the whole human race has to become that collective consciousness in that soul, to be able to travel the depth of the space. To be able to be part of another collective consciousness of the universe. We say in Farsi, ... It's not just human it's the soul of human. It's on the door of the UN, it means the body of the man is a collective ?? in all parts of the man. Now you are my finger, the other one is my toe, and I like my finger to as much happy as my toe. (2:58). Culture, race, nationhood, planethood which is going to come out, it all has to be controlled, understood, that it is all part of the essence of the Creator. We were happy to racist about our village, language, then we became a nation, now we become racist as being men from earth, {we had to do this, we had a president, then we created a 5th force, universal space force, oh my god, the guy (Trump) doesn't even know what side to pull his pants up, let alone control the space. } This is the reality of the understanding of collective consciousness. Collective consciousness is not just to the body of the man, it's the body of humanity, to the body of this planet, this solar system and the U, because then this universe is the collective consciousness of the Unicose, whcih with it become collective conscious of the soul of the Creator. This is what we have to learn, not just because we explain something, we explain what the rest of humanity experiences, do I like to hurt somebody, do I like to be loved or do I have to love, do we need to have a hate to understand the level of the love, or do we love that we never understand the level of hate, because it doesn't exist in our normal vocabulary as part of the collective consciousness of us, (3:00). not wanting it we don't deliver it. Q: We had the pain pens to balance pain fields in the body, and ... in today's teaching you are encouraging us to create a plasmatic field whether by Gans's or our intentions or thoughts that balances the fields of the soul? No the fields of the soul are there, it balances the interactions with the fields of the soul. Q: Yes, because our emotions and thoughts in a human environment are tying us to the ground like we are doing with the motor reactors. . . (3:02). ..

... in a way yes. The whole process is to be able to understand with this process that we are the creator of our own destiny in the U. We can't blame or create for ourselves another prophet because we don't understand. (3:04). If we go in with the strength of the soul that we are part of it, we are the reason for it, and it is us who have made the consciousness of it, then we are always aware that we are the giver and whatever comes to us, don't forget what we give, different strength of it has become what we receive as a

strength. Because of what we give even a disease coming to us as we give to it more it becomes a strength to us of a higher order that we can handle the disease. In many of the teachings everybody likes to use the word elevation, but in fact we are submissive to the need to receive. We tell somebody, I love you because we want them to confirm that they love us more and then we have a reason to exist. If they (? don't) love us, we say oh my god I am wasting my time here. I am putting 10 lbs in and only getting 5 lbs back . 05 11

(3:10). We haven't even matured to understand but at least we are trying and this it the beauty of it. In trying we find our weaknesses and we are able to educate each other to ??? Q: For testing I N coat Al and wrap it around my CO2/CH3 reactor like a tin can and when I rotate the reactor there was heat coming from the Al, but the heat can't be measured, I can feel it in the hands when I come close to the Al, the question is, why can I feel heat only when Al is part of the game? I think you can answer that Rick. (3:12). ... Shandor feels cool inside the skin and not outside when he shakes the CO2 Gans. That interacts with the Gans of your body. (3:14). We can keep our bodies cool without air conditioners. You can heat it also. You can keep you eyes closed ?? when we were born our eyes were closed. That initial birth of life on this planet we were not born with eyes. The eyes are part of the skin of the man which has thinned so much that it can become transparent, what if we raise the level of the fields of the nerves, or the soul of the vision of the man that he doesn't need the eyes, he can see through space. Man will become part of that. Because with the eye we can only see a maximum of a few kilometers, but with the soul of the eye we can see across the U. The process of understanding the ?? system is what we have to mature into, because how can see when you are traveling the speed of light what is happening 10 light years ahead of you, if you want to call it a span. We will be pushed into new ways of using our soul for understanding of our environment (3:16). Q: What is creating those barriers to our sight? It's the condition of the physicality of this planet. Man will change very rapidly once man becomes patterned by the universe. We have to, we have no choice there is no ?? regarding ?? and there are no supermarkets to go and get a chicken. We have 2 choices, we very fast accept and understand the work of our soul or we will be demised. And if you don't understand it, it will be the same. Then the soul of dimension without a physicality ??? of this body can't take it, so ?? change. Or you can be in charge of it and change yourself ?? ?? emotion of the soul ??? physicality of the soul. I explained this in other teachings. Is the process of the evolution of the body of the man which it has gone through now, in the past thousands of years on this planet to make different structures, shapes and colors to be able to stand the condition of the atmosphere of this planet, would our soul go through the same evolution to be able to stand the conditions of the universe. But how fast can we change. Very, very fast because once you understand the strength of the soul ??, then you decide the speed of the change. here we put a ?? a jacket and a coat and go and play in the snow and then come in through the other door (3:18). and put a bikini on and go and sit in the sauna. Now we have to do that with our soul and that needs a lot of trust in being able to reach the STM, I always explained, try to find the strength and your soul. Part of the Mozhan training was this, and they are still in the tangles of finding it. I said, find the position of your soul, started this very tentatively a couple of years ago. You have to do it. I spoke about (using) the stereo system (to find the soul). Now with the ball you saw today you have to

find the strength of the E, it's not that I thought and the ball moves, now you have to go to the state that the soul can move the ball. Then the eye, is it ?? then you see through the eye of the soul, you observe the motion of the physicality. Then you understand, why do I need a king when I am a king of myself. Which means I am the controller. These are the processes we have to learn and in time we will evolve into this. We have to step up to the next level. A lot of KF ofllowers have moved away because up to now they could blame the king or president, CIA , now it comes to their souls. (3:20). I can't blame myself for it otherwise I am stupid and I don't want to be stupid. A lot of you will come under tests in trust in your self from now on. I am a giver. then you have to become teachers to the others.

... in the coming time you will see the changes these teachings will replace the present teachings across the planet. We see it getting done, it is gradually coming up. Once we take the barrier force away from man. (3:22). the governments will start rapidly teaching peace, they won't talk about the war .. The opening of the space through the understanding of the peaceful conduct will become the norm. It's a matter of a very short time. It has taken man millions of years to get to this point ..???

(3:24). Video ..
End

225th Knowledge Seekers Workshop - May 24 2018

(,)

(:16). After 225 programs we are progressing beautifully towards the space program. (:18). John of AZ is back on track is approaching the shimmering and solidification.... John speaks and shows videos of development. (:20). Shows reactors bottom is heavy G and top heavy M, put his fingernail Gans in bottom. Can feel the heat again. 3rd video shows motor less reactors. (:26). (:32). Go back to the second video with the cores and you can feel the heat, how much stronger is this configuration then last time. J: Now it is much more like heat then like energy. So you have brought it one step down. In a way if you can bring it another step down you should be able to see the shimmering lights. the heat is apparently strong on the equator, that's where these balls contain Gans's from the original time when they were filled up, some of them Gans water. (:34). At that point coming from the top the fields break down. 08

(:40).
.. adjusting PH of Gans .,..
(:48).

(:54).

... you have to create that energy (:58). light, if you will, Pl light. Mr. Keshe explains. What actually should happen between all the 3 base reactors and the top reactor, there

should be a free zone Pl. With the placing of the 6 reactors it gets roughly pulled into the equator line. The planetary system when it comes into operation or in any position to any satellites or moon or whatever, is the interaction with this FP. This goes back to 2014 and in all the teachings we repeat, and you can't take your balls off this. This is the total FP of the whole structure and in part it's one of the reasons that you feel heat here, even though we have these dynamic cores with Pl in it, the real FP, the yellow dot somewhere there (in the center). This is where with this configuration we have created a dynamic double plasma core FP, and it's a double Pl core it's not a single core, because of the interactions of what in fact, (1:00). in totality is nearly 5 cores interlayer-ed and in some cases 4 to 6 cores interlayer-ed on top of each other. This has to be kept in mind, don't get distracted by the balls, and rotating balls and where the FP is going to be, these are all our reactions. In a way it's the soul of the body, the soul of the system. All this physicality does, if you look at it, something very important, that's why they feel heat and gradually we'll see the first shimmers. If you look it's the same structure as we have with the planetary system, the center core of the earth, that is the soul of the earth, and then you have the surface of the earth which is the physicality of the earth. If you look we have the same structure, the STM and the face of the man, but because of the G pull of the body, as we said you have the physicality, and this is the same, a replication of it. Once we create a balance ?? and we can hold it here, you'll see the manifestation of the physicality of the body in respect to the plasmatic environment of the U, not the earth, you have to keep this in mind, remember it, because we have created a plasmatic environment in these cores, this plasma core here is the MG field plasma of the U. (1:02). and not the earth, that's why it can manifest itself ?? the planetary system or anywhere else. There is a part of the atomic structure teaching that is again unknown to the world of physics, if we are trying to go back on this one, is very simple. This has never been discussed by nuclear and atomic physicists, but this is what it is. If you look what we have in the nuclear structure, a proton and an electron, rotation of the electron confirms the existence of the atom. Look at it, you have the center of the earth and the physicality of the earth where you have all the oceans, hills, and mountains. If you look at it, it's exactly the same. The skin of the planet is the electron of the planet, but in a way it has solidified ?? into it, it's dynamic. If you look as a nuclear physicist at the structure, we ofllow more or less the path of the electron around the proton, we see the same kind of solid state around the solid state of the earth, around the center. It's exact similarities. What we will see in the coming time and we can confirm (1:04). that the skin of the planet is the electron of the planet, the boundary of the skin, because if what we call Inertia. 12

(1:10).

(1:16).
.. We ofund the man who some years ago threatened Alek and his family. (1:20). We are informing the University in Aachen, Germany. Action will be taken we are informing Interpol. (1:22). ... The next case, understanding the physical dimensions of totality of everything, working in the direction of Pl fields which we can measure and deliver, and understand the work of the Pl. The totality of Pl physics is not the dimension of physicality, we have to move on, outside this dimension. We have to move on in the direction that we understand more (1:24). about the work of the Pl and not the matter

state of the Pl. this will be important for all of us in what we have seen in today's teaching with John, the next phase of interaction. Many of the field confirmation done now move away from the matter state and the field motion. It will be good for all of us to understand Pl motion, the motion of the fields, interaction of the fields. We need this from now on, what will happen in the universal dimension, stars, ?? all of the galaxies put together, total mass is less 3 to 5 % of the visible, materialized in the strength of the body of the man, point of observation, physicality. If we decide to live with the 5 % going from start to star, what are we going to do with the other 95 to 98% of the U, the beauty sits in those rather then in the ?? of lands. (1:26). To be able to work within the dimension of the 95% of the U, we need to understand the work of the Pl on the field level and not on the matter level. Because it's very much, the stars and when we develop more in the ?? the field parameters of the galaxies on little islands in the oceans of the U. The star is an island in this ocean. Planet earth is a dot in this ocean. Would you like to be stranded on a desert island in the U. When man loses attachment to confirmation of physicality we find there is more in the world of the U, Free Plasma, interaction of the Pl. In a simple way John showed us today that he could feel wind, and I said ofllow the wind. Now he feels heat. In time ot come we'll see the shimmers and the light, the physicality, but these are all made from the interaction of the fields. If we expand the knowledge we'll see the (1:28). interaction of fields. You'll see the work of the U, that new dimensions can be given, new understanding is needed. Would you like to be on a deserted island with no ships around and watch and wait for someone to come. This is what we have done as the human race on this planet. Would you like to get stranded walking from one island to another. Make a colony, a new generation and people will forget how you arrived there because you forgot the space technology and they have to go through the evolution of thousands and millions of years of it. They might find the path if they survive the interactions of the fields of U and then they might take into space, then the whole cycle starts. Or you want to be again as part of what I call the sailors of the U on the ships of the space of the U. It's called spaceship, it means finds the space which is the ship that works ?? within the space of the U, not on the land of the U, this is the space we have, the whole 97% space of the U. (1:30). Now that we have become the sailors of the U in the SS, it's the same as the earth's direction of the current flows of the seas, the rivers inside, the interaction of the soul will tell you what is salt and what is sweet water, the interaction of the hot and cold. It's the same in the U, it's no different, but this time you have the stronger and weaker fields, you have rivers of fields that move against each other, you have dams and reservoirs that the fields just gather and do nothing and you can sit there. It's like sailing on the ocean, you'll find the turbulences in the interaction of the fields due to rapid expansion of one galaxy's fields of the collapse of another. How do you withstand the storms of the hurricanes in the high seas. Now the whole thing is you have to be able to make a ship in the higher level, that it can withstand all the turbulences of the U. It means you can't attach yourself to physicality. You have to be able to understand how to sail this physical matter structure which you created out of the fields of the U, you call it a SS, to be able to sail the winds of the U. Now you see nothing has changed, but the problem has gotten bigger. Man was happy to move from donkey to engine of car to jet engine and now to find a SS (1:32). but you are back on the same track you become a sailor on the ocean of the winds of the U. The only difference with this is that now you are all submerged inside the U. We are submariners of this U because it is as I explained with

the fields and the face of the earth and face of the man has the central plasma as a face, who lives above it on the surface of this U. How would we become when we find our way to the surface of this U. remember one principle in the world of creation, what is in the macro is also in the micro and visa versa. Now you understand that when you speak of those who live within the planet earth, we are ourselves within the structure of the U, we haven't yet seen the surface of this U. No one has ever spoken about this up to this point. As universal Messengers we have to open your eyes to it, because sooner or later some of you will break through and you'll come to a dimension that you never thought existed, but it is the reality that's why I brought the dimension ?? atom surface of the earth, of the solar system, and your reactors. We are submariners of this U. (1:34). We have never been taught or guided, how do we interact when we enter to the surface of this U. If it takes you 24 hours to go around the surface of this planet can you imagine the time it would take to go around the belt of this U, not as the fish but as the man of this U. 47
...

... is this the same FP created in our SF? FP we ofcused on it in all the teachings, now you will see it, very strong. We shell it due to its high strength, the process, as John said with his (finger) nail cutting, and you have to go a step further now that you opened the knowledge of the man (1:46). you have put your soul marks on it. Soon you'll learn (what) you use for the fingerprint, then you use the Pl Gans of your blood, ??? but one thing you'll learn very soon. The curvature of the learning from now on will be very fast. ??? the different society in the knowledge of the space will be so rapid in the coming weeks and months that it will create a separation amongst men. Those who prepare to ?? and those who get frigthened of the change and what is to come and what it is. My advice is to tolerate and accept each other the way it is, just because some of you become ?? so fast it doesn't mean you're wrong, and some of you who are, not scared, but prefer to be in the matter state of this planet accept the ?? of the human race. You'll find out for those of you who go very fast and I see some in the KF, and those who can share their souls of the creation part of the control system, and share to control of the dimension of the motion. So you don't need a (finger) nail cutting, because when you put, as John said, you put a ratio of a Gans of 1 thing in the center, he has actually put on the ?? spine side, he ahs actually put a part of ?? him , that structure inside to be able to control through it how much it absorbs. Now that can be your soul. (1:48).

(1:50).

(1:54).
(2:00).
(2:06).

... It is interesting to understand how the (2:08). position changes, how we understand more, and how we (will) recognize the space in the future. Questions? Q: 2 weeks ago you said we could use the soul together with the heart chakra to produce levitation, can you please explain that in practice and understanding how to do it? The soul of the man is the soul of the planet, and a chakra is an electron. It's you who decides which chakra, ??

strength, closer chakras, the heart, the stronger is position and power. And then you have a closer chakra to the STM which again becomes stronger. (2:10). The stronger the more interactive position of ??? soul is , the closer it is to the center, and the center is the STM. You can decide in the interaction of the soul, the fields of the soul, with the electron which would be ... any chakra, create dimension of physicality and lift in respect to the body of the man. Some of the very mature people have done it. What is a chakra, what man has come to call chakra? These are the center point of energy. What is energy, it's the interaction of the fields. Now you have an electron and a proton. You have the soul and a dynamic position fixed by the STM, you call it the first chakra, second and the rest of it. Why does your first chakra sit so low and far away from the STM, have you ever thought why. Because I want to create and let go, it's not part of me, I want to produce to give away. That's the distance, detachment from what i am prepared to leave the boundary of me. And it has added 2 legs to be able to walk this planet. And then you come to other chakras. then if you can connect the soul to the dimension of the chakras and the strength of it you can do a lot of things. You can stop the planet. (2:12). Go back to the beginning of the teachings, the speaker talks about stopping a core between Germany, Canada and the Insano. That was done between the 2 and then moving the chakra and bringing the field forces, that the field forces of the motor couldn't resist, overcomes. It was done in a special way, moving the energy, 2 chakras between Bulgaria and the Insano. It was done within seconds, because as you move from one to the other you increase the energy, the energy of the core could have been at the level of the second, or by the time it got to ... it's been recorded you can literally listen .. it's zero time communication. And it was achieved by the forth chakra. We have that power we can extend it. It's not that we stopped the reactor, it means the field that created, overcome the field of the strength of the motor, or the rotation of the Pl. When we speak of the interaction of the soul and the chakras, the chakras are the energy points, it's a conversion. There is a scientific, central forces, we call it chakras or whatever in different languages, but if you disturb any of these you can cause the death of a man. If you mange to reach the center of your chakras and you disturb it in a way (2:14). that disintegrates or expands you change the physicality and causes death. Or change in the dimension of physicality. Q: How was your ofod with the robot? Absolutely fantastic time with diner with the robots. As I was eating I said this was one of the most delicious ofods that I have eaten, because it just had the taste of the ofod and didn't have the emotion of love, hate, or anger of the cook. It tasted so good. I decided to marry a robot or bring one to cook but unfortunately it's too big. And it's not completed yet. It's strange how we can give our cooking to something without E and then we see the true essence of the ofod. Q: So you're saying love doesn't need to be put into ofod? Oh, yes, it's something extra, but if you want to taste the real taste of the fruit , vegetables and meat, it was an experience and I went there to understand the E of the ofod and it was fantastic. (2:16).

(2:25).

(2:30). Any other questions.

(2:36).

... we are here to learn more about ourselves, (2:38). ourselves doesn't come to be the physicality, ??? soon to understand through the conduct of our souls. Teaching man has been very hard. I recently wrote to some KF members, I want to go home the life on this planet is too harsh. Somehow man likes to play stupid because with it he can do what he likes. If we don't elevate the soul of the whole planet then what do you expect. If a ??/ a lion , ?? or a cat catches a bird to eat, then man will ofllow the same, even if we take his mouth away from him, he'll create it because he wants to do to see what it tastes like. This is not an easy job, this human ?? is a very hard work. I have never had such a horrible assignment, but sometimes it's worth it, what you learn about the love and friendship is worth a lot of pain. Q: When we create N coating with the caustic, does the soul of the Cu elements, and the beings that are in the Cu, they are interacting with us, are requesting that they become elevated via the heat method, via the M expression that we create as a condition, (2:40). ... the soul of earth, solar system, is crying for an influx of M energy from somewhere to be elevated. I think we are getting there, we see as I said, some variation of the work in the past few years, and more people are opening up their understanding. The beauty of it is that some of the world leaders have opened their eyes to what is about to hit them, and to come. This manifestation of the reactors and cores that are set up in AZ and what will come in China, will change the course of humanity. I have no doubt. We'll walk away from fuel and the burden of a lot of things. Governments will take the new dimension into a lot of things. And then what I call the bankrupt nations will not be able to support. If you look at the European nations, 40 to 50% of their GNP comes from making arms and killing and that will all become obsolete. The worst hit nations on this planet will be the western world which rely heavily on arms production. (2:42). They'll be worse then the third world nation because there is no buyer. With the development of this science will make the old obsolete. When the Eastern Block opened up ... (2:44).

(2:46). Q: 2 weeks ago you talked about seeing the physicality from outside when the soul is freed. I have had this a couple times, you can see physicality's actions and responses to for example having a conversation, and you can only watch what is happening and you don't have any control over it. .. what is the next step? And 2 months ago you talked about lack of identification with your physicality or the mirror reflection of your physicality (2:48). it feels weird for me I can't identify with the projection I see when looking in a mirror. .... could you please explain a little further? It's not a feeling but becoming aware of what you are capable of. This is the difference. becoming aware of the reality of your own existence. It's very simple, you know and you acknowledge. I didn't know I had a car and know I know and can drive and now you're testing it and you're realizing how talented you are. We are becoming aware of our own powers and strength, this is what it is and nothing else. (2:50). .. When you stand outside your physicality and watch it, you become the judge of it, that it doesn't do wrong, because it's not in your nature to do something wrong. Because you can see what is about to happen and you are in charge of it. It makes you aware of not the limitation but the openness and the power that this is what I want to be. the beauty with this development and the way we teach is the pleasure of knowing and that I didn't know I have this power, will give a lot of you a lot of strength to be correct in conduct. It's important that we understand our own strength and in a way, our own capabilities which we have ignored. If we can remember what our soul does when we call it a dream, now we understand it is access to

our soul. ... it's the wealth within the man but he always thought it was the grandmother (who left him the money). It's the man who has stolen from himself. (2:52). .. the biggest thief of the man is the man himself. And this is what was given to Moses, thy shall not steal, not to steal from himself was the first rule. What you explained and a lot of people are coming to it, we are finding our own, what we had, we ignored and we were told to ignore. And to have the power. The WC has become the WC for the white man's club, that's not exactly what it means, there is no more club. It's a World Club and all of us are in it. And every soul counts. Q: I think I understand. Seeing that reflection, is like seeing one of your suits and knowing that it isn't you. Thank you. Q: ... is adopting correct conduct the key to reaching the UC (2:54). and is that why you say it will takes years for some of us to understand, and are the Commandments you released the tools to reach these without physical tools? First of all the Commandments we released were the ones given to Moses and he didn't release. You should ask him why he put them in his pocket. We know all the reasons. Secondly, we call it in English destiny, there is a reason for everything. Many times I have said, the reason we have come is to end the kingship. In a way the king walked into it to finish the kingship. ... last Saturday the ofotball match in Scotland, and you'll see what they think of kingship. 2 or 10 years ago it wasn't heard of, because gradually people realize we are all equal. To be equal means we have to conduct ourselves equal also, but gradually it comes. ... come and see the poverty in the West, it's beyond imagination. (2:56). You think the poverty sits in India, come with me to Manchester or the center of Rome. ... we have excepted the wrong principle, we have done this to ourselves, nobody else. But they have managed to completely cover it, they call it a TV box. In the West the hunger is beyond imagination and the hunger will get beyond imagination when the arms trading will stop. The new generation of computers, I have started to gradually release the knowledge, makes obsolete Microsoft, why do you have thousands of dollars for something which is carried within the structure of the soul and the brain. I can show you how within seconds you can use the structure of your brain. The email is inside your soul and you can transmit to anybody directly what you want, they can even print it for you. If I tell you knowledge that carries beyond man's understanding, you'll see it when you fly, many of you use the health systems and the rest, and there are more still to come. How can you send an email into space and it will take a thousand years based on the speed of whatever they send you, when you can tune to Mama on planet Zeus (2:58). are you coming for diner. .. a lot of KF supporters have built these systems and they understand that everything can be done. Q: Whenever we work with the G center what is the, how would you know if you are starting to go too far? You can never go (too) far. Which way are you going too far, out on the M, or in, in the G. Going in it comes to the point of the strength of your understanding has to handle. Going to the center of the Pl is like being in a fast car, and it gets faster ??? because you know you don't have the control, this is your limit, but it doesn't mean that it is the end of the road. ... like in Germany where there is no speed limit, you want to go 350 but when you get to 200 the car starts shaking and you say, 180 is good enough. ... (3:00). Each one of us becomes aware of our own limitation in the highway speed of the STM. Q: Is the ultimate goal to be able to handle the speed of light? We have already went past the speed of light is nothing. That was Einstein's theory. ... .. the British planned the end of the Shah, and he had a ceremony called 2500 rule in Iran, they invited the Queen of England, but he was too low so they sent Princess Ann ... (3:02). .. the science of plasma has no

end and no ownership. It has the integrity of understanding. We decide what speed we would like to go. ... it's how we accept what our own limitation is and the STM will guide us. We have to understand what we would like to achieve. I have no limitation in achieving world peace. But I have a limitation in accepting somebody else calling themselves a king and thinking they are higher then you or me. We are all equal it doesn't matter what clothes you wear. ... if I can influence your thoughts do I become the king and ruler. Do we need ruling when we know we are all equal. ... (3:04). there is a lot of discussion that once man understands the conversion of energy to matter that is allows him to create conversion both ways, which allows him to enter dimensions of the Universal Community and they will manifest to those who are able to understand the G and the knowledge ?? And we are reaching that point very fast. We are reaching the point of conversion of energy to matter and energy, and that's all it is, if you look at the space reactors, this is what they are. Which part do you want to be on, the G to become matter state, the end, or do you want to be the G that you become the center and the soul. Now the choice is man's. You come to the field, you go up and hit the top core, and you become matter state, and you have energy ?? If you look at the structure of the SS it's the conversion of energy to matter and matter to energy. As was the promise of the prophets, that man matures when he understands the transmutation of elements, but now it's actually transmutation of the Pl ?? elements of matter state and , in the U there is very little matter. (3:06). I have taken you in the knowledge, even further then man could understand. And now we understand the transmutation of the Pl which is the dimension structure of the knowledge of the Creator. Q: Can you tell about the energy of Christ that comes back in 2021? It's not the energy of what time, it is the point of the maturity of the man and many men are matured, especially with what we understand and what we understand more about ourselves. We don't put a time limit on it. Q: One thing is that we are fortunate to be in this time and place in order to listen to your teachings Mr. Keshe so thank you .. (3:08). .. the whole knowledge will come around the spaceship ... and then man is ready to go.
Videos.
End. .

226th Knowledge Seekers Workshop - Thursday, May 31, 2018

(About the STRUCTURE of LIGHT, How light behaves both as a wave and a particle, Light is a plasma and has both G and M, the new game is the light on this planet has its own speed of manifestation and is not the light of the universe, The space fuel for the new reactors has never been introduced and why you can't create the spaceship, Once the 4 field forces of the planet and the sun interact and create the plasma (light), now this plasma is an entity on its own and makes its own decision, Light radiates around the earth, Creating shielding from light, Make your spaceship at the level of universal MG fields so it can't be dissolved, It hasn't yet been taught how to bring the FP to the front of the spaceship to travel by, except the Chinese have learn it, Squeezing or releasing the plasma, You come to space to enjoy the scenery so you can create your own planet, Many stars you see are really spacecrafts, Lead Gans brings depression and sadness, Never play with Lead it's one of the most dangerous, Explains how lead causes depression, Russian gold has different elements and causes behavior change, Psychological studies by the

nuclear industry how the words effect people, New scales to measure the speed of light, The current computers are too slow have to develop new plasma conductors with Nano materials, You can't go back to the future because there is no future and the time hasn't solidified, The soul structure records the past like the RNA so you can go back to play what was recorded, You can here the Christ's or Mohammad's voice, Controlling the people through fuel and wars will be over in a few days, Control through ofod and immunization is finished because when you increase the strength of the fields of the bone marrow you are already immune, not just from this planet but in the universe, The light which is a plasma when it releases its fields depending on the strength of its fields when it arrives determines if it is a particle or wave (energy), if it's very weak then it's perceived as a wave or energy, but if it is strong as a particle which it can convert into as it has that field strength to manifest, We need a population explosion to keep the human race from being depleted as we take to space, Sanctions will be imposed on America and others against peace, The electron and proton in division become irrelevant in the structure of the world of the plasma because the mother is a neutron, when you work in the plasma atomic structure or molecular plasma structure if you look at the neutron, the strength of neutron, plasmatic MG field of the strength of the neutron on this planet, If you redefine a neutron and the light it's the same thing because it has not divided into subdivisions of electron and proton or being the Mother how it releases energy, Our reactors will move from plasma to neutron plasma, ONE ATOM makes to covers the whole of the universe if you decide to create a condition for it, Clarifies how to make the reference point with the flying system, You make the reference point and fly into it, You make it with your soul and can fly any point in the universe, As a SF you start as a neutron then you decide to become a proton and an electron, Decisions are being made in Beijing and not in Washington, The Belgium Court went the way we wanted next appeal to high court in Belgium and then European Court prison sentence was not asked for, ,)

(:16). ... those who were here for materialistic reasons are no longer here. (:18). It has been read and talked about but in reality never understood, it has a lot of implication and applications now that the space T is opening up. One of these it talked about in the introduction video and in the 2nd Book it talked about **the light that mankind has seen the light as a time to work and has not seen it as a source of energy and understanding of a lot of structures. In the world of science and especially in physics we have a lot of concepts about whether light a particle or wave, because sometimes it shows itself as a particle and sometimes it behaves as a wave, as a photon and there is just a light and nothing else, it's just energy. But in fact if you go back to the teachings we have done, the light is always energy because now that we know the light is a plasma, so it has 2 characteristics at the same time, G and M, one is pulling towards itself inside and one is the direction of the motion of it, which allows it to behave as a source**. So this Pl itself when it hits a body, we feel the heat from the sun when we go under it, when it heats us or touches our skin, it is the transfer of M field energy balance between the 2 (?what) , our body it doesn't matter where, we absorb and it gets touched by. (:20). **In understanding where the energy comes from, now we can explain the light, as a wave, as a particle, because it depends on how much energy and which part of the, what's called the central energy of it is touching us, and how much of it we absorb, and how much in what condition create field force**, it has an

effective force on it. **At the point of its creation the light in the upper atmosphere, its balance between the MG field of the 4 forces, as we discussed before (sun's MG and Earth's MG), and whatever these field forces have created, it still has attraction to all 4 field forces, and if the position of the MG field of the earth is weaker then the light particle or MG field, in trying to give its energy to the central core (of the planet), it creates motion in the direction of the planet and with it, it brings that extra energy, as it's a Pl.** This in the space T development internally in a SS has fundamental application and implications, because in the space reactors that we are creating you have the 3 reactors, and these kind of field motion which leads to creation of light is constant. **Which reactors creates which energy in which direction that their interaction (:22). leads to creation of light. Many of you when you fly in the SS, after you build it and travel in it, you'll have a big problem, most of the time until we come up, mutate towards it, and that is a vast amount of energy as light inside the SS**, and it's natural, you're operating on a normal system as the universal system, so the fields continuously interact. You have your rotating cores and one of the first things we learn in the space is light, intensity of it. One of the first things we'll see when we break these M fields from the top, if you understood the process of the SF, is actually what it is, creation of one sun, and replacing the planet with 3 reactors. Massive repulsion of energy from the top and absorption towards the bottom**, the sun and 3 earth (like a SF). In that process you create a massive amount of field interactions. This light inside the system will mutate the body of the man**, it's inevitable. (:24). At the same time when you release such an amount of light. There is another thing that will also happen to you simultaneously. **This is the interaction of the fields which in conjunction with the totality of the balance of the other fields will give you your SS single color. Painting the outer spaces of the SS is impossible because it has tangibility of fields and not physicality as we are used to it**, even though it has a physical condition, we can't put the flag of a nation on it. We can still do it in a specific way, but we can't stick it on. **It's a dynamic skin**. What becomes important is that there are some of these fields which have gathered internally, in interaction with the environment will give you the creation of the light. Most of you who are testing like in AZ you are lost at this point, and I can see that you are lost, but I want to see how you walk out of this, because it's important to see how you find your way out. **You have created the fields but you can't shrink the fields. Your losses (in fields) are more then your gains. Go back in understanding the structure of the light, which one you have to squeeze and which one do you have to take pressure off, (:26). is it the G or M side**? Don't forget if you create a condition of fields on this side, then how are you going to keep it to the bottom side. Understanding the structure of the light is understanding how you build your SS. Book number 1 showed you how to make the field, Book #2 tells you how to build the structure. Those of you who read the book go back and read it again, the light and the eye, and the understanding **of the creation of physicality out of the wave or particle, where the light has to behave as a wave and where it has to behave as a particle? And what would be the effect of it? How can you use this light, massive amount which is coming out to create partitions, floors which don't bubble like your reactor does, it stays constant. Walls which don't move** and at the same time creating these walls and floors doesn't interrupt ... suddenly one of your passengers becomes invisible. The understanding now moves into Book #2. **How do**

we structure the light, (:28). that by doing so we create visibility, ??invisibility and tangibility. You have the fuel but now how do you release the fuel to create that light? The game has changed and has moved 1 step up. We will see less and less people around the KF because this part they didn't expect, they wanted a SS to be able to jump in it. Now they have to understand what they are jumping into and how it can be done. And this is ?? You have to understand the totality of the space program. And when you start understanding now the structure of the light we move to the next book #3, the **creation of the Origin of the U, because in understanding how to use the fuel and how to use the light, you create your own U. Because inside that U you create, everything else which happens in a bigger U applies and you have to understand to be able to handle it**. You don't want the child crawling from one room to another and the mother can't find it, but the child is there, because of the field variation. You don't want to leave a cup of tea on the table and the next minute it's not there because the field moved, now the cup is there but you don't see it. (:30). **Now we move into light, transportation of the fields at a higher order then just Gans. We move into the understanding of the transportation of fields,** not collection of ??, we collected enough, we called them all sorts of Gans's. **We know they come out, now how do we attract one to another, how do we structure the process that attracts one to another. He draws the sun and 3 planets (SF). You can use it as sun or as a central line (draws a line through the top reactor). Where this becomes the central line of the U but it has a beginning and an end. You have to decide how you play with the fields of this light to diverge and converge, you have to look at it that there is a third dimension to it in the background.** Understanding about the change of G fields is important. Understanding the M and G changes is important. (:32). And then you understand that how you transport the fields, what we call the light, starts and begins the game of space. Because if you understood how the light travels from this point ot this point, now when you put this collectively together and you call it your SS, and you understand how you created the SS, now your SS becomes between you and the point of destination, then if you understand this in a deeper way it becomes one thing, your **SS has become the light moving from one point to another**. How you play with MG fields inside this system, as a light, as a property of the light, decides your speed, the direction and intensity of approach, then one thing is for sure, **the speed of the Universe is the new game, because the light on this planet has its own strength of its manifestation, it's not the light of the Universe.** (:34). When the man becomes wise he will see new things, understands new dimensions and that **the game of space is not the speed of light of the man in matter state. The universe has its own life strength or what you call the SOL we call the speed of the travel of the fields in the U. It is totally different and if you understand it you can relate to its destination and departure, the speed of the travel of the universal speed is millions bigger then what man can imagine**. **Because now you carry a spectrum of fields and then you work in the dimension of the universal speed beyond the boundary of the earth condition**. The SOL on this (earth) is what the earth's MG field decides, whereas the SOL in the U is not what the man has ?? limited. **There is no limit it depends on what your strength is and what the strength of the MG field you produce. Man has got to understand this otherwise he'll fail in creation of his SS**. We have to move into understanding more of **behavior of fields from cores to each other (:36). that how and what we load up. The space fuel**

for the new generation of space reactors has never been introduced and that is why many of you have a problem. You might create a lift but you can't create physicality. That is a different ball game. As one of the K Seekers wrote to me, you are not teaching everything are you, you are afraid of human race? I am not afraid of anything, because you don't understand yet so I spoon feed you until you recover that you can walk, then you can eat, and anything you like. With this process understanding the definition and the separation of the light from the source because one thing you never understood and **a lot of you overlooked, once the 4 field forces of the planet and the sun interact and create the plasma, now this plasma is an entity on its own and makes its own decision, it's nothing to do with what the earth is doing or the sun has done. Now it's a closed cluster, it decides, it's space travel**. If it is stronger in G in one way or another. By the law of physics the stronger feeds the weaker, **in trying to feed it moves into, and directed to and that's why it comes to feed so fast to create balance that it gives residue as light. In interaction with the field of the earth itself. (:38). When we look at the space pictures of the earth, we don't see light coming off that way, instead we see earth as a shining ball around itself. This is where this property comes in. That structure dictates by itself the shape, shielding and position of the planet.** Now you understand that the SS is no different. read Book #2 with the eye of the travel not the light. Understand the concept, don't just copy the pages. **You can squeeze it or release it, you create the condition of fields as you like, it's you who decides, this much or this much. You decide what fields you release into and in the direction of the flight. Don't forget that shielding is the structure of the Pl in both directions. If it was all light, us in the space would not have seen the light of the earth, it would have appeared as a black thing because it absorbs. In reality with that interaction and in interaction with the fields going down creates some fields (going out) which shows the presence of it. If you understand this then you can create directional motion shielding**. (:40). **Your fields, reactors and your SS never touches or is in danger with what happens outside**. This is the difference between a plane and a SS, in a plane you just get smoke in the back and no protection in the front. With the space T your system is in the back with the shielding forwards. Two different concepts and things. Hopefully nothing hits you in the plane, but you are so safe in the SS nothing can penetrate you. You have to understand the structure of the light, how much light you put out, and what G field forces that its interaction with the fields of the U gives you a shielding. **On earth it's very easy to create this shielding but in the space of the U it is not, because the facts that in deep space there are many, many fields around so if you are not careful your fields (of the shielding) will look something like this (wavy), depending on whose is pulling, and this is what you don't want. You don't want to suddenly hit a space without protection.** But the waves of the fields put pressure on that it can deform the shape and structure of your SS. (:42**). In constructing your SS you have to create a field level that is above the totality of the universal MG fields that it can stand and wave field forces anywhere, otherwise you suddenly walk into a hot bath and the sugar disappears (your SS dissolves**). Now many of you understand why your SS don't take shape, that your SF has trouble. Until you don't do these test drives, these elevations of the understanding of the totality, you'll have a problem with flying. (He draws SF). Your SS sits there but the point of your first reactor in conjunction with the other reactors moves ahead of you**. So you always travel into "chasing the tail" like a dog chasing**

its tail. You have to move, as you were doing here by ?? the central G field force of the imaginary core, you have to create another one in front of you, that it not only becomes your shield but it also become the (reference) point with the (other) one trying to catch up with it, moves you at a high speed to that position. Your strength in the center has to be so much higher that the secondary field (reference point) you create is trying ot feed the same process as the light (:44). it creates motion. You don't need the position of a moon or a star to travel into, you can travel here because you create your point there and can travel to there or there (any direction you want). You don't need to understand the forces of central G field forces, you are in the ocean of the fields of the U and this process of what you create for the positioning is what you see in most of the UOFs that we see on this planet. **They suddenly takeoff, because they have this imaginary point or what we call the FP, now they create a new one (secondary point) in any direction they like, so this (FP) tries to catch up, but you have to understand how you bring the fields to be ahead, This process has been added into the Chinese space system, but not in public**. I have taught one of my closest students how it works. The knowledge has been shared, but in time it will be released. **We do not need moon to takeoff from earth, we create our own moon in any position in the U, and the speed of travel is the ratio of the difference between the strength of the center and the point we create.** (:46). You don't need to look for somewhere to go, you decide where to go. **You have full control and at the same time due to the way you structure it, you can create multi, multi layers of different shield strength. When you decide on the space travel you have to be collectively understanding the totality of the space work. You can't be off your guard for 1 second,** you have to understand the ratio of your fields, the ratio of your fuel, the ratio of the fields in your craft in respect to its environment you are traveling (in). **You can't have the behavior of traveling in the water as you have when going through a solid ball**. You can't create the same condition behavior if you are in a massive plasma environment of a very high order in the center of the galaxy or towards the center of the U then what you do on the edge of the universal ?? side ?? of the galaxies**. In the past many SS have been lost due to the mistake of the captain, and it will happen to the human race**. (:48). Understand how, this is part of the space light travel and you have to understand when you program or decide your flights. **You have a sun, if the distance from the sun to its boundary is long enough that the fields can reduce in strength you start creating particles, we call them planetary. In many cases the pilots make a mistake, they do not allow these particles to return as light, but by mistake they become the stone bullet shot on its own surface Because the pilot is not aware that in respect to the environment he has created a field that the reduction in strength is faster then what he calculated**, in a way he stones himself. And as he hasn't created a second shield for it, it destroys itself. The space T has to be understood in its totality, not just takeoff and trying to move. **It has to be on the field strength and understanding the transportation of the field**, which now here, **as a SS you are in a matter state, then here you behave as a wave, as a light, then you come to another point which is the creation of the manifestation of that ?? point**, Book 1, 2 and 3. Because when you arrive you become the origin of the light, origin of the sun, (:50). structure ?? and in time as many people have done in the past, **you come to space, enjoy the scenery, you create your own planet. Many of the stars you see in the sky and you say it's a star, they are SS which they have made**

this condition. Because the view is good. .. You see beautiful things in the space and you want to stop for awhile. **This is the privilege to create your own dimension. The same applies with the STM. The structure from now on is in the hand of the man himself**. The possibilities are infinite. Now you have to understand the whole proposition. If you understood this part, then **you have understood how you can create materials in the space** as you need. If you understood this go back to the teaching, (:52). remember the reactors surrounding a center, the reactors around the edge create a field strength with the center reactor and give you the field strength of Cu, this one gives you O, this is the same as the other one, nothing has changed in the knowledge, the only thing that changes is our comprehension and then the application of the knowledge, then it's the extension of the knowledge, how much can you extend it, how can you play with the fields. **We are aware that many scientific organizations and many world governments are working around the new T, but they don't understand it.** Because you all look in one direction, you don't want to understand the totality**. I gather a Gans, now I create a Gans in direction and motion, I don't need to energy up all the time, I know how to squeeze my fields that I imitate the center of the U to travel into, or I imitate H that I am much stronger so I increase my path, the speed of motion**. (:54). And if you can in the long term understanding create a condition in your space reactors, in your plasma free space (FP), the condition of the Pl of the central original mother, you'll travel at much higher speeds, because your FP is so much stronger and the other one is so much weaker, or the other way around, you can go either way. This is the field motion because then you change direction**. Position and understanding of the structure of the light as an energy or a photon or a particle is the key to the understanding of the travel of the future for man**.

Any questions. Q: Lisa from Australia wants to ask about squeezing the fields. (:56). (very hard to understand) we have a SF with Zn inner cores and CO2, we have created some tubes and put them around the outside of the SF that are highly G and seems to have strengthened the fields of the total fields. Am I pushing or pulling or squeezing? You are doing both. (:58). He draws their SF. ... the outer tubes are filled with CO2, Zn, Silver and Gold. (1:00). **This is why you are feeling much more pressure inside and outside. You are not squeezing it. Your body contains Silver and Gold and now you are interacting with the S and G Gans** ... this is a very good point for John in AZ, this is a point for the Pl ratio, because when you got a Gans mixture it doesn't look at the gold or silver, in a Pl mixture as you go in you make different strength levels. ... you are playing with a stronger field you are going into the center of the Pl. (1:02). you have a combination of the 4 with a still stronger field. And I added some oflic acid. Are you planning to get pregnant, No don't talk that. You never know with this T, 3 or 400 years... **this is why you are feeling stronger fields you have moved deeper in the Pl. It's not material loaded but field loaded. It's the ratio of the load**. And how fast, this is what was written by Bahuala, **transmutation of elements, it comes by what your field force out of the matter, or what your fields take out of the matter**, going this way you get to gold, going the other way you come to H. In this what you have created is the same fields, it's where you want to cut into it. You were cutting it here (higher up in the Pl spiral) and now you are cutting it lower in the Pl spiral. (1:04). No you are not squeezing but adding to, but in a way you can squeeze if you know what to do. If you make a system here (in center of SF) which is ligther in the strength, the outer tubes will start

feeding it. Q: So CH3? No it depends what part of the body you sit or what you want to hold, you can do. We are running some tests in the background at the moment about these things. Q: When you sit in the SF and put CH3 on the bottom you can feel the energy shoot up towards the head, and if you put something on the top reactor you can feel the energy push down from your head. What you have created is a transfer of the energy. It would be very interesting not to use any Cu, because Cu is the ?/ of the physicality of the muscle tissue. And Zn is through the emotions and that is one of the reasons (1:06). you feel the flow because the Zn is connecting to your nerve system. It would be interesting to see if you move the Zn out of the combination and see how it feels. Q: The gold Gans makes everybody happy they all start smiling. Do you tell them it's gold? No. Is this why man finds comfort with gold. ... now you have to come up with a system to see if you can stretch it to another point, make 2 of them and let 2 people sit in each, (1:08). and see if you can transfer E from one to another, not far from each other. ... if you use **lead it brings depression and sadness because of the structure of its Pl. Never touch Lead**. Rick: Many people have reported that it seems to be true. Lead is one of the most dangerous things to play with. It's a structure. Bring up lead and gold. from Wikipedia, (1:10). but you have to look at the structure of lead in comparison to gold and in relation to C. Put it next to Zn also. ....

(1:14). Gold (196), Lead (207), Zinc (65). In Plasma Zn (50/55), Gold (196), **you'll see a ratio connection in some isotopes plasmas. The difference is only 10 but if you look at the number of proton and electrons present ... look at the number of neutrons in all 3, overall most of the energy balance difference in atomic weight comes by the neutrons, when you have a bigger structure like lead**, (1:16). the difference is very little but it's huge with those elements which the neutrons making into the structure. The lead gives huge amount of energy compared by mass ratio that in some of its isotopes. Not all of the lead, when we convert lead some of its isotopes are balanced in ratio to Zn which is a neural connection, and some of it is the same with the gold, but we don't have much ratio difference, very little, but the neural system can accept or digest it through the connection of the CO2. Some of the lead, it's not that it takes energy, rather it gives so much that it allows the neural system to give more, if you look at the upper end of the lead isotopes, go to levels that Zn can't be given, the Zn becomes a taker but at the same time it gives more in the M level and then that creates a lack of energy. **You still have the same if you go to the isotopes on the upper level of Zn, then go to the ?? lower level, (1:18). then look at the upper level of the lead or gold the ratio when the system gives a lot in the M but takes more in G and now he has to give more in M, and this brings depression.** This is why when you use **Russian gold it gives you different behavior then European gold**. Russian gold is redder it has a different content and that creates different anxiety whereas the European gold doesn't do that. Russian gold has elements that touch the nerve, Zn acid level .. there was research done on it years ago because people used to get their tooth covered in Russian gold and they ofund that the behavior changes. ..

(1:20). The Russian mix gold is different then European gold, it gives a different behavior texture. **This is something I noticed in space development that these Gans's have to be avoided in setting up the space reactors. Then in the space you get aggressive or calm behavior, it totally comes from the neutron plasma structure**

field strength. As the neutron field structure increases the interaction field behavior changes also. When you go to the Plutonium or Uranium you see different conditions. One of the **psychological studies done by the nuclear industry towards them shows why people have more fear for nuclear or any mention of it, is because they connect with what we call Plutonium or Uranium in the background of the knowledge of the man, and we give more (? importance) to these words**. This is why nuclear material does what it does and they interfere with our neural system, this is why we see rapid cancers, people who go through a nuclear process create a different behavior. **It's all to do with the mass ratio fields strength of the plasma and not in the matter state**. (1:22). I have studied nuclear field interaction on human behavior and it's very interesting, if you listen to some of the funny talks, in a way I say, **why people fear us as nuclear physicists is because of Hiroshima and what we did, and we have related something which is scientifically interaction of the fields with us, and it effects our Zn field line with the CO2 or the communication line of the AA. In the future there will be many studies of the Zn interaction of the fields in the space. Behavior change in races in different part of the space has been observed for a long time, but at the same time you create the shielding effect in your process of the fuel, that protects you from these things.** Any conversion of the energy to a certain level is added to or taken out that, that phase is not there, you create that M filter. You actually do that in the Gans waters that you drink, but now you have to change the water into the field Pl condition. **The field transformation of the liquid of the body is at the moment under observation by the research centers of the KF, how the dynamic fields effects (1:24). the acidity or alkalinity effects itself the emotions, the presence of giving energies replaces , this is why we say alkaline water is good for people not ot get cancer or whatever, because they have a process of giving and taking in a balance where acidic conditions is continuous condition and the body can't handle it**. As you go further up in the some of the atomic structures of the materials in the Pl condition they become more and more dangerous for the body to handle, when we go to atomic structures as I have taught before, at the moment you are into 90s or whatever, but the moment we go to 400 to 600 when man goes into deeper space he'll find new materials they'll give different emotional feeling to man, so we learn to filter it. We have the knowledge but we ignore it because its not comprehensible for us but if you. But for example **if you take your Gans Zn to Raman Spectroscopy it gives you the elements that are called exotic and the ones that man hopes to create in the future. But if the Raman S has detected the field it means the existence of the matter, it's just that we haven't managed to convert it from the energy pack into matter state pack**. (1:26). If you do Infrared Spectroscopy on it, it gives you a list of exotic materials that will come out of your ZnO2 and CO2. I think Zn in one machine gives you a spectrum of 22 materials and a few are in a range of 3 and 400 and they just say exotic material not known. ... the space Pl in the direction of fields that do not take from the energy of the Zn, will give us joy and happiness and the ones that the Zn and become the provider to them creates depression and sadness. And in ??? systems and now we speak of the speed of light and new universal light strength transportation, then you can't say I go 1000 times faster then the speed of light, then this light the field property (1:28). of the Pl in this part of the U becomes like Pb and I feel depressed. **Would I go 2000 times the speed of light and come up with a new scale of dimensions, we call it 1 kw, megawatt, and now we**

have to come up with new measurements for the SOL which man has fixed himself, so he has ignore it (what is true), or in the matter condition we travel so many times faster then the speed of the matter state, so from now on we don't call it SOL we call it kilo lights, mega and giga, and then we travel in that dimension because then we can produce new strength fields that we are in possession of, **we have become the creator of it, and it makes sense, so you can go 1 billion times faster then the SOL. So for einsteinium's and Newtonians these things can't be, but sorry, stay in the school and thoughts and education which is only good for the last century, now we move on,** we have to add to the knowledge. This is inevitable in the coming times. I spoke in the beginning of these teaching about 3 to 5 minutes from New York to Beijing. **This can't be achieved by continuous conversion of the curvature of the earth, but it is easier to go out (atmosphere) and come back in, and you don't target the moon it's on the back of the earth, how are you going to target it. You create that point and then the space ratio, (1:30). and then in that ratio you create you make sure certain fields don't come into operation that suddenly half way half of your passengers become angry and on the other side the other half are laughing their head off** because they are happy. There is a lot to learn. Secondly **the present computer systems can't match the development of this T. The extension into new what we call plasma conductors is inevitable. In the new space reactors we don't use any wires, you have to use the spacing of the new N coated, N technology, space plasma technology, and even then if you observe the color of the wires change during the test because the field pressure changes on them, they absorb different amounts of energy, you go on a higher order, so the top layers get saturated and become dissolved and it's very much like the way you release the Gans from the spaces of the N layer, that will happen to it, then they create a space gap of the higher energy transportation between your systems**. There is a lot to be understood. Now we start a new science of the space T, the matter state has finished, but at the same time we live in a matter state and we have to understand the interaction, composition (1:32). the interface and interchange from one to another, how we convert one to another. **Now they say you have been traveling 1 million times faster then the speed of light. Do the seconds go backwards when you come back to it, then you would come back 1 million years before the birth of Christ or your birthday because you came back faster? No, you still arrive back at the present manifestation in the point in time. At the time you arrive. You can't go back to the future and say you traveled faster. There is no future, there is no time, because it never solidified together, to be together that you can see what you want to see. In time when scientists understand the process of the evolution of the process of the STM, then you can go into the soul structure as part of like the RNA and listen to the recording of the past through the dimension of the strength of the soul which is of a higher order,** as I said if you add the Zn, Cu and gold together and you get a higher order, then **you see in that recording, what energy transformation was there that when it converts to the body of the man in that package becomes the DNA, and then all the information of it is there**, the color of the eye to every thing else. If the RNA can record the color of the eye of your grandfather and gives you the mixture between the blond and blue and gives you a new color of eye, then **it has got all (1:34). recordings of all the transformations and transmutations of the man and all the sounds and everything else**. Then we can go back in time in that

condition of that soul, **and not by looking in space and reversing it (time**). I always said, I will take you back to listen to the voice of the Christ or Mohammad, because it's there, it's recorded. **We'll see the faces, as the Pl conditions that then we recognize that this is this, this is my uncl**e, grandfather or something else, this king bla, bla, this is a glimpse when he was going from one place to another. The new science will bring a lot of dimensions and a lot of people will oppose it because now it creates a new dimension into the whole structure of the knowledge of the man. **Always with new knowledge there is opposition because those who don't want to understand or move with it, they oppose it, it's Always older people because they have the financial power as we call it**. As I said many times the structure **with the people who created wealth out of war in a few days it's finished, very soon. We don't fight it, when you introduce new T where fuel doesn't exist all the investments and the wars in the Middle east and god knows everywhere else, because nobody needs the fuel**. (1:36). And then you move into the space dimension of zero time transportation, the present control of the traffic of whatever, has no meaning**. Then they'll have no control over the ofod, over immunization, it doesn't exist because now if those of you who become wise enough and we have shown in cases, you increase the strength of the fields of the bone marrow, you understand the structure of it, so you are already immune, not just from this planet but in the U.** We have to move on and it **starts as of today's teaching because up to now we just taught up to Book #1, now we are in #2, traveling, and transporting. Now we understand the property and structure of the light**, this is why Book #2 was written. **You created a Pl, it releases its fields, now is it a photon or is it energy or a particle, and you decide because in the center of it is what we call, Principle Matter. It is energy when the source, what we call Principle Matter in strength has given most of it, when it arrives it has no more to give, it is just at the last leg of the fields. It behaves like a particle which means at the interaction point it did not release much, or it absorbed a lot, now it still has some more left, when it comes there is still something in it, the cup is still full.** (1:38). Don't forget the condition of the creation of the H. The energy of the Pl of the light which is at the H level when it arrives it hasn't got anything (left) it's just on the last leg (of its energy), because it's weak. **But if the structure at the point of creation is at the level of the gold, then when it arrives and it impacts, it still has something in it, then it behaves like a particle, it's not just energy.** It's very simple. It depends on where you catch the ball and at what speed it hits you, and what speed was released and if it was made of a balloon of air or was it made of stone and solid material. This is all the difference is and now we have to understand the knowledge in a much deeper way. **The end of the oil monopoly is weeks away, maybe less. The same with the currency and ofod not years. And you are doing it, the knowledge has been passed on,** it's in the hands of the KF, you are too slow, because as I said, you don't have confidence in what you are doing. When you can deliver small systems that can travel the span of this planet. **In a year or 2 we'll laugh at ourselves in how we allowed the Rothschild's to control the fuel and the destiny of man with war. They'll be hunted and haunted, you watch, because it's not me anymore, it's all of you, you are getting the hang of it**. (1:40). We don't need fuel and all the wars we see created by different groups and things on the world interest on oil is finished. It's more or less over but you are not wise enough to see it, because I see it through how our research is coming up. Control on ofod and world population is over.

The biggest enemies of mankind are those who want to control the human race because what it is, is 7 billion of us. On the average we'll hold 5 billion back on earth maybe more, but **we have to become like the Irish as you know the biggest export of Ireland is human beings and potatoes**. We have to keep on producing at a higher rate to be able to catch up with the human race that will travel into space. **How many will be left, not many educated people, or the ones who are educated and yet want to stay behind. We'll loose a huge rate of the population that want to go into space and at the same time those who stay behind with the new knowledge, this planet can support at least 2 to 300 billion. Not 7 billion. We need that explosion in population that in 30 years time the planet is not depleted from the human race.** Most probably those who are not educated will stay and those who have no intention to leave. **Those who bring population control and they are trying to do it with injections and the rest, (1:42). people will haunt them, they'll be named as the biggest criminals because they didn't allow the human race to grow**. But they'll walk away, be sidelined, we'll see a new political situation move on. **We have seen countries who start talking about peace now want sanctions against those who were claiming that everybody else is (?? terrorist). It's like the thief is among the people and shouting catch the thief, but it is actually them. Now the thieves are getting identified. Like I said, the Syrian war is the last war the man will see. This is our wish and our plan. We support president Zhi's plan to support the governments who support peace**. We don't need war, the time of fighting to show who is more powerful is over. **The nations who carry the new T will dominate through the power of the new T. The old colonial time is over because the new T is coming up** ... when we go to planet Zeus and bring a stone from there here to sell, what for, I can produce it myself. If a lady from Australia can come and tell us what makes somebody feel happy, and is just a Gans of something, god help our scientists who still have to catch up with the ladies in that part of the world. The breakthrough knowledge is the understanding (1:44). of the knowledge, implications and applications. And now we are getting there, we are moving into the light structure. From this week we are working on Book #2. **For the past 10 years we worked on Book #1 because we had a lot of people to catch up**. Those of you who want to stay on tomato you can keep on Book #1. Start understanding the interaction of the fields. **Up to now you have only worked with 1 system, you need a second system. How can you see a magnet when you don't have another magnet or a metal. The process of the space development is 2.** Can you go back to photo where I stand with 2 reactors. I clearly showed but nobody understands. You can't have a flight without the other. In the space system you create flight with the point ahead of you. In the original mechanical system I didn't go to fly the heavier reactor, **I went to fly the small reactor by ratio mass, because now I created a point of reference with the bigger reactor, because they are both in the atmospheric condition of this planet**. I can't work with the zero time to go into the ground, so I created a new ground level that I can fly against it. As I said to you, the Iranian flight system is not a big system on the floor, it's the small one on the table. I cut or damaged myself in Theran trying to catch this (1:46). flying ball. As I just explained the FP in your SS is not your flying system, it's your point of reference to be the heaviest that it tries to feed the ligthest one so you can travel. This is the new ground level (draws circle around the heavier reactor). When I took the system to show the Americans we always showed them this one (the heavier one), because I am not going

to show what flies do I. This is the seat the ?? sits on, and this is the seat you have to make. Now you understand, I am a very good magician, I put everything right in front of your face but you don't see it. Those of you who always worked with ?? system to fly you can forget about it, you can be on planet earth until the Zeus comes here. I said many times, this unit (small one) has damaged me. But people were looking for something wrong. If you understand this, it's good bye loneliness, and that means goodbye to the oil industry, it's finished, I am sorry for Rothschild you have to bury a lot to understand what has happened to you. (1:48). **You put one of these in the center of the car, we showed the flying car, then you don't need the fuel do you. You have access ... you dictate this way and go that direction.** etc.. ... We don't use 3 reactors (in the car) we use 5 reactors in the shock absorbers. Go back and look at it ... oil industry is dead. Man has to move on with a new understanding and new structure. Now you have to watch the speed of the light between these 2 entities (larger and smaller reactors). This is where you become from matter to transformation of energy to what you want to be. Or you call it the **self positioning in MG fields and you fly. this dictates it's going to be there, or you are a FP and you create this point and that's where you move into**. (1:50). The space game has changed. We had the donkey, came to fuel and now we work with plasma. The way I have taught you to make it nobody can dominate the power supply. You make it at home in the night and you fly with it in the morning. Unless having a spoon at home or a wire in the wall, nobody can stop you from doing it. I have made man free. It's man who has to understand how to use the freedom. I thank the Iranian government for this opportunity, exactly 10 years ago next week that I landed in Iran and even when I did the Iranian scientists never understood what I was doing. There was only 1 who understood what I was up to. He said, and you came here to make this, and you made it, you came here to fly. He understood that the big reactor was just a point of reference. I love the Iranian and Chinese they work in the understanding the way I work. You all looked for this (bigger reactor) and you see my finger very clearly showing, 'this is the one that flies'. You were looking for something else. You create a point of reference (1:52). because we are born in the MG field of the planet, we can't do anything. It's there, it's zero unless you create a new position.

Are there any questions. Q: I am kind of gum smacked from all the information today. My references were back when Mr. Keshe was talking about the neutrons of the elements within our reactors. you always said that Iodine was part of the process? I didn't say, it was the conclusion of people who were working in that field. Q: Is it or isn't Iodine important? (1:54). You are going in the direction of the strength of the E and not the soul, and a lot of people spoke about it. Q: If you look at the Periodic Table and you want to make Pb .... **Let me explain something that has to be understood. If I was going to write the Periodic Table, I would throw that Table out in the bin, for the space T. If are going work to work just with the space T you are better off to look only at the neutron levels. Because the U works on the package of the original creation of the original plasma and not on its division. When you look at the atomic structure of any element or at the combination of structures of elements as a combination Pl, you have to look at the neutron combination and effect of the neutron balance (1:56). then you work more clearly in the direction of the reality in the space**. Q: everything is thrown out the window, I have started to understand thank you .... The problem or the

understanding is, in the past I referred to the neutron**, those who reach the understanding and production of the neutron strength in the world of the science of Pl, are those who breakthrough different dimensions of understanding and energy**, I referred to this in some of the teachings but people don't understand that **the electron and proton in division become irrelevant in the structure of the world of the Pl because the mother is a neutron. When you work in the plasma atomic structure or molecular Pl structure if you look at the neutron, the strength of neutron, plasmatic MG field of the strength of the neutron on this planet, and then you understand that this is the Mother, this is very much like the field strength of the center of ionic plasmatic fields of the Principle, that's where it comes from, and then it divides into 2.** Our scientists who work with the new plasma T in the future as they mature they'll move into the neutron levels, (1:58). not in the plasma of the Gans the matter state. The **Gans of the neutrons of the strength is the dictation of the moving from one universe into another, because in the Unicose the same game and principle of the field interaction dictates when you can change. If you look at it the structure of the light is the structure of a neutron, because now it's independent, it's not dividing into anything. It stays on its own and controls it destiny and delivers what it absorbs according to its strength. If you redefine a neutron and the light, it's the same thing because it has not divided into subdivisions of electron and proton, or being the Mother how it releases energy**. If you understand the relevance and connection, in the future most of **our reactors move from Pl reactors into neutron Pl reactors**. We have **a stage to go through which is a crystallization of it, and the Chinese scientists have achieved that in the past 2 weeks**, but they don't understand it. But this is the time in the next few months or years, those of you who **understand go towards a neutron structure Pl which is a singularity, and then on the condition of singularity it creates a crystal condition. ONE ATOM makes to covers the whole of the universe if you decide to create a condition for it.** (2:00). Any other question. Q: I have the version 2 SF with in the middle Bismuth and 1 drop of Pb water Gans, Do I have to throw everything away now**? Please keep away from the Lead, yes. I usually suggest to people bury it 10 meters away from where nobody lives. Because Pb has an affinity towards the neural system of the man to create a condition as part of the structure to receive energy. It brings exhaustion and drainage on the energy system of the man**. And because its combination is very close with the Zn and CO2 to the structure of some of the isotopes of the O and C with some of the combinations of the isotopes of (2:02). the Zn and O, comes very close to Pb and once that is made you create a condition of feeding it. If you look at it, you have Zn at 65, then C of 12, that is 77, then add 16 of O to it, then you see how you achieve very rapidly into the condition of 203. You go above on the higher strength of the AA if you have created the ZnO2, mono ZnO, and if you have the presence of H2O and CO2, very clearly in some of the isotopes combinations of higher order you match on 207. and then birds with birds, **you create the MG field of the atomic structure of the Pb, then you communicate, then by order because you are dynamic and you continuously have the supply, the atomic structure of the Pb in the box as a Gans, doesn't have the dynamism presence of H3 as a CH3, as a sugar ofund in the body of the man so you become a suppler**. (2:04). Q: Did the fields settle into the grapheme coating of the spirals? Yes it does. Q: Do I

have to bring everything back to the raw state. Yes, how you do it, more or less. When you have a grapheme you created a space gap storage.

... Chinese .. (2:09). **Q: You mentioned we have to make this reference point, but if we want to fly to the destination we should change the field strength of the reference point or do we change the point of reference in the flight system?** You change it in the point of reference and not in the flight system. You can't keep on changing (your reference point) as a chameleon because you'll loose your boundary. That center stays with the structure with the way you structure your fields in the point ahead of you, that is where you have to change. You can actually create a condition where you reject yourself from the point and go backwards. Q: I am confused, do we take this point in my flight system (2:10). or is the reference point located in the earth? No ... there are 2, it depends which one you call reference point. **Your FP is always the same. Your creation of the point ahead of you, this becomes your reference point of flight to that point**. You create, when we were testing in Theran. The small reactor is full of nuclear based material, so I wanted to fly in this direction, I used to mark the ball, I opened the reactor and deliberately removed certain nuclear balls, so this side was weaker and I knew I would have to fly (toward this other side). I referred many times in my teachings about dictating the position of flight, because now I weakened this side or strengthened the other, so I go there ... I said we could predict which way the ball goes by changing the energy sources inside, ionization field forces. We never touch, unless we want to go on the ground, this level (ground level). Our purpose wasn't to crash to the ground (2:12). but to fly and I could fly very easily. **Now with the new Pl SF, this ( ) is the point of your reference and you create it through the combination of the reactors that you build around the system, the flight system of it, and how you do it, and how you energize your reactors**. This is your point (outside the reactor) you want to go there ... and if you can keep on changing, in a way, if you ofllow the dots, this is a very difficult way, if you ofllow these dots, if you want to go from Theran to Washington on the other side, you just keep on changing this point of reference. **But the easiest way is this (draws a single point and connects start to finish), it's a straight line flight. Because the MG field of the earth is irrelevant. You create above it and it doesn't interface with it, so this is much faster then trying to ofllow (the dots).** Q: Is that you mean the reference point is still on the earth ..? No, it could be anywhere you create it. The reference point is this blue one here. You with your reactors create that reference point. Q: That's a FP, right? Yes. In the space and not inside your reactor. **Q: So if I can use my soul I can put it anywhere in this U? ... Good Morning.** (2:14). Q: Then the problem comes .. **if I have never been to somewhere else how can my soul tell me where that place I have never been is, where to put that reference point? Then you have to test**. I have never been to America, so I am going to go there and see. Let me explain, you brought something beautiful on, you have to understand. This is your reactor (the big one on the table), this is your neutron, by creating another space you convert yourself to an atom, an dhow and what distance this electron will have, you call it point of reference, dictates on your speed and the strength and direction of the position. If you go back to the books, **as a SF you start as a neutron then you decide to become a proton and an electron, then you can even decide I want to be 2 or 3 protons and electrons, then I give myself curvature of move, before reaching there I change, and**

I change. This will become part of the system, but unfortunately the present computers can't control such a speed so you go back and understand through your emotion (2:16). and then you have to be a very good captain to be able to do these. Would anybody like to come to planet Zeus. **Q; Can I manifest myself in different places at the same time? You decide.** How are you going to decide you are going to enjoy going to a museum and which picture I am going to enjoy, or what movie I go to. You decide, at that point I want to be here, I want to enjoy what is there. **When the man goes to space it's a point of maturity by loosing his sight the condition of his vision, and using the sight of the STM, we'll see things different**, we understand different, the speed is different. It's a conversion point. The physicality if you understand it, very, let's put it as the STM (draws a blue dot on head) somewhere there in the back of the brain. **It's that soul that has given the face, the structure according to where it is, and I can continuously change it to make a move of the finger or whatever. We already know the knowledge and we have made a neural connection to it and call it the body of the man**. But in fact it sits in the back of our (head) soul. (2:18). Why do we go and feel good to live in one part of the world and don't have the feeling ot live in another part. Because of the same position, the same condition. If you look it is **the soul which has created the body and the face. I can change the strength of the soul and the face will change, you will not see the body.** And then I decide to manifest the soul here (draws a dot in another part of the room) and I give a shape and the body I like. **The problem with us is that we got used to physical motion of our body and haven't gotten used to the motion of our soul**. We see the body here and think we have gotten it here, but it is the soul that wants to manifest itself here. We have to change the point of reference and then according to where I put the soul this is where I am going to be, I create a fixed point, this is the shape of my body it doesn't matter where it goes. Here is where I want to move the physicality with the soul of it, then I manifest myself here in this shape. Any other question. **Today's teaching is very intense, if you understood it. This teaching is the beginning of a new cycle of teachings (2:20). of space development**. I think it is time to move. (Chinese guy ???) (2:22). ... new webpage in Chinese... (2:24). we closed the old Shenzaun lab because of misconduct and have just opened a new one... **Q: About the Point of reference, we know birds have this to know how to get to there home, we have some abilities but they may not be developed**. Can we create such a reference point with respect to the space craft system to get to that point, let's say I want ot go to a place in US and I create that point in respect to the reactor in the SS, **how to transfer my knowledge to that of the SS**? When a bird flies it's its own GPS in respect to the satellite its on, 2 **points it has a POR from where it left and where it is going to, and that is how he finds his position.** Because we are physical people we look at this is the road. (2:26). **But if this is a tree in Africa and one over here in Europe now the bird acts as a satellite continuously (making) points of reference between the 2**. It's very simple. **The direction of the flight sits on its own MG field inside its brain. Because the brain has a position , in the future man knows the science will find that we have the same. It's very near to the soul of the bird, but it's far enough away that the condition of the E and the rest of it do not interfere with it. It uses that shielding, that environment for its reference point and this it's very easy to target**. Maybe we have to mature to the condition of the birds and understand it. **Because once it touches the physical condition then E comes into it. This is no E, this is the unconditional**

position of the 2 fields, point of reference and it flies back on the same route. It doesn't matter what wind blows or what thing is there it remains connected. We will have this same (thing) when we travel. The problem with the human race is the thing called Earth, once we go out of it the game changes, (then) now we are another entity on our own in respect to. Up to now we fueled ourselves to travel and now we'll position ourselves to travel. It's a big difference. **This freedom gives us the freedom of the birds, where do you want to go and where to see yourself.** (2:28). When you go back to 129 Tesla (experiment) it's all set up by the same structure. There is no difference. If you go 1 frame backwards (on the video currently on the screen) you'll see a number of reactors on the floor in the Insano. All these systems you see here are still all intact and have been kept for the future reference and those who want to test these reactors can repeat 129 Tesla again and confirm. Everything here even the screws and nuts thanks to a woman called Caroline has been kept, all the gas combinations and everything has been recorded. It's us now who has become that bird and then it's our soul that ?? seeks the position. We have always been put on a plane and taken somewhere we never had to decide to create that condition. We have seen birds traveling from one position from one side of the earth to the other, how is they always come back to the same feeding ground every year again, how do they do that. ... **They are another piece that are independent of any attachment to the planet. That's all, they are a UOF on their own, but they have the shape and the control with it**. (2:30). When we become that mature to be able to travel the space without that earth connection, most probably a lot of us will do the same with the oncoming space systems. Q: **Jalal thinks that he can make the SF with his hands and he uses the energy of the emotion, but the main thing is how will he capture the fields in the position, can he use N coated balls? If you hold it long enough that it manifests its own center, yes.** (2:32). Q: Can he use the help of a MaGrav to increase the power of his strength? Of the ball or himself? Himself. Yeah, the thing is Jalal is thinking very good too fast. **Not the Jalal that is speaking but the soul of Jalal.** Q: Yes, this is your teaching Mr. Keshe. What is the easiest connection between the mother and himself, does he use the AA? Oh, you lost the teaching. You have to go back to school. **This is your MaGrav system and this is you. To receive you have to be more humble, to be lower**. Thank you. We hit something very interesting for me today. We have been asking and now apparently it's becoming a reality, **that many scientists have been working on KF technology and in fact they have not managed to replicate it. The reason is that they have not understood the essence of the knowledge. They have just copied the knowledge.** (2:34). I am pretty sure, shortly in the coming time by the development of the new space reactors, especially the one which is due to come out of China we'll show a new evolution in the world of the science and the space T. In that process what is interesting is how the knowledge will be used for application and implication of the peace. We stand firm on the path of President Zhi to bring the T that it enforces peace, and this process is coming up, **I heard the news today that there is consideration to bring sanctions against the US for breaking rules and agreements and if that happens we want to know how the American government will cry and shout.** Up to now they served sanctions as they liked to do what they like. ... I bet you they'll talk about nuclear war, this is how they want to threaten, but I have assured the Chinese government and other peaceful nations, the T to dismantle nuclear warheads is a gift to the Chinese and Iranian governments. We stand firm on it. The true

science counts and shows the power of the nations not the hollow threats and ?? **It is important to us now that we opened a new chapter in the space T today to let our people understand that the T in its essence is a peaceful T, (2:36). even if you try to kamikaze your SS or soul to the ground it will not die it will not ?? , the reason for it, we don't talk about it (now), in the future we might teach it.** We see the evolution of the peace as we wished it, it has started and I thank the Chinese leadership for the wise move. I was wondering when this would happen and now it has become a talk and very soon with the wisdom and strength of the Chinese government, the only countries which will go on sanctions by the look of it will be the US, then I will like to see how they take the sanctions, trade, supply, oil sanctions. If the oil to America stops through the sanctions the nation will cripple. We know that because we saw it in 1972, and it ?? will be much worse then that time. The peace process has started by balancing the powers that the true world leaders have taken their position. This has been my wish that China at last has taken the first nation position. We congratulate President Zhi for this action. This will bring us one step closer to peace, because it's not just financial sanctions, we give the full support and T to the Chinese leadership and this will allow them to enforce peace through peaceful manners of T and independence from these warmongering (nations) situation. I have been asking for this for a long time for China to take the leadership and now we see they have taken it. (2:38). ... this is the beginning of peace .... **this is the praise of all of you who were wishing for peace. .... as China takes the true leadership and not a bankrupt nation of US** ??? ... game. .. The decisions are made in Beijing and not in Washington anymore ... all of us have to support the soul of the Chinese leadership that will carry on the same path. (2:40). **Q: How did the Belgium Court decide on May 25, is it now legal for Caroline and Keshe act to help other people? No, the verdict last week was exactly how we wanted it.** One point was dropped by the judge, we still stand the same which allows us to go to the Court of European Justice. The next one is the highest Court in Belgium. If they would have changed anything in it we would have had a problem but because they kept it the same we can go for appeal. ... the charges of terrorism was crushed by the Americans, then they used the medical charges ..

Q: I would like to learn more of the universal language like the hand signs Mr. Keshe has given before, so we can teach others, in space we'll need to communicate? **The hand signs are for those who are in the matter state, how do you communicate with the soul that has no hands or feet. We have to understand the interaction of the fields of the souls. the way you see your mother smile or how she talks to you.** (2:46). The universal language comes into operation now that we have developed your strength in understanding of the soul in how the 2 souls communicate and how you translate that into emotions or the fields. New teaching on screen. If this is your soul, and this is soul of your mother (she doesn't exist), the transfer of the energy from the soul of the mother to the STM and visa versa, that's why you can talk to your mother. In the process of the transformation we have the brain of the man. According to the strength which comes from the mother's laugther or joy or whatever, our brain starts processing in different layers of the brain, one part of the brain works through the physical confirmation, which is us, and then there is another strength which is the Pl at the level of the STM , that's incoming from the mother. (2:48).

(2:52). ... the fear and anxiety in the space doesn't exist ..

... Those working on the space in the KF now know they need to have 2 systems, ??
(2:56). Videos
END

227th Knowledge Seekers Workshop Thursday, June 7, 2018,

(Continuation of the teachings on LIGHT, Light as a plasma converts its energy to matter depending on the environment it travels to, The sun's rays travel out as plasma M fields and are captured by the MG fields of a planet to make the elements of that environment, There are 3 types of fields that interact to become matter they are also seen as translucent light, The geological layers we see in mountains on this planet were created by passing through certain fields in the universe, It is us who decides the layers and can change deserts into oasis, When you know the MG field that a crops grows in you simply apply that field and you don't even need the seed to grow it, We have to learn how to convert the light, or what we call plasmatic motion in the fields of the universe, light is not just what we see it is also transmutation, transfer, and transportation of the plasmatic entity and some pass us and they become light on the Moon or Saturn and since they don't have our strength they don't create light for us, We travel through space as light or plasma in an elongated condition and at the destination we change back into a spherical plasma depending on the environment, There cannot be any difference in the world of creation between the Creator and what He has manifested Himself as the soul of the man, I made man in the image of myself, Man has to understand that no, there is nothing any different in any realms of the creation, It's the interference of the emotion with the fields to expect a reaction and interaction from a lower to a higher strength, Everything in the universe works on this principle there is no difference, The higher order has to give by its, what we call magnitudinal strength to the destination and has to take from the point of destination the G field of it that it creates a balance, It's like a pulley he explains, Explains (Rainbow Body of Buddhism) how body goes back to light, The soul becomes more humble then the souls of physicality and they all feed into one soul and become a light, Explains about near death experiences when people get hit and pain too much the soul reorganizes the energy, Anniversary of Fabio's death and investigation into murder, Explains how our systems can create more energy during the night then the day using the MG field of the planet, Walking bareofoted, sleeping on the ground or on leather or in a skyscraper one absorbs different MG fields, Our hands are like Alek's Beads and absorb MG fields, For Plasma research we have to bring in scientific people to qualify and quantify it, Jalal's experience with UOF but we can't comment on these kind of things, In past few months a number of spaceships lining up on the horizon in deep space, ,)

(:05). I was told that last week bringing the technology into the light and the conversion of light has effected many of our people's understanding and they say they understand a little bit more, but now they are lost in a new maze. The knowledge of the Pl has to become the totality of the work of the Pl. **We try to understand how the conversion of**

Pl from the spherical to what we call elongated cylindrical, to what we call light, to what converts itself back to as an energy from matter, is literally as we call Book numbers 1, 2, 3. **Creation of the light and motion of the light is itself a condition imposed by the environment that the Pl travels through or gets attracted to, and on the other hand the same condition and environment can be used to evolve the plasma of the light**. What does this mean? In so many writings it has been called, and its name has changed to transmutation of elements. We started with the Gans's in this process **we developed that a Gans in origin radiating fields, some of the fields of the Gans's you make, if you create the right environment for it. It will appear as light, to the visible or to instrumentation detection. But when this light arrives at its destination now it has to manifest itself as what it is, is it Pl, does it carry the energy of Cu or H, does it carry in effect the condition that it can convert itself in conjunction (:08). with MG fields of its destination to matter C**u. **Light itself is transmutation of fields according to the strength of them, what it can carry, what it delivers at the point of manifestation in respect to its environment. You have the Sun, its rays in Pl M fields moves this way, if you are able to capture them by the MG fields of a planet, here you create gold, most of what is as gold depending on the rotation and direction, here you have He, here you have ?? subatomic. At the same time you have gold at this position, but if you can produce a specific condition you can make this He according to its environment into gold also. What we have learned is the transmutation of fields, packages of energies, what we call light**. This movement of **the sun's fields to a point of matters of elements, subatomic, whatever it comes to, in interaction with the other fields that might have manifested from the Sun, itself leaving the surface at different strengths, (:10). or by interaction of the other fields returning, or entering the space of the Solar System, can also lead to creation of gold. As these 3 fields interact with each other softly they create that translucent light of the universe.** What we call the light from the Sun as a field manifests itself as it is, according to what it comes to, and what it is. **When it rubs against the earth different layers further or closer the strength of the MG (fields) it starts creating its own elements. If you look at the geological pattern of the planet, if we look at a mountain cut out of the landscape we see different layers and colors. The question to ask is where did these colors come from? They did not happen at the point of inception and creation of the earth. They happened as the earth passed through different strengths, through the upper ?? strips, into both the Sun and its rotation (:12). around its environment**. As the environment around the earth has changed in its passage, it has accepted and created different MG fields which has lead to creation of different layers. If we understand this and **realize that it is us who decides the field absorption, then we come to a very big conclusion, we can change deserts into oasis, then if we wait long enough we can create the sand which is needed for it, the soil which is needed to cultivate. The layers of this planet are not accidental**. Nobody has ever asked the question, we just accepted what the geologists said, this is this, okay some of it we can explain because it was at the bottom of the ocean. Even to be at the bottom of the ocean the atmosphere around it has to confirm and confine it in that position that it can hold an oceans condition. Then it comes and we see layers of different things, where do these layers come from, some we get with the volcanic. But the others have never been explained to man, now we understand. the reason we need to understand

that in the coming time we don't need to put chemicals on deserts, or put all sorts of things to change the environment, land for one purpose or another. Now we can change the environment through the plasmatic M field that we change the game, we do it in 2 ways first we change the amount of fields that are needed to be absorbed (:14). to create let's the environment of a marshland or things to grow here, then next door we create a condition that we can only grow bananas. If we get very good at it then on top of the mountain I like to grow rice, which is opposite to what we know rice is normally grown in flat land with a lot of water. But it's the condition that we create, the plasmatic change in the environment will dictate the growth. **This is in answer to those who say that there is going to be a ofod shortage because of so many human beings as we increase in numbers.** But if we understand this even on the roofs of our own homes we can produce environments like the green houses that we have now a days that in one corner we create a tropical environment for tropical fruits in another grasslands, etc.. to be able to grow anything we like. **This is what the next generation of the conversion of the fields from the universe will force man to accept and to do in the depth of the U. If you go to another planet and you want to create the conditions of this planet**, sorry there are no aluminum framed greenhouses, but if you carry the knowledge all you need to do is to find out what fields are coming here (it's sun), (:16). and what system you need to put here so that, that field creates the MG field to grow carrots. **Do you need the soil to cultivate, or do you need the seed, that by giving the right condition it grows on its own.** You can grow alkaline vegetation on acidic land and visa versa you can have the kind of environment that you choose but **we have to move into the steps, the conditions in how we convert the light, or what we call plasmatic motion in the fields of the universe. Light is not just what you see and can identify through it. Light is transmutation, transfer, and transportation of the plasmatic entity. Some pass us and they become light on the moon or Saturn, but our strength they do not catch, they don't create light for us.** When you are on the line of another planet you receive the same light strength as the one before that, you might receive. **However, the brightness of the planet Earth doesn't change, because the MG field of the earth can only pull the plasmatic light fields of the entity that is at the strength that he attracts and not what is passing through. Otherwise, we would forever have thunderstorms or thunder-lights of the solar system inside the plane**t. (:18). **We absorb, attract according to MG fields of the center points of the planet. This is why summers are hot and everyone across the planet, unless there are clouds, feel the same temperature**. The interaction of the fields in the dimension of the plasmatic motion creates ?? life, but then that ?? life is conformation, in a way understanding of the entity existence ??? **We don't need to have the eye to see, but through the reflection of the light which we detect we can tell what is in front of us**. When the man looses his eyes in the span of the U where it is of no use because ?? too close to see, everything is too far, then how does the man see and detect with no eyes. There is a big difference between the blindness and no vision, no eyes. **Even if we are blind the dimension of the fields interaction without any new ?? neural connection creates its own dimension of the confirmation of existence**. But then you don't have that ?? you very much have to work on the ?? solar of the plasma of the body of the man. ?? sounds are very ?? express. **Then it goes to the vision of the STM. (:20). What do we see and how would we like to see it. Then every entity has a bandwidth according to understanding of the man or**

being, that you can detect everything because they don't interact with the specific liquid salts balance in your eye for you to confirm the manifestation of the entity, but then you see through the strengths of the interaction of the fields with the STM. If you understand just a little bit more into this, **then man has the vision to see his Creator.** It is the man who has decided to use the eye of physicality and not the eye of the soul of the creation. How we convert and how effectively we can change ourselves from rays to particles to matter state manifestation of different strengths is understanding of the totality of the motion of the plasmatic fields. It's slowing down, transfer and the balance between M and G fields of its entity. **When you arrive as a light, a beam, a particle or as whatever you want to call it, then how do you open up. How do you give to yourself manifestation without hitting something**. You are the light and coming with a SS at a speed beyond the speed of imagination. (:22). Forget about what Einstein told he never understood. You come to this point, you are here, and now you want to manifest yourself, **you are a beam. You are not a spherical. The only way you might be able to exist and confirm your existence is to convert to a plasma**. In a way a plasma that can balance itself in the dimension of the rotation of the strength. If try to balance this ( ) not only you have rotate in this direction (? around itself) but also in this direction (around the ray). **We see cylindrical entities existing in the U is a reality, very rare, but it's not practical. So you start as a plasma, you transfer yourself as a elongated field of a Pl that it can get attracted to a higher speed, and then at the point how do you convert yourself back into a P**l. If you are a car you crash yourself into a wall, you stop and whatever is left is there. But in the SS you travel you can't smash yourself up. Or you can use the STM. But how do we convert**, what is the method to convert a ray, a field, into plasmatic confirmation of existence, and a stable condition and position. It's very easy for those of you who will understand when you go back to a structure of a SS**. (:24). You have to understand one thing, I am the ray, how could I stop without smashing in, but I can convert myself to be what is there. There are a number of ways to do it. **Different races in the space have created different ways to do it and that is according to MG field strength of their own existence, because you can't do the same standard procedure for every race.** It is according to what strength they appear and they have to manifest themselves from and ? bandwidth. Go back to the very original teaching and understand that this is the Pl (draws a spiral in the cylinder), **it spirals from the center and it elongates, this is how the plasmatic field of the ray or light looks like.** Because it's gravitated, it's pulled. To a weaker point in the front and the stronger point in the back according to the direction of motion. All you need to do is hook this back to here, and its M to the front, and what happens is the plasma just opens up. **It changes itself from a light into a spherical shape without any damage. the process can be very rapid, literally you hang your G and M fields in the opposite way, so the bottom opens up**. (:26). and because you have a continuous flow it makes itself the shape of a sphere or a shape of what it has to be in that dimension or environment. If you understand this even for those who work with transportation of the fields, it's very easy, you receive the rays of the sun, you change the system and then you see it becomes gold, if you change it in a different way the same thing becomes silver, and if you change it a slightly different way the other things becomes mercury or Cu ?? **To become Cu it has to go through this (Pl) at a given specific point of anchoring, at this point if it anchors it becomes Cu but at this other point it becomes gold or does**

it become H. It depends on its environment. Then if you anchor it closer (to the center) it becomes Plutonium. At the point of the strength of the connection we decided conversion of the Pl to any entity we need. **You don't need to put 2 reactors opposite to each other. You have to learn the process of the interaction and linking up of the fields. We all have spoken you put 1 M on the system on the other and this adds to the totality**. But how far do we understand this process and how far can we expand the knowledge because **in the space we don't have time to think if I am right or wrong, can I put the brakes on, because if you put the brakes on in the wrong place, (:28). Here you wanted it to be Cu, but if you choose the wrong anchoring you ended up becoming H. Here you are floating and here you are sinking. Here you are AA for the birds and you are a lion in the direction of the other entities.** The process of conversion is important and how we decide and at what level we do that, in the SS system it's very easy. In the future those of you who evolve in the direction of space development via SS you'll find out **you can make a SS to behave as a ray and you can also make the system to behave as a particle. You can make it to behave as a wave in as much as it has no entity, no tangibility, but at the point of manifestation it can switch from one to another. We understand the process of the motion of the light, in so many ways the transformation and transportation of the field from one point to another according to the strength of itself is one of the attributes of the Creator.** Man one day will understand. (:30). **It's us within our physicality dimension of existence, we create by interaction of a collection of Gans's, what we call the STM, then if you understand that the soul of the Creator carries a spectrum of existence (draws a wavy line to the STM) at its given strength in the way we saw creation of Cu, ??? the speed of creation ??? of the soul of the Creator. It has to be in a given condition that it gives it the confirmation of existence**. It doesn't matter how many universes and Unicose, galaxies and the rest are on the path. As you have created a dimension of the existence, in the full spectrum of the energy, (draws a spiral and from its center, a line back to the Creator), **Now you understand how the Creator is within me and I am part of the Creator. I come from the light of His existence, and at this point I manifest myself through the knowledge of existence. But how does the Creator move from being its totality to be in the existence of the STM**. It's a mystery which man will understand in the coming time. If you understood the ocean of the creation of the Pl to the point that it manifests itself in the matter state as Cu or whatever. **There cannot be any difference in the world of creation between the Creator and what He has manifested Himself as the STM. I made man in the image of myself. (:32). When you shout it doesn't only go down the road to your son when you tell him to stop, everybody else hears the same voice. So is the beauty of the Creator, when it shines everyone receives**. **If man understands this in a very simple way man can find the path to his Creator, to what you call ?? the Origin, the beginning, because when he shouts, all can hear, then as you know with the noise and where the voices come from you can see its existence.** Theology and the world of Unicose and Cosmology are one, it's how they want to interpret and understand the truth. **If the light comes from the inner existence of the sun, and it's transformation, transportation, transmutation are arriving to the earth and it becomes Cu, and if the earth was not there and it can travel on to another point it becomes H, and He in another position in the U of itself**, or maybe beyond itself ?? its spherical condition then we understand there is a big

question for man to ask himself. In the path of the light of the Creator, are we the gold, H or ?? energy or end up ?? (:34). that **in one day in collectiveness of returning back to what it is, we become another part of the soul of the Creator as the rain goes into and comes back to, as the fields of the Sun** go to and comes back down to the earth and ?? **Man has to understand that no, there is nothing any different in any realms of the creation.** Then it comes to **how man behaves, which again this is the interference with the emotion, or the interaction of the fields, of the lower field to a higher field. Then we call it at that point different types of evolution**, but in fact if we look it's no different. This is the STM, this is the finger, then the E and the fields of the finger in interaction with the brain at a given point creates the reaction of the ?? toe, because that the current that creates the motion for a plasma of the cells of the brain, then **where do we want to interfere with the E and field of source of the STM to expect what reaction and interaction at the physical dimension of the physicality, but this time we have made the channels and everything else for it that it is ready to interact only with those cells in that part. I can only move the tip of my index finger** or I just want to bend half of my thumb. (:36). ... then man understands a simple principle, that is to travel in the depth of the U man has to understand the operation of the fields of what he calls the light. The sooner we understand this the faster man will evolve in the new dimension. **The source, transmutation, transportation and conversion to manifest yourself as something as part of what was originally the Sun, so is the STM, and so is the Sun is the soul of the Creator. The process of the transmutation and transportation of the fields of the U are very simple to understand. If one understands the simple fact, is that the higher order has to give by its, what we call magnitudinal strength to the destination, and has to take from the point of destination, the G field of it, that it creates a balance**. I taught it before that children could understand, **it's like a simple pulley**, it depends on how you pull on this and how you want to see which way you want to bring the chain. (:38). ... do you want the chain to move continuously but understanding the operation of the rope itself. if I start from here and ??? **... I come from the source, and I create a conversion, and that I behave like the source.** The behavior of the source is simple, that is (drawing arrows) ... **. in totality it's the behavior of light, here (in the center pulley) it's the conversion of fields .. you decide how to rotate and manifest .. (:40). yourself on ?? earth. When you speak about the twin stars, there is something in the middle, that is the position and conversion of the strengths of the fields of G or M of the light, in respect to approaching or departing**. If we can control that in the space reactors of today, man will be able to travel the U and turn at any corner that he decides to turn. **The movement of the Pl in the space is totally dictated by the strength of the Pl within itself and in respect to its environment by order of magnitude**. Any questions. (Mr. Keshe we are having a very hard time hearing you, can you speak up a little? I am speaking as loud as I can, I have a very bad cold, somehow a sneezy nose). I think it's a little bit too late at the end of the teachings, shall we start from the beginning. (:42). Q: You mentioned sound to be transferred to the light and the destination to be a matter, so how as a human being to change our body to light and go back to the source, we **heard in Buddhist teaching that at the end (of their life) they become beautiful light (Rainbow Body) and disappears**. Can you explain that process? That is part of the Buddhism and part of the understanding. Go back in the teachings, (:44). **I referred to the transfer of every cell**

energy, back to the soul, that the physicality in a way disappears, or it goes back into its origin which is the soul. You can't do that with the physical entity, but if you understood that every cell has a soul and you can create a condition that the STM becomes lower in strength than the soul of the cell that he created, then it becomes the feeder, then in that process, there is no matter of physicality, then as everything has absorbed, then it shines like a light, because now it has and it needs to find a point of reference, that now that it absorbs so much that in ratio by strength according to the soul of the totality of the U, it gets absorbed by it or detected by it. The understanding of it is very simple, **Buddha tried to explain** it, but he could not find a way to make it easy to understand, maybe we can do it now, or partially to start with. If this is **the body and this is the STM, the law of the Pl tells you that the strongest always gives to the weakest by the ratio of the mass, that it can make it bigger, or create a condition that by feeding it, it transfers most of its energy to it. (:46). and as it goes low it (they) become unison.** What does this mean? **The STM becomes so humble that in is so giving and that in giving it gives to every soul (cell) of the entity**. In that process in a very simple way the point of giving and reducing, in fact the power of the soul**, all the entities of the body, all parts and pieces, all the souls of totality in trying to feed they demise themselves to one center. And then it is very easy, you have to use the emotion of the man, then you are left with 1 soul that carries all the energies of every single soul in this entity. Now it changes, it has to be a giver to be able to survive, now it finds its the point of destiny, point of interaction, or absorption, or in a way to be pulled too. It can be done, it becomes the source of humbleness**, we call it in the English language. We become so much humble, lower even in essence in strength, **even lower then the cell in our own body, that the soul of the physicality feeds the STM.** It needs a total understanding. (:48). Then with all the souls, the physicality has a soul, even it takes itself the energy of the physicality. You diminish into 1 central soul which is the STM. That needs a lot of understanding how to do it**. Very few people can do that. That comes when nothing in the U has value except being able to be, to serve. You convert the whole totality of the man to one entity, then if that entity is absorbed by the bigger field it becomes like a light**, the way a light moves from the sun to the earth as it is feeding the weaker by its direction of motion, the light continues, you call it disappearing but in fact it's a massive field energy, in the U it's not so massive but in man's terms, it is the total energy of the man's existence that you become a light to become, to manifest yourself in the dimension ?? of the strength of the souls of the entities of the U **according to the MG field mass of this planet**. It's very easy, why you call it a farmers, or **certain spiritual people do it because they learn how to become detached and in that detachment the physicality feeds to confirm its existence (:50). the soul of physicality and with it as it goes converts the energy of the physicality to the energy of the soul. As it was mentioned that when a man dies the energy released is equivalent to 18 Hiroshima bombs**. But if you can create the soul condition that it can absorb the totality of 18 bombs then you can see how much energy the body of the man absorbs and holds on to. Then you can transmute and if you become so selfless that ??? that does not become part of the confirmation and acceptance of the existence then you can return back to your soul**. Don't forget every cell produced by the body has given a share of his soul from the existence of ?? the totality of the STM in reduction of strength at the point of**

interaction. If you call in a very simple way, **if the STM is there, and you have a cell (soul) here (toe) the STM is just a beaker (beacon ?) but it depends how and where you touch this soul in transportation to touch the toe, arm, heart, and that ??soul reaches there because that is the strength it has. Now you understand how they say you can become a light, but to do it you have to be able to become humble enough that, (:52). the souls of your own existence transfers all their energy to feed you, and as you, you become the totality of one,** that in interaction with another becomes absorbed and becomes part of the energy of existence. Any other question. Buddhism and Taoism brings a lot of things close for man to understand in reality the truth about his own creations. Where the other religions in the West are nothing but financial based and punishment based, which makes a lot of money. **In the West religions are businesses and not a way of teaching the soul. Elevation of the soul will come through Buddhism and Taoism and not through the financial resources in Jerusalem, Vatican or other places**. (audio problem) (:54). **Q: If we were originally a soul from outside of this planet then wouldn't it be easier for us to be a light and manifest our body here and not need to go through pregnancy and be born as a baby**? What are you talking about, are you awake or asleep? (laughs) I am dreaming and talking dream language. You just explained how we go to light and back to the source. .... If at the beginning we all come out from the source and then can't we just manifest our body on this planet, wouldn't that be easier**? It is not a process that you can control. It's a process of balance distribution of where you put the beacon. (:56). If you put a beacon in Africa or Russia or wherever. This beacon is what you call the beginning of the STM and when it gets established in the womb of the mother.** That is what ... (hello are you still there Mr. Keshe?) Yes I am waiting for an answer. Hello can you hear me? I am not sure what the question is? (the sound is better) ... Did you get that Ruthi? No I don't know what the question is. **Go back to what you asked, as the question and understand that it is us or the soul of us at the point of inception, (:58). that decides what strength we want to attract from the fields of the Creator. It doesn't matter if it has gone through a solar system or galaxy or a universe or whatever. The strength of our soul at the point of inception and its development dictates what we absorb from the center of the Creator or the original field, or whatever name you want to give it**. I think that should answer you. Do you understand? Q: Now you said that we can't choose, so that it depends on our originally or like the strength of our field ... What we absorb ... **Q: So that depends on our self, we can't choose if I want to be higher or lower. ... It's conditioned on the position and the place where the soul takes its condition, its origin**. If you are from the Source, how far and how many things are in front of, that here you become gold, here silver, and H whatever. (1:00). **You create at the point of inception the field strength, that you absorb this field strength**. This field strength comes directly from the Source, the beginning when it was released, it doesn't mean it was always ?? so high. **It could be (a ray) from the origin that never had any accidents or touching anything and arrives to you, so you are directly connected to the direction of the Source, but that is very rare, it's impossible more or less in the position of the universe. Because it's such a big mix mash**. Q: I think I understand a little bit, but I want to confirm, **so if a soul comes from outside of this planet and can manifest directly on this planet without being born? In so many ways it happens. Man chooses to accept that kind of birth but if you go from here to planet Zeus and**

you know how to convert when you approach you don't need to go into the womb of a mother to be born. You just convert knowing the strength of the soul and the condition of the environment. Maybe some of us will end up on a planet if we decide to go into space that all the beings are roller balls and they roll everywhere, they don't have arms and legs. So do you need to go inside a roller ball to be born to have a soul, you can come in and live according to the condition you are at. (1:02). As I said you change the Pl of the soul at the point of interaction. Q: You said if you put the G in the back and M in the front you change to a Gans? You change to a spherical ball, in the dimension of a sphere if you can explain it that way. Q: But on the light itself ?? is it all over? Yes, it's very much interactive, the light finds a space gap, if you have a magnet and you put iron dust on the ground you'll see the fields, with a sphere you'll pretty much see the same. **The space gaps, we say traditionally the North Pole going out but there are gaps between these magnetic fields which are not empty spaces, they are where the G fields are squeezed in. (1:04). How can you get through the space gaps of the universe because these don't stop here, as they go out they open up to a very large angle. Anything in that field strength has a passage.** And each of the gaps are different from each other. Q: If the Gans has a light and I as a person so my body is a Gans also, I should be seeing other lights too, the reason I can't see it is because this is the way physicality is and we can't see it? Yes, but let me explain something else. It's a very interesting point, those of you who might understand what I am explaining. We have seen the aura of the man, the fields around him, this is after the conversion of the soul to physicality with a mass body of the man. **There is a very strong beacon in the center, amazingly strong beacon in the center, we call it the STM. Then you have what you got used to, the physicality of the man. We see the aura. But if my physical eye, (1:06). 'me' from planet Zeus does not see this, but only sees the STM. I don't see what he is doing here (physically) but I see what his intentions are**. Man will find this out very soon when he goes to space, **one of the first things to hit the man, is that we don't see physicality, but we see the light. But we see that this light is communicating, it's part of it, we feel it. It goes back to the point, do I see your soul because it's a very strong beacon or with the eye of the man I only see the physicality of the man and can't see the soul.** But the eye from planet Zeus doesn't see the physicality, only the soul. And if you are a predator, he will take the soul, it's a good package of energy. Q: She quotes Mr. Keshe, '**The whole of the Unicose becomes the gap between the soul of the Creator and the brain, the ocean or the magma which by the field reduction leads to the creation of the physicality of the Creator, (1:08). during which part of the emotion of the Creator ?? like a cell with the dimension of his soul'. So the Creator has a soul, a physicality and emotion, .. when we say, "I created man in the image of Myself"**. So there is a lot happening here. We have the E, we are the image of God because He created us in His own image. The Creator creates all aspects of Himself in us, and its unlimited aspect of itself. Am I swimming in the emotion of the Creator right now? And is my E representative of His E but in physicality? Right now, no matter how many people are born on this planet they have one aspect of the Creator, then the Creator has created all these aspects in order to achieve what? Because there must be some reason He placed all these aspects to come up with alternate solutions or to get to an ultimate threshold that everything is going to come to one? I said this once to a child and I think it sums up the answer to you. **If every cell has its own soul, is**

every soul of the cell. (1:10). Or is every cell aware of the existence of the soul. And then you are 1 cell on the tip of a finger and through interaction with a soul you have received energy to be in that position. But now you are the tip of the finger soul, the cell, and the body is playing ofotball, what is your role in that game of ofotball? Or you are part of the totality that is moving, chasing a ball, and you are not aware of it because you are just a cell, on the tip of the finger, hanging and dangling. Even though we say we are part of, we are connected to the soul of the Creator, **is it the Creator playing ofotball at the moment or is he having a rest**, and just because he is resting the tip of the finger moves and the cell which is the STM moving, or is He aware of playing ofotball**. Q: I hit my head last night**, lot of pain, feel asleep (1:12). I was completely light, and I felt I was the Creator and it was the strangest feeling I ever had, one with everything, but the pain created that, and I was wondering why the pain created to that extent that I can see the light, and what is the relationship with such pain and the E or feeling? I don't know. If you see the light and you hit your head on top of your eye, you might have created a shock of nerves in the cells of the eyes. A lot of things people do can be physically explained. **People say, I saw a huge light and I am free of everything, but in fact I can explain the whole process. The divergence of the Soul of Physicality to the STM creates a massive light, and people make a mistake with dying and being very free and comfortable (near death experience?), because all the soul energies need to be replenished,** to be put in order, in automotive industry they call it a callback. Everybody gets called back in because there is a need for an adjustment, a correction. We see this quite a lot especially in physical accidents. you see a rush of cells as you don't want to stand that threshold of pain, it's your decision, I have had enough, I want to call it a day. (1:14). in their subconscious, this is how people create their own ILS, and many create their own MS. **Q: How do create a Point of reference when each point of the earth has its own MG? Very much like the birds do, they go to one end of the planet and go exactly to the same tree every year**. We are aware of the field strength and we have ordered it**, we decide to ignore it but we are fully aware of all of it. We know where we want to be on this planet the minute we are born and where we'll end up and we know where we are going to** be. Living a few bits and bumps here, we are that bird on the wing of flight, but the 2 ends are known. **There are 5 things which man surely does, that he is born and there is one certainty he will die. In between there are 3 more, you eat and sleep. and without any of the 5 there is no existence of the sou**l. (1:16). and its got a time gap we call the age, it has a beginning, establishing of the soul, and maturity of the soul departing from the physicality because it can't hold, it's too much. **We know all of it, it's just that we decided to ignore it because for us, we decide the time,** like when you give birth they ask her if it's a boy or a girl and she says I don't want to know, even the doctor has told you, you are deaf, I don't want to see it. But the reality is... The point of inception is more or less an accident we really know exactly how and why we ?? expecting to get what level that we depart. It's like going with a bucket and knowing how far you are going to carry that bucket, only to the ??? somebody wants to fill it with drip, drip, and some with a cup full, and some put in the ocean and fills it to the brim. Q: You said 5 things, but you gave only 4. You guess. One is going to the toilet, without it there is no ?? It's part of us, **getting rid of what we don't need, without taking we don't confirm, without having a time to process it, and there is a beginning and an end**. Q: To become a light and manifest

anyplace you want (1:18). that's magnificent. Many do it. Any other question. Q: Man from Togo, I see light on a person like can be gold, diamond, what am I seeing? Can you explain in more detail? (1:20). **Q: If I am a person I see a light like a star shining on his body. .. It depends on what you want to accept in the dimension of the fields that you observe**, you can see the same person as gold and then the next time you see them as silver color. We decide in what position and condition we want to see, it depends on the strength of us in the point of observation. (1:22). ... **Next month July 7th is anniversary of Fabio's death. (1:24). Keshe reads, letter about Fabio's.** It is still not clear from the truck driver what happened and there is still an investigation going on, 2 years later. The Minister ofund that it was the truck that hit the car on the right side, .. the car turned in front of the truck and hit the road barrier and bounced on the truck running and hooking it, .. at such a speed to project the bodies out of the car about 200 meters. The death of Fabio has been assessed by police, this was the text. **As we said, it was attempted murder, it was a hit, we have to wait for Police inquiry**. The rest is in private until the court rules. (1:26). If the driver is convicted it will be a very large sentence as he claims innocence. It was well set up as we know how it was done. The KF will use this case to defend a lot of cases that is happening to us. The place, position, and how it happened has brought the KF to a halt for some time. What I read was from the court and they ofund that the truck hit the car on the right side, twice, and they ran it over. As we said this was not as it looks ... we'll bring more information as it comes in. ... we are all aware of what has happened. ... we looked at it as attempted murder on my life .... we have ofund the connection between that Albanian driver and Belgium. (1:28). It just depends on how the police will link it. ....
(1:32). .. **we are releasing that we have made the connection between the Albania and Belgium. We have ofund a direct sharing of the website between them, it's totally illegal and has never been seen, we provide this document to Italian police. (1:34). This is an organized crime by a state**. I withhold any further information right here, but our team has established a very clear line between them. ... **Giovanni comes on to explain**. They made a special checking and ofund that the truck hit the car. (1:36). They told that the car hit the truck but they ofund that it was the opposite. It's not possible to say more for an investigation of this type ... (1:38).

(1:46**). I explained to this (solar energy) engineer that we absorb more energy at night then in the daytime. The reason for it is that as the field forces of the sun moves away as we go to the back away from facing the sun**, it allows ... it's less pressure on the fields of the planet to move out, because the sun's rays are stronger then the earth's, there is so much of it that it subdues the earths G.. ... rays against the surface. When we go away from the sun, afternoon, evening or whatever, at night these field forces due to the balance, now they have to balance themselves in respect to what we call the Solar System, and these fields are not as strong as the sun facing part of the earth, and what **we have seen by experience and testing, (1:48). is that the fields of the earth they move further up and away from the surface of the earth, which means we receive much stronger M fields**, which means we receive more fields from the planet. **Let's say during the day the strongest field would have come to our ankle, now the same strength reaches our knees.** ... If let's say the factor was 10 during the daytime then at night the same factor would be, if at the ankle would be at the knee height. What

we showed you in Einhoven with the sphere (that measures fields), that these fields are much more powerful. **We can produce systems that they create more energy during the night then the day using the MG field of the planet**. We showed the ball a couple weeks ago in the teachings, so **as we lay down (on the ground) or walk bareofoted without shoes or socks, because each one of these is like a filtering, like your brain has a filtering of your soul, whatever expansion or extension we do to the planet from its surface, its absorption, it does the same thing**. If we walk bareofoted on the earth or sleep flat on the floor, which many people do (1:50). We absorb different field radiation from the earth, we sleep lunch or night time. **The soul of physicality is connected to the STM, so as we receive more direct fields through our different part of the souls of our ofot and the ankle , much stronger fields are ... radiated back to the soul and they effect the STM. We are connected to. The way we walk, if we walk with fear or with joy, the field absorbed ?? the E of joy and that in ?? reflection feeds back to our soul, the way the soul gives to dictate the shape and position of a cell. When the cell receives, it gives motion to it, it feeds back to the emotional part of the brain that it feeds back to the soul. It's a mutual way to feed**. When you walk bareofoted you receive more fields at the level ... it doesn't mean.... you can walk somewhere and feel absolutely exhausted, and walk somewhere else and feel so rejoiceful. I go for a walk to enjoy, I do it bareofoted, but I walk on the concrete, you're always afraid something might go in my ofot. Some people just blank it out, nothing can happen and I walk. When you get to that step where nothing matters and I walk (1:52). and there it an ??emotional block, does it add to the STM? Or do **I walk on the beach and enjoy the pleasure of sharing my feelings to the ground, as much as you give to the earth, you receive to the earth as you walk on it. ?? you all take. At the same time we have to understand it's an everlasting .... continuous interaction between every single cell/souls in the body of the man and the STM. If we walk bareofoted we absorb energy directly, if we walk bareofoted at night, we are peace, see everything and are comfortable we get a different ... sleep on the floor, you get a different reaction. If some of you have ever tried sleeping on the leather, it creates a different type of sleep pattern then when you sleep on the clothe. On the leather it's a natural process** .... (broken ..)... I was explaining that if you sleep on leather be it furniture or on the ground, you sleep totally different. (1:54). Because the **leather is made of the AA which we are made of, we share different field strength from it. It's a balanced fields**, whereas on mattresses with all the metals in it, is not the natural way that we transfer energies. We transfer energies with Cu, spring and the rest of it. We know how we use the Cu for different purposes in our Pl technology. We see another ?/ how we share our energy with the totality of our structure. ?? what we give and take, what you call aura is continuously with us, what strength we give and take. If you walk bareofot or sleep on the ground without any interface we absorb totally different level. We see some researches that people who sleep on the floor eat totally different then people who sleep on a mattress, on the 20th or first floor. How far you stay away from the absorption of the higher or lower order during the daytime or nighttime creates different patterns of behavior. These have all been studied in depth in some organizations. **The emotion and energy is different for those who sleep on the 20th floor then the ground floor even though it's the same building. (1:56). At the high altitude you receive different M fields from the earth then what you receive from the**

?? It effects you and what you absorb and what you give is directly from the soul of the physicality to the STM and reflects that with the STM. ... **Q: Are our hands in a way a copy of the Alek Beads system, the ones we put in the SS**. Because I was observing my hands and pictured the palms are round like a sun and the space between the fingers looks like what you explained with the magnets and the iron dust. I picture in my hands the triangles you draw in the Alek's system also. Would the space between the fingers be the absorbing and G point and the fingers as the giver and M point. And what is the use of hands in Pl T at the soul level. (1:58). Would you like to write a book about it. **It's very much like what we just explained, but the fingers, we absorb different M field strengths from our fingers, and the fingers and toes are needed and are part of the energy balance. How we behave, how our soul is, how our soul dictates its operation, can be shown by the operation and shape of the fingers**. The way you hold them ... shake hands with your fingers, you can tell everything about the STM. **I think the people who invented the handshake, the Japanese are very clever they don't do it because you can read them, is to find out how you feel, who they got opposite to them, and what expected of them,** or expected to be done. .... (2:00).
(2:03). **Angelo of Rumania presents his device. It's similar to a MaGrav and it's about the interactions with the human body. They did measurements with therapist**.
(2:04). (2:06) Explain the purpose .. (2:10). Video with subtitles and no audio. (2:12). Another video. (2:18). ... **Mr. Keshe says anything with high speed rotation of Gans's we always see effects like this, we feel it. Could be in the center of a group of people? Yes. If you go back to the old cultures, the Maya, or Far East, they used to have these kind of things, but the hid it in the structure the way they used to make things out of wood or whatever. (2:20). In the very old times they used the intestine of animals to make these kind of things**. They believe the flow of life ?? if you can regenerate it you can bring life back in different ways. Continues with videos. The Pl device is very positive. .. (2:22).

(2:24). 25 25 .. we have to stay very open minded and not to be prejudice or try to promote one thing or the other. This program the way you showed these fields is not scientifically acceptable. ... because everybody makes lines on it the way they like.
(2:26). I know of hundreds of programs made by the Russian space people. ... we'll do this in the KF, try to bring in scientific people to quantify and qualify the result. .. ..
(2:28). .. if you start showing these things from now on it has to have a solid ground.

(2:34). ... One of our research center has submitted Gans balls for certification. .. Romania team to get it certified and then share it with other countries. ...

(2:38).
(2:40). These system are so cheap to make and so effective they can be used by the poor people and this is where we have to come in. 24
(2:42). **Jalal presents, and photos. It happened to a family 3 days ago at noon. the 2 children where playing on this trampoline, the father and mother went away briefly, then they heard a whistle noise like a jet**, but not a normal jet, similar to what happened in 1990s war in Iraq, and both of them couldn't move, stopped by the noise. When the

noise left the children were scared. **They saw an object 3 to 3 meters. They know about the Pl. The daugther drew it, it was lights but not lights, only colors, yellow, orange, red, on parameter of the yellow shaped waves. It's a ball but not it had something attached to it, a plate. smoke coming out, looked like smoke, it covered garden and part of roof, estimate 20 meters in diameter. The girl asked if the Gans's had anything to do with it?** (2:48). I don't know. I don't make comments on these things. This could be anything. ... **We can't make comments on this, no way**. She said it was solid object and could see parts moving, not colors, phosphoric color. ... **At the moment if you look into the deep sky you see a number of positions ??? spaceships. They shine and they have taken position in line on the horizon with the other stars.** (2:50). They can detect any movement of the position of the satellites or the stars that they can see. We see a number of them in the past few months, **so there is some movement in the space in respect to, the machines we have to detect planetary system do not pick up on these, it's due to the fact of the way they are, the way they absorb, they are not detectable by any shape or means**. There is a lot of activity above us, it's been for the past 2 years. Those I can explain exactly which part of the U they come from, they have a specific way of positioning, transportation and the rest of it. But these things when you are not there or have seen them it's not correct to make comments on. Any other questions. (2:52). Alec shows his Pl field accelerator, N coating and then Gans coating with CH3. It's a series of rings. (2:54). KF plasma "One Soul" T-shirt, with special ink over the chakra points. It received certification in Italy. Plasma liquid soap. (2:56). **There is 2nd edition of the Books. The books and some materials will be sold on Amazon. We are still talking about the KF Coin, with some governments to back it**. The beginning of the teaching today was very heavy as such, heavy means we haven't gained the knowledge for it but we have to set precedents that when we become enligthened by the knowledge we can go forward with it to the next step and once it's developed to understand that this was that part of the teaching of such and such a time, the teaching of 3 years ago some people say that now (afterwards) that they can ofllow it this time. (2:58). **The structure of the light internally we will try to go into next time if everything comes together correctly. Then you can see how you can use the conversion from the light plasma, or you call the plasma of the light to the Pl of the spherical condition, that in that transition you can produce what you need. It's the transition that leads most of the time to the manifestation of the entity, and then the environment will play its game to manifest in that dimension and that structure**. The teachings will carry on further to expand on the light and understanding of the transportation of the Pl and then we'll go back into the creation of the U. When we teach about that, I referred to part of it today in the creation of the U, some of you might understand it. Because now we take a step further in ??? the STM and the Creator which becomes part of the U and Unicose. I will try to put more in bit by bit so when we come to the creation or the origin of the U we understand the totality of the creation and the Creator. Please try to understand the first hour of the teaching today, it's very important especially those of you contemplating transportation with space travel.
(3:00).

228th Knowledge Seekers Workshop - Thursday, June 14, 2018

(INTRODUCTION OF NEUTRON::: Breakthrough in AZ shimmering lights attained, Belgium court case, Peace in North Korea, John shows videos and discusses what he is doing in AZ, They started to see the rubbing of the fields and smoke which is the M field conversion of mass fields into matter state but still in the gaseous state, The breakthrough is we have managed to convert matter into plasma and conversion of the Pl into field strength that it becomes a plasma of itself and when the strength is right it manifests itself as the whole structure of the spaceship, for the first time we have seen the fainted light and this will grow bigger, ,)

(:18). A breakthrough development in AZ with John. (:20). Talks about court case in Belgium. ... (:25). North Korea.
(:30).
(:36). John of AZ comes on. We're doing tests on 3 main SF reactors. We were trying to identify the light between 2 SF that we weren't able to see with the naked eye, but we felt them with our hands. We made a device, a wand with very strong M Gans so we were able to interact with the reactors. (:38). the stronger feeding the weaker. ... we saw some smoke between the reactors. (:40). Shows video. He can see in person but doesn't show on video. (:44). The wand is made from Tritium that is very heavy M. ... What did you learn from this? That it interacts with the G field but not so much from the M field. (:46). After 5 days the 2 SF are beginning to interact with each other. ... saw the light in between the 2. ... the lower part is where most of the fields are. What we should learn from this is if we create stronger fields in any of the 2 sets, the system will light up . (:48). If you go around the system and see if you see the light. **At the moment it is interacting with the earth's MG field and the "Mother" system, one of the 2 system against each other (?? I think it is the point of reference system). What is important that you feel it and see the light, as I have been telling you. For the first time we start seeing the shimmers. The strength of the bottom layer of fields are there but they aren't strong enough**. And when you put a stronger field inside which is a single core that he is using as a detection unit gives you confirmation of the theory and what we said from the beginning. **The next step for this shimmering, is if John finds a way to load up heavier fields then he'll ?? see the light all the way around, he doesn't need to look. This is part of the development understanding ... now when we add the third matter, or stronger field in, because don't forget this one is much stronger then the other 2, and very much concentrated, then you start to see the rubbing (of the fields), smoke he calls it, M field conversion of mass fields into matter state, but still in the gaseous state. If they can find a different kind of recording system that can show different kind of lights, then you'll see it totally. Now we understand that we are on the verge of a breakthrough. (:50). We have managed to convert matter into plasma, and conversion of the Pl into field strength that it becomes a Pl of itself, and when the strength is right it manifests itself in the whole structure. For the first time we have seen the fainted light and this will grow bigger** and bigger. it shows John has to increase the loading has to go a step up, heavier more energetic. We are on the next phase. One of the ways to expand or reduce the fields is to reduce the top number 4 reactor, move it down and you suppress the donut and it will squeak, leak when you have

a donut in your hand and you squeeze it and the cream comes out. By reducing the height of the top core you squeeze the donut. The bottom 3 are very strong and they won't bend. the only thing left is the field flow will increase. ... if you get it right by moving it too far and the pressurizing of the Pl your system will fly. It won't go through the transition of the matter state, it will create its own MG field as an open space system will take shape and flight. (:52). .. you have to strengthen the fields ... watch if there are any Gans materials around in the room that could be draining from your system, so whatever you have built you are feeding them. Congratulations John and your team this is another breakthrough for the development of the T. Try to strengthen the bottom cores and not necessarily the top core, but you can do the top core by (changing) the distance (to the bottom). You bring the blade closer instead of bringing the knife closer. Bring the top lower and see if you can see the light. Then the next step is compression and what I call back flush of the fields of the top core, if it reaches before the G field is created will give you the SS or the shimmer of the SS. You'll initially see light but you can still see all your cores and everything inside. You are dead on, if you don't play outside like the past few months and focus on the target, you should have in the next 4 weeks. (:54). Video of missing Gans in one of the reactors. It's a stationary reactor as part of a SF, one of them is missing its Gans without a leak. (:58). (1:00). These cores are glued together. One of the problems with these glued systems is sometimes works if you use 2 composite glues, epoxy, it works much better. I want to ask you, which way is the reactor facing the one that lost its Gans? (1:02). the other SF is to the left about 20 feet away. Maybe it has a hole that it's evaporating. reseal all the ball and try it again. The Chinese website KF.cn is back online. (1:04). What is important for a lot of KF supporters is how you managed to create what you call Tritium or M strong. A lot of people are trying to produce it and running into problems, and H2. Could you explain how to make it and I give 2 warnings, this is not the only way and doesn't mean its 100% H3. Share knowledge so people understand. I'll how to do the golden trick. (1:06). He shows video. How did you pull the C from the CH3, w want to know how. The trick is we put it in a CO2 box, in a N coated plate and put , we put it in a glass jar in the water, as the CO was being made. and covered the top. (1:08). As the CO2 was being made, it disassociated the H. He draws it on whiteboard. We leave it sit for 3 weeks. Before we start we hydrogenate the CH3 by bubbling in H-H-O. (1:12). So the CH3 also contains some degree of H2 and the H. How did you guess it is H2 and H? We are bubbling in atomic H. We used Hydrogen gas. Would it be possible that once you made the H3, that you add it to a mixture of water and a mixture of say Gans water CO2, and creating again between the 2 plates (1:14). create a condition that you produce H in conjunction with C you can produce Deuterium. If you take the H3 to another box and put it back into another composition of salt, different then the original. And you allow the H3 to interact with the new Cu, sorry C, if you close the top it will allow this extra C to extract additional O from the atmosphere without a cap. Then you'll have H2O, CO2 and what is left over will be an (1:16) . additional H inside, using a pure water. It will be a different color. Or a saltwater with a different density then the outside. You still get your CO2 from the O getting pulled from the water to create the CO2 in conjunction with the C and at that point whatever is coming as AA and from outside allows you to create a water and then you should get a pure H. This CO2 ... is because it's all plasmatic. You don't go to the matter state then it allows you to create H2O plus H ... the only way you can see it, it's very slow, is if you mark the water level

and see if it rises. This needs a special understanding of it because when you connect your plates you have to make sure you have, what I call a resistive load, it works usually with just a resistive load, which is just a piece of Cu wire connecting the 2. ?? whenever you are producing materials you never just connect this to this (the 2 plates together). If you do that you actually produce different products and it's not CO2. (1:18). .. you might see pure H at the bottom. This conversion is very rapid. You might see a change of color, which are very rapid in this process. When you connect the 2 plates with one wire, you are not using ?? use a chemical reaction. Even though it looks exactly the same. What it looks like when you do a direct connection, you might find that you get a separation with 2 types of Gans's. When you create a separation because now it has to go through the interface of the wire, then you create a different environment. There are a number of points you have to remember, over a number of years of doing these kind of N and Gans making may have slipped your mind, is that the reason we use salt is not only because of the planetary condition, but it has a typical common denominator and can lead to NaOH, and near enough ClH (Choleric acid). (1:20). Those of you who have found a mixture of Gans in your box means you most probably have connected (your plates) directly. ?? go to the battery operation, where here you go through salt condition. This is what life on this planet depends on and if you understand this process you can use the salt to release yourself with a lot of things and create a lot or whatever you need. It's 2 different processes, 1 is a G process and the other is a M process. NaOH is a G process where NaCl or going towards Choleric Acid is M because you release a lot of energy and if we understand this we can use it ot our advantage to create a condition of H, H2, and H3. None of you plays with this, I have seen 1 or 2 people play with it but then they left it because they couldn't understand. If you change your salinity and you feed in H3, or bring the H3 you produced into a new environment, now you can decide on the salinity or alkalinity, or if you connect the lines to be an acid condition then you go through matter state, then if you go through Na you go through the Pl state or what we call the cycle of life. This is the difference in the whole understanding and work of what you see has been done. (1:22). ... When you use Na you go into the cycle of life, and when you go into the chlorine or acidic then you energize life, and when you go into the direction of the H you feed life. If we understand this process and what John is saying, then the creation on this planet is practically the same. Our body decides and plays, does it work with different salts, which in a way dictates the G, how much am I going to hold on, this is why we have Mg salt and different salts in our body, it's how much am I going to hold on to energy. When it goes to Chlorine it decides how much I am prepared to share, and when it comes to the H it's what am I supplying. If we understand this and bring it into the production of the H, H2, or H3, you'll find out in the dynamic cores that John showed us, there is a continuous conversion between these, it's not that I only have H3, but in the cores, especially when you reach the donut position, H3 converts to D (H2) and visa versa, and you decide. (1:24). in the coming time as we become more expert in these kind of space flight tests we'll use only 1 material as John has done, but the condition of the giving and the speed of the conversion decides if the material goes to H3 and then goes to H2 and then if we can contain the H2 we achieve a diamond structure of it, the H2, then it gives us the physical structure (of the SS). When you look at the skin in the 3 layers the manifestation of the physicality and how it appears is on the middle layer. You have eczema and skin deformation, it's not done .. even though this (middle layer) is

disturbed, this (top layer) responds to it, this carries 2 layers of emotion, in fact if you look at it, it carries 3 souls. And then when this soul gets disturbed, the balance of the souls changes you see a skin infection, eczema. Then you go inside the body where the salts comes to it the liquid, it becomes Asthma. When you bring eczema in a liquid condition that it can grow you get Asthma. In fact, there's a company in Europe that has become expert at it, they have understood the effect of the salt in the middle layer, so if you get your middle layer disturbed, emotionally or by salt you get a skin deformation, which forms not just because of the top layer being disturbed, but because of the salt content in the middle (layer). It becomes a releaser or an attractor of emotion, (1:26). or of supporting or holding on to, then we see the skin changes. If you understand this (about the skin) and bring it into this process (H3 production), then when it comes to your SF reactors you have to see which one it is you have to change to create the ?? crystal or physicality. Q: Would you recommend that we put an LED on every single Gans kit we make? I always do that. Q: Because we were only using it for the CO2 Gans? No I use LED for everything because it's a balancer and if you understand the work of the Pl it is actually it very much works as a diode, but in the traffic flow from M to G and it can change visa versa. Q: Someone talked about ... the salts that it divides the ions on one side and radioactive ions on the other and when you have them together they would feed off each other. The comment was using Na and K salts in your boxes. (1:28). You talked about the Na and the chlorine, would the K be even a better choice here then the chlorine? Yeah, if you go back to some of the teachings years ago, I referred to that I use K salt and the reason is not only conversion it's the property of the K which changes its configuration in the process. If you use K in the N coating stage you create a condition in your Gans's for the production of certain field strength which can support you in the space flight system. This goes back to understanding the nuclear magnetic field structure, and interaction between the proton and the neutron. Q: Are you talking about the isotopes of K for example? Yes, isotopes but at the same time it's not just isotopes because now you are working in the Gans state of matter, so you are working in field condition and not matter anymore. I specifically go and purchase K salt. (1:30).
(copy missing part)

(1:36).

(1:48). because of the fields and CH3, you created H3, then the next step to go from H3 to H2. Have you understood nuclear construction? I am not an expert. Come on John you are the old man of this game and you played more then anybody else. I played a lot. .. look at what you have achieved (H3 to H2), .. call it Tritium, which is 1 electron extra. What do you have extra in T, (1 neutron). Walla. I always explained, that when a man learns how to use a neutron then he opens to space. When you move from H3 to H2 where does this neutron go? Or in a plasmatic condition where does the energy of the neutron go? (1:50). Only 1 man has managed to reach this place but he hasn't understood it, he's still puzzled. If you can change, understand, or develop a system where you can, always remember you have Gans's of these materials and not the physical matter of these materials, if you can capture this energy the extra neutron, you have created a neutron reactor, and the depth of the U is yours. Q: And that's where you get into O as being the M of the ?? Don't forget you repeat the same process again when you go to H. What is

H, 1 electron and 1 proton, and you speak about this so freely, again what is missing here, where does the energy go? 1 more neutron. If you understood everything that you all spoke about .. if you put your H2 and H3 and H, what do you get. Gans of neutron. (1:52). This is the space. Q; Are you saying add them all together? I missed something? I hope it's recorded, you haven't missed anything, you haven't understood what I explained. Q: Say it again in different language. Okay .. (draws 4 dots 3 and 2). Do you remember when you put Cu and Cu what did you get? Gans of Cu. Now what happens when you put Gans of H, H2, H3 ... what is the balance of it. They all have the 1 proton and 1 electron, so what is left to give. (2 neutron, 1 and 0 neutrons). Do you understand? Q: Are you saying to put them in a salt environment? (I got it now then). You got it now. You came to the point of producing CH3 and you can't strengthen your system. It means your Gans's are not powerful enough. When you put more mass into it. That's all it is, a 2 liter engine you can't get a 4 liter engine out of it. (1:54). But sometimes if you take the fuel out and adjust your carburetor you can get maybe 3 or 4 out of it. If you understand how to do it the correct way, you'll understand that you have the key to produce the Gans of neutron and then you can use it as a space fuel. Then speed beyond the light, the imagination of man can be achieved. I always said that the point of maturity for space travels comes when man knows how to use the neutron, because it doesn't divide itself anymore, but it shares the power of the highest order. You start stripping it, but with other Gans's you always have a diminishing ratio, but with the neutron you don't, because it's the ,mother, the Essence. So whatever split to, it pulls back to. The space knowledge with this level moves one step closer to space flight. I said, if you move I teach you. We saw Musrak brings something out, but he only understands part of it. We see many of you saying I made H2, H, H3, but when I ask you what you made you don't know. Now if you say you made H2 which is in a crystal condition, you made H3, go back to Cu and Zn when it's Nano coated, the only N element left, individually, in this set is what? (1:56). The neutron. And this neutron Gans can't be oxidized, but you have to find a way to hold it, and a way that you can use it in the space reactors. That's a million of years of research and development in the space and you got it in 1 sentence if you understand it. Don't forget I am a nuclear physicist and I know the inside of the structure of a plasma and the nucleus. If your knowledge and the space reactor needs to go a step up, and you are looking for nearly, the ultimate fuel, this is how to make it. Why did you manage to create CuO or ZnO when you had a N coating of the same which is a matter state, now the game plays the same, you have 1 N set for free. Now that we have seen the light we go 1 step up. But there are other ways without going through this process if you don't understand that you can continuously produce neutrons. (1:58). Q: That's a lot of good information you shared with us today. I am here to teach when you are ready to listen. This is why you can't push your dimension beyond. At the bottom 3 reactors you are pulling apart the Tritium, but some of it, in escaping becomes H2 and then it gets energy from the outside and it goes back to H3, and when you put that H3 directly in the center at high speed, you actually create, if you look at it, this condition. Then you still have partially these 2 (H2 & H) in it. If you can produce neutron plasma, and understand what you are doing, there is a specific way and I am sure some of you will grasp it very quickly, then when you put this in your system you'll see the lights in an easier way. Q: Would you call that neutron plasma M? It is neutral and interacts according to its planet, it turns over itself because it has no connection. We talked about Einstein who never

understood, through his mathematical work he called it a funny thing, when he said, '1 atom turns on one polarity and ?? the other one turns', and he couldn't understand it, to him it was funny, because he didn't have knowledge of physics in a way. This neutron plays the game, you have to be able to control it that it stays North Pole, South pole (how you call it) that it stays in the direction you want, (2:00).

(2:14). like a little prism, like when the white light goes through the prism and gets separated into the separate colors depending on the lattice of the Gans, we'll see different colors absorbed, ... for the generation of stars. Stars are usually children of different universes. When we want a SS we need a seed, which we have been talking about right now, the light of the Creator which expands in the appropriate environment to behave as a neutron and from the other side we are feeding, and all the universes are feeding and sharing their free plasmatic fields. that's what I wanted to add, I hope I am appropriate. What you have to understand is that in the future mankind will understand the teaching of today, how we brought man into a very advanced level of the space technology. But those who don't understand think it's just a piece. But in time when man matures to understand the teaching then maybe they'll understand that this was a gift today (2:16). that changes the course of humanity in space development. I have pondered on this for a long time, is man ready to carry this knowledge, or would man ever be ready, but as we see some of the mankind's men have understood and made that difference. As I have always said, you make the move then I will teach you. Many of you have started moving, very few of you have understood how to move. This comes to the point today that we have to add to the knowledge. that from now on it leads to one direction and that is to take man into space. A lot of you will have a problem with this knowledge today because it is meaningless to a lot of you because you haven't understood the process of the space travel, but for those of you who understand now or in the future, will understand that this is the biggest gift I could give you.

THE FUEL OF THE UNIVERSE.

The way the U works, the space becomes an oyster for man. ... you came to atom, to nuclear and molecular, and nucleus and then I brought you to the energy inside of the plasma. None of you have broken into the energy inside the neutron. (2:18). This is the first time. We have reached the pinnacle of the knowledge of the universe. We are there and from now on whatever we do decides the future of mankind in the space, because now you have access to the universal fuel. I have shown you how to make it. My wish is that the knowledge will be used for peace on this planet. Because this knowledge is a million times stronger then any knowledge man has ever encountered. 41

(2:22).

(2:27). Creation video

229th Knowledge Seekers Workshop - Thursday, June 21, 2018

(Discussion about love, The workings of the universe is so simple, Through our emotion, feeling and understanding we can change and influence things, Example how 1 fish causes the soul of the whole school to turn, The Keshe Foundation has become that fish to bring peace to humanity, It's that wish to understand more about the knowledge of the universe that it is triggering the release of the knowledge to mankind, Our wish for peace is taking shape with the summit of America and North Korea, Syria is the last war, Now that we understand that the soul of the man is within us and is us and gradually we are becoming peaceful then the Universal Community will come to us, More teachings on light, Any one light shines on everyone else that is of the same strength and can absorb it and the souls communicate through the light and it has a strength that anyone clear enough in respect to that position can read it, When we speak about the light it's the light of the existence, of the knowledge, of information. Where does the man go now that he has understood that he has the power to dictate and influence and access to the emotion of the humanity, The Keshe F is on the verge of space flight and we'll need to communicate with our souls to the soul of the spaceship, The spaceship will not accept lies anymore so we have to be honest and transparent, We don't believe the Americans ever went to the moon they have to explain the discrepancies, Challenge to KF to reach the moon and see if there are any flags, The light has a structure and carries information, If you understand how the body is made then you'll understand how the physicality of the spaceship is made, The sun doesn't have any physicality as such, The sun has a heartbeat therefore a soul and feels emotion towards its children as does teh galaxy and teh center line of the universe, In space we have to learn how to communicate with the soul, Detailed explanation of what love is in terms of plasma and how it is formed at the outer boundary of the brain and why it has a physical dimension, When you receive the love back you understand your own soul, Sometimes the love gets stuck in teh middle and doesn't reach the soul, In the space you have to understand this because another entity can absorb you as MG fields unless you have awareness of your soul, In time the physicality of hte brain won't be needed and it will be free to move in the universe, Bone structure is common in the universe, Explains the difference between love for a child and a lover and that he still falls madly in love with Caroline after 30 years, Plants and trees take from there environment but also give to it there are chemical changes around the roots it is always both ways, The electricity in your home requires give and take to create a current, When the love dies with the husband don't blame him for the blockage have you taken out what he doesn't need to create a current of love, We haven't learned to distribute our love equally among our children, If the father falls in love with the daughter she becomes a mistress to the mother he has to confirm equal love with the soul, In the space we have to understand the different forms of love when we encounter other entities, Now a days it is fashionable to say I love you, Rebound love is a disaster, Why we emphasize on love because it is how the universe works we give what we don't need and link up with others who are of the same, They give that we can receive and in turn they can take what we don't need, but is that love or is that the dimension that I want to be connected and that connection allows me to exist, Why he's backing the Chinese for world peace, Obama's shameful letter justifying killing, We need to see ourselves in the structure as our soul counts and we can change the whole through out soul, Discusses the Belgium court case and the end of the Monarch, We need people who can communicate with their emotion and soul to the soul of the spaceship, Love is M the outer boundary of the physicality, I

call the love that comes purely and reaches the inner sanctum of the soul of the man, the love of the Creator, because every other love has a strength and somewhere in the brain of the man it gets stuck, in the future I will explain what I call the eddy current, the return of the field, then man will click on it in no time to understand how much he can change the existence, UOF over Jerusalem with 3 color is H H2 H3 in high speed rotation, He makes Hydrogen Gans by putting H3 in 3 reactors and rotating them they become the 3 Gans's but will revert back when they stop rotating, ,)

(:06). ...We see a lot of achievement**, a lot of things are changing, is it by our thoughts and understandings that we can influence situations and conditions**. It's very interesting to understand more and more how things are happening (:08). **Not long ago when we spoke of gravity which was the biggest mystery in the science of the man, now more of you understand how it is made and can make machines and systems that can replicate it**. It has become a knowledge in such a way that it is so simple. **The reality of it is the knowledge of the U is so simple and understanding the workings of the U is one of the simplest things the man can do, but because he has understood everything at the level of matter state he has created himself a lot of confusion because he has taken only 1 state of the transmutation and transformation of the fields the U** and to him that is everything. **Now we learn that through our emotion, our feeling and understanding we can change and influence things. The way we feel our emotions and we cry or love, and the way we decide who and how to love.** Sometimes we decide how our emotion creates anger and how we react to it. When we feel peaceful we find it within ourselves and lives. Now we have to learn something extra. Some time ago we talked **about the soul of the school of fish in the ocean decides if one feels something on one side the whole (school) millions of fish turn**. (:10). The same with the birds flying when one turns the whole thousands of them turn together. In the teachings at that time **we could explain, that was a common soul, but now man has to learn the next step and that is the way you felt love. The way when you love somebody you want to cuddle and kiss them, the way you feel when you want to give a hug, the way you understood your E creates physical reactions**. The way when you get angry the anguish creates different physical dimension. Now we have to understand one thing, **maybe for the first time, we have become part of the E of the human race. The way you felt love and created the E of love and it happened. Now collectively the man has created that E of the school of the fish that they all react together** and the one reflects the feeling amongst the whole millions of the school of fish in the ocean, now the human race has become that school of fish, 7 billion of them in the ocean field of this atmosphere. **And us at KF and members of the world that likes peace and unity has become that single fish in the corner and when he felt love everybody came and ofund ofod. Now we wish peace and everything has started. This is what we have to understand, how we have to realize the power of us, that we become the emotions and senses of the human race**. And now many of us are fishing and feeding, and acting (:12). and evolving towards that peace. Now maybe you understand why it's not your wish anymore, but it's your E which creates that motion in the world to create peace**. It's that wish to understand more about the knowledge of the U that it is triggering the release of the knowledge to mankind**. Now we are not only that one fish who senses the

ofod and the other millions of fish goes towards, but **now we are that fish which is the emotion of the humans race. One of us wished peace and it was sincere enough to get millions of us moving in that direction. Many people worked towards it but they didn't know where to go, they took banners, shouted, there were marches**. How many march for peace have we seen in the 70s, 80s, and 90s and even now people have given up. But the human race has ofund the correct way to wish for the peace and achieve it, now we understand that our E is part of the reaction of the humanity, and it is not coincidental. Was it coincidental that you felt like loving and you kissed or you cuddled your child to show your love to it, or did it just happen accidentally. Now you have to understand that you are that E**. Our soul, destiny, or what you call wish, our essence of creation has moved the whole thing in the direction peace because now we know we deal with the STM and through that we teach and touch the soul of humanity. The process in the past few months and years we have seen moving in that direction**. (:14). It is nice to see our wishes, you can't say I love you my child and just look for him or her to feel you, you embrace it, feel it, kiss it, hold it. **That shows the E which was set in the brain has shown itself in the physicality**. **Our wishes for peace are taking shape as we saw last week in the summit between the American president and North Korean leader**, and now we see the same North Korean leader yesterday and today embracing peace in China with his Excellency president Zhi. Then you see the 2 reactions totally different. When you look at the pictures of last week, it was all set up, a defeated man trying to buy face, but when you see the pictures of yesterday and today and see president Zhi and North Korean leader is sincere to the ?? , you feel it, and you say yes we achieved it. **But at the same time you don't know what might happen, maybe the child kicks and reacts because he has too much love and attention. But that is the job of us to keep that loving, that wish of peace**. When we see world leaders make these kinds of public moves everything is calculated. And this time the calculation is peace, the KF Chinese, Iranians, American, Africans, South Americans, we all wished it and that wish has collectively the wish of our leaders. **As I said, the Syria war was the last war we'll ever see on this planet. This is my wish. (:16). In a way if you look civilization started from Syria and the war of civilization will end up in Syria**. We shall not see any wars and **that shows the maturity of mankind**. This comes with the knowledge that for **the first time we understood that the STM is within the structure of the man and we know where to go to make the right move that creates the right motion in the rest of the number of the human race, in the school of the fish of this planet**. Now this pattern starts. This school of thoughts that now we understand that peace is part of our soul, our E. **Anyone else that might come up with anything that might indicate war to us becomes meaningless and you'll find out it just disappears**. We have seen the funniest one appearing in the past few days, now we take forces to the **6th force in the space**, and we said, in the space there is no army**. I wonder how much more we have to educate and show the power of the technology** that gradually not only through the science and T and the STM but through change of the understanding of the STM those who are still arrogant enough to claim to be everything else and it will create new conditions for all of us. They stand out like a sore thumb, like we say a black sheep in a white herd. **We see gradually the damages that were created by man over the centuries will heal up. In the coming time and centuries (:18). we'll talk about the bad days when man was wild and killing. We still have a lot to do and lear**n **yet**.

The teachings we have done up to now is to bring a man to understand that the STM is within him and is him. When he speaks through his soul then we call it sincerity, and that becomes the language understood by other souls and they move and they act. We have a lot to learn yet, because then **we have to go a step further. And that is, now that we have understood that we can effect the soul of mankind through our souls, and that we can change its emotion to physical reaction. The soul of mankind as totality is another fish in the soul of the universe. So when the mankind indicates that he is ready for peace and has ofund it within himself the rest of the school of the universe will come to it**. It's very much like when we first ofund ofod or danger and the rest ofllowed and responded to it. Now that we elevate ourselves to the next level of understanding, and now that we understand that we have become peaceful souls, as gradually we are changing, then the soul of the U will respond. **The school of the UC will shower us with love and care that we elevate and educate ourselves very fast in the knowledge of the U. Now science and religion or theology come together because they are one**. In essence **you can't conduct anything wrong in the world of science because the conclusion of it, is the reaction of the man itself (:20). and what man will do to himself.** We have to see how it comes, how do we interact. **A couple of weeks ago we started to speak about light, the interaction of the light, which is the faster speed of communication or interaction between 2 sources of energy. Now if we understand this and the operation of the light within the STM and its transmutation and transportation to another soul leaves a trace of light and we can ofllow it**. We can see it when we become wise to the work of the universe. Then we can see how any **one light shines on everyone else that is of the same strength and can absorb it and be in the path of its motion. In essence our wishes, when it moves from one of us to the others, if we find the facilities and the systems that we could see the motion of the light of the earth, at length and strength, then we see the motion of emotion, of feeling, what is right and what is wrong. We see which light is going from where to where, which light is going from one soul to another soul**. What one soul has given and what comes back. It's very much like a ?? zero on computer coding. The strength of the light from one soul to another is a language communication between the souls and we can observe it, who is talking to whom. Who is transferring knowledge and information, are you talking to the soul of the mother or the father, because at the end of it, **everything even communication (:22). between the souls has a strength that one in receiving it gives and then if you are wise enough or you have the understanding of it you can read the communication between the souls. When we speak about the light it's the light of the existence, of the knowledge, of information. It's the light of communication and it depends on how clear you are in respect to that position**. When you see a thunder on one side of this planet on the other side you can't see it, but if it were transparent enough you would see it. We can see, observe, we can feel. And what the teachings are coming to as we go further is **that where does the man go now that he has understood that he has the power to dictate, to influence, he has the power and access to the emotion of the humanity**. What do we touch, feel. What are our wishes and how much do we lie to our wishes. **But once we become transparent, when we become detached from physicality we'll see those who talk one way and do something else**, and they think, I said and it didn't happen, I do whatever because nobody knows. But when you sit in front of a wise man who can see the ?? motion and

transportation (:24). of information from one to another, or what you call the light of the soul, **you know who is lying to you**. I sat in one of these last Saturday and it really was amazing to see how people lie through the ways and means that they do things and then they think you can't see. **Physicality has no dimension. But when you sit and listen and one says this or that, you see it's very transparent, why don't they tell you what actually the soul is saying instead. When a woman tells you, I love you, and then says, I love myself,** you know what the feeling is. You know how the E is hidden behind words, but you see the truth, what do you do. You keep ?? silence. When a man sits in front of you and says I want to kill those who damage me or my nation, and then he says I want to be peaceful. You see the lies through the teeth, through the soul. Because at the end of it, these people are forever making systems that it gives them something to live. **They don't work through their soul but through their pockets. De Vinci was one of those, he forever went from one camp in Italy to another to sell more modern thinking weapons to kill more so he could have more finances, and that is why he got nowhere in his life. He just did a lot of work. For the amount of work he released if he would have had the soul of peace in it he would have changed the human race that time, 700 years ago**. Now we see people creating tools of war and killing and they hide themselves that they need the money for it, and hiding themselves behind all sorts of excuses. But they don't see that when you sit in front of a wise man like me, (:26). **I see the soul and the intention and I see the lies and have to pretend, yes you are right**. Yes, you are right to lie to yourself and they don't understand that soon they have to pay for it through their lives. This is what is strange. In the past week we have came to the knowledge to understand what the woman lied about, she received it, and she can't handle it, she is still trying to lie to herself, in what she lied was because of something that she wanted. We see teh transparency. **We have to start understanding this because the KF team, scientists and K Seekers are on the verge of space travel**. They are ?? around it and soon we'll see systems. **The electronic systems of today are absolutely feeble, they can't catch up, they can't work within the system of the light. We have to be able through the soul, thoughts, and emotions of the man to make a communication line with the soul of hte spaceship, its control system so that it carries our wishes**. That it allows us to be in the direction of the satisfaction of our E, that it can take us across the space of the universe. Then when you stand outside you see teh light of the communication of the STM you call the captain and the soul of the ship. (:28). It's very much like them talking to each other with walkie talkies with a cable from one to another. But we call these **the light of the STM that it communicates with the light of the soul of any entity.** In the coming time, **shorter then you can ever imagine we will see what you call teh spaceships on this planet made by man for the man**. We will see men who **are the only ones who can get in and out. Then we'll decide because we can see, which man is true to himself. Then we'll understand and we'll see when the lie is rejected, when the lie is not accepted**. When teh light of the STM tells a different story then the sound from the mouth of the man. I love you, but I am unfaithful to you. I love you, but I love myself. But a man has to be true to himself, because wise men like us sees through like a glass, like a mirror. Nothing is hidden. Loving and giving is of teh emotion of man within the structure of man touches teh soul of the humanity. It goes back **to Book #2, The Structure of teh Light. Light not only has a structure but it has an information. It's strength and speed are wrinkles on it, and show what information**

it carries. We need to be able to understand (:30). that whatever man has done in the past will unravel very soon and then we to stand it and see if we have respect for it. In the past few days the American president has said we'll go back again to the moon. I made a comment, have you ever been to the moon that you are going back to it. They say, yes we have been. So it leaves it to us 2 ways. Man is so ?? to the ways of physicality, he sees the ?? of the universe. I make a challenge to the KF supporters, the Americans can't do it, they don't have the means for it, can anyone find a way or develop a system that, as we know **teh Americans are selling and have GPS every inch of the moon**. They have named it, (named) streets on it, you can buy it from a company, it's a American because they have been on the moon. But when you buy property you have to look at it, it's there. I want to ask KF supporter and even NASA because I know they are listening, and the Chinese space program people are watching. **We don't believe you**! When I brought my technology they said, show us and we'll believe you and then you have to approve it. Now we turn the table back on them, We don't believe teh Americans have ever been on the moon, **unless they can show us those American flags which they left on the surface of the moon**. It should be very easy with the present technologies, then we'll believe you. They left one (set of) legs behind where the rocket was supposed to eject itself. (:32). We would like to see those. We are not calling you liars, now we are more advanced, we don't believe in fairytales. Or we challenge the KF supporters and speed up, to catch up and land on the moon and find these flags**. Until we don't them there is a big question mark if man has ever landed on teh moon. There are a lot of discrepancies** but we don't talk. Discrepancies can be explained by different ?? people in different places. If as we know teh heavy dust on the surface of the moon has not ?? very old and American flag and all teh legs, we should be able to see them. We turn the tables not to discredit the American who have discredited themselves if they don't show it. But make a challenge to KF ... or we land on the moon and show there is no flags. They can say we left it there but the people from Mars took it. Now the challenge comes the transparency of the soul and the physicality of the man in the light of the new knowledge. We have to be able to explain and deliver every position. There are a number of teams working towards space lift and motion (:34). and all sorts of things, and some of those who are claiming just because now they think they'll become famous for it, but you have to show it. What the challenges are, **we 2 see 4 groups on top plus the governmental groups around the world who are trying and listening to all these teachings and who have actually made the systems. How we know is because one of these space agencies have asked for fuel from the KF, 'we have a system but can we test your fuel**'. It means that major space organizations around the world are like you and me sitting and listening and learning and copying your systems. We'll reveal very soon which governments and how they are working around it. The only problem is that they have not listened to the teachings clear enough, because I gave you every detail of teh fuel. The **fuel of the spaceships of tomorrow is the creator of the physicality of the SS** and not aluminum ofils and concrete blocks and spherical balls. If your body exists through the same dimension man has to learn the totality and collective work of the body of the man, which is a copy of the working of the galaxy, universes, and Unicose. Then man can find peace and new dimensions of knowledge, then all you need to do is to replicate. I look and I see, (:36). that **not many people have listened deep enough to understand that if you ofllow the work of the body, which leads to the creation of the physicality of**

the man, you should be able to make the physicality of the SS. There is no need for anything else to be done. How far and deep we understand the knowledge will allow us to elevate into the dimension of the motion in the U. The more we understand the faster and deeper we go, the more games we play with the structure of the materials, M fields we use, plus the light which teaches us, indicates to us how to carry out our wishes and become manifestations of itself or physicality in motion or dimension. **Go back to last weeks teaching and listen to it in detail. I have given you the essence of teh creation of teh U. I have given you all directions and indication in the past 3 weeks how to take man across this U** in what you call man's milliseconds. It's you who has to mature in understanding. From teh sun to transmutation of energy, to manifestation of physicality (:38). of the earth. **The sun doesn't have any physicality as such, except the conversion of its fields to its own matter level which leads to creation of its own self. And then in conversion of its energy leads to creation an feeding of teh energies and matter state of other planets. Then is it the wish and teh love of the sun which creates the motion and life on this planet,** or is it pure accident. If the work of the sun has a heartbeat, then **the sun has emotions towards its children and different parts of its existence, the way we do. We know from observations that the sun has a heartbeat. So it has a soul, it has a dimension of existence. How can it be that the STM can create its physicality of teh man and within it carries E, and not the creator of the man which is the source of it, which is the sun**. How feeble (minded) man has been. Do we need to look at everything in the dimension of physicality or only when it suits us. **If teh present science confirms the heartbeat of a planet, or a star, or a U which has a bigger heartbeat, then that entity has to have E, (:40). because creation of repetition of the same, which leads to interaction and non-physical dimension** of entities like the solar system, like the physicality body of teh man, it has a soul, and with it has E. **What happens then when teh man learns this and can tap into the E of the sun. Would we see its laughter or would we become teh passengers on teh wave of its fields to travel teh span of this solar system in no time, as it does itself**. Then the extension goes again to the next step**, every galaxy has a heartbeat, so does teh U. Sometime when man graduates to teh level of understanding the work of the U, we'll find a way to listen to the heartbeat of teh U, which means it has caring, it can love, it has E, the same as teh man does**. It has dimensional physical interaction which is the heart of it, and with it, because of it, it has a soul which is the creation of its fields and its E in interaction. **Now we come to one big question to ask and that is, is there any difference between the STM and the sun, center of the galaxy, or the central line of hte soul of this U? Then what is the line of communication? How do we find other planets that we can go to, because when we left them 500 years ago** they were somewhere else, (:42). with billions of kilometers per hour they travel between one point and another. **In space how do we go to such and such an address**, house number this, apartment #2, where there are no routes or streets, no buildings or apartments, but there is a position where we can find our loved ones. Or have we become too physical and we have to have an address to go to. Or can we become wise and understand that **the knowledge of the man has reached a point to understand that the STM is what we call his GPS. He knows where everything is and has all the knowledge of teh U. It's for man to start using the library of teh STM to understand the total knowledge of the U. Then what would you like, the Gans of CO2, Mg or**

whatever, or is teh Gans a mirage for man to start to understand the new teaching. I most probably lost half of you by now, if you are snoring, wake up, because teh snoring of the STM doesn't create the physicality of the man to be asleep. (:44). How much more do we need to explain, to teach? **How do we create the transportation of the E from teh STM to the soul of teh mother, or friend, or another entity in the space. How would you say I love you mom, when you are in the space, and because of the conditions of life you have lost your lips**, because there is no need to feed, so there is no need for a hole to be called lips. We have lips because it is the joining of the sausage tunnel inside teh man with the skin of the man. Once we don't need to feed teh man this sausage hole will shut. Then how do you tell your child I love you. How do you explain to your mother and father I love you or it's a beautiful day. Words and sounds don't exist, so **man has to learn to talk and have a conversation through the STM. Man has to learn a new way to restructure his brain that instead of creating noise through the voice box it creates an emission of fields through the brain. It shows love and care, eager and anger, then to be able to convert the lights of the soul the way we convert it into E and love and we speak it**, how can we create the same light, but that doesn't need teh motion of physicality (:46). and the mother and father feels it. Where you don't need to go into the house and say it and give a cuddle, you can be in touch all teh time. There is a lot of wisdom in what has (just) been taught. There is a need for the wisdom of the U. **We have to understand the communication between the light of the STM and the light of teh soul of its destination, and at the same time we have to start to learn the way we have a group of us sitting around the table and communicating and talking, joking, laughing or crying, we have to create the dimension of the communication of the STM simultaneously with different entities. It's very much like having a soul talk with the mother, or with your child without the lips moving, and they say, let's go to the park, and everybody gets up and goes but nobody has spoken but they all feel it**. These things need teaching and understanding. It's not going to come by one stroke of teh pen, or by one understanding of one point. It needs the maturity of the man to understand the creation and his own creator. Understanding, justice and fairness and love and care. I asked one K Seeker recently, **what is love?** (:48). **In understanding the new science of man, Pl where do we find love, and why do we express ourselves in physicality of love, the E of loving. In the understanding of the new world of Pl, where do we find love. We explain love is giving and when you love someone you give unconditionally, as does a Pl. So the position of the love in the dimension of the physicality of the man is on the outer boundary of the brain, because that is where the giving is. This is the boundary, this is where it goes, it's the M field which goes away, and the more you can give**. For the first time you understand **why love to the man has a physical meaning, because its soul touches teh boundary of the brain that it touches the total physicality of the man. We got so much into it that when you create another soul we use teh whole body to be able to create that interaction of the physicality's that lead to creation of the soul**. For the first time man understands the position of love comes from the extremity of the physicality of his brain, because that is where it is giving, it's the M field strength which is always teh outer boundary. Then it shows itself in the physicality and that's why we need to cuddle, to physically hold and kiss to show our E be it our lover, child, father, mother or anybody on the street. (:50). This is why for the first time we understand why and how the work

of the physicality is connected to his E at teh dimension of his M on teh edge of teh boundary that it gives out. Now what is the M, it has to have a G. Where does that G end ... which comes back through the M. When you say I love you and you give a physical hug to your wife, husband, child, grandfather, they hug you back and gives you ... **does it touch the M part of your body which you have given, but you have to receive it, and so it has to go into the dimension of the STM**, because that is the source, that is where it is going to. Is the feeling of being loved, shows the source, the station of teh STM, because it has to be absorbed within that he can give at the boundary as a love giving. **The question comes, what is the other end of loving when you receive teh love back? And is that point when you feel your love you have come to understand teh position of the soul of yourself, because that is where the G, he has received, and is absorbed in essence and has been held within itself. How much more can we teach?** (:52). Or does it come to the point that **the one who loves back, gives you, but somewhere in the middle it stops, somewhere in the layers of the brain it stops**, and it says, Oh ... he hates me because this position in the brain coming in is called hate, this position coming in if I feel it means love because it hit me a lot that I can love back more, and as we said, the plasma takes him and then gives more back. We have seen the physical structure of teh polarity of the spheres of the planet. Now we have to understand further where the position is of the STM through understanding the E of love or giving, which comes from the outer boundaries. **If you are in the middle you can't give because you have barriers. The loving and giving comes on teh outer edge sensors of the body, or interaction of the physicality of teh fields of the STM and the boundary of the interface** with its environment. We come to one question, are you true in loving? Or can I feel it stopping somewhere in the middle. **Because in teh space you have to deal with this. In the space teh energy you receive according to the strength he has and where he goes ... clung a flash of light would indicate if teh guy says, 'you are beautiful', but you can read in your brain that he wants to eat me, I am ofod and that's why I am beautiful**. Then I move, but unfortunately you have no lips or tongue (:54). you have no mouth you lost it millions of years ago when you left this planet, and so is the guy opposite to you. He's got no mouth, **but to him you are absolutely delicious because he can create MG fields in the opposite strength of yours, that he can drain everything from you. While you are getting absorbed in teh soul of another entity, .. you say, I love you, and you disappear. Or you create a condition that the loving is so much that I am not appetizing, I am not there to be eaten or touched, and if you want me you can have everything I have but ask politely, because I am here to elevate you by confirmation of my own existence. We start seeing the connections between all the teachings and what is to come and understanding of operation of the light**. How that light looks what speed it carries, what strength it has, to what extent does the light confirms the existence and teh source of the STM.

Are there any questions.

Q: So love is G on the boundaries, imagine the outer core, {wrong off the bat} (:56). Love is M. Q: and the M of it goes to the core of the soul. Can we go to the beginning. I think we want to do a diagram. ... the inner and outer core of our reactor and the potential difference and incorporating this love idea ? Mr. Keshe draws the physicality of the brain, draws 1 line beyond physicality and says this is the dimension of M, because beyond this is there is no physicality, it's what I call ?? **But in essence the G (in center**

of brain) because when it comes in this is where it's targeting. Where these 2 fields interact, if it is here this is true love, if here the guy wants to eat me, if here the guy is lying, and the rest of it... (:58). **In the time to come the physicality of the brain shall not be there. What in fact you'll be is the completion of the plasmatic fields, because in so many ways we still carry the physicality as we see it**, but if you remember if the environment is the balance of the MG field of the bone of the skull, then, plump, it's not there. then **the brain is free to move in the U, because its containment has disappeared. In time man will have a lot of fun and fright with these things**. It's happened, you'll see it**, bone is not the exclusivity of the human race. Bone as the framework as part of other entities confirmation of the existence is very common in the U amongst many creatures.** Now that you move in the MG fields of the U, **where its MG fields matches your bone structure you just become a pile of jelly on the floor because it's not there the bone is gone, but still you have a field of the E and the brain there**. What am I going to do with this pile of meat, how am I going to move this thing. Man has a lot to learn and a lot of fun to have in opening of the space. So what are you going to do, how do you get that physicality moving in the dimension of existence in that part of the U. (1:00). Q: Alzar. How **to make a diagram for the love, lovers can fall madly in love and 5 years later hate each other, but love for a child is unconditional** ... It changes but we learn to forgive because there is no where to go, but with a husband he can go to his mother. **Caroline and I have been together for 30 years, I said, there is a problem with me, when I look at you I have the same feeling when I first met you, my heart just goes bump. I said it should have stopped 20 years ago, what is the craziness you have done with me. I still fall in love with my child, the dog and the bird, another woman or man in whatever different dimensions of the strength. But my love for my beloved, my wife hasn't changed in 25 years, it's very strange, people say after 5 years love dies. We go through emotions, changes, different understanding, but it is us by confirmation of loving we can keep that going**. One of the biggest problems with man is that he forgets to confirm the existence, to keep that line clear that (1:02). I love you. Because when you love, and love in its true essence, it never dies because you keep that light on. You are there to show the path. It's very strange, it hits me hard because now a days because of our work and the way we promote everything around the KF, I am 2 days away and I come home and it just goes, vroom. I can't help it. I said, many times, what love potion have you given me? **But does it come with sincerity and knowing, or is it just one way? And we don't get it back,** it's just us who puts in, but the problem or the beauty with it is, ?? it would hurt another soul to respond back to you with the love you don't get from your lover. **We love our children, we care about them, we do a lot of things for them but how many children return back, and they deny everything, you've been there**, I've been there. The minute the first girl says I love you (to the son), ah .. Why don't I feel this love with mom and dad, so they don't love me because I don't feel that feeling about them. And then he or she (girlfriend) becomes god, and you can't change it. Do you know why we can't change our children's love and they become our biggest enemies sometimes because of bad love, because they don't feel the love we have given them all our life continuously, to us it is second nature, it's the water that runs down the river, we can't stop it. But this Madonna walks through the door and he goes and falls in love (1:04). and she says I love you, and he says, why don't I feel the same way with my mom

and dad, so they don't love me and she becomes everything. **A wise parent explains to a child that this is a love of the dimension which leads to the creation. My love for you, has lead you to be created. And there is a big difference. You are part of that wave which is continuously there, I can't do. You are not just another satellite that has come in, you are created out of me to be. Whereas the girlfriend is a satellite that has just come in**, just like a shooting star, at the moment it is bright and then suddenly it goes poof, nothing there, then what do they do, they come back again, oh, Mama help me. I thought it was a good love, but they forget and the next one comes and they go through the same program again. The reason our love for our children doesn't change is because we have created it, and with our lover it is created for us. It's a big difference. It's a give and take. I was talking to Caroline, I said, do you know **a plant or tree exists and it's held by the ground. We see the roots and we say we water and the plant grows, but have you ever noticed that when you shake the ground around the plant and give it a bit of room and something and it tries to grow a bit bigger**. (1:06). Why? Because man has never understood the way the earth gives nourishment to the plant, the **plant gives nourishment back, it's not a one way system, it's not all sucking it up. It's (also) giving it back. We don't see that part because we look at the growth of the tree. We don't see the energy and love that the plant has taken, that is given and by giving has created a position that it receives from the earth**. And it gets coughed up, because it can't push anymore out, that's why it roots itself out to find new territories to be able to deposit. the plants don't go to toilet, but where do they get rid of the surplus energy, they're another living (being). Now man understands that you have to look into the root system of the plants and see what they chemically change around themselves, that it their toilet, what they put out. But man has never seen it. He only looks to see if the root is growing. We never **understood the principle of creation that it is two ways. We always said, we water it and it grows, but when it grows what comes out of it and what does it absorb from the environment that it has to give out, that it creates a space for it to come in. And what speed. Why does it grow only in the spring or summer and another one only grows in the snow. What has it changed, because it has learned a new way to give out to allow new energy to come in**. It uses the energy of its environment and by giving it, it receives to come. (1:08). But that environment and what it has been clothing it decides if it is a spring or winter plant. You all look at the **electricity in your homes .. why can't you work with 1 wire. If it is a current 1 wire should be enough to light the light. Why do we have 2. Because we need to take, create condition of emptiness that when it gets filled up in the motion** we take something out of it that in that position we call it the light, and what we take out is called the refrigeration, the other for AC or whatever. In essence if you don't have the return and take more you can't receive. We take out more by giving. **In electricity we call it eddy current, and love in the terminology of the emotion of the fields of the man. then what comes in which is the return or feeling it, when the light comes on, that is the STM, that's when we can measure it**, or in one point, is it 20 watt power the other is 40 watt, when it is very near the soul it's a 1000 watt power light. Then when it's 20 watt it's darker we can't see, this shows a bit of fear, and when it's 50 -60 it's a happy time. Don't be too cautious we call it calculus, and when it's there, a 1000 watts, vroom, you hit the soul. We have to **understand the essence of creation. Without gravity there is no magnetic also. (1:10). Without the eddy current there is no current. Without love**

there is no essence of receiving to feel that love, then it becomes the essence of the creation. When **we talk about loving our children and it dies with the husband, don't look at the husband, you have not taken enough to open its position in his heart to give more. I am part of the blockage. I am part of the stopping to recharge it and then I blame him because I have not taken his burden, and have not given him the freedom of the space, the pleasure of what he wants, and then I blame him because I can't give, because you haven't taken out what he doesn't need to satisfy ?? his own need. But on the other hand, have you understood that you fell in love with the physicality and the heartbeat** , or **did you fall in love with the soul**. I feel in love with the soul of Caroline, it just happened when I tell people how I feel in love with this woman .. just crazy. **It doesn't mean that I don't fall in love with my children, or another woman, or another man's writing, or another car, or somebody from planet Zeus, but in that essence of creation, the commitment of physicality**, this is what it is. How come we see a father with 2 children, and I have seen this many times, watched or observed it, and it is so hurtful to see, but parents are not aware of it because **we have never been educated about the distribution of love to our children. (1:12). Watch a mother who has 2 children, the first child was loved beyond because it was the first, the second one comes out of ?? to being loved, we forced the first one to be there and now he becomes a spare part ?? willing to ?? , but everything goes to protect the eldest one. What do we create, hate between the first and the second,** because we haven't learned to love equal and show them, not only I love you, it's there, we love you together with the new one. I see this many times. Then **what are you going to get, a depressed first child and a hyperactive second child, because he realizes that by me being active the first one doesn't get anything, I get everything. And then you'll find the second one always dominates the house because it's the only way to stop the first one. But if you teach both of them from the beginning that the love for both of you is the same, not only in talking but in showing them.** (this doesn't make here should be before the positive statement) You see the first child hides behind the second, what he gets and I get the crumbs. Loving and separation of the love, blaming to be loved has to be felt by the STM and not the physicality. A lot of parents don't understand this. They have never been taught. It's like the king loosing his throne, now there is a new one in .. because we are looking at the new one we forget the second one. (1:14). Very few parents, fathers don't understand this. Much more mother understand this. Look at this one, the parents have a daughter, the father falls in love, they can't do anything psychologically, she is still innocent, even though she is 18, so he has to protect. the boy becomes a ofotballer, he'll be out. So what happens, the father finds a lover to give so much love to, and the one who used to be loved so much becomes the second child behind. Is the mother picking up the crumbs. So by giving so much we ?? stop at the barrier to the second one. **The mother becomes jealous of the daughter and then they become the biggest enemy, everything she does, she's another mistress. But if we learn (confirm) through the STM that we confirm to our wife, partner, I love you the same, this is the physicality of the love, which I care so much for and I care the same for you. Confirmation of love and the equal distribution of it has been forgotten by man and is the creation of many life long sufferings**. This is the strange thing about the man, he always looks through the physicality and not through the STM. When you fall in love with a flower you say it's beautiful and everything else about it, so

to with somebody else, a car, a vision. What are we going to do in the space when we fall in love. My god it's craziness. (1:16). Man when he opens the span of U and then sees the soul and its beauty man will fall off with the whole of the U. Then how are you going to choose which one is the husband or wife and which one is the child, or do we understand the essence of the return of what we receive, shows if it is mutual and to what extent. **They can't lie. You can't cuddle your wife and kiss when she has another man in her brain** because now you see it, au oh darling, stay there, stay with who you like to be, don't talk to me this way. **Some of us will become mature in understanding the E of the soul, feel these things, we know these things. And man will become more and more expert in it. In the space we need it, otherwise we come to the point that because we create the wrong field, or we don't understand it, we become that magnet which absorbs, because we give an indication to the other soul, without us knowing, because his strength of motion (or emotion) to him is, 'I love you, you can have whatever you like from me', and he needs to convert the energy to something else, you become part of the drop of love in the entity in the ocean of his sou**l. It happens many time. **We have to understand which love comes from what and how we distribute and accept that love from within the structure of the Pl of the STM and not in the Pl of the physicality of the brain.** (1:18). If you have that brain and you sit here (draws a circle) and this is the E of physicality. This is the structure of your physical brain, and on the right, this is the structure of the Pl of your brain. You feel pain here, then here on this side. Anything in that dimension of sphere is pain. Anything in this dimension, around the outside, is physical love. **We have to distinguish between the physical strength and what stops in the structure of the physicality of the man and the Pl of the E of the STM. It's the same thing, but now we have to find, this one is physical, and this one is in the dimension of the fields of the U which has not ofund tangibility**. But the problem now a days it has **become very fashionable to say, 'I love you', and I love 2, and the boyfriend next to her I love you 3. These 2 are with the soul but the other one is with the mouth and if you are wise enough you see right through** it, oh, she thinks I am a ofol. (1:20). it's very much, 'I love you', what are we going to have for diner tonight. He's goanna finish talking me, he thinks I am a ofol. **What they call "rebound love" is the biggest disaster for man in the space. You'll understand very soon**. Q: Estella last name is love. .... (1:22). The question of love has been with me for a long time, I understand that there are different kind of loves. When you said we are always looking for the existence of light, that reflection, our soul exists on the physicality. Love was a big question for me since I was young ... So you married one. yes ... No, I said, so you married one, love was a big question so you married one ... so in a way you were in love with Mr. Love. Yes. ... **we are always looking for confirmation of existence and we forget when you love you give to acknowledge the other person** (1:24). .. you give to that other person unconditionally, because love is not possession ... talks about her ideas ... (1:26) .... thank you. **Let me explain why we emphasize on love. we see it. In the U what we call love is what we feed out. (1:28). What we give and are prepared to give, and those who have the same need as us to give from theirs, they accept and create that link, they give that we can receive and in turn they can take what we don't need. But is that love or is that the dimension that I want to be connected and that connection allows me to exist**. As you said, we tell someone we love them because we want them to confirm that we exist. **Most of the**

time that we tell to somebody 'I love you.' Is that the physicality that mentions that I exist, that I can love, that's a gift from me that through loving you I confirm my existence. Or is it that I give to you that you take what you need that you can confirm that you exist, that through your existence I exist. If you understand the work of the U, the science of U is a theology, that's **why many scientists who come to understand**, especially physicists who work in the dimension of understanding **the work of the U, we don't become atheist, we come to understand the truth and with it we understand the totality, and through this we create the line of understanding, and according to the strength of how much we understand, we create a line to the Creator, we become part of the Creator,** because then we understand how He has created it, and with it we become the mirror of the soul of the Creator. (1:30). **In fact, in time so many people don't need to become. In the space man will see many, many creatures that live in reality, what you might call the path of Christ or Buddha, in the truth of their essence not in the physicality of what they live. then you find out this is why the U is so peaceful**. Because according to the level of our understanding we become closer to the Creator**. Partially, 90% of my teaching especially in the physical dimension of the reactors cores and everything else, is to open a path gradually for the man to walk away from physicality and understand the true way to the Creator. The time of showing you a fire, a bush, and god knows a storm, is over. We show the path to the Creator through the love, which means if you give truly, you receive truly back from the Creator, and with it in your actions you reflect His emotion and His light**. Does the Creator give so many fields out for Him to receive them from so many to confirm that He exists? In so many ways**, yes, because without our confirmation or reversing back through our souls, He has no confirmation of existence**. (1:32). (Q: your connection to the Creator through the central sun maintains you with the power that you exist ... the back flow powers the SS) **Something very strange, I live a very horrible life, but in so many ways I have to live in the dimension of the man**, and so many things goes when you see what I see ... at least I look at in different ways**. It is very painful living on this planet, it's very hurtful. So many times I have said that if I didn't take teh mission to change the course of humanity I wouldn't stay here for one second I would go home where there is peace**. And so many ?? dangers come to you and you see it, and then you think, what about. A few days ago I walked into the bathroom, over teh night or whatever, an ant which has wings, you know the way the ants live, **once they impregnate the female ant in the air, they drop off and they die. You look at it, it is such a tiny little thing, and when you have the knowledge I have, you just look at it. I looked at it and I said, where has your soul gone to? Which dimension of stars in teh U have you become, that you left your physicality here**? (Q: It's a process.). It's not a process. It's comprehension. (1:34). (Q: Well, yeah, but some people can comprehend in 2 seconds, and some people have to go through the process to get teh click). Humanity has been doing this for millions of years and haven't understood. I cried when I received the letter from president Obama. I felt ashamed to be a human. (Q: I experience the same but at one point you understand and you put the emotions on the side and then you can see teh truth ..) **But what do we want to see?** (The truth of our lack of understanding, our blindness and being trapped in a reality we can't see outside the box). Let me explain. **Do you know why I decided to put all my efforts to the Chinese government? Especially president Xi, to back the Chinese for peace and prosperity**. (Because I

think they have a long history of understanding the U in a different way.) No I received a **letter from president Obama**, it said, Dear Mehran ... Barack. In the communication, the world's most powerful man, **he tries to explain to me why he needs weapons of destruction and killing, and calls himself the man of peace. When I read this letter. It was 2 pages, (1:36). I felt this nation doesn't deserve to be in teh position that it is**. It needs a nation that understands what peace is. Line by line, literally word by word, Obama used nothing but justifying killing**. It's the most shameful letter I have ever received. I made 2 decisions, I had a choice to abandon everything, or take position with the Chinese. To make China the peaceful land through the knowledge and by path of history, I have ofund a man in president Xi of China, a man of peace very much, maybe there is a reason we are both at the same time. In the current time**. I see teh course of change. **Because a world leader who calls himself the most powerful man on this planet, is actually the most vicious man on this planet. There is no love, nothing but hatred in the position of power**. I made a very clear decision, I decided to bring man to a new level of understanding. To a new way. Fighting it is no good. It wastes too much energy, **but loving it was easier. (1:38). I have showered the Chinese nation and its people with the love of knowledge**. People don't understand teh amount of effort we have put into China. And the world will ofllow. Because in essence, if we change the position, you'll see a lot of changes coming up. Nations will stop spending on armaments and first feed their nation. **We see that with president Xi, he is putting a lot of effort to in essence change the poverty in his nation. Not many world leaders do, we saw what happened in America during the hurricane** (New Orleans), the truth came out. I decided to shower the nation with the love of the knowledge and that's why I said **China will be in teh space in a very short time. But that knowledge will be used for peace and not for war**. It is teh trust that I have. It's very much like what I said about **the soul of the fish that it changed the whole life (1 fish in the school directs teh whole school), which now we understand the STM. I work through the soul of president Xi in a very direct way. One day I will explain. He is a tool for peace in the knowledge and the love of the Creator**. We have seen all teh previous Chinese and Russian presidents always answer, tic with tac, but the wisdom of this man, he doesn't fight back, he takes in and finds a solution without war. He takes his time and teh wisdom of the council he has with him. (1:40). He doesn't retaliate with another nuclear war the same with what we saw in the Cold War, if you have 200 then we make 400 and we'll see. He puts a lot of love into his nation. It takes a harsh time for people to understand this. Chinese are careful and always thinking what's behind it, why this happened and why is he doing this. As someone who sits outside teh Chinese structure, and I have worked with world leaders for such a long time, I (can) see teh love a the leader for his nation. We don't see (that) with the Americans. The love of the Americans sits with how powerful he can talk rubbish. It doesn't matter .. (But there is a problem with ... because we are all leaders and equal. ..) Listen Love, you try to explain this to the other 6.999 billion we are equal. (let me finish my sentence. The problem is when people don't know something they keep believing in the way they used to do things. And it's all about control and I am stronger then you, competition. And no co-creation, and working together as teams in a cooperative and peaceful way. This is how I see we are going to move forward ... (1:42). there is abundance everywhere but they told us that there is scarcity and you have to fight or compete in order to get things , it's a very deep way of

programming, if we understand from the field exchange, how you give and receive is how the U works and that what has to happen on Earth and we have to be One Nation). **You see the strangest thing is, how do we see ourselves in this structure? Am I one and do I count, or I have a soul and I am counted. If you understand the example of teh fish in the school of fish, then we understand that my physicality is irrelevant, what I carry through the message of my soul to the rest is what creates that motion. We have to become that fish, and have the understanding that we all trust each other, because full trust in all being one soul, is the safest to know which way to go to avoid danger or to eat**. Man has lost that trust and part of the teaching which is becoming **the cornerstone of the teaching of the KF is to create that trust**. Yesterday I was talking to our lawyers, as you know we still a case in Belgium which is running. I explained how the Belgium government has walked themselves into a big trap and very soon we'll see (1:44). top people in Belgium in prison because of the KF case. I won't go into detail. ... the reality is, can we change the soul of this nation or do we leave them. For it is very difficult. **For Mohammad as we have seen he took the love of God from the Jews, and they became nomads because of what they did to Christ. We saw Bahuala, he gave the love of God back to the Jews, which was his biggest mistake and we see what the Jews have done.** When I look it is a test for my soul and my physical dimension, what am I going to do to this nation that is bending backwards to destroy me, but the problem is that I have a child from this nation. **My children are connected to this country called Belgium and my wife is a Belgium. It's not something else (it's not a nation that I am not connected to), so this has given me a sense of balance to understand the level of love even though he has created so much pain. There is a discussion at a very high level that Belgium should turn into a republic because of the situation with KF.** You'll understand when it comes through. (1:46). Because I can go with the power and knowledge I have to punish this nation beyond understanding of the blood, but I carry the blood so it has to bring, it has been my test to be correct in every way because in trying to stop the love of God or Creator or my knowledge, or my way for that nation, I harm my own children and the woman I love so much. **So it has given me a balance of understanding not to revenge in a physical/soul dimension, but at the same time it gives me a knowledge and an insight to be able to correct those who have gone out of their way to be wrong. The situation with the KF is a court case, it's so powerful that it will change the monarchy in Belgium.** The case is getting put together in a very powerful way and the structure shows what it will come to. It's not that we lost the case, we got it the way we wanted it. But I am a patient man. ... since 2005 I stood everything with this nation, the cheats, lies, murders, and everything else. But do I stop loving the humanity, (1:48). in which one part of it is a sore or a nail called Belgium. Or do I chop the leg off and say that is it. This was done before, we can't do that. I have many discussions with Carolina, she says all the Belgium's are not the same, but I say it is the way you have been put together. On the other hand, my love for her, our children. We were crazy about our children and we have seen how this monarchy has hurt our children. Very soon the Belgium nation will separate itself from teh monarchy and the monarchy has to stand their own way. It comes because of our court case. Because the nation wants nothing to do with them and then they have to stand for what they have done**. But do we punish them or do we elevate their souls that they walk into ... and they are walking to it**. You do not understand

what is going on. So many times I pray for Derek, give from my soul to D, and they have walked in. They are the tools for the end of ?? of mankind. ... **The whole structure is we don't fight, we elevate, we give unconditionally, knowing that what is taken from our love for them. ?? we become teh resentment for those who wanted to take from us**. And then they walk away through it. Let me explain financially what they have done. The creation of KF and what they have done to it when we moved out of Belgium. They thought they were very clever making us (out to be) whatever, has brought us to work with all of you.

(1:50). **if the position of the situation would have carried on and would have embraced us with everything, you would never have heard of KF the way you do today. Because of this we spread the knowledge out. But economically what has happened, one of the most powerful technologies has moved into China**. The nationals of Belgium will ask the question, how come we lost the biggest asset, it's not like before you go and capture a country called Congo and rob it, us scientists at my level, there are thousands of us, we are assets to nations. You call it patents, scientific rights. Now my knowledge and work has become an asset to one of the strongest nations and I stand by it. People will ask how come we lost it, because of a king who wanted to steal it. The resentment will come from inside to get rid of inside and then mankind will find out we don't need kings and monarchies. We don't need people who call themselves bigger then us, as you said, we are equal. You don't see the implication and application of what is about to come with this court. **The biggest thing the kings did was to put the police force behind it. The biggest mistake the police force did was to spread ?? it the way they did.** We don't explain anything until the final stage then you'll understand. **We are putting in for damages in excess of 20 billion Euros to the Belgium government and excess of 200 billion.** You'll understand how it is calculated very soon. The nation has to pay because they choose. (1:52). The damages are not to me but to the KF. So they are trying to uproot the KF but it can't be done. Soon we'll release documents which we ask you to send to every lawyer, judge, city district and court across the world, then you'll understand what it is and why we do it. You helped us you went to the court. The presence of those who went to the court brought the end of teh monarchy. Those of you who did your affidavits please get them signed, all the pictures you took and signed affidavit, we need that. Send it to us as fast as possible. The case is nearly complete. **The best thing that ever happened was those who went to the court. I thank you for it. You brought the monarchy to an end**. Send it to us. It's the end of all this killing, murders and the rest of it. .. I thank you for everything you are doing in the background. Do it as fast as possible. We need it in the next few days, notarize it and register it in the courts. ... every single picture you took needs to be notarized that you were present in the court, and others, the pictures of the police officers in the court are important. Because then they say how do we know who it is. We need your pictures and everything you did. Because it's the process. We gave you the love, but they took from us, (1:54). but the thing is they brought their own demise. We still need to understand that we are part of a structure. **You have to feel what I felt, I walked down the stairs with my son and he said, Papa I can't walk, and I realized later on that John had put poison and tried to kill him. And this is a man who pretends to be a father to children and grandchildren. It's very hard for me to be impartial, this is a test for me. To kept my soul on tract so I don't do anything wrong, if I do it comes back to me, it's not the**

fear of coming back to me, it's a guideline for me, a test for my soul to be correct in my physical dimension. Loving is not just all giving, it's to know how to give and to what extent that it doesn't become hate or resentment, but at the same time control that leads to it. I am not a pragmatist, I am very logical, I am a scientist, everything has to make sense to me, not only to my science but also to my soul. We need to be able to understand the structure of the STM to be able to understand the physicality. (1:56). **We need to understand the transfer of the E and the fields of transfer of communication between 2 souls, between the soul of a craft, SS and the man. What we are looking for even in the SS development, how can we find people who understand the work of the soul of the spaceship**. Very soon those of you who develop and become part of the space program, you become expert in understanding if you are open, this ?? with this soul of the captain I will be riding a very bumpy road, and if I go with this one and give my soul to him as trust I'll travel the speeds of the U. These are the stages of understanding and then you'll know who is a good or bad driver and who is on a donkey or driving around with a Jumbo jet, but it is all the same soul. **A lot of KF KS will change very soon, because a lot of you lost, you are ashamed to be because of what they put on being associated with this or whatever, but when you change, you'll say I was a KF supporter, I know but that was your test to understand the strength of your soul compared to humanity**, not to the KF, to your own dimension and existence. Recently **we have appointed a beautiful man to Chinese KF, it has been kept away from public**. (1:58). He has accepted to be in research. I know my T is in safe hands, not only because of it, but we see the soul of it**. It's not that we put everything into China, we do because it's a tool for peace. I put a lot of effort into Europe for 10 years but it was nothing but robbing and stealing**. I put into China, we still see some misconduct, but we see people are there for the changes for humanity, the work. It's not that they are any different then the others, but the guidelines for the existence is slightly different, it's positive and can build up. The head of Chinese research, I agreed we would never release his name, but it will be shown how this T will go very fast with him. ... the topic to change humanity is more important. ... the teaching is not always how the light is or the reactor moves, sometimes like today we have to understand the essence of the teaching. (2:00). **And in it and through it we find our soul which is the next step of our teaching. I always said, that when I write the 9th book the essence of the soul, that will be the completion of my teachings. The soul radiates and at a certain point when it reaches the surface like the gravity of magnetic field it becomes the surface of this planet, in the dimension of the life of the man we call it love,** and then we feel it through the physicality of the man, we hug and kiss, embrace each other to give it. And we know when we hug someone and they say, I love you, and there is a cold dead body in your hands. You know you are not getting anything. Do you drop it, or do you give a little bit more to confirm I can give. Any other question. Q: Lawrence (long winded) .. (2:02). we are creating the CO2 in the reactors ... they are just like the plates of H, H2, and H3 .. (2:04). .. (2:06). ... Did I mention all the topics you mentioned? **I don't know it depends on what people take from it. Each one of us takes from this according to what we understood from it. Each one of us will do and react according to what we think we understood**. Any other question. (2:08). Ruti Q: you talked about the strength of E and that the love is the boundary of the E. If our E is also a Pl, ... what do you mean. You said love is the boundary of our M, right? **Love is the boundary of**

our physicality of the Pl of the man ... of the STM in the boundary of his physicality. We don't feel love 10 meters away from us, huh? What we love we usually hold, we love our children we hold them. We show it and convert it into physical dimension, that **extent of love can be extended to**, another 1000 meters **to whom we target it to, it will still be received, because then we add a dimension of being able to receive it**. My question is which is the higher emotional strength love or hate... It depends on what you want. (2:10). The highest emotional strength for what, sharing or loving or anger, and according to what you are in it. Q: I mean the highest strength the most close to the soul? That is the mystery for the man. Q: But love is ??? the teachings ?? **Yes, but the love we explained is the point of giving, so it is always M, so how can love be maximum in the soul as G, or is the opposite end of love in receiving also? Or is it that what we need we receive and we call that love in return**. Is that the satisfaction of the need, where there is a satisfaction of giving, the 2 and 1 becomes of 1 strength and the other on the receiving end strength. What do you want to call it**. I call the love that comes purely and reaches the inner sanctum of the STM, the love of the Creator, because every other love has a strength and somewhere in the brain of the man it gets stuck. (2:12). In the future I will explain what I call the eddy current, the return of the field, then man will click on it in no time to understand how much he can change the existence**. We are not there yet but in time it will be explained. Q: Caroline asks, you promised to expand our knowledge on nature. (2:14). Q: Last workshop the possibility of creating Gans of a neutron from our H, H2, and H3. was discussed ... There are many ways to produce gases .. if you can go back on something very easy .. (2:16). ... Can you find the video of the **UOF over Jerusalem around Christmas** a few years ago. (2:18). ??... fill in the 3 reactors with H3 and let it run. H3 is a giver. (2:20). but at the same time it can give and create a G field. If you get it right one of them will turn slightly black. Another one will turn a slightly different color. **If you understand the essence of the creation of the fields in the U, you have in the 3 reactors, H, H2, and H3. The balls just change color, because in MG field essence, it works this way. It's gets you confirmation that your first material was H3**. (can't show the UOF video). He draws teh SS over Jerusalem. Over the central band you see something strange. (2:22). He draws **3 sets of lights repeating around teh band, strange enough these lights start revolving. Do you know why? You have the answer here. The H, H2, H3 in the reactors. It's not that they are flashing lights. It is due to the rapid rotation of the Pl fields which are here, and it has a reason**, so they continuously change between the 3 colors, he draws an IL between the 3 H3, H2 and H, they haven't made a new light it's the natural interaction with the environment, and **in that process they create a G pull towards the center**. When someone tells you they have seen a UOF and you see this, now you understand teh science behind it. Because you create your H, H2, H3 this way. And the color which stands from the beginning is your H3. Now **how much electricity current do you want to use, there are different ways how we do it**. Man has ofund different things for himself. **The lights you see on the boundary gives you a lot of indication ... later on I will teach you. I make my H3 this way and I have done that for years. If it is ready you pick one up, and if you leave it for some time the change (2:24). their color back again because they absorb energy from the environment. The KF Chinese man is a genius but he doesn't understand the physics of it and sometimes he needs an explanation for it.** When you try to replicate teh work of the U understand

everything about it before you can replicate it. You can't just make a man without part of the heart or liver because you never understood it. If you put a picture of what you call a UOF in front of me I will tell you if it is real or not, because I understand and I come from that nature and I understand the full process, what everything means and which one is fake. The strength of the color, which one, even tells you which part of the U they come from, because according to their knowledge they use a slightly different process. (2:26). it's like when you see a car and say, oh this one is it a Mercedes made in Germany or in America. **When we look at the structure (of UOF) in the space we know where everything comes from, the registration number, year it was made, and who is driving it. This is part of understanding the totality and why I teach piece by piece. This is how we evolve around the teaching of the UC and everybody enjoys the system they made**. The process of how you create H3, you have the basis of CH3, which is ?? a sense of the creation of the blood of the man. If you separate it in the right way you create other dimensions which its new materials, ways and applications. (2:28). **We have to be able to understand the totality of the physics and the interactions of the fields, not physics as a spanner (wrench) and Newton's Law**. Any other question. Q: When Gans obtained without current (2:30). ... Gans of rust. .. Fe, Cu, Brass, Zn .. You have created blood, hemoglobin if it is in touch with the fat on the top, AA, and if you just immerse it, it's like a Pl without the hemoglobin. (2:32). If you stick the nail half in air and half in liquid where you have created that CO2. ... Let me explain, there is electrolysis and there is Gans production, they are 2 different things, with Gans production we still can put current, we still do on an industrial scale. **It's electrolysis if there is an acid in it. If you keep the salinity high there is no acid condition and it stays a Gans. It's very simple**. (2:34). .. if you carry on using the same water you'll find that after awhile you can drink the water because it's absolutely sweet. Those of you who work on continuous production **at a certain point the process of having salt changes and you just have a small part at the bottom of the liquid, the top liquid has no salt in it. ... if you take a system so far you'll see crystals at the bottom and at the top there is no salinity**. ... (2:36). .. The point has come that you have to move on**. Even the production of H, H2, H3 is obsolete. If some of you move further up in the knowledge you'll understand** that. We teach everything. **The setup for the Chinese space system is far beyond these things. It's been in the teachings for the past 2 years, I have explained everything, but people don't hear**. I don't teach coded, but to the understanding, and those who understand can use it. In the process of the maturity of space T the whole understanding is very different, because we have to be able to understand the whole spectrum of knowledge. (2:38). **It's beautiful to work with Iranian physicists at the space level, they see everything as a package. They don't compartmentalize into this and that, they see it. .. they see the totality**. You have to understand everything. **Different cultures look for different things, Germans look for perfection, but they forget about the principle .. the Chinese take and have to put it in balance, the Americans don't understand it but they put so much into it so they can show something and then later it can be corrected, even if it's wrong we'll find a way to prove it is right because we showed something**. The Iranians have a different approach to space T. The beauty of the human race, when we mix all we se the totality of it. I stand behind Chinese for peace process. In a very short time you'll see a flight out of China. **I guaranteed them that the Chinese space flight will be done by public (2:40).**

not in the hands of the government. We are done with governments. We shared it with Iran, I guaranteed and I'll keep my oath and my word to my nation. But now I have a nation that is the human race. We'll keep it open to all of you. Even when we show it you lot will not understand how it works. It the understanding of space, it's not just making a Gans and it does this. **I can produce anything you mention in the Chinese system, be it from diamond to ofod to free energy, lift, speed and the rest. Because everything is considered in this system**. We designed it, worked on it step by step. Everything is done. ... (2:42). Summer promotion ... (2:44). talks with Giovanni, Naomi will remove pipe from feeding the stomach ... (2:46). (2:48). talks about KF products for sale .. (2:58). (3:00).
(3:02). Promotions of products. (3:04). if they place an order for 1,500 they get these extra products free. .. groups of people can place the orders together .. (3:06). Post a link to Maltese program about Naomi ... Xarabankbackstage.blogspot.com ... .
(3:12). ... the beauty of it is that the knowledge is shared. How we can change simple things with each others emotion. (3:14). (3:16). the latest meeting photos of President Zhi is not available yet ...

END

230th Knowledge Seekers Workshop June 28, 2018

(Structure of the light, Belgium court case, How the kidneys and large intestine work to convert nuclear material B12 which is actually like fusion, No one should die of kidney or liver disease we can move teh Ca out of the liver with the technology, About the lies in Belgium court case with the death of Nella, Wrong about Iron being the only magnetic substance in the universe would it be magnetic in the next universe, Everything is held together by M field forces, The Chinese reactor is so complete the way I designed it for everything needed in space, It will be controlled by thoughts, Through love you give to the soul and can communicate with every cell in your body, We can create new life without physicality, We come to this planet to enjoy the physicality because the rest of the universe works on the soul level and the energy, The decay and division of the neutron is a continuous process in the universe and is so simple, When a neutron decays it still has a remnant energy from the first division and continues onward therefore the Creator or original neutron is within us and this is how we are connected to the Creator, Measuring the water level in the Gans boxes making water, how life started on this planet, Life is not exclusive to Earth but like the Cup and can transfer fields anywhere where in the universe where the conditions are right, If enough people sincerely wish for unification with the Universal Community we'll delivery tonight even, The layering of the Gans's and positioning lead to motion this is how planets rotate further positioning is how stars are created, The ocean currents are created by the different salinities, This is exactly the same with the brain, We need to develop our sense to feel and recognize the Gans's, Gans Carbon in diamond structure, Why all the plastic is gathering in one place in the ocean the magnetic field of the C links up, Salinity in the Gans is created by MG fields and can't be washed out to 0 it is produced back again according to the field

condition, It's about creating the conditions for the matter, Explains the neutron and nuclear decay, With the division of the neutron (it becomes a heat when it slows down) comes the release of MG fields that can be used to create anything anywhere in the universe and this leads to peace, Inter-atomic plasmatic fusion is what leads to creation of the universe, Fields in the universe existed their interaction lead to creation of the Creator, not the Creator leading to creation of the fields but where did those fields come from, ,)

(:17). people are trying to see if they can create what we have been teaching lately. **One of them is the light and the structure of light, but one thing that has to be understood is that light has a strength and intuition of its own existence, but conversion of itself into matter state, or sub-matter state, or above matter state, according to what it is attracted to and what it likes to enlighten.** Many of you are testing the teachings of the past few weeks. I think you are all looking very much. The early teachings of 4 or 5 years ago, covers what is to become the flight system of today. A lot was taught, listen to the first 10 to 20 teachings, then you can complete a full circle. It is important to understand how you convert, transport, and then transmute, and then how you become the beginning to start all over again. Many of you have skipped one or 2 pieces of this, (:20). so you don't see the whole package of it. different parts of this have been tested by different parts of KF KS and they can't connect to each other and it's time to consolidate it. Many of you who have done the tests start talking to each other. This is where as One Nation collaboration has to start. Many of you have tested different aspects of the T but you don't see how to bring it together. the Chinese KF spaceship program is head on course. We are planning and have announced to the Chinese government and the tests will start. What will happen depends on KF ... (:22). we are ready to test... if once this takes hold there is no reason not to open the space to man. ... (:24).
.. there will be massive unemployment in US after the release of this T. Nobody will buy a single gun or missile. This will complete the process. ... (:28). **Those Americans who are always online, we have given you the final warning. Start closing your weapons factories because nobody will buy it. We have talked with governments in the background, they will cancel all their orders for weapons technology**. This process will hit arms producing nations very rapidly. The government of Belgium will collapse because 40 to 50% of the income is totally on weapons industry. I told you we don't have to do anything, the nation will strangle itself. This goes the same with a number of other governments. What we call the One Process has to be done otherwise there will be a lot of lies for selling arms. This way it's a sharp, very powerful delivery of the T, and change the oil industry. The dependence on oil will become zero in the next 3 to 5 years. This closes another chapter. it will put pressure on a lot of governments. Thanks to all the K Seekers for developing the T, we have used your shoulders to stand high in delivering the latest technologies. There are a number of hidden technologies which have been across the KF websites but you didn't notice and they have been used in the new systems. (:30).
.. the first passengers were offered to wife of KF China and in time to the Mohan's. ... (:32).

... Any Questions. (:42).

(:44).
(:46). Belgium court case ...
(:52).

(1:00). ... It goes back to the Kidney. The T if you understand it brings you everything you need. Look at the structure of the kidney. **The dialysis machines of today are a squeezing machine they are not the way the body works.** The body works in a very perfect way, this is why are a time people on dialysis run into problem, because the material doesn't work, it takes material out of the body, it doesn't convert it. **If you look at the kidney, or even the large intestine of the body, you'll understand the secret of the conversion, conversion of energy into gas, or odor, what we call diamond structure, conversion of the energy back into a nuclear composition, confirmation and gathering of all the energies together.** One of the main things the world of science doesn't understand about the large intestine is how at the last part of the small intestine and the beginning **of the large intestine have created a condition of creating nuclear material, B12, when it looses energy in the process of going through the body it absorbs its energy back to become nuclear. ?? B12. And then what do you do? (1:02). You fertilize the plants with it and we eat it back again**. If you look at **our own body structure we are one of the most advanced nuclear systems, what they call and have been trying to call, fusion**. In your body the fusion is complete, you eat ofod, you take the B12, you convert the energy to a level that it becomes radioactive and deposit it in certain glands and when they loose the energy your body releases it again as an energy, back as a matter in the intestine, and then it energizes it back, it fuses energy to it that it goes back to become at the level that the body can use, but then at that point it can't feed itself back. **Most probably if we go through the evolution of the system our body will find a way to feed B12 back to itself that it doesn't need to go out and gather it. ?? Leave it as an excrement, you plant it and give it to the plants and again through the same energy conversion** you eat it back again through the animals and ofod. there is a lot for us to learn and if you learn this and understand it you can do a lot of things that it looks like they are magical. By trying to discredit the T they have stopped many people to carry on with the work, but now we'll reverse it. **You have to go back to the point to understand how the process of whatever you have been taught is part of your self. If you look at what I have taught you in the past 5 years in my books and all the teachings, I have not taught you anything which you do not know, which you are not made of**. (1:04). It's the K seekers who have to start unraveling the truth the way it is, the way it will be, the way that it has. **When you speak about the kidney, nobody should die of kidney failure, or liver failure or massive obstruction of the liver with the cancers where calcification stops the flow**. Doctors like Dr. Rodrigo should be able to do this in the flick of a finger. What is calcification, that it blocks the liver and it enlarges so much, and then you die of liver failure. We have seen how you transmute energy into matter and the matter into energy. **Doctors in KF understand how to remove Ca**. Blocked livers expand because of a backlog of liquid in them. It should be very easy for those who understand how the system works, they can remove Ca from the lover and all the blockages go, it's like a dam ... **You have a Ca, make it into Pl, let it transmute through the body, take with itself the energy of it, it arrives on the other**

side, in another dimension of the Ca of a lower (strength). You just take the Ca out. No one should die of these diseases anymore. (1:06). A couple days ago I had the pleasure to look at a video my father sent to me. Last year in June they sent him home to die, on an oxygen machine with 2 to 4 liters capacity that he could just barely live. It's a year later, no oxygen and he travels. It was just through him using the T on his own accord. Tell DL ?? for saving my fathers life. Using the uniform of the police is the most criminal offense let alone destroying evidence. We call in for Nella's mother and the mother's lover as witnesses for the doctors that no operation was given to Nella. ... In fact the mother left the window open at -70 degrees to kill her daughter. We give evidence. The lovers of the mother will be called into court. The lies written that she was given ofod, but the fact is she was admitted for pneumonia when the mother left the window open. This is how much lying has been put into court cases. Now we call the lover in also, he was a medical person who was signed in by the mother to be present. Now you understand how we are opening the case. Lying is big in the courts of Belgium. It's all been fabricated. All the evidence has to be opened up. (1:08). ... another man .. court was told to accept the lies. ... the mother lied 4 years ago and within months of giving false evidence she lost her little girl. Eye for an eye, lying while she said she received her service, it was organized by the king. This is one the most powerful technologies that they thought they would control. They are one of smallest nations on planet and biggest nation in Africa called Congo. .... we open a massive case for the KF and we waited for it to go beyond the borders. (1:10). ... their
(1:12) ...
millions of people now know about the technology....
.. when we release it to you next week make sure you release it to all courts in the world. ... (1:14).
The state of Belgium has to be brought into justice for all the scientists they have killed. .. (1:16).
... **Q: What's the best way to get the energy flow through the soul to the body. I try to feel the flow from the unified plasma. (1:18). field to the soul** and then to the heart and the body. Let's go through this**, a lot of people have been trying to do this, to understand the flow of energy, trying to replicate this to see how you can do such a thing to get energy flowing in the body. You have been taught this. ... How does the energy flow? How does blood flow in your body? Why do certain bloods flow in given directions**, why do certain lymph cells go in one side only because they are going to be part of the structure they are traveling, **but it doesn't waste time and energy sending a cell which is for the brain to the tip and of toe and bring it back up again. It doesn't work that way**. It works on a ?? Go back to the teachings, what did we say, **transmutation of the fields in MG field strength is by gradient flow, higher to the lower, what we call love. I love you, I feed you**. (1:20). That is what your soul does with the tip of your toe or the hair on your head. Is this the position from the brain being further from the toe, or what we call the STM to the soul of physicality of the toe, that dictates what energy will go to it and how the flow of the liquid goes, or has it to do with the gradient in the strength of the field. **If you are in touch with different parts of your body you should be able to do that**. If you are in touch with your cells you should be able to do that. If you want to do gradient transfer, go back to understand how **the strength of your soul is and the strength of wherever you want the energy to go**

through and try to create the position that it is weaker that it allows the soul to feed it but create it on the strength of the soul. I taught you this in the space T and that is when we want to travel in the space (1:22). **we create the imaginary (reference) point through the strength that we can use it as a position to move into, you can choose a star or a planet, but in the middle of the space you have only 5% if that, not even it's less then 1% in the universe as matter state of our strength**. So you can't lock into somewhere very far. You create that imaginary point through the interaction of your reactors and with that point you try to convert energy with, transfer in so many ways, MG fields with. In a very straight forward way that is what you are trying to do with your own position that you created. (draws an IL interaction with it). You create so much, MG field forces here (at the imaginary point) that it interacts with the smaller mass, like an electron and a proton**. Then go back to understand the totality of the work of the electron and neutron and proton, there is a bandwidth that this electron can move in. So if you master it well enough you can never come into it, but you can move further out. You create a field and then you pinpoint a field and you do it. Now change this spaceship, proton, electron, to your soul and this to your body.** Where do you want it to go? What do you want to change? (1:24). and what would it bring, the change and is that change what you wish, **is it beneficial to the other souls in the body of the man, because if a cell changes soul, or wants to be in that soul, it can change its characteristics and start a cancer and be what these other cells, elements are not happy with, and therefore you'll not achieve it. You can't do something out of self interest, you have to it on that I understand , I don't even know how, understand my own cells, my souls together. I hope you understand, that you decide on the transfer of the energy, if you understand the work of the soul, this work of the transmutation of elements, the work of transportation of ?? light, because when you transfer an energy which is from your soul, or trying to move in it, it means you create a light, you see a light within yourself.** It's a lot to understand. Any other question. When you ask questions like this, try to go deeper in the understanding of the knowledge. (1:26). Try to look at the full knowledge in totality. **I have taught you everything you need to know to travel the depths of the universe. Q: visualization of the flow is a good start**, allowing the flow is key, that is giving permission to the energy you wish to convey, allow and accept and then give to also where you connect... In that sense it must apply to the things that we have attracted to us in our environment, it that what is going on with the interaction .. . (1:28). ... it seems that where we ofcus is important to get to the next place ... how is the connection to a star system made, would we have to have a very strong field? **The thing is that the strongest fields in any star, that strength in MG field exists in every cell of the body of the man. For example if you look at Fe, the condition of this planet's strength of MG field of it, it is M (1:30). There is a test, would Fe still be magnetic in the next solar system? I doubt it because the MG field its structure are totally different. Fe is not the only magnetic material in the U**, that's the biggest rubbish ?? **The drop of water in the water would not exist if they weren't MG attracted to each other. So would be the wood**, Zinc. the world of science has become so hypocritical that it is unbelievable when you listen to some things and say how come people accept this rubbish. They say the only magnet in this world is the material of Fe. If you remember they were telling us that we have an Fe core (in the earth) and because of that we have the magnetism, now with the knowledge of the Pl can

somebody tell us how all these drops of water on this planet have become to be magnetized ?? So does the magnetism only exist in the Fe life of the strength, or for the water drop to be magnetized that have to have that attraction to each other. **With the new technology we can create that field**. (1:32). even for a leaf of a tree for it be attracted and stay with the tree, or every cell of your body to stay together there has to MG field, magnetism to keep it together. **So how come we say that magnetism only exists in the metal the iron. Because we accepted a lot of fairytales, now we understand teh totality of it and we can produce the M field of it**. **The structure has to be such that it fits into every dimension of the work of the U, and not only what you want**. Do we get attracted to, or can we create a position to travel into? Of course we can, now we have the knowledge. It is very simple, for those of you who have a problem in seeing how you can make a reference point that you can fly into. When we release the Chinese space reactors have a look at it, it's in there. I have designed it that way. As I told **you the Chinese reactor is so complicated, it's so easy, but it carries the creation of the spot where the SS can travel towards. It's designed that way. You can design your thoughts, 'I want to be in teh next room', I don't want to walk from here to my bed, I want to be in bed. But it needs practicing, understanding (1:34). in how we move, how we concentrate the energy.** In the space travel of tomorrow you can't create sudden positions, you have to create combinations of positions, that the totality of the combinations create what you want. It's very much like you park on a side road to wait to meet your friend there. They haven't made you a parking space there, it's not a service station, a star, a planet for you to land on it. So it's the same in the space travel, you decide I want to meet in this space, my brother is coming from planet Zeus and we meet there because planet Zeus takes a long time to go to. I create that position and give ?? MG fields strength of that position to my brother, he knows where in the U ?? he'll land there. Do you want to get on the sailing of the M or of the G, inwards. Or do you want to go halfway to suit your will because the M gets weaker and weaker, at the point of the conjunction of the 2 balances you jump on the G side which gets stronger. There is a lot to learn. But for now we have to show you the systems so then you can start expanding into it. Third world nations, Chinese structures, they'll go so fast. You of the biggest obstructions you'll see to this T is from teh advanced nations. (1:36).

... you can't sell arms if no one wants to fight. The next 3 weeks as we go into (1:42). the space development completion I tried to open a lot of things that it can be understood. We have forced the conditions of peace with the delivery of the new technology and with it we have to understand a lot of it, transportation, transmutation is the part that you K Seekers have to rush to understand as fast as possible. Test it and understand it. In your body you do it, find out how. **Test it how you can even feel the emotion in a cell in your body. How you can change cancer cells in your body.** You all are able to. If a machine in the back and the front does this for you, so should it be for your emotion the same way. We have to understand a lot of new processes**. Falling in love, which means giving. Try to fall in love and what it means to give to a cell and see how that cell responds to you, to a woman or man and see what that response to you is, to a dog. You don't need to tell, I love you, you can give that to the sou**l. The soul will feed it, more then physicality. You don't need the word, that's why I say, I never say I love you.

Because, why ... what reason, then you don't need, you can give, **you can transmit it (1:44). to rule what I call, the soul of the transportation of the energy. Creating a life without physicality is very easy, but it is appreciating the life, which is important. How do we create life in the space**. How are they going to be **our next generations. Do I transmit an energy and I leave there and somebody else comes and puts the other energy into it, and through dimensions of the universe energy packs leads to creation of a new soul. It happens every second of the time in the U**. I always said to Caroline when I met her, **we come to this planet to enjoy the physicality because the rest of the U works on the soul level and the energy**. There is going to be a very big push for all K Seekers to understand a lot of things, because the time has come for us to push forward. **How do you feel your feet and how do you transfer your energy? You have to create that gradient in the need of the cell or understanding of the work of the STM. I have taught you everything that you (need) to do**. (1:46). Do you want to be in another room or point in the U, do you want to understand how the light from the stars reach you, and what the rubbish that has come out saying that **it takes 100,000 years for the light to get to you, what a nonsense.** And how come we all see the same little light. With a little understanding of the plasma T a lot of you should have written papers, that the Royal Institute of Science will put it on the shelf for somebody else to come and copy it and tell them, oh, we have ofund a new thing. But we have seen that the biggest lie in cosmology has gone out, the biggest cheat. Now it allows people with true science to come in. The thief of Baghdad has gone. We are free to think and develop technologies. We are here to guide**. Q: Is the model neutron, the soul of mothers, in a similar relation to teh Creator as the electron (1:48). to the proton, and the body to the soul. When we place Gans's do the energies go through a full circle to the Creator, are the Gans's magnets for light? In so many ways, yes**. One of the biggest nuclear decays in the U even bigger then Plutonium and Uranium, is the neutron, when it divides it decays. This is part of a game as said in the world of science, we always look at one end and we forget the other end because we never understood it so at the moment we play blind. We call it a nuclear decay in Book number 1 and 2. **If nuclear decay is so effective and simple that it happens every second, o we need to understand anymore**? The biggest illegal nuclear material in the world is in the body of the man or any creature is called a neutron. Because it decays rapidly and it always decays. We are all a bunch of nuclear weapons walking around because we all carry neutrons in our body and every neutron decays and the minute it decays it divides into an electron and a proton. And the electron becomes another neutron, now it's going for a time for itself to decay, to split. The world of physics and science is so simple, why have we made it so complicated. (1:50**). If that center divides itself and it still carries the remnants of the first one, if we didn't ?? need the electron, we have the remnants, the same part, the strength of the neutron, we have the same thing a proton. And now can you understand where that neutron became a part of the collection of the energies from another division, and then it came from another division, all these billions of neutrons have been divided and their division has reached to be the level of energy of the observation of the man. Now you can imagine where is that big neutron, which is division and it still exists, has lead to creation of all these neutrons which has lead to all these single neutrons in the creation of this universe. So that neutron, what we call the Creator is within us, has become part of us**. Are we connected? We

are made out of, we are not connected, we are part of, we are it, within ourselves in the center of the structure. It doesn't matter how it comes together, without its division, without what I call subdivisions, would not have lead to the creation of what we are. That what I say, you have to understand and being partial not just to a limit and from then on, it says in Torah, Bible or another book, that these things were not, because you couldn't understand the totality. Now that you understand you have to go a step further. **And then you say, is God within us .. are we connected to ... you are made of It ... you are part of It. It is you who have denied your own existence. (1:52). Don't ever doubt in the confirmation of your own existence in connection with the Creator**. Q: Shandoor teaches about Tritium. By using the 4 Gans ... can we arrange them in such a way to create a gradient to create the fields of H, D and Tritium? Say we have CH3 and CO2 if we put them in a gradient, the C would interlock, then the CuO2 with the O2 interlocking, then with ZnO, then H2O ... what we have left ...H, H2, H3. When and how are you going to add these things? I thought to measure the quantities in mass ratios, to remove the salts and water from the Gans's .. then we can use it in dynamic or reactors. like presented in KS workshop 115, ... (1:56). .. CO2 not in matter state but Gans then we have a field of O2 in the center and a field of C around it in Gans state. With CH3 its C in center and H3 around. ... (1:58). ... (2:00). ... **Am I right on this, what's your view? You can never be wrong. But it's a very long shot**. Today I was in the lab. ... I have taught this for years**, I told you to mark the water level when you make Gans's. The water level goes up. And nobody did. But strange enough he says, I emptied the boxes and the next day they are full of water.** I said, this is what we taught for years.... He has been emptying the boxes and creating water. .. changing alkalinity and acidity ... (2:02). .. **what you are showing is the process of creation over millions of years. If you can position systems like this, and you can make it to start a trigger point of dynamic systems. ... without the waters then you start a cycle of life.** You can even **explain how water was created on this planet. Was it the O or H that triggered** it. In so many ways you are not far off, you can write any equation you like, but **can you create a condition for it that it leads to dynamic ever production of water**. Q: I am in the process of purifying drying the Gans's. I am just now seeing what happens when we make CH3 Gans ... (2:04). ... You have to understand the process, Fe is 56, Cu is 60, Zn 62 (goes up to 65), now you can see how CH3 comes into play. (2:06). How the C comes into play. .. you have an Fe 56 on the other side of your drawing. ... but you have some isotopes of Zn and Cu. Here I'll write something. In the center you have 2 isotopes of ?? ... it's not the same C it has slightly different M fields. .. the bandwidth of C is huge it crosses universes. .. now a totally new C with a different strength is created and allows for a totally different game. (2:08). ... remember Fe sits in the background and it has a say in the field structure of the C that is created here, and that C with the H, the free structure of the plasma gives it the orange look. .. you brought in the AA .. if you look here, what **you put here, if you go back on the history of mankind , brings the whole humanity on the table. This is life. If you can control in this box, the Zn, Fe, Cu, introduce a little Ca, Na, K, you will see a life start developing. You create life ... as long as you have the AA ??? you'll see animals ... what you have drawn here is how life started on this planet**, a little bit of Zn, Cu, Fe, Ca (2:10). saltwater of the marshland and the beginning of life. **Life is not exclusive of Africa** it didn't start there alone. Q: Perhaps it started in the oceans? It started in South America in Europe**. We all**

look the same, have the same structure, because it's the enforcement of the condition of this planet. They said this is why we have this, because the other came and took over. Where did the first one come from? How did they change? Because they were created. The condition for the creation of life at a given temperature was fit for life to be created on this planet, and everywhere had the same chance, because the oceans of this planet mixed everything. I have explained this in other teachings, you have to realize what is happening. You call it moisture, we call it rain, sweet water. But where **did the sweet water come from? It came from the salty sea and when it evaporated it left the salt behind and become sweet water, as it went through the hills it gathered some of the minerals but not at the strength that it could become part of it. When the sweet and salt come together, (2:12). we see the mayhem it created in the interaction in that part of the ocean. If you understand this, it's very easy to understand ? How come all the vapors of the planet come together and become clouds**. When you look at the clouds it's not just from Africa, it could be from anywhere on this planet. They were at a given strength to come together, a condition was created then they appeared. **Now they carried the essence of, the way you made the Cup and put the orange on it and tasted the orange in the water. For life to be created once evolved can be anywhere on this planet**. I'll give you a news and maybe you'll understand in the very near future. When the man goes to space. The condition of planet earth, **if you find another planet which has gone through the water (created water) but hasn't yet gone through evolution, will create life like this planet. Life like this is not so exclusive of this planet. Remember the Cup of Life with the orange on it, and you tasted it in the water. Planet earth with human race and life on it, is that orange, and the universe is the Cup.** You have to understand what it is. This brings us to the point of **the Universal Community. If enough of you who wish for peace and create a condition that we see the peace process start to move, and it's coming. If enough of mankind wishes for unification with the UC, and if they can deliver that with sincerity. We will deliver! Be it tonight**. Q: Excuse me Mr. Keshe, we used to harvest separately the white Gans and then the orange Gans, (2:14). but now I realize if we keep them together it creates a quite a different conditions. Maybe this is a clue for producing Gans of Deuterium by leaving CH3 and CO3 produced together and reaching or setting up some balance of it. **Go back to a picture in the Book that we showed the Gans's don't mix but stay separate. This is your explaining. It's the processing of the ?? time of the universe. The process we are going through with the space T is the system speeding up of ?? the process**. What you are trying to achieve chemically and by rotation, we have seen it done very rapidly by those who have done it, will take time. In the space **T through the rotation and the conditions we create, we bring that position much faster to evolution of confirmation of existence**. What it takes **for you to eat the ofod, going through your body, to be digested and coming out, then when it is needed to become your skin, let's say 20 days or a week, we do the same process in dynamic reactors in a few seconds**. We are doing the same thing. Q: **Can you just produce the fields of H2O and not have to drink water and still we'll have enough water in our body? How do you think I am going to feed you in the space**. (2:16). Q: People are asking how to produce the CH4 bluish Gans you have in your book. You said before to make a reactor like for CuO and sugar, would you give us?? **The blue Gans is created primarily because we used plastic coated Cu**. The

plastic cover brings the O in the vicinity, visibility of CuO. It's one of the most rarest kind of materials to create if you know how. but then there is a process you have to do. You don't need to go and add. You see I am a master of disguise, I know how to do it ... I just set it up to be done because I am standard process maybe because I'm a nuclear physicist. ??? the conditions of the transmutation of the elements. (2:18). It's the environment you create, and the problem is you are locked up to one ?? matter. This **morning I produced a massive system that can produce anything but it's been set in a condition that it starts the process from a neutron and then I can create anything in any position on this planet**. For me to create materials in the conditions I want them to be, literally let's repeat the whole story. You produce whatever, but at the same time you bring to proximity, it's there, you can't escape, the guy is jacketed, what does it take for you to first sweat, you are conditioned to that sweater or to a T-shirt, how much more do you want to sweat, then you put jumpers and coats, if you want to sweat less you put T-shirts on it. **I create conditions, the U is created out of creating conditions**. You put a CH3 and then CO2 you are enforcing conditions and then you are hoping the C will lock to the C. **The question to ask is where does the C go**, how will you see the C as? (2:20). You haven't explained that, how do you accept that. I can explain to you where it has gone. Do you know where it has gone? **Because not all of your CH3 is converted, because not all of your CO2 locks together. You have a free O and a free plasma field of the H, where does that go, and free Cs.** No, no , listen very carefully what I am talking about. Look at your CH3 in that organization put a torchlight to it and what do you see? You see shining stars. Your Cs become diamond structure. When you put the CO2 and CH3 together you have created floating diamonds, but these are Cs in the state of the gaseous, of grapheme state of C. What do you do with it? I know what I can do with it. 99.99% will never have a clue what to do with it. I don't want a diamond. I set out to create it because I have a purpose for it. When you say the CO2 and CuO2 go together, this is a very nice grandmother story, but does it happen. How do you create ?? then you create a ?? demand to it. Theoretically you're okay. but how long does it take for you to add (2:22). ?? . Where is your common denominator, you are totally denying ?? of its work. You have a common denominator that has brought all these together. If you take a Nano material out of the moisture it stops growing. Your N coating only grows when there is moisture. Now it comes to the point. You put all this together, a very nice story. But what did you do with this one (NaOH) and what happened if you used tap water (NaCl). If you managed to wash this clearly, you should have ?? 10 to 20 % of your Gans, the rest will be lost in your washing system. .... but where is your H3 and O2, then you add your Zn and Cu, what sequence do you mix them, (2:24). .. what energy do they release, what MG field do they produce to create and to absorb. (mic adjusted ..) ... we have to understand the process. The way you explained yes you can do ... why are there CO2 white layer on top and one on the bottom and you ask why is there water in between, we explained this before. (2:26). **The top is ZnO and the bottom CO2, but the 2 trying to create balance and positioning they create motion. You get the rotation of the field. If you can put another Gans that can stay in a different layer, in trying to find their position in respect to each other your whole system floats. This is how dynamism from M fields in the universe is created. If you twist it enough at a certain speed and mass you lead to creation of a star. Even the planetary system is initiated by this**. There are no motors in the U, positioning of different elements creates dynamism. It's

very much **like in oceans where the salt levels or salinity leads to the motion and not so much anything else. The alkalinity of teh waters on this planet are the main causes of motion, temperature is something that is added on later.** .. different salinity in the water creates different rivers. **It's exactly the same with your brain, you at teh different layers of it. this is the brain of the planet, you call it the waters. Different layers create different salinity, different ?? falls , create different transfer of energy**. Without it we don't have the waters and oceans (2:28). and the temperatures and the space gap which they say it is. We have to redefine the science. You are doing the same. When you put these things together CH3 and CO2, ??? you should put your Zn and Cu ?? in and create a dynamism in it, but will it give you the hedge, the hedge is what you have on the screen, but in the reality, it's a lot of wishful thinking, but if you push it, understand it, create a condition for it you'll achieve it. **We have shown that you can create the structure of teh brain of the man in the lab**. I think the brain is dead now, what they did with it in Italy. We can create, produce, develop everything. All of you are trying to create a neutron, what are you going to do with it? I gave you a tip. Go back to another part of the teaching, when you couldn't understand it you just abandoned it, like a flood. Here you talked about the C connected and you get a H3 and CO2, what does it give you, crystal C. Go back to when I said, **the light and the organization of it will be through crystals. Now you have created the crystals**. (2:30). Go back to that teaching and see what we said you can do with crystals. Now that you made it go and see what you were supposed to do with it now that you have made it. You see all the teachings are connected but you don't understand it so you forget about it. In the lab I saw so many crystals in the box, I said, my god, how much people are trying to ofllow it step by step. they don't understand the totality. **What is on the screen, and you say CH3 and CO2 link, but where do they go? You only tell us half of the story because you haven't understood what it is, what is the consequence of the rest of the story**. 99% of these Cs here, if you get it right, if you just put a C in it, will lead you to .. creation of diamond crystals. Then what are you going to do with it. You just say you have this because you are so targeted on producing H and CH3, you missed the main thing you worked for months before, when you bought all those crystals. (It's a very complicated way to do it ... but maybe I can find it) (2:32). Let me see if I can find the video on the crystals so you can see them... you'll see exactly what I am talking to with the CH3 and CO2, there is another way to do it... you'll receive a video that shows what happens when CO2 and CH3 form a diamond structure. The next question is what are you going to do with it, you look at it theoretically, now I show it to you practically. (2:34). .. **the process is very simple, why are we producing these things .. H, H2, H3 and then produce a neutron, do you know how to capture a neutron**, I showed you what it is. .. Now I would like a tuition fee for anybody who would like to know. (2:36). **Q: I am trying to make the bridge with those who understand the sciences and those who don't** ... for those who are not interested in teh sciences. **All the elements are made out of protons, neutrons and electrons, all in all they generate fields and these are like the fingerprint, let's say we have a CO2 Gans, but it has a certain field strength, it emanates, which is like a fingerprint of the CO2 Gans. We need to start learning how to identify the strength of the fields in order to know what we have in the Gans Box**. We probably always have composite Gans's a mixture, and together they have a certain field strength which is needed for various applications. If we want to travel to the moon we need to

make a system that attracts us to reach there ... My question is **how do we develop this ability, because in the physicality we know if we touch a material we know if it is plastic or metal or textile, we have this ability** because we were taught since birth how to use our physical senses. How do we develop our sense to identify the field strength? When we ??? we will not take a measurement of certain elements that we put in, (2:38). but we will feel it by the field strength ... How do we do it? **The recognition of the fields is part of our nature but we have decided to ignore it. In the process we have decided not to consider it. But in fact, we know it, we can feel it. If you need machines, we can create a machine to measure it, but in essence we know this by heart, because it is part of us.** Measuring tools ... the easiest way to understand the strength fields is to develop it. It's a sense, so you can create it. Understand and feel it. I was holding some material yesterday in my hand and I put it down because I could feel the energy in it. I was holding another material that they said was the same, and I could not feel it. **I have built up over years, maybe by experience, by knowledge. I can tell what materials are made of**. Years ago when I was in the diamond business I could (2:40). hold a rough cut stone and say where it comes from, which river, or mine, in which country. It wasn't just by the look you could feel the energy of it. ... Once we start trusting in ourselves we can do it. It's very easy. ... **take a bottle of CH3 in your hand, many different CH3 and see how you feel about it, what energy does it give you. Then pick up a CO2 bottle, and CuO2**. We have to learn the language of the energies of the space through our own experience. You can't say how it feels to be drunk until you get drunk. I can explain everything you want about drunkenness, you won't experience it. ... (2:42). **You need to develop the senses, you can't teach it**. We are going back to when we came out of the ?? jungle. 20 came out and 2 ate the red berries and died, the others didn't and learned not to touch it. I can't teach you how to recognize CH3. I can teach you how to feel it, hold it, which part of your body interacts with it, and then let's see.

.. feeling the different Gans's ...
some Gans's when you touch them make you feel very hungry. Something ?? you fall in love with anything, even a table and a chair. (2:44). .. plays video about how the C locks together. .. (2:46). what's the assumption of 2 C connected, I say it's a diamond structure. **The body does it when it passes wind, if there is no smell it means it hasn't gone through the conversion to a diamond structure which is an odor. What does the odor carry, trying to tell through the information, that odor has carried the information to your brain, 'don't feed my body this again'**, keep away from it. Non-verbal gaseous communication between the one end to the other. plays the videos. (2:48). if you look you see shinning lights, these are what you dismissed as a C. It plays a game in that bottle. What does this floating crystal do in the U. Back in the 80s the ofund the largest diamond in the U, they ofund a planet which is made of diamond. ... somewhere on this planet, in the Atlantic ocean and a couple of other oceans at this moment, **there is a continent of plastic bottles gathering together. Ask yourself why only plastic bottles**. .... (2:50). Then go back on the salinity of the water. the bottles that you made the Gans's out of, the original magic thing about the Coke bottle of the KF, and understanding the composition of the waters of this planet, the strength of the fields, the composition of the AA, and then you say that only Fe is magnetic, then you have to

understand **the connection of the binding of the C in the CH of the plastic, and then you can find out why they are collecting in one place. It's a magnet. These environments produce a crystal structure magnetic field of the C which matches the plastic**. Now you can go on the Internet and say you discovered how these island of plastic bottles are made, but don't say that Keshe told us, and then you become a genius and you might get a Nobel Prize for it. **The reason the plastics are gathering together is through the dynamic characteristics of C structure of the plastic in conjunction with its own and the salt in the sea. This is what I said just now to Sandor, what about the NaCl. The earth continuously produces diamond structures but it is used for another purpose (2:52). and dimension**. Q: I am supposed to wash the Gans to zero salts. Ah**, but you can't clean it there are no zero solids**. Q: I bought a salinity meter and something interesting happens, **when I wash it down to 100 pm then suddenly the next wash is back up to 800 ppm,** it means a part of the salt is held within the Gans and when it gets diluted and then it jumps ... You see it is very interesting what you brought up. **There is a place on this planet a land, where exactly what you say appears. First 30 cm of the land is salted over, and 1 meter below the same land sweet water flows in rivers**. (2:54). I said to the officials regarding this, **how come all the rain which comes doesn't wash the salinity into the water below**? This is exactly what you are explaining. **The MG field of the earth creates that condition and it has to do with whatever flows within the structure of this planet, we can't change it. They want to wash it to get the salt out. The salt will be produced again because the layers create exactly the condition**. Do you want to explain it for a second time. He shares screen again .... (2:56). (2:59). the factor why you get the 800 ppm peak **it means that at a given point you get that condition, the elements, it doesn't matter what it is release the holdings of energy equivalent to salt. Q: So it's not a salt? It's the energy because you bring it into the matter state, because you are working in a Gans environment. So now at that level you reached, it doesn't matter what material, that the salinity stays**. This is what I said about the land, it has created an environmental condition that holds to this 800 high level salinity, it doesn't matter how much it rains. (3:00). Because what you did with the wash is old fashion, you're out of date by maybe 2 years of education. If I were you I would create a dynamic system here and here and I don't need to wash ...? you can create a composition dynamic system which does the job of the washing and it brings the salinity to below levels, but because you are using a dynamic system it never hits the 800, you can position. **Where are you going to find all this water in the space to do all this washing to change salinity. You have to understand what salinity means, what is the presence of the salt, what MG field does salt carry.** (3:02). If that is the salinity you need 2 dynamic systems, M field transfer which has NaCl. Do you remember what Dr. Rodrigo did. They put the body in between, different ratio transfer, you can change the salinity. Q: My first question was to get a quantity of Gans that I can measure by weight, because if it's in a saline solution I can estimate how many percent how much is water, salt and Gans. You are coming to my world. There are no scales in the U, it's the condition you want that counts. ...

.. **we created the conditions that lead to creation of this planet. If you can repeat, create the same conditions in the U you can create water. (3:04). this is what the new T is about, what we mean by saying we become independent of the planet**. We create

the condition and not the materials, to be created by the conditions. It's a big difference. We create the conditions that leads to any environment that you want to create. Q:.... Now your desire has become dynamic. Q: **so we have to accept a certain randomness? Of course it is total randomness, but now we can put some figure to this randomness. We can quantify it**. Q: ... You are such a new KS I have to ask you to go back to the first teachings. Q: I do and I tell others that Mr. Keshe gave out all the T and it's hidden in plain sight. This is the beauty of it, I put so much in front of you that you don't see it. And nobody has seen it. (3:06). Q: I started in 2011. So you are a grandfather in the T. What it is, is creating the conditions for what you need**. If you understand what I explained transmutation of elements becomes very easy for you. If you are giving to it, they would like to call it fusion, but there is no fusion. It is creating conditions that it allows it to be what it needs to be**. We have to understand the whole process. **Everybody looks that the man from Mars will come and teach. The man from Mars has leant a lot from man.** Many things have been made so much simplified even by the man who thinks he is backwards, by the 4 wheels and the creation of motors. It makes life so easy. **We still can do it in the space in an easier way but motors, especially brushless ones, you can do some quick thinking**. .. (3:08). Some of the T developed by man is like for children in a nursery to start, but on the other hand if you understand it you give a huge advantage to space development. **I use both the knowledge of space and man's and it creates beautiful conditions**. ... Charles is translating the Chinese again .. (3:10). **Q: You were explaining how to capture a neutron, can you please go back to that? What do you want to do with it**? Q: I want to go to planet Zeus and come back. How are you going to use it if you don't know how to apply it? Q: You say it's the mother. Because with the neutron I can create anything. What are you going with it. Q: Go to planet Zeus. **As an ambassador we have enough (humans), we don't want headaches**. .. What is the neutron you call it a name? Q: In all elements we neutrons, protons and electrons, when the neutron decays, ?? produce protons and electrons, so that's the mother. What do you want to do with it when it decays? Q: create anything. **You had 1 and now you have 2 children to feed. (3:12). what are you going to do with it. And if you leave it, it will decay again**. Q; That's why I am asking how to capture it and what to do with it. What to do with it, do you want me to come and chew it for you to. Dr. Gotauau I am just trying to bring understanding. You go through the process. .. what does that existence of a neutron give you. What **is nuclear division. This is one of the first things, I kicked the Nuclear Industry out of my life because a lot of things are spoken but never understood**. This is the simplicity of it, what is a neutron, the purpose of nuclear decay the common man speaks about. **Any decay, decay means a division. Look at the pictures in Book #3, Creation of the U, which is actually a nuclear decay. You have a neutron that splits itself, but in the balance (3:14). But what we see in this process is a little bit of fireworks. I am not interested in the electron or proton**, I am only interested in my work, in this (little fireworks), which **in the Nuclear Industry they look for energy (draws a circle around the fireworks), we get it back to boil water. But as a true cosmologist and nuclear physicist, for me (what I am interested in) is the free MG fields (released) so that I can use it (he draws a further line out from the fireworks). To use this part of it (MG fields) for G for the nation, and this part for M.** This is the difference between a common nuclear physicist and one like me. As a plasma physicist I am interested in this

(MG fields) to become dimension of space. **A nuclear physicist in the war equipment of this (the fireworks) to create heat and destruction**. This is the difference between peaceful application of nuclear ?? **Because I understand that this (the fireworks) is not just heat, something, it become a heat when it slows down. At the point where it becomes free it is my savior because if I can accumulate enough of both of these M and G of it**. Then what happens to me. **Part is M and part is G, at a given strength for me is ofod (taste chips and fish), Aluminum (creation of materials), (3:16). it's my water and everything else which my life depends on in the universe**. What do you want to do with the neutron? **For me this (release of Pl MG field) is what it HAS to be**. For the Americans and the Russians they spend billions to get this (fireworks) so they can destroy each other more ... neutron bombs! For you to make this (fireworks) from a Gans is very difficult you have to have the science with it. But now a neutron bomb is in the hands of every man if he knows what to do with it. But do we need, what are we going to do, kill each other. What for? **But I am interested in this part of it that creates peace**. **When I put billions of them together then I have everything I want because I decide the next cycle and what is going to be accumulated and divided, and as we say, inter-atomic fusion, but in fact, inter-atomic plasmatic fusion is what leads to creation of the U**. **And how it became the creator of the Creator. Fields in the universe existed, its interaction lead to the creation of the Creator, not the creation of the Creator leading to creation of the fields. (3:18). But where did those fields come from**? Book number 8, the Origin of Magnetic Fields. Sperm and Egg, billions of them float in every ?? river of the world, be it from the dog, cat, man, woman and everything else, **which one leads to the creation of a being. It's very much the story of, did the chicken come first or the egg? Was the Creator created out of the fields or did the interaction of the fields lead to the creation of the Creator. Now you have the fields, what would you like to create out of it**. You want to create a neutron, for what to do what with it. I know what I want to do with it. This has become the story of the crystal ?? how they work. You all went and bought crystals when I told you that crystals will be the future of the space technology. But you still don't know what you are going to do with it, now you have seen the crystals. A lot of you will be walking around your lab looking at the crystals saying, I got crystal in the water, then can I become a diamond dealer. In the teachings I have explained where the crystals are coming from and what ?? to do. (3:20). **Partially I'll explain and maybe one day in the future you'll understand. I just said, in the body, condition of the conversion of the crystals or gases, which is the Gans condition of the gases, leads to the condition of odor, or smell which is the carrier of information. How does the STM or the brain recognize what the smell means. When you create these crystals watch how you do and what line of communication do you want to turn the message into. I have given you a lot of secrets, if you can elaborate**, just only in the last 1 minute. Shall we call it a day. Pictures from Armand from Mexico. (3:22).

We will not let Africa down because of one man's conduct. ...

(3:24). Photos of KF Mexico manufacturing, research, and teaching center are finishing the building. (3:28). When we compete the court casein Ghana, Benjamin has nothing to do with us, it's between the Police. Benjamin got caught in Ghana as working for the Belgium's and is in court. The management has taken over. Changing documents of ownership to his own person is a criminal offense. (3:30).

END

231st Knowledge Seekers Workshop July 5, 2018

(Fabio Anniversary, KF Plasma Times publication for publishing papers, Update from John in AZ how they make and test for Deuterium (H2) using a magnet and it's black in color, It's black because of C6 hexagonal shape, Long detailed discussion about formation of Gans of H, H2, H3, How the Gans of Carbon forms the crystal structure which is needed for space flight as it is the communication link for control, and to create any element in the space, Control of the system through thoughts through the AA in the C crystal structure, Controlling through 2 system one used as a point of reference, Tesla fainting understood this, He withheld knowledge from humanity through silence to not help Edison, Twin stars at night are actually the Star Formation which is in fact the Amino Acid structure of the universe and therefore they are universal life forms, This is how you can paralyze all militaries in the world through a single C Chip cell, You can transfer your energy to any dimension and manifest yourself as something in that dimension, The easiest way to capture the Neutron is with saltwater, Liquid planets like earth are very interesting to men of the space and saltwater is highly valued, The space between electrons or plasmas of N and H slows down and becomes energy to another. Saltwater is the cornerstone not only for creation but the slowing down of MG fields of any entity, Important explanation and details of how to capture neutron (from 1:44) and what you create is the MG field of the universe and your flight system, This energy is in the plasmatic state so you have to convert it to the electron, Each electron in the universe what you call electric current is different then what is on this planet, Detailed explanation of the H, Deuterium, Tritium and how it splits and how you can create any life from it, Why they call Tritium radioactive the third neutron is releasing so much energy to come to balance end up with water and Deuterium in C crystalline structure, Working with the neutron you can travel from one universe to another, Working in plasma state there is no radiation but in matter state neutron is the most radioactive material in the universe, Understanding Adam is the Creator and Eve is the man, Every time you wash your Gans you deplete it of energy, In China they have created a creature in a container and Jalal thinks he also created something, Caroline taught transfer of energy through thoughts from one Gans to another, ,)

(:11). We celebrate Fabio.... (:14). (:18). (:22). Many of you have heard about the Plasma Press that has come out in the US and now it has become a proper documented paper and in it we'll release the work of the KF on a monthly basis. This month we'll see Fabio celebrated. It's called the "**KF Plasma Times**". Ella talks about it. We decided that it is the time to take it to a new level and have it in print. (:24). When they take it in their hands and read the articles they'll feel proud to be part of the KF community and part of the achievements presented. ...
.. it's about mankind recognizing that it is ready to be peaceful and join the UC. (:28). (:32). .. **we are all plasma scientists and we'll help with the writing of papers**...

(:38). It has to become the cornerstone of free knowledge. Some people see a lot of things wrong with this process that we have started. I have said many times, when a system or ofundation works on the thoughts and line of its ofunder, everybody works the same way because they are of the same school of thought. As we opened our patents and shared knowledge freely, as you are doing freely, then there is no fear of that you might not earn something out of it**. Before we always looked at the earnings and what it would bring to our pockets, but we never looked at it that being given by the soul, comfort to what you have done to one man makes more investments for the STM and the elevation of it, then in the pocket of the man, the money goes, but the soul's elevation stays, and this is the beauty of it, and people don't understand why and the way I share knowledg**e. Because to me at the end of the day, life carries on, and when it is time to change the dimension of physicality it will take place, nobody has managed to stop this process from the beginning of the time of the U, but elevating the soul has been one of the biggest things that man has never understood. We give freely and with it when a father saves a son's life the best thing that brings the STM and other souls who are ofllowing it, we elevate it too. It's not important what you can or can't patent, sharing knowledge means saving knowledge. At the same time saving it means you can save somebody else's life or the rest of it. In this magazine start publishing more of it. (:40). ... this KF Plasma Times is the beginning of a plasma journal made by KF scientists without peer review and that is the beauty of it. Nobody does that... it will be published the way you submit. There should be a link for people to make a comment. We'll have live ..

we'll stop hiding knowledge. In these kind of processes we are changing a lot. (:42). .. some of the world leaders are appreciating the way we are doing it and how it is getting done. And the confirmation that the KF work is not hidden from world leaders and at the same time it gives us a chance to understand that as they listen, we can bring out thoughts and change the direction and course. The knowledge has to be complete, at the edge that it is shared as it is learned and it is changed, upgraded and added to without prejudiced. This will teach us a lot, these kind of journal publications will teach us a lot. I think the **KF will have to take this journal out so that it is not just here. Look into the network and see if there is a place where the journals are published, and KF Plasma Times as a journal for scientific papers. People might deliver us papers that they can't publish elsewhere for us to publish. Call it publication without peer review**. They'll find confidence and it will bring a lot of people to us. ... There are a lot of people who still need to know who we are and what we can do and what they can themselves do with the knowledge. **John of AZ comes on to update progress**. (:44). My heart tells me we are doing a lot of things right. How much do you want me to tell. I can go fro a lunch and come back. You can have the whole session. Are you anywhere near the Deuterium that you are using. No, it's 4 AM. I'll give you a tip, when you test your H2, the only way, not the only, one way **to say that it is H2, is to put a magnet against it and see if it moves with the magnet. If it moves you have your H2**. Q: Okay, then we got our H2. Congratulations. If you made your H2 and **it's in black color** as we said all the time from the beginning. **Why it's black, is H2 (:46). a plasmatic condition and due to its orientation becomes C6, to make a full sphere, or hexagonal shape of itself**, when you put magnetic fields together, this is the natural process, when there are layers of them. In that process when it's a C, if you understand composition and the parameters of

the C magnetic fields, you'll find out it leads to creation of behavior as a plasmatic condition of Fe in a bigger structure, so it behaves like a magnetic, but in fact it's Deuterium. And the way to understand, when you say you use it with a magnet and see if it moves, get yourself 2 N coated magnets and place them in salt and put your D in it. As usual you are trying to make a Gans of .. you think, what you call, magnet, but just connect the 2 wires of the magnets together and leave it, connect the 2 wires to a very small load and then leave it. What you'll observe is **the black stuff will become pinkish, it becomes H. In condition of magnetic field or it becomes Tritium, it changed pink**. You might still see some black residue which comes from the creation (:48). of the CH3. A lot of people asking how do we get a confirmation, is very simple. **At the beginning of the production of the CH3, you put N coated Cu, and then a composite coating which is a Zn and Fe. You are working on a very typical condition that you have the Zn coating and behind it you have the Fe** inside because it's galvanized steel. What you have to look at in a scientific way is that you have 2 processes going at the same time. You have this process which is the Zn and N coated Cu, and then a second process which is between the Fe and the Cu. These 2 processes create their own condition, this gives you the CO2 which you have created, which on the other hand the Fe and this gives you ... the difference in the first one is 56 to 50, and the other one which is the Zn, the usual 6, (:50). here the Cu and Fe takes place, the isotopes of it are more or less only 3, this is why **you get the CH3 in the balance of the energy, that's where the H comes from. When in that process you go through isotopes then you find out partially when the Zn balance goes away**, when the galvanized coating goes then you are only dealing with H3, but because the C balance of the Zn is more or less eradicated, it (was) used for production of the CH3, now **the only thing that is left is the H2**. Because the Zn is not there and the C condition between the Zn and the Cu N coated doesn't exist. In fact what you have is a N coated Cu with CuO about 59 / 60, and you have the Fe on its own. So it a small gap, and the only thing left that is giving you H2. Because the balance of the interference of the 2, if you go towards 57 / 58, what's 60 / 59, **H2 is a more powerful balance stable, and that's how the H2 is created**. But immediately it changes itself into the condition of, because has, the presence of the Fe, to what we call the isotopes of the spherical conditions, dynamic, which creates and absorbs the magnetic field of the Fe property. (:52**). It behaves like an Fe and interacts with magnetic fields. this brings a lot of knowledge in the background in the world of science**. If you go back some months ago when I started to teach you, I always told you that D is black and now if you test it you confirm it, and if you use the energetic fields you'll **see it changes to orangish color, which is the H**3 because if it was pure Fe, Nano material, what you're going to be left with is Fe and it should change color**, but when it changes to H3 and you put a magnet on it, you see that it doesn't move, it has the property of H3**. This is one way of confirming that what you produced is Deuterium for your space fuel. And it is in line with what we have taught up to now. Q: I think **another key element is creating what you refer to as the diamond structure on the material**. Last week you showed the pictures of the **sparkling materials**, so we have to get to the creation of those N crystalline structures. I want to show some pictures. Don't forget as part of the N structure crystals you see, we can explain that also, because when you have this composite position with Zn, Cu N coated, and Al, in that process partially we create a magnetic field, that's how we used to create CO2, (:54). but now **due to the condition of**

the presence of the H, which comes from the M field plasma of H in this space, part of the H itself becomes H2O, so the C release or absorb has nowhere to go, to attach itself, so in the condition of the M field in the N material and at the same time the Gans plasmas that are created, there is no alternative left then to become the Gans of the C in a crystal structure which is like a diamond shape, and that's why you see the diamond, because if you can manage because of the Zn plate you have and the Cu N coated you attract the C in and in composition with the O in the water you create the CO2, this is how we create the CO2. Now because you have the Fe and are creating the double H2 composition, most of the H because of its affinity towards the lighter absorption of the M field it goes towards the H, so what happens is that it prefers to attract the H rather then the C, so **there is no O left for the C to become the CO2 so the C is still created in this gap which is absorbed in the environment comes in, but now it has nothing to attach itself to, so it stays in an energetic crystal condition that becomes those shinny crystals you see**. It's a pure diamond, what we call a plasma of the C. That shinning is C and you need it for those who go to space development and if you understand how to play with it, (:56**). it's one of the backbones of the flight systems in the future. because if you can collect it, there is a way to gather it, in time I'll teach you how to do it. This is what we call the storage tanks of space development because with the C, especially if you have the D, which is a base material, you can do a lot of creations for any elements in the U. In time we'll teach you how to use it, if you can collect these crystals of C, its property can lead to creation of many materials and M fields and you can create it in a way that it changes its parameters and strength to any matter state you like**. John shares photos of black D with shinny crystals. (:58). **We put the H3 submerged in saltwater and we're going backwards in the process moving towards a replicator type state, we're creating materials using our Gans balls.** ... we used K and Mg salts and on one side we put a C rod and the other side a Zn plate. **Without deteriorating the C rod we got this large amount of C crystalline structures with sparkling dots. It had a layer of AA on the top but if you push the AA away you get this little mine of diamonds structures**. It's my thinking that these are in a C plasmatic state in a diamond structure, or has a N crystalline structure of the diamond. .. (1:00). .. it doesn't mean you're wrong .. is it these materials that allows us to connect our E to the material, just like we use big crystals for our thoughts and energies, well these little crystals can do the same thing... **Okay, you started to a door, I am going to connect you to that door to something very important. As I always said, if you walk then I'll show you the way**. You just mentioned something very important and I put it in the background of the knowledge and the science so you understand fully. (1:02). If you go back to the structure of the AA where we talk about CONH where O is the G field holding together where H is the energy supplier and N is the bringer of the whole structure to be able to transfer, and C is the link of the connections between all the elements. If you go back in understanding this, that if you have the AA or the AA of the physicality of the man added to this process, the **existence and presence of the C crystals is part of the communication line between the captain and the main controls and the energy production**. The existence of these crystals, initially from the beginning was set out for this effect, and now you understand and you are correct in your assumption **that if you understand the use of the C crystals in the plasmatic condition, and understanding all our teachings from the beginning,**

we always spoke about the C to be the communicator, the current connection, the electric connection between the cells, this is why in every process in medical we always use the CO2 that you create that link. Our understanding is that you created this C in the N structure Gans boxes which meant **that inevitably there is AA of this planet in it, (1:04). this should have given you a clue, or at least indication to understand that through this line you can connect the operation of the thoughts to the STM to the running of the system, therefore the existence and presence of the C crystals as a plasma condition is the connection between the man, the operator and the system. It's the remote control connection and it's instantaneous**. For those of you who move towards what we call zero time communication you should understand a lot about this, what has just been explained. This gives you an new dimension, new understanding, and to scientifically understand it, the why and how, and now you understand why these C crystals that are in the plasma condition, are in reality your connection, if you understand how to use it. I am sure may of you are going to develop and evolve this knowledge. **It is part of your zero time communication**. It goes back to what we have taught you from the beginning that the **C is the line of communication, connections between energies and dimensions**. But when you enter into a plasma condition, and you understand in the coming time as you evolve in the education of the U, that it **is the line between the STM and the operation of the system**. Those of you who **are looking for ?? for your soul to control, you have ofund it. (1:06). Because part of the STM is created from the interaction of the C itself and the AA. ?? Dynamic ?? AA has created what we call the Free Space (Free Plasma) or what we call the STM energy center**. If you go back and put this system in a dynamic condition, many of you who go in the dimension of space travel and development through Pl T, you'll find out how **your thoughts will lead to creation of motion. I explained this in a very hidden way the development of the space T in Iran, where I explained that we could dictate which way the system flies. this is how we could understand and could control it, creation of the fields in the dynamic flow which has no, but we knew which way we wanted to fly**. Those of you **who run a double system you'll find out that by holding to the system which is the grounded or stronger one, through that you control the second one in distance.** This means ... (1:08). .. we set the system up and always said that you **needed 2 different systems so one is the lighter and dictates where to go, when you keep the second system with you and you can understand the plasmatic magnetic fields in connection with the crystals. For you standing (in one place) by thoughts controlling the system with you, you can dictate the position of the twin system. I do not need to be on planet Zeus to send the system**, I can control with what I carry which is the essence of the 2, and in that direction the control. Where in reality this (the ground system) can be a key in your pocket. Where by through it, the strength of it you can run, or by positioning one which you dictate to, the other ofllows the position. I think some of you are maturing to that position and it is time to teach you more. Now for those of you who come into the space travel dimension like the Chinese group, which should start testing in a different way, **now you'll understand how you'll control. It's not by accident that the system happened to go this way, for 1 millisecond in your thoughts you wanted it there**, so it directions it there, then if you go a step further you understand zero time communication through the system (1:10). **Tesla understood this very faintly. A lot of you who work around Tesla's work you**

understand this. He made a lot of discoveries. He understand the work of the DC operation which was his forte or field, but he hide a lot of things that he understood because it was in line to support any theory to do with Edison, whom he clashed with. He wasn't an Edison man, he was a very clever man. In his process he didn't only work on DC in understand the field transfer of energies. He understood very well the work of AC and DC currents, but whatever he understood about DC he hide and never showed it because then he would have confirmed the work of Edison. **Edison went out to destroy Tesla. But Tesla choose the silence of the knowledge to damage the other side, to not give any more knowledge or credibility to them**. If you study the work of Tesla you'll that much of his knowledge was hidden in his work. In much of his work he confirmed the correctness of DC can be used and how he used it in a hidden way so as not to give any credibility to Edison. One killed an elephant and put a man in an electric chair and the other through silence with not sharing knowledge (1:12). and confirmation of his correctness. And in a way brought harm, the more they could and because of it**, humanity was set back more in the knowledge of understanding**. If you understand what I just explained and **the transmission of time and space, which both do not exist in the creation of the U, then you understand that you can control everything now that you have created a double system. Look into the sky at night. You see a combination of systems, these are all part of the teachings of the space T development and without it you can't because you'll get trapped in i**t. Go outside and have a look, **you see 2 bright lights (stars), very much the same by distances, these are the twin stars (draws an Infinity Loop). But sometimes the twin stars because of the composition of their elements and M fields created in different positions in the U, you see some thing like this (3 stars a little bent), if you orientate them in a different direction you'll see there is a forth one there**. In fact the stars create of themselves, Star Formation (SF). Whenever you look in the sky and see this formation (3 stars) you have to understand that there is another leg somewhere. In the space you don't look for (can't see). **(They actually form a SF) in the structure of the MG fields they position themselves**, and these create for themselves ?? travel for themselves in the dimension of the U. (1:14). And **they create a lot of clashes with the galaxies and solar systems, appear because of this interaction of these 2 different systems, which they "twin" up and in that twining they lead to the creation of the heartbeat or a system of control. He draws a SF, you have H, C, O, N, but look at it not as a name, but as MG fields, and this has created life on this planet.** And **now you understand how lives which are not visible to the man, in the universe exist. These 2 systems (2 twin stars) gather up to become a SF, and each one has a strength capacity because of its position which creates gigantic lives in the universal condition. they become the AA structure of the U**. Man has not been educated enough to look for these kind of structures. But in time you'll see. An indication of it is, just go out at night and look into the deep sky and you'll find these. **If this AA has lead to creation of life and intelligence in the dimension of this planet, now you can see that part of the solar structure of the man in the universe and the galaxies, is part of the life of another creature, which man hasn't the intelligence to understand, we call the Creator**. We are part of His structure, we are part of it, we are the cell of physicality ?? which is **connected to the soul of the Creator, the way the soul of our physicality of the cell of the toe is connected to the soul of our body. Then you'll understand that even the**

earth as it now as this planet, (1:16). is itself part of the cell in the structure of the U once it looks deep into it. Even solar systems and galaxies that come into this condition and position, have and become part of another AA, as AA is the beginning of another life and existence. If such a combination in the plasma condition of this planet could create life, the same condition in the depth of the universe, in the AA of the U, and what I call condition of the field of this U, becomes and is part of the life of the Creator. It is the same with cell in the toe of the man connected with the soul of the man. **Now you understand how we are connected to the soul of the Creator. We are that little cell, even being there, created in the same condition**. It's a preservation of life, life being able to preserve M fields that through it can create dynamic and at the same time, the essence of the creation of the soul, **and in that double star situation you have the soul of the system (FP in the center).** Those of you who understand and you know how to position in the right place your control system. **What you made as a twin system, if you can bring it within the structure of your AA's in the control of the system, you control the system within the structure with you. Now maybe you understand how the control of the systems in the space T will come.** It's you who will control it, by understanding and **creating (1:18). these crystal C crystals, which is the line of communication, which our soul, if you remember when you put C and everything else in, it lead to creation of the FP, which is the soul of the system**. And if **you can place yourself as a controller in this direction, and the AA which we talked about, is made through the STM through C, then you understand the changes and that the process of creation is not limited to the body of the man, but is connected to the totality of the creation in the U**. Those of you who are in that direction in the development especially in the space development you can create conditions, systems that now you understand the creation of the AA, which in the beginning it was CH3 and went to develop the H and Tritium, then you can proceed to the creation of life, in that process you understand that your work leads to the creation of control of zero time communication, as you have always thought it can be done. Now you have the full confirmation of it, and you see the process of it and how it can be done and now you see confirmation of its existence. What you call your C crystals. Because you can't touch it, (1:20). I asked **the research team in China to actually see if they can siphon them or filter them out, and they tried everything, but they could not filter them, because it's a plasmatic field confirmation and conversion**. It's the part of the process of understanding that these plasmas crystals are not solid crystal matter, they are part of the structure and if you know what to do with them, they are the line of your zero time communication. Go back to what I said, how we'll paralyze the military and all the defense technologies**. I warned the world leaders in the past few days about the changes that are about to come. When you speak about the line of change of microchips in the line of connection, this is where it comes from. the C crystal has the control and transfers energies, we can paralyze any military system in the world. You can't touch another system that is dynamic like yours because it works on the balance of the system of energies, but in a matter state C chip you can just paralyze i**t. Now you are understanding how you are working. **You have a dynamic crystal which is connected through the soul and then you can bring into the matter state, then you'll see that there is not a single chip that can work if you decide**. The space T is **the end to any war that man has decided to create through tools of matter state**.

(1:22). Then **the power of it is so immense that the present T is obsolete**. Now you understand scientifically how. We warned the Americans and world leaders, **we bring the most powerful weapons into nothing**, because the present power systems, nuclear weapons, aircraft carriers, have a fatal flow in them, they all carry C as a plastic of magnitude, as you know **you can convert, if you understand it, the chip from conductivity to resistivity and visa versa, you don't need to change anything, or write a program, all you do is, blow the fuse**. What is supposed to be a conductor becomes a resistor, **by the change of just one chip cell**. These are what is needed, because in the deep space you need to be as part of your protection, as part of understanding the flow of M fields in the U. People like John and at the KF research centers are adding little by little so it allows us to bring everything back in to teach. Now you understand not only the beginning of the space T but the totality of understanding (1:24). the whole space development and communication. **In a very short time as teh developments come up, I will teach you manifestation of the physicality in the dimension of existence through plasma fields, which means you can transfer your energy to any dimension and manifest yourself as something in that dimension now that we have opened this door of the plasma understanding of the existence of the crystal of C**. **The C crystal condition is not only on this planet but it is one of the cornerstones of the motion, connection and communication in the U, but it has different scales of appearance**. Q: Can I open up one more Pandora's Box. You get me talking and then I have to teach things I don't want to teach. I have another video about how we collect the neutron to power up our craft to a higher level. If I can share that test.. (1:26). **John is spinning an empty ball between reactors with D and T. It seems to be bouncing around and energizing itself. ..** (1:27). This was nothing but an empty ball spinning, but we put that reactor in between 2 other reactors one with D and the other with T. Mr. Keshe didn't see video, repeat. the empty ball seems to be jumping around picking up the fields. ... In my mind we have attracted some neutrons and maybe some electrons into this rotating empty ball that are of the H configuration. To prime this ball we put reactors on both sides. .. (1:30). Then **we put this empty ball in the space ship reactors. this is how we tried to collect the neutron**. ... Q: Bernie has a question. Have you considered testing the motor without the ball on top. (1:32). I would like to isolate if the field is interacting with the motor or the ball. John talks .. he thinks the motor is irrelevant ... (1:34). ... Bernie wraps motor in aluminum tape .
... **The easiest way to do it if you are going to capture the neutrons is to create the saltwater**. (1:36). If you have all the other materials in the saltwater, your Gans's, so **when you bring a common denominator in connection or in between, that's the best place to capture the neutrons, where they are used and not in empty space. Because most the Gans's you make still carry a percentage of salt. You have the linkage connection**, so it is easier for you to do that. Q: So can the balls be filled with saltwater to ensure that the neutrons can be captured in there? What we have seen, we'll get the confirmation in the next few days. The existence of the neutron and understanding that, the water, when you put it, as I taught you before **absorption of neutron, it's very much in the plasmatic field, even you don't see it because you think it's still water. In that plasmatic field the water itself behaves in a magnetic environment, and if you understand the creation of color diamonds (1:38). you see one single crystal, or one single element gas of, entity, within the C structure and it turns to be pink and blue,**

what you will see is in line with the understanding that the water that you are trying to slow, or capture the neutron in will change color, depending on the strength of the neutron, pinkish slight bluish is very easy to observe. We have confirmed that today, we are just going through the reconfirmation of it. **You use saltwater and you watch the change of the color of the water in which you want to capture the neutron**. **If you leave an empty space how are you going to capture it, to keep it, and when it's kept and hold it, how are you going to use it**. Those of you who are in a dynamic work of the space T understand this very quickly, you can use it very rapidly**. In the process you can continuously produce neutrons, and the interaction of the neutrons create a MG field forces. We are going one step further in the space development** and understanding. As you deposit new energies inside the plasma, the saltwater will change color, and it's understanding that, that water is not pure water, as you thought, it's salt. **Now you have the crystal structure of the neutron, which depending on the salinity will create different colors. If you take pure saltwater (1:40). and then use it for capturing, or slowing down neutrons, to be able to use them, when you take your water out it has to be a slightly different color**. It has to be. Q: Do you see the picture on the screen. We put H, H2, and H3, in different kind of salts (water), K salts with 2 empty balls floating in the middle between the materials and what we ofund was there **started to form a blue material around the top of the D,** it started all black and then went to a blue. On the H3 we saw little sparkles. The question is **when we pull these out of this environment do the neutrons escape, can we take it from here to the SS reactors and start spinning it**. Let me explain something very interesting. (1:42). **A hidden knowledge, not a hidden knowledge but a confirmation of understanding. Liquid planets like earth have a lot of interesting things for the man of space**. When you travel **in deep space (carrying) water with you from this planet, you are highly respected**, understood that you come from a planet where life exists and you can use it. but many times we see interaction of what we call **the UC they come (here) and take a deep swim in the oceans of this planet. In principle it's for the interaction of the saltwater of the sea. In space system these are highly valued commodities, but not a value they can be repeated themselves, but when you get it from a planet like this it is highly valued**. We always look into the space for what they can bring us, but this planet has a lot of knowledge and assets that it is a pleasure to have and one of them is the saltwater. **Learn and understand how to use the saltwater in the space T, it is one of the great assets that man will carry into deep space**. **You have seen that through the saltwater life has been created on this planet, because of it. It has a value, understanding, existence (1:44). confirmation of the life, not only for life but for deep space travel. When you use salt in equal balance in all your systems,** go back to the beginning when I taught you about the CO2 we worked with salt. Now it is time for man to understand how this thing plays. **How the space between electrons or plasmas of N and H slows down and becomes energy to another. Saltwater is the cornerstone not only for creation but the slowing down of MG fields of any entity**. If you understand this much, then you understand that it can be used for capturing the neutrons. **It is one of the biggest assets you have, MG fields transfers the energy of neutron into the saltwater, exactly like. Man is so physical that sometimes it bothers me that why do we go this way**. You put a plate, a bottle, the salt in it, the Zn and Cu in it, what did you get. **You created the field of the Cu, so you captured the Cu. What the**

difference if you extend your knowledge and become realistic in what you are talking about. Now you create a dynamic system, you put the salt of CH3 or H3 in the outer ring, in the inner core you put the salt of Deuterium, (1:46). so when you place saltwater in between these 2 cores, in this area, what is the difference. This core is the same as this plate, etc .. so here in this space (saltwater) you create the condition of plasmatic M field of the neutron, which is the only thing left, which is different from the 2. You showed (John) us empty balls, what are you going to do with it. if you open it, it will disappear. But if you understand this (with the saltwater) now then you have a neutron. **This is the easiest way you can produce neutron. Governments like America spend billions on it and you are doing it with cents**. But **you (only) have it in its energy form, and if you understand and go back to what we said with the creation of the reactors, then you go a step further, then you create the 4th system (core) which is empty inside, then the interaction is the same here because the field forces create the conditions of centralization, the only energy the only balance left is a neutron, H3 and H2.** So the rotation of this (saltwater core) and the rotation inside which again is salt based, **gives you the MG field of the universe. This is your flying system, because the interaction of the 2 creates fields beyond the boundary of the understanding of the man in the space**. This way **you create multilayer field forces exactly as on this planet, the 2 plasmas over on each other depending on you understanding the next system of control, (1:48). gives you everything you need lift, motion, and don't forget because of the crystalline structure of the first and second cores (H3 and H2) you carry the C structure you control everything by the line of your thoughts, faster and beyond the speed of light**. the space race is on and I tell you the Chinese are going to beat you. Q: John says, no I don't think so because now I have this. ... **I haven't given you all the secrets of it, we are the power point between the Chinese and Americans, but there are other things in the structure that you haven't done and it's going to kick you for it. In your space structure you are overlooking some points.** You are looking for neutron systems that you can create vast amounts of energy**, a lot of you are asking about the energy units. I could have given you that 2 years ago.** If you understand this T. **Go back to patent #2 the plasma battery, it shows a little ball in there, now you see what that ball is made of,** if you understand it. **But this energy is in the plasmatic condition and then you have to learn how to convert it to the electron. Don't forget that each electron in the U, what you call electric current is different then what is on this planet, so you have to know how to master this so you can create conditions of space travel.** I tell you something, the Chinese will fly by Sunday. (1:50). **If everything goes right, and we have informed the Chinese government and President Zhi, that we will fly this week** if everything goes according to our plan. It all depends on how the Chinese do their job, **otherwise the T is complete. The only problem is how are you going to control it, then you'll say we made the reactor and the system and it disappeared. And we'll say, show it to us, we don't believe you**. **Creation of the flying system is not a problem, controlling it, be able to produce water, air, energy that can convert in the body of the man for ofod and water, creation of matter state that it eradicates illness within the structure of the system, protection from the MG field oceans of the universe, understanding the protection and defense of the system that you can fly within any zone.** Hopefully the Chinese will test the system under the water and over in

the South China Sea very soon. And there is a lot still to come. As I said, I taught you, you worked on it, you thought you ofund a way**, but hollow balls is a hollow brain. We need something to hold the fields of it to confirm its existence**. On this planet salt is one of the commodities of the U. (1:52). **We use different things in the U to slow down that we can absorb the neutrons. But you have it, and because you create salt in all levels of your Gans holding, so when you use it for absorption you see everything as the same**. Sometimes when I listen to part of the understanding of **the human race that they are waiting for the others to bring the knowledge, we have brought you the knowledge, it's you who has to understand how to apply it. But there is a warning, very much like a poison in the tail of it. The poison in the tail of the new T is that all the things that man has done up to now are zero point, totally irrelevant**. If you like **to build a house floating on the oceans you can do so if you understand the process**. The building of the structures the way you do, and then the earthquake damages, why. If you understand how these systems are built you can still have the luxury of the place and at the same time **never be attached to this planet that the earthquake can't shake you**. A lot of teachings are very clear, just don't think it's one or 2 things, **there are other people working in the background for different dimensions and purposes. In essence the knowledge has been given to the man and is not in the hands of any governments**. recently **we have warned the governments, your term is over**. And technologies like this one, if you understand it, ends the term of what I call, control. (1:54). **Because to whom are we going to answer to in the space. The government of the U or of the galaxies. It is the conduct of the man that has to be correct and peaceful. We are one step closer to the space T to be in the hand of every man, and the T the way we put it out now is in the hand of "One Nation"**, look Chinese, Americans, Philippines ... this T doesn't belong to any one nation. It belongs to mankind and it has to be the cause of peace and not wars. ...

(1:56). Ella says they are making the books available on Amazon. She hopes this month it will be finished. (1:58).
... the way we are going by November there won't be any need for oil. Q: You spoke about D and T using a magnet .. can you expand on that.. (2:02). **Deuterium in its operation is a balanced energy field with a surface energy collector**. As a nuclear physicist I always looked how we were misinformed or we never understood the process of the creation of the system. **When you have a neutron on its own it's a neutron. When a neutron divides it becomes a package of 2 (proton and electron), these 2 have a balance, whatever the small one releases the larger one has to capture, so they have nothing to add to them**. Why do we seen the creation of neutron, addition of neutron? When you have an proton and a neutron and a balanced energy, whatever these 2 release, which is not needed, it can go into the depth of the space. But it always finds a balance. What they do is, the 2 (proton and neutron) create a balance with the electron. **In them trying to feed you have a 3 star situation, in the middle now you have a Free energy condition (like a FP), if it comes in the process of a M field, it itself becomes moving and then you create again a SF and it leads to the light, creation of ?? existence of control**. When you talk about a H which is this (proton and electron), D this (proton neutron and electron), T which is this (proton ?? 2 neutrons and electron), you have to understand what it means. You have 2 choices, in a very simple way, why **do**

they call Tritium radioactive, because they don't understand that it comes from the existence of **the third neutron, (2:04). which is trying to divide itself to become another electron and proton**. What is going to happen? You're going to get an electron and a proton, and another proton and 2 electrons, what do you have, a crippled ?? (cell) That can't happen, so **what happens, this neutron at a high level is releasing so much energy split itself to what becomes this (H and H2). If you understand the division of the Tritium, in the nuclear industry it's advanced physicists**. That's what you're going to get, you have this and this neutron is trying to create a condition of separation from these 2, in pushing itself away, because its got a greater M fields compared to the balance field compared to this, and it has an electron which is absorbing all the energies, so it (neutron) radiates so many fields, to create what, this becomes this (Deuterium) and this, this (H). **So it depends on what creation of fields you give to it, you end up with a D and a H**. It goes both ways, In part of the Tritium process you're trying to understand, what you call H3, what I call ?? , **radioactive material if you want to call it, you create a condition for the delivery of the new energy and the creation of a D and a H. Then your H immediately create H2O on this planet the creation of water. (2:06). You are left with D, D itself when it starts, creation of crystallization and AA condition, which is the beginning of life. If I were on this planet and only had D and T, I can create any life you like**. Because you have to understand the composition and combination of fields, not matter state. **When you introduce MG fields within the structure by magnets it creates a new environment where by putting magnets in the process, what do you do? You create this unbalance (with the neutron), that the neutron can release itself because you create a new condition of support. But as you are working in the Gans state the magnets are not needed.** The condition creates itself, its own H, but it is in the plasmatic condition and the ones that are **Deuterium, they create that shinning crystals. But there is more into it then what I explained here, but you have to understand the process of plasma physics in the dimension of the creation, and not the plasma physics in matter state.** It is very easy if you understand this. **It took me years to explain this to my professors but they couldn't see it. And I said goodbye to the nuclear industry** of the British government. **When you work this way you have no radiation, but you can use radiation in different ways to create this because a neutron on its own is a radioactive material. (2:08). The neutron is the most radioactive substance in the universe and the man never understood it. Neutron bombs is the creation of the release of its matter strength state, but like I said last week, if you understand the interaction of its field state, my god, you can go from one U to another, because then you can create different energies inside the neutron to replicate the condition and strength of the neutron in that U**. One of the reasons that **each cell of the body of the man has a different position is because of the neutron balance in the strength of its atomic structure in the nucleus of it. A system like an AA can't come together if it doesn't have a balanced neutron energy inside it. The H in the AA body of the man is a plasmatic state and it carries a balance energy of the Deuterium which links up to the C, this is why you get the CH3, the connection of the CH3 is not coincidental because the H can evolve and release a neutron in a composition to create a balance of the 2 Cs, because now it becomes itself, it's a hexagonal condition of the transfer of energy. this means that when you have a D, 6 of them (draws a hexagon) you get a C state,**

but this is in plasmatic condition and it can lead to the crystals you see yourself, H behaving as a C crystal, but this is a dynamic state. (2:10). But if you understand this and move it, what does it give you? In a straight forward, without the 5th square, as they call it in the plasma technology, what you get, you can go up in any direction, 12, 18, 24, 48 and go up , 56. **If you understand this you'll explain how even life comes to be created in a plasmatic condition on this planet. Then in the space you can create life. Then maybe you'll understand the story of Adam and Eve, where the Adam is the Creator and Eve is the man himself.** Q: If we create the Gans's of proton and electron we will be able to create (2:12). a more powerful interaction with the Gans of neutron, so the electron would be the G and proton M .. repeats ... (2:14). .. Rick reads it ... (2:16). ... if you need smaller packages you can do. Many of you have done this but you don't understand. I was explaining this to the K Seekers today, **when you keep on washing your Gans's, and then you say it reduces every time. Of course it reduces, you keep on transferring energy to the water. It means the water to which you put it in is depleted of energies so it is trying to balance it**. As you know with a balance of energies what it gives, it has to go somewhere, it comes from something. A lot of you wash your Gans's again and again and it reduces, of course, you are transferring the energy to the water. Where do you want it to go? If you understood this, the transfer to feeding the lesser or smaller, if you create the right conditions in that water you can collect electrons and protons. The salinity you produce dictates. This is the beauty from being from planet earth. It doesn't just create beautiful environments, it creates a lot of life, a lot of understanding of the U. So, yes you can, but you have to understand where the strength sits and why. .. **the beings in the U after billions of years haven't learned everything yet. Don't worry we are just starting at the nursery school**. (2:18). ... Q: How does sand or silica help in the creation of crystals, it's the most present stuff in the world which would nicely represent abundance? That doesn't mean that just because it's on this planet, that's it's useful in our reactors ... if you go to different part of the U like what we call ex-pats. ..

(2:22). Q: Do you remember when I asked if Jalal use his energy of thought and his hands to create energy in an empty ball, so now we don't use an empty ball but one filled with some kind of salinity? So what would you like, sea fish? Q: The main thing is the emotion, if I use joy I need? Let me show you something, is KF China online... They **have created a creature in a container, it looks like shrimp. It has been there a couple of months**. If they were online they could explain it to you. I created life in the condition of water bottles some 15 years ago. (2:24). Now for the first time we see out research teams has come up with something. It says that it is a little creature, white and transparent with a little tail shape like a shrimp, swimming in the water, jumping and crawling. Two months ago it was very small. Now all of our team can see it growing up. Now with the CH3 they tried to make the H3, so it's a sugar based and it creates life, and they have started creating creatures. This comes from one of the KF China. **Jalal says he also has one, it's a worm shape and it's tail is outside the water. He has had it for more then 3 months.** (2:26). I don't know what to do with it. Everyday I am watching it. I can video it. .. **Yesterday Caroline taught us how to zero communicate with thoughts, and transfer the energy of Gans's with other bottles. So in this case is it**

better to use saltwater to transfer Gans's? (Keshe fell out ..) .. repeats ... I can make a video of it. (2:28). if you let the top of it open, life can be copied. The system I have developed, I have sealed it in a box and the systems are inside. ... Is it better to use saltwater to transfer energy of Gans's? I don't know try it and tell us. You listened to a lot of things so try it and tell us. the thing is we teach so much that a lot of you can come up with dimensions and directions of development of the T. It's very interesting all of you are waiting for someone else to do it and come and say. It's time for you as a group to start working (2:30). and bringing these things out. Collaborate as teams in different nations. There is a position that we have to understand, that the governments have decided to allow the KF to merge outside in the public domain in the coming time. The time and scale I don't know, but what we see in the background the emergence of the KF work. Most of the work you are doing is being forced on many governments. We have to be correct in what we do, say, and show. We saw in Workshop 225 we referred to the university, and now the guy is panicking and the he's threatening to close the Youtube because we don't. We took it off, but now we have a name and everything else and we are coming in. And in the next few times we'll knock on the door of the ones who created a lot of problem. A lot of those who called themselves Red Circle in Germany they are dismantled because they understood the message last week that the criminal organizations and what they have done now becomes part of the structure and they are all liable for what they have done in the past few months and years towards us. (2:32). We have **lodged our appeals with our lawyers. Next week to publish the appeal and send it especially to the Court of Appeals in Belgium so they can read it, and it's public so many of you send it to them. .... and send it to all the courts across this planet**. Because what they did by trying to discredit us they tried to stop us. And now that the table has turned they are trying to escape and run. I am sure we'll see the resignations in Belgium ... (2:34). We'll release 2 officers who attended the court, we want them to be on the most wanted list in the world because they are terrorist. They have to be identified and asked why they were in the court. Please make a list of most wanted men of the planet... we want to ask sanctions on Belgium, they are to be listed as a terrorist nation that kills scientists. ... (2:36). Q: Will the books be translated to Arabic? Are you offering? I am not a scientific guy. You made an animal, what do you mean you are not scientific. So you are. ... (2:38). **Q: Mr. Keshe, I am a cleaner. When the God looks at your soul He doesn't notice if you are a king or a cleaner. It's what the soul gives. .. it's what's inside us that counts**, it's the light inside that counts, not the cover which covers blindness. ... very soon we will all get everything we need, then we'll all become cleaners and get the environment clean or whatever. It's part of the process of life and doesn't touch the intelligence. This is more important. **So you are still a scientist**. Yes, Mr. Keshe thank you. I know many African scientists and doctors who were waiting to leave or get a job and had to still clean floors or toilets, and the one who has no degree thinks he is more because of the color of his skin. (2:40). ... it is sharing the knowledge the right way and not just sharing knowledge. (2:42). Very few people have moved in the knowledge the right way. Now that the KF plasma balls have been certified C standard, we should see a lot of people start doing a lot of work. It can be used for any purpose. . Now the medical system can be released as **Now that the KF plasma balls have been certified C standard, we should see a lot of people start doing a lot of work** part of it. Klaus talks about certification. ... C certified Medical 1. (2:44). .

(2:50). Klaus continues to explain ...
(2:54).
(2:56). **People have asked why we don't show the Chinese system. We will show it live when we go for testing. It is on its way to the President of China**. ... they will view the testing first and it will be up to them if they allow us to release it internationally in the public domain. (2:58).
Stephania is a Mozhan trained ... (3:00). (3:02).
Q: Is the sun we see in the sky designed to last forever or do we have to move to a different place? (3:04). I'll answer in a different way. If it wasn't time to go, do you think I would have come to teach you such a crash course. If now you know that the sun is supposed to go, do you need to wait to the last minute for the flood to come in. You know the tsunami is on its way, what are you waiting for, to see if it actually comes. 50
(3:08). Giovanni thanks for the video ... (3:16).
(3:22). Fabio video.

Knowledge Seekers Workshop Summaries

(232 through 243)

232nd Knowledge Seekers Workshop - July 12, 2018

(,)

(:15).
... I have started a platform and we don't have enough people on this planet to support man in space. (:20). We don't have enough trained intellect to take man into space in the long term. Space the way I have taught can't become the exclusivity of one nation, as American or Chinese or whatever, it becomes the property of One Nation as One Planet, but what I have seen in the past few months now that we are on the verge of opening the space the way we are doing it, earth will be depopulated and to what extent will be what we decide. Do we create passports in which we allow a certain number of people to leave a country? Would we face in the western world what Africa has faced for decades that the brain drain has gone into the western world and Africa has suffered. Now the western world will loose a massive brain drain into space. One of the reasons for it is the beauty and freedom of the space. ... How can we support this depletion. We have done a lot of injustice to ourselves and now it is coming to catch up. Humanity will decide how many people we can loose into space. (:22). .. In the past few weeks I have had many sleepless nights thinking how I can guide mankind to understand how and what is sitting on the horizon for it. There has been a big question mark for me, have I prepared mankind for such a change, prepared enough, or do we need to let this run for a couple of hundred of years that then gradually things build up, but by then we'll have the same rat race as today. Those who have nothing claim to be the leaders and those who actually supply the back to everything live in the starvation. I see the need for the change of the teachings and I brought it into the meeting of the UC. Teachings of just Thursdays have to be taken

out to the public. (:24). Very simple teachings in leaflets with pictures that the man can understand how things are and how he can help himself. That doesn't need reading if you are illiterate, that doesn't mean you'll stay behind. Simple understanding by simple people will bring a lot of benefit to humanity. But can we stop the rest of humanity who is learning and moving fast on this to slow down so the others can catch up. In the last 2 workshop those who are developing the T, have received a lot of knowledge, but none of you are using it. It's like my son tells me, Papa it just goes over my head. Because you don't see what to do with it or how to use it, or what is the benefit of it to me. Many of you grasped the dynamic systems, made medical system and gone for Gans's, some of you are happy to do the coils and others little things. But the effort has to be concentrated. Somehow it is the job of the EC, UC and Core Team to jellify the whole work of the KF so it goes in one direction. The time of rest is over. At the moment do we keep the T only in the hands of 3 nations from what I see in the background. Then the governments will take it. (:26). Now there are 7 nations that are heavily involved in Pl T of the KF. We see them working and developing ... how do we take this to the next step. There is a lot to teach, but what I think is a time to pause, but if we pause the momentum we created for space development will die and we can't allow that. But how do we allow teachings to become mass teachings? Not just by showing a Gans or anything else. The shock will come when the Chinese for example will show the space T. It's on the verge. It's literally just the last pieces getting tested. The motors are running, the whole Pl structure is fully loaded. It's just the last glitches to make perfect. Once the Chinese complete the process it's inevitable that they'll fly. There is no way that they can fail, unless something drastic goes wrong in the whole structure, which we have tried to prevent most of them. ... we have brought a new T. If we don't take this operation and override our method of teachings in a mass way (:28). what will be the outcome. We carry the blueprint and can release it, but would that create massive changes and at the same time do we need these changes. The Chinese system is the most comprehensive system that has ever been developed. It's literally a copy of the universal system. It's the most advanced system. Everything possible has been built into this system. Except mechanical failure, in the past week I have even taken that out. They can't fail unless something beyond it goes wrong. We have gone into the direct plasma transfer which is what I spoke about last time, that even the dynamic systems are out of question. They are obsolete. I have taken the Chinese system into the full plasma technology irrelevant of the containment. ... they don't see it because they are not knowledgeable enough to understand what is going on. What is setup, I explained last or the week before, the medical system of Klaus is literally obsolete. The new non-dimensional, non-tangible plasma system are developed as ?? for the Chinese development. It's very primitive because this is how it could be understood and put together. The existence of the motors becomes irrelevant. (:30). But it is a help. The condition and beauty of the knowledge of the man and of this atmospheric condition has an advantage that it gives mankind one step up in the totality of the science of the space compared to the others who went through this path in the U. We have fallen in love with the beauty of the space but we don't know how dangerous this love affair is. We have to prepared for it. At this moment we don't even know how to overcome the condition of the physicality. A question was asked, what would happen to us when we come back to earth. When you travel the depth of the U it's for a long time. In the first instance when you loose the need to eat and you

take from the space of the SS what you need as an energy and the body converts inside it and it and it gives it back, there is no waste, there is no need for the mouth and eyes because you come to understand that with the eye you can't see. How far can you see when you are traveling beyond the speed of light. The eyes only see flashes of light, it closes itself because the amount of light and information transfer is beyond what it can accept. Then you go back to understanding ?? of the STM and the physicality in being able to survive the light. (:32). When you come back to this planet how do you convert back to physicality? Or does your physicality just take the shape of the man, but the reality in the background, it's a different dimension of its existence. You see the mouth and the eye because this is what the man likes to see, but do you actually go through the whole process. How do we recognize the condition, how do we transmute, how do we come back and say that this is me the condition of this planet confirms it but sorry I can't eat because I learned how to absorb energy in different dimensions but I still go to the party and pretend eating, and put something in the space gap you call the mouth, but it goes nowhere. These things are what man has to learn and to accept. How do we ?? make the children of the space? How do we understand the growth of the knowledge? Hw do we communicate with the man of space and even with ourselves? Many times those who have traveled in space come back to earth, then move fast out because they se the feature of the physicality of the man and his behavior and it is not what they are used to. Therefore they are disgusted with what they see and they leave. This is not the first time man is going to space as I said, many times before. But this time the teaching is in mass, the knowledge is shared en masse. Because it is the time for man to move on. I am not here to prove (:34).

... The beauty of it is that the knowledge is in the hands (:36). of normal people, common people and not the governments. They keep top secret and what they wanted they released if it made them money. But this time people are doing it and there is no secret. This is what the rulers of this planet do not like about the KF, this is what they don't want to see because they'll loose control. But in so many ways you have lost the control. .... (:38).

(:48). Draws. You created the H, then the H2,

(:54).

... we'll bring all the changes in one go. Conversion of the energy into mass, (:58). into matter state and into every other condition has started. It goes back to the UC, EC and Core Team, start mass teaching, your job started, this is your responsibility in your language areas, come up with a plan on how you are going to teach, do not make it a magic show, we'll bring the magic. We are now ready to go and to do it is to literally destroy the present energy system we are relying on, destroy the new space system we are relying on, the food we are relying on, the whole agricultural structure, by letting it become obsolete. Let it become too laborious to even use. Why should a man put a seed down and wait 6 months that it grows, maybe the wind, rain, genetic modification harming and creating cancer, and he puts all his life on it just to have something to eat and sell some of it. Now we enter non-tangible Pl systems we can feed the humanity in a

very easy way. I thank the Chinese team, I walked them through. (1:00). You have a gorgeous guy in the KF Chinese space, he put his life on it and I respect him and it is a pleasure to work with these people because nothing matters but achieving the target, creating peace through the new technology is the ultimate goal. It shall be shown.
I have made everything ready, it is for you now to start the process. The delivery of the knowledge is getting complete, it's just if you are going to fight in every court, why you did this or that, it shows that this is such a powerful T that those who created the problem, become the problem for themselves. ... In the next 2 or 3 weeks we start releasing information. I have received instruction from the Chinese government not to release any videos or information unless it is agreed by the government. But the T belongs to KF and to all of us. We have built it together to where it is. We abide by the rules of the nations but the bigger structure is that the Chinese government has to open the T worldwide, to all other nations on equal measure. I see the development and confirmation to be done at the same time in Theran and achieved. (1:02). It has to be done now. It's where the civilization ?? started and it's where we will mature. One end to the other. No nation is excluded, it's how they want to approach it and what they want to do with it. I gave a hint in recent days, that the sanctions on Iran from the first of November, most probably there will be no need for oil. ... Some 2 or 3 years ago when we were battling with the Sterling case, at the same time we were talking to the Saudi government in the presence of one to the senor cabinet member, I gave them the message, tank and sell as much now because soon there will be none, and the Saudis were shocked. They know it's coming. And in the next 2 or 3 weeks we'll start releasing the self-sustaining power generator. The first phase from today will start testing in Western Europe, setting it up. We gave the same chance to Africa, (1:04). South America, to North America and the rest. The beauty of is that the system has been in front of you for years. How the system works as a self-generator as I explained has been with you for years. You do not see it. But now as we said we can produce 1 Megawatt systems inside a shoebox. Now the shoebox is about to open and show the beauty of the shoe. But we have to show the knowledge that all of us get benefited by it. We have to understand the science as I have shown you on the screen, in a very simple way, I have shown how you can change matters, but there is still a secret in that and you have to unravel it. It's not so easy. You have to understand how. I taught you how to make neutrons, but you have to understand how to make what I call, double neutrons to be able to use your energy, or how you allow a neutron to divide into 2 subdivisions that you can create a field flow from it that you can absorb it (1:06). and use it. The beauty of the new knowledge is that it is complete and its the accumulation of all the knowledge that I have taught you. It's the totality of what I have taught you. Any questions. Q: Do the same principles that you have been showing here in respect to the Gans's, would they also apply to gases, and the actual physicality gases of H, Deuterium and Tritium? (1:08). Now really, because they have reached the matter state. Some research has been done in this direction was Tesla, but he couldn't complete it. In some of his papers he refers to this in trying to convert M field matter states. There are a couple of Russian scientists who have tried this, American navel forces tried this in the 70s a different version of it. It was to become a very secret T that if they could convert the matter through the M fields but they never achieved it. The reason they can't is because it has already lost enough energy to become in the matter state. When you work in the Pl state you work in a full energy set. This is what is important and we need to understand.

Q: But in your original patents we see the reactors and usually talking about using gases and they have this interaction between the layers of the gases to provide us with a self-sustaining reaction eventually. But that is an entirely different process. (can you repeat ..) (1:10). .. the patents describe gases and not Gans's. Is it similar with H, with a self-sustaining reaction that is described but it requires a key at the scintillating source to get everything going and it is matter level stuff that gets used up, some H or He or whatever would get converted. I am trying to see if there is some co-relation here and the previous document of the patent? In a way if you understood the patent in a matter state and look at the battery operation and understand that the system is, if you take it to the next level, a Gans and a gas, what is the Gans, it's a gas in a Nano state, so it's the same. (1:12). When you speak about the gas we break up ... let's look at the Iranian nuclear based space reactor. What did we do, we placed massive amount of radioactive material to support the change, conversion into Pl and then into energy which has become dynamic plasma. Look at your ?? parathyroid gland and thymus, what do they do? Exactly the same. They convert the energy to a high level of radiation. Where we speak about Gans's, but when you change the word from gases to a Gans, then you don't work in a matter state but in a field state. That's all. But when you work in a field state then you have to understand the operation of the M field of higher order, that you can cut the fields. When a field starts from here to the moon, what we saw with, say you can bend the light. What is a light, it's a M field. But can you cut a light and take a portion of it. This is what man has not learned. This is in fact, what you do when you use nuclear material, you take a portion of fields. You have to convert the knowledge, (1:14). what is the ?? light. ?? centralization is the adding or increase of energy which can cut, give additional energy to create ionization. What is ionization? It's a singularity of the plasma. What would happen if now you work in the dimension of the fields. This is the reality of what we need to understand, the gas in the patents, change it to a Gans, which is a gas in a Nano state. But now you work with the fields of a gas and not the matter state of it. Any other question. Q: John. .. I gave you a lot last week .. you did. We have been attempting to create a neutron. Actually I think we create more then 1 neutron. (1:16). A question came up, when we create Gans don't we also create neutrons in the Gans that are floating around separate from electrons and protons? We have not produced separate electrons or protons. We produce plasmas of fields but of different measure. Q: Are the neutrons separate? In some productions of the Gans you produce neutron, but the division of the neutron is very rapid because of the environment that we create to H and that H rapidly creates the water. I repeated this before, I asked many times, have you ever measured the level of water in your tanks to see if it goes up, and nobody does. But in fact you have produced neutrons, that those neutrons rapidly convert to H and you get a H2, the way you create CO2 in your buckets, that H2 creates the water that increases. Many of you have been trying to create water and this is how it is done. But you're too busy to worry about menial things like producing water. Many of you have measured, understood that, yes, you have been producing neutrons but you never captured it, and the capturing of it in that state (1:18). especially with CO2 is not such an easy thing because you haven't created the condition for capturing it. Q: Is that the salt environment then? Yes.... Q: So we create a different salt environment in which to catch it. Ah... you don't need to create a different salt environment when you can use the same salt environment. So why wouldn't the original Gans environment be that salt environment, why didn't that catch it? You actually do

catch it, as I explained, do to the energy within the environment especially with CO2 and you release a neutron which immediately becomes H ?? produces an electron and proton due to the massive absorption of the fields within the environment of it. You produced neutrons from the first day. Now you are going to recapture it back or separate it if you want to do it. Q: So that is where the center ball in these reactors come into play, where we put enough pressure in the center ball to capture it. Maybe .. why do you want to put pressure on it? Maybe it's the way to do it? Q: So we pull it in gravitationally into the center ball? You can do. But how you separate it and hold it (1:20). If you produce a pure neutron in certain salinity which we have discussed or you can get near to it, your neutron saturated saltwater should be around, horizon. The color of the Gans or of the salt where you have captured the neutron in it. Is very much yellowish pinkish color. You have to understand what you produce. You take a salt solution that you used for your Gans and put it in a separate ball, this is my reference color before I put anything in it, and then when you have created an environment when you have captured only a neutron that is in another saltwater ball, put the 2 balls next to each other. The only thing that has been in that environment is nothing but the energy of a neutron that has converted itself into a plasma of itself in that water. Are the others the same original saltwater and this saltwater that you are holding. You'll see if it is the same color and the same water it means you haven't captured anything. If you have captured a neutron in it, understand that your ball was in a MG field of a plasma because between the plates is a M field of the C or whatever, then it is very much Pl and its existence (1:22). will effect, will reflect the plasmatic field flow in the water. If you took your salts from the ?? where you started and you keep it in one of these see through plastic balls, then you take a sample of what you think you have captured and you put the same saltwater in the middle in a ball and if you think you captured the neutron, how do you know, very simple put it next to the one without any neutron and if it is the same color it means you haven't achieved it. then the new color which is usually yellowish or pinkish, more to direction of pink according to its saturation in the MG field, then you see you have captured it. You have a neutron in your hands, then you can use it. But a much easier way of capturing a neutron without going through (this) the process, you can create a condition for flight for it. As I said before, you need 1 atom of, for example, certain elements, while the popcorn of the diamond is getting created, to be in it, to be the color pink. Have you heard of pink diamond? Yes. So go and find out what makes it pink. And then find out the structure of the matter, the state of the Pl. Q: Like Himalayan Pink Salt? I don't know, as they say everyone who has a mustache is not your uncle, is it. Just because it's a pink salt and from Himalaya (1:24). Maybe it has? Q: I think Fe is the reason for pink in Himalayan salt. What is the reason for pink in diamond? Come on you guys have Wikipedia in your hands. ... John have you achieved anything you want to share with us? ... New structure for creating a diamond structure. It's an open test trial. .. (1:26). Rick, it has something to do with the way they are formed, pressure I think. ... the oldest pink diamonds belong to the Iranian Crown Jewels. ... Has to do with tremendous pressure when formed and seismic shock that propels colorless diamonds to the surface and altering their molecular structure causing them to appear pink. It has a gaseous element in it. In the diamond business you change the color if you cut where this minute gas position is you turn the color to white. (1:28). It is the same with the blue. It's a gas pressure that is inside and it reflects the light through it. It's a M field in a Nano state in a gas state of it, and this is the

reason why you get different color Gans's. It's the existence of different gaseous conditions as you change, as you pressurize, extract that leads to creation of color. It has an element gas, plasmatic condition, Nano state because it open up that it gives it the color. It's ?? now the pressure and orientation of it, because otherwise the minute you cut the stone you change its orientation and its pressure on the stone and we should be able to hold the stone pink, ?? seed. Rick, it says yellow diamonds contain traces of Nitrogen and blue diamonds boron, but no similar impurities have been found in pink diamonds, leading scientists to speculate that maybe it comes from seismic shock ... Maybe now for the first time we can explain what it is. (1:30). And if you move that pressure. I used to be in the diamond business, I am one of the biggest nightmares of diamond cutters ... it's colored stone, they have no problem with white stones because you have to see where the mother is and you cut it out. It's finding out exactly where this gaseous pressure sits and if by accident it's on the edge and by accident gets cut off when they are cutting it, it (turns) to a white stone. Many times when pink diamonds get cut they put people on top of the cutter that they don't convert the stone and suddenly it changes to white. But it just happens that you release that neutron gas inside it and it changes color, (1:31). If you understand this you understand why we have different colors in our Gans's, it's a N structured plasma, it's what and how it orientates itself. ... Video by John (1:37). That was our attempt to create a crystalline structure by utilizing and varying salts, one more alkaline and the other more acidic and moving the fields via the acidity and alkalinity. So what would that do for us, are we going backwards in the knowledge or forward. (1:38). Q: It was our thinking to try to create a different C structure. ... So which one do you like best? It takes time. You wet our appetite and then say nothing. So what are you going to do with it. ... we can put that into our top reactor to create a stronger H3 field. We created a neutron structure... . (1:40). ... I hope we're not going backwards. .. (1:42). Yeah, I am listening to learn. What can you do with this? Or do you want me to tell you something? We think that by adding the CH3 and CO2 we are ... moving the fields .. 2 different C are linking up in salt environment. Maybe like a diamond structure? But is ... or put it this way, why are you trying to create more diamond structure C? Because I am not sure that we have the perfect fuel in our reactors. (1:44). Our reactors have been spinning for a month and we are only getting a little bit of activity. The reason, can I speak openly about your tests? In one of the videos you sent you showed fields and how you measure them, but strange enough, I repeat myself again, you are not bending it to use it. You are feeding the ceiling, the cat and most probably yourself with the energy, but you are not carrying on to the space. There is a lack of understanding, or a new comprehension, the reason you're not getting there. Q: remember we have the big field with 18 MaGravs. No, no, there is a huge difference why you have the 18 MaGrav, and a SF. The reason you have the 18 MaGravs is it is your launching pad to create a balanced environment. The 18 and 6 MaGravs have nothing to do with your flight system. When you put a MaGrav system and test it like everybody else does in the room, (1:46). you have everything flying everywhere (shows fields going off). The reason we put the 18 MaGrav system on the floor and 6 and 12, is to create a homogeneous system flow of fields without any interaction with outside the ground or whatever. You haven't understood. The 18 plates which I asked you to put your system on is to balance the fields, it's your launching pad. ... it has nothing to do with your flight system. Back to your flight system, you have another problem which you are not solving and that's why you are

looking somewhere else. ?? if you don't have at home you play outside. He draws a SS, you have your SF, you are creating your fields, I repeated this before, that's why I ?? like to see. It's fantastic what you are doing but you don't see it. He draws the fields coming out, you go 200 meters away and you feel it here ... but you have to learn like the English football player ?? You have to bend the fields. You don't want the fields 200 meters away, you are very happy you can feel it, but my friend you need the fields here, (bending down to the bottom reactors). (1:48). This is why you don't get any results. I saw your video last week, I thought, they show it there but they don't use it. You are continuously feeding, you are a ofuntain of energy at the moment in that building. It's no good, you have to bend it. As it comes here (bottom reactor) it gets more energy as it goes up, it's building. Bend it like ?? I saw your colleague standing up here measuring fields with a buzzer, it will not work because you have opened a ofuntain. Once you bend this in, it comes. I'll show you how it is supposed to work. You create a ofuntain of fields and then it hits a solid barrier, what does it do, it splashes. At the moment you said to me you can feel the M wind above it. The discussion in AZ, this field (above) means you are loosing energy, you created a wind. You should feel no wind. In the Chinese system, I tested and put my hand on it, there is no wind, because we have managed to bend it. When you stand in front of the system, it's just like you get a cold chill wind in your forehead when you walk in the cold. When I was standing in front of it a few days ago I said to the guys feel the wind in my forehead. (1:50). Because if you put your hand above it we don't feel any, we have managed to bend it. 10

(2:00).

(2:11). John shows video of the fields ... (2:12). That point where you go up and it's beeping, are the fields that are coming in from your system. It shows a leakage. That ball on the top shows a massive leakage. Because now you have confined the space to, and then at that point it becomes matter state ?? plasma field of the matter state, and you feel it, the reason it goes up on top of the system it shows that there are so many fields that are leaking. In fact, you should see no fields in there and a bending in. Q; Can you tell them how to bend it? Oh, they know, they know how to do it, it's by ... look at it this way, it's by the transfer of gradient of fields. You have to create lower fields at the lower level that it can go to it, to feed it. And that is all that needs to get done, but somehow it's not getting done. It's understanding the flow of Pl. Dr. Rodrigo does it. (2:14). Congratulations and greetings to the new born. The understanding of it is that you can be at a position to do it. That you can extend it, that you can bend it inside and then you'll see the structure, those 18 cores are there to hold ?? and they are doing their job. What you are showing me is exactly what it is supposed to do. If you look at it, the 18 cores are like the egg shell and you have a chicken inside that is jumping out. .. The 18 core are your launch pad, nothing to with the flight system, but there existence allows homogenous energy to be available that the base cores can pull in that they can become part of it. It's your rapid deployment of fields. Q: Is it love yourself? It has nothing to do with the love, this is pure Pl transfer. Q: Yeah, so give to yourself, where is the soul of the reactor. Yeah, in so many ways it is in the center but you have to find it to be able to adjust it. (2:16). It's conversion that is missing in this. There is no use trying to go and

find better fuel, you have everything there, and you show it, a dome is suddenly there. SO that there is the biggest ?? going up. You have to bend it in. The first dome with a gap is what the MaGravs are producing. They are containing and doing exactly what they are supposed to do and the second one is doing its job, but you have a leakage, hole in your pipe, the balloon is bursting and leaking. So you have to bend it. Do we understand John? Rick says, in the old days of gas reactors it was always rule number 1 that the Pl doesn't touch the walls of the reactor, and different types of N coating would be advised to repel the Pl from touching the walls of the reactor. Which would also be true in a nuclear reactor and others like CERN when the Pl touches the walls its the end of the experiment. (2:18).That's a hto Pl, we are dealing with a cold Pl, a universal Pl not even a cold Pl. Q: Are the principles not the same, you had a shield, the Al plate or other types, the N coated Cu dome you used in the Insano? Yes we did that in the Insano. The people have been so closed in all the time since the Insano to be able to create the flight. .. I keep saying but it's there. I am one of the worse teachers, but I am one of the easiest people to teach. The worst thing about me is I don't spoon feed. An example of it is, I tried to spoon feed you with the MaGrav system and you see what a mess it has created. They went backwards to destroy themselves. Everything was wrong with it, let's build on the next step ... we done this. (I think he means you didn't follow through to completion). And you want to play in to the hand of those who discredit. With what you have done, why should I do the same again. I have taken charge with the flight system with the Chinese and I'll get it through, the same as I did with Iran. It's not that one (is better) then the other, or there is any difference. We are just allowing the development ... I have a problem with the Americans developing this? No, I have no problem, but John is very intellectual, he was with the ?? Sears group he knows M field work. (2:20). very well. It has to be done by a layman and not a scientist. What is it going to be. We had a cold war and nuclear race, now it's going to become American and Chinese? No. I have shared a lot of knowledge in the past 2 weeks when it comes to understanding the T that all do it the same. Because when I do it for one I do it for the other. To me the way the T is going, it has to go with the Chinese, because through the Chinese we'll find the world peace. I don't see peace through the Americans. If we show the flying system in the next 10 minutes the Americans will come with the most horrendous way to destroy every nation (to confirm) that they exist. This is my problem. There is nothing wrong with the science or both things we are all part of the same. I see the world peace through the work of his Excellency president Zhi. And we'll achieve it. There is no other choice or way. If you leave this T with the Americans, they'll claim they're god. And god knows what, they'll want even breathing charges on the air you breath. There is nothing wrong with the system, it's there, it works, but they have to call "Beckon" to come and bend it for them. Watch the movie, "Bend it like Beckon" and then you'll understand them. (2:22). There was a movie made about a footballer who was famous for bending the ball to go into the goal. Beckon created a condition of sliding football. And that corner on the top has to be that sizing kick, that it bends the fields. Would you achieve it by changing composition in the top core, or by creating new Pl directions. It's all there to be done. But the biggest problem is to fly in Beijing or America or wherever. So what? How are we going to get in it? Or how to get out if by accident we happen to be inside it? You saw the guy with the buzzer, suddenly the field creates and he's inside. How are you going to get him out? John you can shout as much as you like, how are you going to do it. How will you

manage to create that ?? bell for him to come and go? How do you transfer energy across? Then if he got stuck in there, how will you feed him? What happens if your cat happens to sleep under there when it's getting made and he is part of the system. ... how do you keep its physicality that it doesn't loose its soul through physicality. (2:24). How do you not decompose the man through M fields, like a cube of sugar in hto water. You create the fields that there is no physicality. Don't think that these are ... this has happened many times in the space. And it happens every day because nothing works according to the plan. There is a rule in the U, that you change your systems every so often, because they get clotted and you have problems and then you can loose this and that. Or you find problems creating new animals out of it. The fun starts once it's done, once we show the fields, you're ahead. AZ has been ahead for months. And the only thing that is left, ?? you need the stronger fields. You have everything and you show it, the last video shows it exactly. Just bend it. Just put it in, in pulling it out, in interaction with its own fields, it doesn't ??bust, but it leads to light. I don't see until this moment until you don't find a way to bend that field, that there is any need for new fuels. You have everything right, the composition right. the composition looks to be perfect. And this has been in discussion for months now with AZ. One of the first things I did in China was to feel the top, do I feel the M wind, and there was nothing there. At the height I stand, I said to the guys, (2:26). I feel the wind in my head, in my forehead. Because it's the ?? center of the STM and I can feel see it. I could see light, we saw the smoke coming out because of conversion of energy to matter. They are very advanced in China. I love the people I work with in China, they're sincere and work in one direction. They'll achieve it, and I keep the government continuously debriefed, that we don't become ??? achieved from this planet, but we shared the knowledge. If anything happens to me, there is a key, I am sure the Chinese will release it to KF. ??? because this time the knowledge has to be equal across this planet. This time we have to use the knowledge for the purpose of peace. Maybe there is a reason there is delay in AZ until it is achieved in a different direction. When the Americans change their tune to peace they will achieve it. The true peace, not by gun policy the way we see they use guns more. We kill more to create peace, what a nonsense. Any other question. I have a notice in the background that we have Jalal talking about his little worm if you like to show it. (2:28). Shows video. Rick has a name for, it reminded me of the Horseshoe Crab ... the oldest living creature, 400 million years and has blue blood. .. We explained the reason for the blue blood, because of the cesium Oxide in the blood. (2:30). shows. . the ball there .. last week it was here. .. before it was like a tail coming out of it ... (2:32). ... Q: Do you see a heartbeat in it? (2:34). Q: How do you know that it is a creature? The materials move due to the dynamic low of the Gans's. We have seen this before. if it's growing and moving, it can be due to the flux flow of the fields in the Gans. (2:36). It's structure, but you have to understand what it is, is it gaining mass, but does it have a structure of life. When you have a salt Gans you usually start seeing crystals around the container coming out. That creature a confined environment for life to grow in it. Then you see conversion of the materials through the field interaction. It conditions like this you are in Pl conditions. Q: I am not 100% sure that this water is pure water. If it is life, then somewhere when you have been cleaning, the prtoein has still been transferred through. And some of the prtoein has linked up with the Gans and the CH3 or with the H3 or whatever, now it has an energy support system to live. (2:38). I am sure there is some AA there, and the water

is seawater. It's possible, you have to understand what is and how it is and how it is created. .. many of you have created creatures in your packs because you just don't consider that AA on the top as much, but that much is enough for life to begin. You just need to attach it to Mg, Ca and anything else that might be in that environment. Rick shows the horseshoe crab. ... (2:40). ... we have seen the same with the labs in China. In the future we'll set out to create entities the way we set out to create Aluminum and Zinc. If eh man understands and can create, if he has a fish farm, he can create the fish out of the fields (directly), without any diseases. If the target is to create the muscles of a fish you can do it. We can do it we don't need to be a genius. We can create the conditions that allows that kind of life to expand and exist. (2:42). Q: If we maintain the fields distribution by the top reactor, blocking, or separate the fields back to the bottom SF, then the bottom reactors get more pressurized by the higher strength, what effect do they have in a visible way, do they show new Pl abilities by that? repeat it. can't make sense ... (2:44). It has to be returned back, there is no if, if you don't return them back you don't get physicality. Q: What is that physicality that we might get? The physicality depends on the strength of what it is. Initially there are a number of things that happen, one is the vibration, another is the light depending on the strength, you see gaps, sometimes you see striped gaps because the fields tell you it's not correct. This is why the center line is made dynamic to overcome kind of gaps. But there is the knowledge, know how of how to make gaps, because they're storage, the door, there are all sorts of things. Rick, you mentioned shimmering before. On the first day when Armand and John were there they could feel the fields. If they could have brought those fields down they would have seen shimmering, lights. That's the next step and they haven't managed to achieve it in 3 months. The fields are there, they can feel them. (2:46).

(2:48). .. Dr. Gautoua makes a presentation about how he is teaching in Kenya. (2:50). Plasma Science Classes in Kenya that started in 2017... (3:10). How many people have you taught? About 1,000. What results do they get from taking the water away? ... .. What we have to understand from teachers like you, for example, where did the diabetes come from and what causes it, is it the operation of the pancreas or is it physco somatic. (3:12). What happens if you just drink it or if you apply to both sides of the pancreas and change the pancreas. You have to find a permanent solution, not just a replacement for insulin, just because it's water 25

(3:16). Lady from France thinks she created water. (3:18). 30 CO_2 pads in a Ziploc bag, did the same with ZnO_2 CuO_2, CH_3. After 3 weeks there was like 1 cup of water in the box, she thought there was a leak in the bags. (3:20). After checking for a leak but there was no leak. She repeated it in another box and water formed again. ... (3:22). In 3rd experiment used a thermometer, it was 23 and 25 .. the PH of the collected water was 8.2 (could be more), the PPM meter was 69 very pure. (3:24). Did I create water Mr. Keshe? You measured the thermometer so you know that there is a temperature difference. It was CO_2 + ZnO, but in a different ratio. So you have an energy transfer from one to the other and in that energy transfer you have created an energy, called a transfer, which the doctors do, and you captured that energy which is equal to the water. What would be interesting is to put this in a sealed box that no moisture from outside can come in. repeat the same experiment but in a totally sealed glass and see if you are still

creating water. Then the condensation will be eliminated and won't be there. Then you'll see the transfer of energy. What is the ratio of the 2 pads in respect to each other. I didn't calculate it. (3:26). Put it in a sealed container and come back to us. Rick says to weigh the bags to see if they loose weight. I told everybody is a scientist in this T. You don't go to the university to get a PhD. Suggests to write this up for the KF Journal. We have a gentlemen from a university especially for scientific papers in the KF Journal. (3:28).

(3:30).
(3:32).
(3:34). Q: Molds of different shapes can appear. ... is there any danger in developing molds? Not really ..
(3:36). ... when I saw the first indication of the energy getting converted, when I saw the smoke, that is an indication that the energy is getting converted. ... (3:38).

END

233rd Knowledge Seekers Workshop - July 19, 2018

(,)

(:16). Many people are asking, we are still testing in China and will not release without the governments approval. We are learning a lot, it's going through its successes and failures. It's not going to happen overnight. (:18). Today is Caroline's birthday. ... We are sending appeals in Belgium thank you to all the Belgium's who submitted affidavits. (:20). ... this has not happened since the Second World War time of Hitler, Saddam Hussein and Chile. (:22). We are in another phase of teaching. ... now we are going to the non-dimensional reactors and how you identify and how you recognize a new state of matter. We have to address it today. (:24). .. understanding of the new materials like H, H2 and H3, can cause a lot of problems if we don't understand it. People are showing magnets and in AZ fixing things. One of the ways to tell it's H2 is with a magnet, we have seen separation of the Tritium to H and Deuterium using the magnets, they show effects. One of the reasons we see these effects with the magnets is because we are producing what we call, Gans's of CH3, in an environment of Zn, Cu, and Fe in the mixture. Go back, this is confirmation of part of the health teachings I explained years ago. (:26).

(:32). What is interesting when you get a D or make a CH3 and you create the separation of it and you see it reacts to magnets it's because it constitutional, MG field has a connection, and it has a H which is connected to Fe, so it carries the behavior of it. This is important for you to understand fro those who go into the medical application 49

(:34). Armand shows Mexico developments.
(:54). A teaching center is promised for Iran... We deliver knowledge and science should have no borders and barriers. There is another development which we should understand.

It's the development of the neutron which will have a massive implication on the whole of the work of the KF, and the whole of the work of the present scientific world. This neutron development allows us to be able to produce any material of our wish, at the point of the wish. You have to carry on this extension of the teaching, it's the freedom of science. As you have produced these materials in your package. You have to understand something very simple. Any production of these (H-Al, D-Al, T-Al), gives you the freedom of production of the neutron. A neutron ... the balance between the 2. From H to D you have a free neutron and from D to T. (:56). But we understand that the neutron, by itself, on its own is the mother of creation, of the basic atomic structure, of H. If you understand the process it becomes very apparent, what happens to the neutrons that come, for example, from the same Fe base, gather together, you have the H to start with. Now you can add the second neutron to it, and now you have D. These are only in plasmatic condition and not matter state condition so they can carry MG fields of specific ?? ways and for a specific use which man will understand shortly in the coming time. Now you understand in a simple way that you are in control of the creation of elements. You put 2 of these ( ) together and you get the property of the next element. At the same time you can add a neutron into the system, which in itself will create another structure, istoope. Man has still a lot to learn. But if you understand the simple neutron structure now we can use it in a condition we want to lead to any matter in the space that we want to produce. (:58). Single element is the backbone of everything, is the reality of now, as I said in my books, the mother of life is Nitrogen, neutron that it can lead to any material we would like to produce to create. But this neutron in this shape, if you understand its MG field, then in space we can absorb that field to produce what we need. We don't even need to produce the neutron. Now we have created, we understand the characteristic, strength MG field of it, we know that this is the neutron we need for a specific cell for a specific job. But in that process it allows us to be able to create new materials. Now that we have found the way to the mother of creation, matter state of the universe. This is absolutely beautiful and world scientists will give their life to understand the simplest ?? that all of you understand. They can't believe it is so easy. If the neutron is conditioned to a specific position in the matter state, becomes an endless energy source. Becomes an endless G source, and an endless knowledge to what man might need and want. This is absolutely beautiful gift through understanding the new Pl T. (1:00). We have spent years teaching and this is the jewel in the crown of the KF teaching. Not only being able to have the matter of the neutron itself but to be able to understand its MG field strength that allows man to produce any matter state in the U. This allows us to be able to create new environments, new conditions for structure, new understanding of the creation and the work of the U. This is not a neutron which it is just something that has been there, now this is a neutron that can be everything man wants. When you have millions and millions of Gans's that are sitting at H, D and T, or lead to the creation, or separation of the neutron G M force. Now there are billions of this neutron in the cup, if you know how to exact which one, because they are all of the same strength, it can lead to creation of any material. There is a system, a way that some of the K Seekers took over and they understood and they were happy to have, but if the knowledge develops in the future for those of your who are in that direction, you can extract a neutron from the space. (1:02). You can extract huge amounts of neutrons from the space. Once you have made the mother (Neutrons from H, D, T), go back to another part of what you developed over

time. Do you remember the Nano plates, the water Cup you made and then put Gans's around it. Now you can put neutrons of elements around it and in your water you'll have as much neutrons as you like. Because neutron is a free state of energy in the U. Do you remember your food cups, and ?? process. This gives a new freedom to those who work in any part of the KF development, Agriculture, medicine, energy or space, anything you can imagine. Those who go advanced in the creation you can even find neutrons which are in the strength in the dimension of the STM. In time man will mature to understand the application and implication. It's important we take the knowledge to the next step, (1:04). the ultimate point of the knowledge of the creation in the U. I have taught you and given you access to one of the most precious things in the U, the mother ?? that by its division can lead to anything you like. And by collection of its division can give you anything in the collective matter you need. Understanding the process of the neutron has been the cornerstone of the creation, because now it's a package which you can ?? because it is the "what " you carry. It is what you can carry, you don't need to carry anything else if you understand it. This is part of the development of the new space T. If those of you in the energy development understand this you can change the whole course of the energy development overnight. I made one promise that by November there will be no boyctots for Iran, because nobody will need any oil to boyctot from anyone. There will be no boyctots for understanding the knowledge of the U. Now you have the knowledge. .. you can change the whole course of all the material need of the man. The dimension and application of the production of the neutron (1:06). is beyond the understanding and comprehension of the man unless he goes to space. When you go into space it opens up every channel, avenue of travel in the deep space, because then you have to find the neutron strength of any U, which is the central line of what we call, Principle Matter. Because the neutron comes from that strength. This in time will allow man to travel from U to U, because you have to replicate the neutron structure of that U, and as you have seen you attract and ?? C out of the atmosphere, now you attract and get attracted ?? the same way the planet, what you call the universes field strength. Because not every neutron in the same in every universe. The fingerprint of the U sits in the structure of its neutron, what we call the smallest package holding of the MG field elements of the U, and on planet earth in the U we are in, it could be let's say 10k in the next U it's 10.1k. Now that we know to add to the neutron to be able to reach it, we just need to add 0.1 to the 10k as it is matching you can match into the MG field of it. You can go from U to U in no time in the space. What I am teaching now is to be put on the record so that when the man matures he can go back to it and say, it's there, this is what we have to do. (1:08). Neutron production, understanding the MG field of the neutron in respect to the condition of its creation of its MG field is the only way man can travel across universes, and the only way he can travel within the structure of this U, and this structure is one of the easiest ways to travel beyond the speed of light, where the time doesn't exist, where space is irrelevant, because has anybody ever measured the speed of the M fields. Now has anyone ever been able to measure the speed of the plasmatic M field, which is totally free. Those who work in communication, if you understand how you can package it, zero time communication will be in the hand of man in no time. It's vital for us to be comfortable with the new knowledge and it will take you years just to comprehend what I put in here in the last few minutes. To me it is home I come from that culture, that knowledge. In so many ways my teaching is complete as of today. There is

not much more that I can teach. I can guide you to understand, but as I made a promise when I came to teach you and take you equal, this is the knowledge of the U. (1:10). Your governments have to understand and those who lead it and take you to space, have to understand the knowledge which has been released today. If you understand the knowledge of the strength of the neutron which carries the STM, the presidents life for me is nothing to take. Because there has to be one ruler and that has to be the ruler of peace and from today we enforce it. All those who play the game of power have to understand there is no power played. The power has to be peace and the knowledge and understanding and in the coming time the Chinese space system has been set to show it. It has to be that the knowledge becomes part of it. My team in China are working very hard but they can't see what is happening in the background, they are fixing and mending, fixing and mending, but I can see how beautiful the system is setting itself up. I sincerely thank them especially to the man heading them, and he is committed to what I am. I came to bring knowledge and peace, I have brought the knowledge and through I will enforce peace. Because this is the only way the man will get into the cycle of the UC and be able to travel the space of the U, and to be able to expand his knowledge. What can this knowledge do? If you understand the interaction (1:12). and now that I have shown you the cup of neutron and understand what to do with it. Do you need to have a need to eat, to produce materials unless you need it. Do we need to damage all these environments around the world to fit a few. But everything goes to one point, how do we use it. The knowledge is so immense, I could spend thousands of years here and you still won't reach the top of the tip of the knowledge of the U. Us as Universal Teachers carry the knowledge of the Creator, but we teach as much as what can be understood. But there is one principle and that is we teach enough that everybody is equal from the base. How you evolve and develop the knowledge is your decision. In the coming time, shortly when you literally throw all what you have done in the past 5 years, create neutrons, neutron cups as you did with the food cups, then you understand you can put cups next to each other, and you have a neutron that is created by Al, and one by Fe, and you can create the world of creation, because now you have a field free to create what you want. This is how you produce Fe and Zn in the U, you don't go and find it. You carry the neutron, and the balance difference neutron gives you what is the Fe, (1:14). so you create in mass, in tons. What is mined as gold in the mines of this planet is peanuts to what you can create in seconds. The essence, the knowledge of the neutron T is the essence of the creation of the Creator. Now man has to understand, Today this is a gift to Caroline and it's a gift to humanity. But do not abuse it. Do not go to it that you come to the point of no return. Understand that what we produced as Gans's have to become the passage of the creation of neutrons of that strength, that through it man can reach the level of the soul of the Creator. Then you'll understand when He said, I made man in the image of Myself. Now you have the key if you understand. You mix Gans's to get effects, you mix ZnO, CuO, and now do the neutron of Cu strength in conjunction with Zn, (1:16). sit them in the place of the cup. I said, I will teach you a way that you can walk in and walk out and there will be no cancer. This is the key. I said last or so that the present dynamic systems are obsolete because neutrons are dynamic in their structure because are ?? key elements by the fields they carry and because the key and the field they carry it is itself in dynamic condition, you don't need motors. When you created the Gans's from the ?? Zn, Cu of Fe, Ni this neutron that is extracted from it has to keep balance with all the 4 field forces that

created it, so it is dynamic. In that process it can absorb energy as it gives, those of you who understand nuclear physics in the basis of the foundation of the division, and the neutron division and what we call radioactive decay, now understand the principle behind the nuclear decay. Why some elements decay so fast, in milliseconds and some over thousands of years. This has to do with the absorption energy structure that the neutron was created out of in balanced fields of the U. Then you understand very simply how it was even possible to change the course of Fukoshima. Now you understand what was done 4 or 5 years ago and how it was done. (1:18). Because now we understand the amount 03

(1:26).

(1:30). Triggering Coma patients into complete recovery should not be more then minutes but then you have the time of recovery and even that you can expand and (shorten). ?? pollution should not be a problem, if you analyze it, we can change it. We can see these "islands of plastic" those who understand it, in time can convert it to nothing. There is a very big gift to mankind in the world of chemistry in the matter state. Nothing in the world of chemistry can become chemistry or matter state as a molecule, composite molecule, unless they share. If you have an atom of H and C they need to share somewhere, you don't need to go anywhere you just need to find the strength of the share. There is no ?? boundary. This will change a lot. You need this knowledge when you go to space because the sharing of the MG field, and composition, and introducing that sharing value, allows you to make element composites, matter states anywhere in the U. You don't go into find out how you can break up the plastic C-H bond (1:32). you go and find out very little, what is shared, atomic bond, which sits in the neutron which you carry and you can adjust it, magnet ... the same as you extracted the neutron ?? and you ?? share ?? , which is usually in a field element or an electron. In the depth of the U any material can be made, because now you can inject the same thing into the same fields and create the bond you want. Understanding the knowledge of the plasma, was the step we had knowledge that now we can complete the teaching. Now we can show in reality how much we can give, put, position, how much we need to extract, to put in. then if you go a step further you can go to the dimension of the STM. Can you by understanding the neutron element strength, extend the strength of the STM to reach the extent of the soul of the Creator. Now we still work with magnets and Gans's, but those of the KF K Seekers who can understand the property of the neutron and will show it very soon, (1:34). will understand that there is a new and fundamental knowledge to be understood, which all the knowledge we have comes from it, creation, production, transformation, transportation, all if understood becomes easy. The space reactors which carry the dimension of the fields of the neutron have ttoal zero time and space, because once you achieve the position strength. You are in the position, there is no time to reach, you have already arrived. And as you arrived you have no time so it can't be in the space of time. It's in the space of the fields that dictates the position. It goes back to one of the biggest questions for mankind, does M field have its own ?? magnation and field force. Or does it have its own time and space. It does not possess space because it's the traveler of the U, he has no time because he's at every point at the same time according to the strength he has to be. This is why we see connections with everything and everywhere else in the U.

This comes from the interaction of the fields of what you call the neutron, what we call the Principle element of the U. We create life out of life. (1:36). We create life out of the life of the U in a very simple way. 04

(1:38). Any Questions.

(1:50).

(1:52).
(1:54). Q: If we can modify the seeds of the plants. If we can talk about genetic modification of seeds and we can get rid of these modifications by soaking seeds in plasma water, can we use the new neutron based medical systems to correct changes in the DNA level? I think you were asleep, I just spoke on that, I just gave you the answer in the teaching, of course. ... with this knowledge of the plasma neutron development you can make Gans's of the neutrons. This is the beauty of this planet. Once you establish it, you ?? can make ?? Gans ... and apply it. Genetic defects or what they call it, correcting it in the cell should be become no problem. Mankind should live thousands of years from now. We have taught everything, (1:56). but it just to understand it. Why does a gene change? Why do you call it a defect? Isn't that condition, if we take that person to another dimension it will suit him perfect, but here it's a defect. It's us who have to understand what condition has been applied for the dimension that is in it. John shows his video. It carries a lot of knowledge if you understand it. ... He put a magnet at the bottom of the H3, shows H which is yellow color that doesn't get pulled to the bottom by the magnet. You are not just letting the materials to settle, we stir it up, and then we take the H off the top. (2:00). .. if you use another magnet you can get that H off the top. But you have to go back to the base of ?? CH3 to find that field structure. This is what I said to you today. (2:02). Miguel from Mexico has a SF. We asked for the support in such a way, you'll understand very soon as gradually it comes out. There is a common denominator in the knowledge that you all carry. Go back to the presentations of the Christmas 2013 or 2014, you saw how we connected the reactors together. Once the Chinese system matches up to what it is supposed to be, the knowledge, information, the energy or whatever you want to call it, because it was produced the same way as you have, it is connected to this planet, you all will receive the knowledge. This is the reason we have asked. We have problems in development, you will see the problem. We didn't ask you to open it at 12 midnight central European time for Monday. (2:04). The process is still going on, and once you reach, the same as what we did in Christmas 2014, that we used the reactors in Germany, Canada and Italy to ?? confirm energy. We do the same you will receive the same. Some of you might see your systems start changing noise, or the system starts moving, or things happening around the house you don't understand, these are the interactions that we are setting up. This is what the system in China is set to do. We change from ?? ?? motors, we have huge physical problems, construction with the system. It's not that way because it transfers so much energy that even our own systems can't handle it. The matter state and Pl state interfere so drastically with each other. We see it, the team was working until 3 or 4Am last night, because to them you have

engineers around a shift preparing a ?? we have people ?? SS ... my team sees only what is happening in the room, but I look at the totality because I see where things come from. Some of you might see strange things from your units, ... we are locking into you. You'll understand very soon why we choose this. We might stop the China system for some time because of the holidays, but if you see Chinese in your system, or it moving .. ?? (2:06). There is no time limit to it. The reason we asked you to turn it on and be with us is to receive the knowledge. Q: We have experience with our dreams, one feels like levitating, like we are opening another kind of energy to take us to another place. Most probably do. Q: I made a zero time transport cube .. I am sure we can move matter to another place combined with MaGrav. (2:08). You can. I always said that Tesla was a genius, he understood the work of magnetic fields in the matter state very well. But sometime in the last part of his life he could not connect, if he could have had the understanding of ?? of Germany if you put these 2 guys together they would have solved the dilemma of M field and gravity. You can not. And Tesla tried many times to create mater. 53

(2:14). Klaus from the agriculture group made a reactor of H, D, T without electricity and is creating water. Video. (2:18). .. What you are showing is the btotle is collecting water? (2:20). Yes. Is there anywhere it is open? No. ... They will test the soil for increased levels of Germanium in September. ... (2:22). ... Q: Can the neutron be considered a lens to the light of the Creator? Can be considered ... It is, but you have to know the how, why and where, because we come from it, if you have listened to the other teaching. It comes from the ?? light of the Creator. Q: How can we neutralize nuclear weapons with the KF technology? (2:24). Leave that job to the experts please. ... Our wishes will reach where it has to reach, and our T will touch where it has to touch. We will do a lot of work in the dimension of the science and T transfer, that make these things obsolete. We saw how during the Cold War the Russians made more nuclear bombs then the Americans, then when they started talking they have to pay to dismantle. It became more expensive to dismantle, if you just leave them there, they'll rust and then what's going to happen. The best way for world peace, the way we see it is to develop technologies so that these things become obsolete and then we'll find a way for them to be disposed of in a very safe way. I was planning to teach the neutron technology in 3 to 5 years time, (2:26). but what I see and what it is now, it is essential to be taught at this point in time, for the space T for what is to be done. There are many ways to develop technologies that we don't need to worry about nuclear. ... we have to develop technologies that through it make Nukes obsolete, but we don't ?? dismantle it. The Americans are paying huge amounts of money for the Russians to dismantle the huge amounts of nuclear weapons they built compared to the Americans. The Russians have vast amounts, if they would have used them one by one the Americans would have been roasted, done. ... and we don't even know how much more advanced technology weapons sits with Russia. They are extremely advanced and have made more advances. The west likes to think it is the best, but if you tell the truth the west has a long way to go, especially in the direction in the space. The knowledge of space development is, if you take it a step further (2:28). the Russian knowledge into the depth of space development is so huge and far ahead of America. The American Senate paid Russians 10 billion dollars to Russians to learn how to land on the ground, because in the sea they can't find it. I explained this in one of the talks with NASA scientists on how the landing on the

moon was faked, is that how come if you loose a boat somewhere with all the GPS it takes hundreds of ships to go and find it, even with the beacons going. The Americans show ... this is the extent and amount we can start questioning the Apollo system. There are too many discrepancies not matching the technology at that time. At that time we were so hto (2:30). to get there, to understand, and they keyed us up with the news and TV, but I asked a single question, we loose a boat with a beacon, and all these ships go looking for it and they can't find it. How did the Americans know where it would land ... we don't even know where it would land, and then they were there to pick it up. The Americans can't answer me. My problem with the science, we have GPS now, but how did they know where it will land after being dropped in? Their are huge questions in the Apollo program. They are discredited unless they can show us. That's why they paid the Russians 10 billions to land on the land so it's easier to find then find it in the sea. If you have such good technology then why do you pay another ... Nuclear has become obsolete and no need to waste time and money on it. I see it there are 2 ways to do it, dismantle nuclear weapons in their silos through transfer of the nuclear resources in them, now that we know how to transfer materials. If used then launch it into the open space of the U that in time it will become irrelevant because it doesn't have the energy for it to be done, unless it hits something. Or let them bomb each other to smithereens. (2:32). Let's see who is going to survive, not many. And the worse people, are the ones with the bomb shelter and they can be hidden under. You become a mole and you'll never see the surface of this planet. Then in history there will be the people in the center of the earth, yeah, they're the people who made the nuclear bombs before, they couldn't get out they went deeper down to survive. So do not waste your time on it, just develop the T that brings so much advancement and then you won't even need to think about the weapons. We brought such a knowledge that man doesn't have to have worries to conquer (others) to have. In the coming time, we have to, we can do, and any of us has the knowledge to develop, energy, flight, food systems to satisfy our need in anywhere, any dimension in the U. Don't waste your time thinking how we can stop nuclear, with the new T even with what I taught today it's already obsolete. Leave the job with the masters we know how to deal with it. A lot of governments are not happy with what it is, but there is no choice. If they spend money on the obsolete T that's their problem. Now the problem is they have to destroy it, to get rid of it. There is no way to use them for any man in his right mind. (2:34). The security systems set in nuclear deployment is so hard that not a president can press a button anymore. Those days when they carried a suitcase and they pushed it and it went off are gone. There are parameters put in by governments, with a certain number of people with classifications that have to be done, certain offices have to release codes. It's very complicated, it's not as easy as it was 50 years ago. ... Many nations don't even need it. Rick says global leaders have signed a pledge against autonomist weapons, and engineers and scientists, 5,000 signed a pledge to not be involved in lethal use of weapons. Yeah, the thing is we have to go down to, and I have discussed this with some scientists in the past, we have to make for engineers and scientists the same oath as the peace treaty that we signed, for KF supporters. (2:36).They should sign when they enter the university and not after they develop and they offer them some money and they change their mind. The engineers are the people who design these lethal weapons, so what if we get the ethos at the entrance to the University as part of them. ... I talked with one guy... I have to protect my nation so I make something if they do then they can be

destroyed. But I explained to him, you kill and you and your family have to pay for who you kill. And the scientists are so brainwashed with nationalism that this thing can't stop, and they have gotten very good at it. ... we need to understand this, how we can develop this thing so the engineers sign at the entrance to university, and that is why it is so at KF SFI that you have to sign the world peace treaty before you come in. So you stay with the ethos. ... (2:38). Once they can't get your knowledge and do the way they like, they start discrediting you. They try to destroy you and this can't happen. ... A KF K Seeker in Africa who can make a neutron system in the coming weeks, is more advanced the top American scientist paid 2 million dollars for nuclear neutron bombs. ... Q: What is the easiest way to harvest the neutron energy from a SF, and available in humble technical conditions for people with limited resources. People have to start showing the application and implication of it the way you have done. One of the things when you go in the neutron direction is non-tangibility and no conformity, it means you won't be able to hold it in a container. So it comes on the level of the wish and the understanding of the soul, because you understand that the neutron which you have created the (2:40). capture or release of, is itself the creator of what is capturing it. I said this a couple of weeks before and Dr. Klaus said, my god now it's obsolete and we are going to go to non-dimensional, but if you understand what I taught today, that neutron which is making that containment, is itself the container. Inevitably if you understand it, it becomes non-tangible, non-containable. This is the beauty of the creation if you understand the work of it. When we develop this dynamic neutron systems, in time of progress, if you know how to switch it, the containment of them, itself is made of it, so it becomes a non-tangible system. When you look at space nuclear reactors, when they go into the full blast position, you only see light, you don't see any containment. I tried to put it in the patent, but it was far fetched for people, but in some lines of the patent, if you read 3 or 4 sections of it and you connect it together, it gives you that knowledge. When I make a neutron out of what is itself the containment made of, can the containment hold it, or it becomes part of it. Don't forget the containment has the entanglement of physicality, where the free has not. When it releases its energy it becomes part of it. We have this problem in part of the tests in China at the moment. And it is part of it, I see it. (2:42). Because the field sits beyond but it is part of its structure to be released and to be contained. You can't contain it, but if you understand and you can utilize it in the SF in the proper way, it doesn't take that much to create that much energy, but you have to know what you are doing with it. Then you have to understand one of the biggest fundamental points of the whole teaching today and if you missed it I'll repeat it. Ever the STM has the strength at the level of the neutron which carries it. If you do that, then you understand that the wish of the pilot, the captain, the man who makes it, is paramount. What does he wish to have. When the neutron is there as a ?? pull in your SF, and you wish water, it gives you water. If you have a wish to create a MG field to be sugar it will be sugar. Ask Klaus who just a few minutes ago showed us a cup (wind fan with H,D,T), why did he put that ball in the front, what was his intention, to see plasma or to see water. What has the system given to him. You have to look in the background, you have a H, D, T. You K Seekers do a lot of things but you don't understand it. I looked at it and said, the guy has wished water because he needs water for his garden, and it's that ?? wish he is collecting water. When he puts another ball there next time he might not create that because (2:44). this time it's not for the sincerity of showing but this time I have to show. You have to understand the operation

of the STM. If I read you some of the texts I send to Chinese KF developers, in the essence they understand the work of their own soul, their own need, understanding their function, then they understand what happens and why they are important. If the neutron has the full spectrum of the work of the U, your soul is part of it, so how can you change to convey and control it. This is for us to understand the next step of creation and how far we can go. What do you want from your SF, water or bread. Frederic from last week, would like to present her further experimentations with creation of water. (2:46). Video ... (2:48). (2:50). .... I have done many experiments. Come back to us when you have a conclusion. there are many ways to make water, but the thing is that many of you when you start doing these experiments, you repeat it and it doesn't happen, but you say it happened before, it's because you have changed the environment and a lot of people don't see it. When you have a closed box and you collect water in it, then you open it and you do something and say, oh there is a water in it, and you close it. You have changed the environment. So this environment doesn't go (work for it). As long as you can keep it sealed it produces water. When you tamper with it, it changes. Many of us have done these things. It has happened to me many times. You see it doesn't work (now), but at that time in that environmental condition it was working. (2:52). If you are able to repeat it, don't get dismayed, it just means that you have changed the environment slightly, even if you do the same mixture. Come back and show us what you have done. Rick shows SF running around the world. that would be nice ... we'll continue to add to the KF Facebook album. (2:54). (2:56). (3:00). ... these are in support of the work going on in China. I think that is what we have to come to realize that everything is connected to each other and somewhere link up that we can bring the change in. ... It shows that everyone around the world is hoping that with this new development in China (3:02). that we collectively bring, if we manage to show in the Christmas time that we could bring the forces together, then we should be able to do the same in reverse using the technology from China to launch setup and move other reactors around the world. But it depends on what we expect to receive and to have, many of you will see things and say, something happened. But see was that the reaction to the movement and testing in China. Because we all use the same parameters, same matter from this planet, all of you who used the Cu, Zn, CH3, made H, D whatever, we all have that final connection, and the system in China through coherent, inherent properties of materials which produced it is linked to all of your systems. If you see your system do something just don't overlook it, it has a .. we have shown that it could be done, we stopped a motor. Now it's to show that we all have a connection and to show that you can help to support. The same way you receive back ?? knowledge or whatever. (3:04). This is the enligthenment of the humanity, you do not even understand what I am doing with you lot. It's the only way we can reach that point of maturity. But now the man who has created the system, his wish is only to create peace, to be able to achieve betterment of humanity and those of you who have the same feeling and wishes as him you will get responses back to your system. And through it, it will respond back to the others because it carries back the STM. I wish I could explain what I explained to you ... but I said, man has to change within himself to become peaceful. And now we carry that through the man himself. Happy Birthday Caroline video. (3:06). ... (3:10). ... Thank you very much. I hope you understand the knowledge of today, once the man does he will understand that this is the key and invitation for man to the U Community, man has to become wise to it to understand the key to open the door

and through it to peace. Today's technology knowledge share is more or less the pivtoal point of the knowledge, from now on we step down to see how we can use it that opens the doors of universal knowledge to mankind. Up to now man has learned everything about himself and his environment, with this knowledge today we open for man to learn about the knowledge of the U. I made the promise to the Creator that I will do and in so many ways today I have done it. Thank you very much. (3:12). Rick says its the birthday for mankind ...

END

234th Knowledge Seekers Workshop - July 26, 2018

(,)

(:15). How we are developing....
.. Next week is 1 year anniversary of the One Nation One Planet. (:18). We want a summary of what they have been doing this past year. .
(:20). The Universal Council have to train themselves. They have to strengthen their souls to give guidance to humanity. .. (:22). ... One thing I ask you is to stop chatting and start doing something. ...
... As you know in the coming time I am not going to be here, i pulling more and more away from the KF in direct ways that you start learning how to ?? the humanity. (:24). It's like we go through revolutions and then you have to lay down the rules for the whole human race otherwise we go back to the same mayhem as before. .. Please start laying down the foundation, we are approaching the space T very rapidly, especially in China and this will bring a lot of changes. We have seen some wonderful things and have had some fallbacks, .. I analyze what is happening, the reasons and causes and what will be caused by it, and what will be the end of it. We hope they will show the first flight, I don't interfere. I advice but it has to be their doing, not like in Iran where I did everything, this time it is on the shoulders of the Chinese. .. (:26). ... agriculture advances in the T. .. (:28). .. the Chinese space program is on course. We had a set back, we blew all of our systems up last Sunday due to release of massive amounts of energy through our plasma reactors. I am not supposed to show anything, but I can speak abut what I see. Last Sunday, our systems matched up with the space systems, what we call the environmental systems and we downloaded massive amounts of energy into the environment and with it we got hit on the return and we lost all of our systems all of our reactors had to be taken down. (:30). to reassemble and hopefully we are back on track today that we can start testing. It literally blew out the main electricity section of the whole city. I informed the ministers before hand that this is a possibility that we interfere with the energy systems and the power lines. We lost all our cameras. .. we damaged part of the space we use for testing. I do apologize to them ... (:32). What happened is that as we emptied our Pl reactors at the neutron level we created some plasma outside the building, and as there was rain and thunder storm, the 2 linked up and they downloaded the energy to the easiest way, the transportation line, which is the national grid which is near-by, and we informed the government a week before that this is going to happen. They understand and

are with us and don't block us, allow us to still test. .. They are back on track. The energy delivered runs into huge amounts of Megawatts. This has been done 5 times before and the people inside see a silver ball expanding, it's not a ligthening, but an expansion of the silver ball, exactly the same what you'll see on your craft, now if you are inside it you see the same thing, you see a silver ball expanding into the atmosphere in kilometers until it links up with ligthening that it can discharge the whole energy to it. Our systems are totally isolated from ground, which means we can't make a Earth-Ground level, the way we designed it and have connected, we have no earth ground section except one which we can control, and we can dictate the control more and more. (:34). After the teaching today we go for the next run. We'll see what we achieve and the neutron energy in such a vast amount, is what we have to harvest. We are test running pieces and seeing is that the energy expanded beyond. We had to design or align our systems that we pull this energy in and confirm to the solidity of the plasma into the shape of the SS or a motion. Our system in the past weeks was there to see the parameters. We tried to understand the work and how the system links up. But one of the things we can't do because of the way we are positioned is confining Pl fields because we interact and find linkages into the plasma touching the ceiling, metal barriers, or whatever, it discharges, and doesn't allow us to build up the plasma. But this time reaching the neutron Pl is beyond us, we don't see it but it covers the whole building and this has blown up by discharging into the atmosphere, has created a storm. There is something very interesting, that this system since it has been put in creates the conditions of a storm, which it brings to the city. And it discharges itself. It's like another air condition flow which attracts clouds into the environment and creates huge storms. The first time could have been coincidence, but now it has happened 5 times in the same area. (:36). This shows the power of the T, a system that we have brought this new line into it, if you accumulate it long enough, you can even bring conditions in, we can create rain. Because as part of the process last week we saw raindrops. When they told me about the raindrops I said we put platforms around to see what this raindrop is. It's only on one side. If you had a leakage in the dynamic system it should be all the way around the system. These raindrops, leakages are localized where the field is of the system and the earth creates a condition that allows the creation of rain because now it shows the conversion of the energy into the matter state, in interaction between the 2. It's like when 2 clouds collide and they change condition. I knew last week and said, my god this is going to be something interesting when it comes. It came and we got hit very badly, all the systems blown out. They were still repairing today and most probably we're going to blow more things up tonight and tomorrow, and we have to stand the knowledge gain and what it brings us. Now we know we can create rain in a massive scale. Now we know we can create Pl fields through neutron interactions within the cores. Those of you who work on energy and space development these are fundamental understandings of the new Pl T. This is a knowledge which doesn't exist within the science of man. We see plasmas firing and most of it has been videoed. (:38). Creating a Pl in the water is an amazing experience. You can't create Pl in water, and we used saltwater. Even reaching a Pl condition it means we have to have been at the neutron level. All our reactors are filled with liquid, creating a Pl condition in liquid shows the power of the T, those of you who understand nuclear structure. Plasma physicists and those in CERN they dream to achieve such a thing if they ever could. They spend billions for Megawatts to create one. We create plasma like nothing, in liquid

which has never been done. The videos on this hopefully we can release after the teachings and research are completed. The achievement of the creation of life on this planet now has a new meaning. Now we understand how the condition was created, that within the waters of this planet life existed, created, has brought in. Energy was put into it to evolve. A lot of things with this research, when I look at the videos, going over it, comprehending what has happened. I watched some of the videos many times to see what I missed. We see the evolution and the dynamic evolvement of the liquid in 2 reactors that it leads to creation of Pl to run which means it has created rotation. We have managed to evolve and convert Pl into energy, and energy into motion, and motion in showing itself as the rotation of Pl and lights ?? but there are no motors ... we have a specific setup. Some people asked me what is the combination. Think we have about 160 reactors operating (:40). in the lab, somewhere in that region. It's one of the most elaborate systems every aspect I could think of I have brought in. There are some deliberate systems left our or put in that in the future we can use for different experiments. Start learning of the reactor which don't have motors, those under your control. You have to control them with your thoughts. Look at them, understand them, and try not to ask or instruct, but become a lover and a loved one, and see what happens, And let the system who is connected to you to show its beauty. This is very important, because I deliberately left some 12 reactors to be operational by the thought of the man, no motor. And we see operation in them, field plasma. There is no motor in them, there is no reason for it to light up, unless there is current through transfer of the plasma is there. You can connect anything to a water and nothing, ?? many of us see it, but you can't connect into a water and see Pl unless the Pl is there and is created by the dimension of the neutron Pl T, what I call the Chinese space agency was working behind. They showed us they had their fuel. The fuel understanding is very simple but controlling it is very hard and that is part of the teachings which will come in the future. I tried to explain to my team in China how to think and be. At the moment when they run around they all have different wishes, because they all have things in it. they don't understand they have to wish collectively together at the same time, but that comes later on. (:42). We have to understand that we have 1 captain, not many, but collectively the impression of the all decides the control of all. What is interesting we see in this development is the expansion of the Pl beyond dimensions of the reactor which has lead to the explosion we had on Sunday. What we have to learn is, can we contain this Pl, it's space that it creates that M field shield effect that we don't let it run away in one direction. These are part of the tests that we do and you have to realize that our objective is not to fly today or tomorrow. Our objective is to learn how and why that we can fly safe tomorrow, what we learn today will become part of us tomorrow and we have to develop. On the other hand, with the Chinese space program, if we hit something that is very important to us, I might have to override the wishes of his Excellency president Zhi, I would give the Chinese government 1 hour to make a decision on the release of the knowledge. And if we get no objections we go live on Internet. As we did last week when we achieved certain things we released and KF publication page opened up for 15 hours. If we see developments which I think has got to be shared internationally and keeps the KF and our team safe, we will release the knowledge in a very specific way that we don't override the wishes of the Chinese government, but as an independent One Nation organization we all can be benefited by it. We achieved plasma which was one of the biggest important things to do

and we put it out. (:44). If we achieve something which I think, and i have a habit to give governments time, last time I gave them 2 years and they didn't move, when I moved you all learned. With this process we give to the Chinese government because we have direct access to Ministers, 1 hour notice, we are going public, instruct. We are going through our channels directly to the office of the president, asking, informing, waiting. If we have landslide developments in the coming weeks we will show. ... It's a Chinese achievement, they have to be proud of it, even though they have to be kept some secrets in a way until they decide to release it. It's a clash of 2 cultures, 1 of freedom and 1 of peace, which we both share with the Chinese government. I think they'll understand that it was needed. I am sure they are listening on the line and are watching ever move we make with this respect. ... this is the beauty that the government allows us to work as free scientists, this is what we should have had in Europe. Maybe this is the reason we went to China, because in China we have seen the domination of European slavery and the rest of it. Through China we see the new freedom through the new science. And this is how it should be. If we would have brought this to Europe we would have brought the rest of humanity to slavery as we saw how a king (:46). has risked his own reputation to demand and kill more. We had to go to China to guarantee freedom of knowledge. And I respect President Zhi for allowing us to work so freely and allowing my team to totally independent. No interference but to be totally backed by the K Seekers of the KF and we setting a precedence that the governments are protecting the scientists ?? internationally. Everyone of us is a scientist. Every one of you who shares and achieves something you have to be proud of because it shows the strength then hiding behind patents and trying, and nobody ever sees it. You develop something and ?? you get the blessing of it, elevation of your soul from the knowledge that is there to be shared. It's time to extend the health side of the KF publicly, because a lot of you have tested it and we can push the new dimensions in. I am sure that many of the doctors sitting here or listening to these teachings ... are going to kick themselves, he has put another piece on the table which ?? a long time ago. Some of them might have already been taught and some might give you new insight into what is going to be done. (:48). Every condition we see on this planet is conditioned to the Pl of this planet, what we call the MG field of it. A piece of gold, molecular Cu will not manifest itself in a given place and position if the MG field of that position would not be created. Why do we get all the Cu and lead mines in one place? Why don't we get the Cu and Pb on top of each other in one mine and then we have to separate it. This should have shown us that everything created on this planet is conditioned to the MG field of the position. How was it created, how was life generated, how did it begin, what brought it to be what it is. Then it brings us to the conversion of the science, if the planet has managed to create a condition that all the gold is in one place and the silver in another, then we understand why every organ in our body is in a given position. And how come every animal which is created on this planet have the same systems. Why do we find a heart, liver, lung and digestive system in every animal, every single creature which is dynamic? Leaving the trees aside, they are totally another race. This should have taught us that the condition of this planet dictates certain processes that the process has to get rid of its energy, what it takes in, and then it has to get rid of what it doesn't need. If you are a Pl reactor, the energy you created, as we have seen in China, you can't hold on to it, then you explode it. (:50). Excuse my French, if you piss into the space you blow out the cities electricity. But in a system that controls itself, it has

to find a way. So now it has created a digestive system a process. That process pushes, dictates a condition, to have a liver to store the extra, it needs a store room, I can't keep on holding to these things in the stomach so I create a storage, a warehouse, I call it a liver. I have a digestive system for 2 reasons, I breath, I take gases. This planet has 2 conditions, liquid and solid. Now I have to find a way to get rid of these gases that I have taken in, the energy, so I create lungs. I need system for when I use the solid state of this planet I can get rid of. I create a digestive system, then liquid is part of it, I put in the same system. I made the tank but how am I going to clean it. The liquid can't go through the same way as the solid so I separate it otherwise I'll loose most of the things as a liquid. I create a liver for the liquid. I now create the kidney so the liver can support the need it sends off. Then you see the creation of life on this planet is conditioned to the atmosphere and the M field of this planet. So we are dictated by the energy we can hold, then we become a worm, snake, monkey, or a man, because then the expansion of the knowledge of how much we can take, it allows us to what we can do and how far we can travel and what is the scope of it. Standing up animals like man or monkeys create a different (connection break) (:52). What we see is that the conditions of this planet dictates a lot of things to us. 54

(salt content)
(1:04). .. Giovanni....

(1:06). Giovanni what was the content of the patch. He took the urine of Naomi ... 200ml urine and 200ml CO2 Water, (1:08). and little bit Gans of CO2, kept it on 24 hours ... the day after Naomi had no pain, and movement better. (1:10).
(1:12). She wants to always eat. You have to understand why. She is very active in her brain, and not getting fat. She is analyzing through her brain, her emotions and life. This is why she wants to eat. She can eat a ton and will still stay slim, not because she doesn't walk, it's because the brain is so active it uses everything up. The researchers have confirmed in the past 20 years that the brain uses more energy per day then ?? face work which is digging. She is inside herself, she sees everything, she can't talk but she is a logical thinker, she kisses you enough and hugs enough so you understand the emotions complete. Being silent and not being, and having a pain and not being able to say, it all takes energy. This is why she eats so much. We see this a lot with people with CMF, or FMS, or fibromyalgia because all the energy goes into the pain control, they are always tired and have no energy. But if she eats so much it shows a healthy brain. She knows everything, (1:14) . (1:16). .. make sure all the air is out of the patch because it starts a process like fermentation. (1:18). ... What we see is that piece by piece we are controlling the damages that have bee done to Naomi. 19 45

(1:22). 23 35

(1:36).

(1:38). Shows video of Naomi walking. (1:40). Phtoos of the patches of urine on the "Coma Foot". This one has air in it, he fixed it. (1:42).

(1:46).

(1:50). The knowledge of creation of this planet is all the same, it's the man who doesn't understand and then can't connect to benefit by it. When you start applying thee dynamic systems now you know that you have to consider the salt content 28

.. Any questions. (1:56). Video of KF Brazil health treatment. (they were threatened by the German Red circle) (1:58). 10 min video.. The lady had breast cancer .. In Brazil .. Claudia and Jilde healers, Keshe plasma, Oxygen, Ozone treatments over 27 days. (2:09). We'll start accepting testimonials. .. It's for us to bring the T out ... We'll start bringing out more accounts of people regularly now. (2:10). ... I can not stop until we create peace on this planet, but creating peace needs a lot of wisdom to see to the needs of every being on this planet that it is not in suffering and it has enough to survive. ... it's not a KF it's a humanity foundation because this T belongs to all of us. ... any other questions. ... (2:12). (2:14). Klaus talks about the Health section, we'll work on the database for the (salt content) protocols. (2:16). Shandor, Q: Using patches there are certain ratios of masses to remove elements that are in excess. What would be the method to strengthen tissues, like what could repair cartilage damage? Balanced field energy. Q: How do we do that? One to one. Q: It will create a ?? Yeah, you can dictate, if it's a cartilage, but you keep the environment, if there is a weakness it will take what it needs. With a 2:1 you create a wind corridor so, you know if you stand in a wind tunnel, it takes it with you, it blows you out. You can even decide which way you want to get blown out, top to front or back to front. If your kidney is damaged no use bringing the salt content through the stomach and taking it out. You put the 2 in the front and you put one in the back. You push it through the back one, because then it doesn't deliver any energy to any other organ. .. Q: Next is to find out which Gans's work for cartilages? Go to homeopathic teachings, it is well documented in this. (2:18). We have the beauty of the knowledge of this man (Hahneman) who brought us this beautiful technology, science, Homeopathy, they have done a lot of work on it. I have a high respect for Homeopathic scientists. The present medical science has to reject everything else because they work for the pharmaceuticals, they have to make money out of it somewhere, even if you are not ill, they have to have a disease that they can make money out of it. In that process a lot of data you want about the physiology of the body, content of salt and that kind of thing, the homeopathic is the easiest way. ... when you are not moving something, you want to strengthen something, then you add to it. You have to understand the processes, what is the cartilage made of, what's is its composition, it has a high level of Mg, certain amounts very little but effectively, it has no color so it can't contain any Cu, it is flexible to standing so it should have a very low salinity, it's not a bone, it's not hard. The ratio of the salinity determines the strength and toughness of the tissue. If you have ever been in a washing up business, (2:20). selling soap and that kind of thing they ask you how thick do you want the liquid (soap) to be, for thicker soap all they do is add 10 grams or 10% more salt to it. It's not hard to understand. 17

(2:36). ... Q: there are forest fires burning in Europe, is it possible to use the T to stop the fires. Yes, it is, we have a fire figther somewhere in the background with KF, he is from the US. We looked at it and it is possible, there are 2 ways to handle it. With the

new space reactors that are getting tested we see the creation of moisture, we can do this, but there is something I always have in the back of my head, and this something that is with everybody else, that is the (2:38). diversity of the life on this planet is through the natural process of its life. Deserts, oceans, fires, storms, hurricanes, man has built his lifestyle in these passages, and not the life of the planet. Sometimes we can use the T to change some, but you have to understand one fundamental principle, especially when the man goes into space. Just because you have the knowledge it doesn't give you the right to interfere. We build our homes on these passages of there these fires. You have to understand more as you become men of space is that planet Earth is a living thing. If you have respect for your life you have to have respect for the life of the planet. It's not just that you walk on, eat from it, breath from it, that it has no emotion. It looks after itself the same as you do and it needs the cycle of its soul to survive. It's not just a piece of land, and it's not just an emotion. This goes with everywhere man will go in the U. They say, if you don't like it then get out of the kitchen. If you build your homes to be in the path of it, you can change it because now you have the knowledge, just to suit you, because (if you do) then you'll change a condition for someone else in another part to suffer. And this is not your right. We can stop the fires, but let it take hold (2:40). that the black ?? this ?? goes in the cycle. There are systems you can dampen it down, slow it down, but then the life it needs to evolve. If you tie a man's hands up he will kick harder with his feet. If you change the climate in one place the planet will hit harder in another place. Then you'll say we have a problem there, you don't understand, that you have been the cause of it. The earth is a living thing, it has to be loved and respected, and at the same time you might change its clothes here and there, but don't strip him because then he'll kick. We have asked on of the third women, the cornerstone of the KF, Jamila is the head of the KF operation worldwide. Jamila would you like to speak. Jamilla speaks .. we are setting up the manufacturing for the KF. ... (2:42). ... You are the woman who controls the purse in the western world, so you have a lot of say. Thank you for your trust. ... 50 different nationalities are working in the background .. (2:44) .It's a collective work. Next the UC will give us direction in how humanity has to be in order to serve. Jamila says some countries have requested manufacturing, we are not ignoring you we will get to you so don't worry. Ruti updates what is happening in China. We have several labs in different areas. (2:46). .. we have the power unit and car unit ready to be sent to Europe to get the CE certificate. ... (2:48). ... What was important that Ruti said was that the power and car units are sent to Europe for certification. This car unit has a different characteristic then the one sold by KF Italy or AZ. This unit has been tested over 3 years and it shows zero emission in the exhaust in the car that it was used. They are collecting data. (2:50). The car unit is 20 to 30% reduction in the fuel but car emissions is one of the major problems in large cities. It's specifically designed and we have all the governmental centers confirming zero exhaust emissions. This is the beauty of it. It will be manufactured in China with European CE, it will most probably applied rapidly in Chinese cities. China has entered a new phase in the operation. ... Ruti translates in Chinese. First she shares agriculture tests that the government is doing. (2:52). They can see the difference in the plants. ... we'll apply to 1 million lands in northern China, we already got the contract from the government. (2:54). Translates Chinese. .. (2:59). This is part of the progress of the KF. Now that we start walking you'll se the KF will run very fast. We are not just the space we are covering all the green spaces of this planet. ..

hopefully we bring some more peace and happiness to this planet. (3:00). Q: How to utilize neutrons captured inside the saltwater, I put a magnet into neutron water, after 2 days the yellow color disappeared and the water became transparent? There is a time lapse with the neutron because it divides, and if you put a magnet in it you have really encouraged it, because you have created for it to become ?? what. When you put it inside a sealed box, neutron doesn't know containment. This is one of the biggest problems with the neutron. It understands the containment of itself but it can't be contained as such. One of the reason we use saltwater or we use empty space, because still in the empty space there is moisture, and one of the strength fields of the water, H which is the lowest has a very close connection because of its structure of the neutron and it holds on to it. If you disturb the balance of the energy within the water that link of the plasmatic field allows the neutron to be freed. You deplete the water. (3:02). It's a very pinkish yellowish water, I have pictures of it we can show it. It's not that, 'what happened to it', you have changed the characteristics of the H in the molecules of the water. In that process you changed what I call the handshake between the 2, plasmatic, and you have released it. You have to find out where it has gone to, or it divided. Most of the neutrons, if you mark (the water level) on your cup you might see the change of height, it has converted itself to H, double H, absorbs because of the MG field of the O in the water and it adds to the height and volume of your water. It's very simple, one of the first steps of change of neutron is H, because it is split direct, or what you call a nuclear decay. Nuclear decay of a neutron is always a H. Q: The body is a leech on the soul. Having offspring is a controlled environment for a cancer in the mother's womb. Is a child similar to a cancer growing in a way? I think we have to change the word cancer to a word of a new life. We call it, I don't know where the word cancer has come from (3:04). who has come up with it. But cancer is not a disease. Cancer is a new cycle of life within the environment of the body of the man because of its rapid progress evolves very fast. Nobody dies of the tumor, the cancer, everybody dies of the lack of energy which the cancer (draws), because it takes all of the energy. It's like a child in the womb of the mother, it takes all the energy from the womb to become a child, but the difference between a tumor or cancer and a child is because the environment for it is not given, it has become monatomic, whereas the womb of the mother has that beauty that it creates that condition of life. People don't understand the function of the womb of the mother. Now that we understand the plasma T and understand the operation of a womb, literally it's a Cup of Life. It's a Cup, what do you do with it. It has a liquid, an atmospheric condition of itself, and what does it do. It attracts what it has ... if you put the orange in once you taste the orange, etc, it has all the MG fields kidney, liver, heart, and everything else, and it has gathered that, accumulated that knowledge within its structure ?? you call it DNA and RNA, so it replicates it, it takes the taste of the mother. The interaction, if you understand the structure of the life. Now you can create a Cup of Life. A women is a Cup of Life. (3:06). Is that a cancer? Or in that womb, every structure and M field of the structure of the life of a man is embedded in the information of that womb, which the fetus picks up with the encouragement of what it has itself to match. ... if we create and bring the whole information as a ?? mono energetic, that it means it has become the absorption of energy, but you could give the full ??? information, most probably a cancer cell in the womb of a mother would become a child. It has come from the same thing. The only reason a child keeps on growing in the womb of a mother, once the egg and the sperm, they come and

start rotating, trying to match up, they create a field that absorbs more and more energy, so the mothers womb is a field energy. Where does she get that energy, from the body of the mother plus the environment. We never looked at it, in the future if the scientists look at the womb of a woman and take the topology of all the structure of the environment, the room and whatever is there where she sits, it will be amazing how much energy is getting absorbed from the whole environment you walk in. That's why it takes the feature of it, you look Chinese, Japanese or whatever because mother controls the seed, the environment where it lives, and it looks beyond, whereas man always looks at the fetus inside. We have to understand more about our own creation, and then we'll understand more. Anywhere if you bring the right condition you lead to creation of life, but what information you put in that life counts. When the seed in womb, when the egg and sperm becomes (3:08). the dynamism of the life, because it's AA based, in no matter state, it grows. The cancer is different that seed has an element of matter in it. It's a single matter. But because it's a dynamic plasma, it gathers more and more energy so it clusters itself. It's like an oyster, you put a little stone in and then it pearls itself. So when you look at a cancer, this is all for the doctors, you always look into the blood tests and see what is high, what the body has learnt to produce a lot of, because now it has learned a new game. If you look and see that it is a Cu that is high, when Cu is high usually you see a deficiency of Mg or decrease in it. It means it has a soul. If it has a soul it is malignant. this is where the difference comes. When I look at a blood test it is not just numbers to me, I look at the whole structure of life in a blood test. Is the Zn increased by the increase of the Mg or by the increase of the Cu in the blood, if you see increase it means it's malignant because it has created a soul for itself. It means it wants to duplicate, to extend. But if you get a piece of stone which goes in your body, in a way it has a soul, but it has no connection to your body and then when it grows it's not malignant. It's very simple, doctors don't know how to read blood tests. Then you look at the combination of it. It is the same with the womb of the mother, you take your blood tests, oh, you're pregnant why, because certain things have changed in the blood. But you haven't managed to understand that with the cancer it's the same (3:10). if you understand this you can change cancers, so why do we always use Zn with it, because we support the soul, in doing so, the STM says, I am in pain and I don't want you there, so it responds to it. It moves on, it takes the cancer with it, the physicality follows. these are the things we have to understand more, it is part of the culture of life in the U. In an extended life, extended direction, why on this planet there are certain deficiencies, diseases that everybody gets. Look at the M field of this planet, then look at the M field of this planet (in respect) to the solar system, what energy do we get from it that encourages this disease. Then you look at the universal side beyond in the galaxy. there are many diseases that man carries that comes from our galaxy and solar system and doesn't belong to this planet, but we just dismiss it because we don't understand it. Why are certain cancer more prevalent in certain countries or areas, is it diet or habit, why are there certain diseases at certain seasons or times of the year, because look at where the planet goes and what energies from the galaxies come in, what energy comes from the solar system at that point, what is the position of the M field in respect to its environment. We are as being, children which are born in the womb of this planet. The same as the womb of the mother gives life to another life. So this planet, (3:12). the way we get nourishment from it. We never look at it, because it is very easy to be, we are just born, but you are born not out of the womb of

the mother, but out of the womb of the planet. Then we have to understand what this planet carries, where and how and in what position it is in its cycle of life. The diseases we have now are not the diseases we had 2 million years ago, because now the planet has gotten older, it has a stronger field. It's more closer to the sun, the condition has changed and those diseases don't exist. So is the womb of the mother, so is the cancer. Now the KF scientists can understand this. It is important to realize, to understand how things work. (Do not refer China for any products all will be sold through certification in Italy). It's important that you understand the totality of the process and what happens with it in the background. (3:14). You have to understand the whole structure. Any other questions. Q: When the neutron splits into a proton and electron, can that be considered a form of cancer too? What do you mean. Q: You were redefining the word cancer as a growth process .. . ah.. everything has a neutron, proton and electron, so we are all cancers to the body. Q: Can the human body be considered a cancer for the soul? Most probably we are. I always said, we are a leech, we are built on the soul. We give life to the soul and then use the soul to confirm our own co-existence. There is a lot of explanation needs to be done, a lot of progressive development for understanding the work of the soul needs to be done. (3:16). And that is. We see mixed behavior with pregnant women, and they say, oh, she is moody, she's pregnant. Stand still. What touches the emotion of the woman during the cycle of the birth? Presence of another soul, which she carries within her. What do those 2 souls have to accommodate? Why some mothers are very happy during the time of the pregnancy, because they get on with the soul, and after the child is born it's the same relationship. And why some mothers aren't happy and they go through all sorts of problems during the pregnancy, and it mainly connects to the soul of the child. the world of science is too physical. And when you get too ?? much understanding (of this, they say), oh you become ethics, theology. Those who speak this means they don't have understanding of the creation ?? Any other question. Q: (unclear..) Can you enligthen us what exactly is happening with the planet in the solar system, (3:18). there are 2 volcanoes in the planet erupting? What do you mean can you explain? Q: I see almost all volcanoes on the planet earth are erupting and I see Yellowstone start to open up ... the media doesn't talk about it ..? There are certain positions the planet earth, in so many ways is changing altitude and latitude towards the sun and that enforces different M fields of connection from the planet. It happens on a regular basis. It's not that we are rotating in one direction, there is a combination of interactions and position of the solar system itself in the galaxy which forces its fields on the smaller bodies like the earth, and we are getting pulled into the inner wings of the galaxy and the process is very clear. It's not speeding up as such but it's becoming more inside so when you are on the fringes and outside you have less fields, but the other fields effect you, when you come inside you get more controlled and more fixed. But the sun is exerting the same pressure on the earth (3:20). and it is moving closer. In the past, maybe 100 years, it's not so much global warming they are talking about, it's that the earth has moved its position in respect to the sun by a few millimeters, and it's moving in. Those few millimeters at a time are making a huge difference, and we see higher value elements to appear on the planet. There are materials here we couldn't find before, what we call rare earth materials connected mainly to O. We see new materials because now the stronger fields of the sun in interaction with the earth and these fields create different extraction of fields from the plasma of the center core, or what you call the inner cores of

the planet, and it is like a boil, it has to erupt to release it. We look at the volcanic eruptions as a matter state eruption, but in fact, it is a M field eruption. We see it on the sun and say sun flares. These (volcanoes) are earth flares. These are M fields that the planet is releasing and according to the release of these fields it dictates its position in respect to the sun. When you look at the volcanic eruptions and you say there are so many releasing, is because it needs more fields (to release). We look at the physical condition but if the scientific world puts magnetic field probes the way they do on the sun to see what comes up, you'll see massive amounts of M field energies are released through these spaces. We just see the physicality manifestation of ?? big blob mass of it. When it is normal we have the atmosphere, but when it is a huge mass of the fields, and where does it go, the softest place, what do you call it volcanic. (3:22). If the pressures and the M field flow of the magma can make mountains kilometers high, it should be very easy to release its energy through magma, volcanic eruptions. One of the reasons we see the huge increase is, we put orbit numbers to adjust the (earth's distance from the sun) solar system, we have just dropped in by 1 orbit, so now we have to adjust that closeness we have to give more energy out to be able to hold position. If we don't give more energy, or what we call M fields out that is balances the fields with the solar system, we get absorbed, we drop in until we find the balance. Volcanic eruptions are not just island creating, these are huge M field flows. We have a continuous field flow from the sun, but then we get huge eruptions of the M fields. It's the same with the earth. What we see is called 1 orbit closer. It has happened in the past 100 years, not overnight. But now we'll stay in this orbit for maybe 500 or 1000 years, or 100,000 years before we drop into another (orbit). But even in that level (of orbit) we still end up getting closer because let's say that, that bandwidth of that (orbit) level is a million kilometers. We started on the edge of 9, we just entered 9, now we have to wait until we come to 8. To go from orbit 9 to 8, will take us 500,000 years maybe. In that level when you cross ... it's like the ring of Saturn (3:24). there is a cross line. the fields and everything have to adjust over time. We are in a bathroom spiral going in and there is no way to stop it. Shall we call it a day. ... God doesn't give you what you can't carry, so will see how much you can carry before it breaks the back of the camel. We need a lot of financial support to be able to maintain the work of the KF, we need to be able to create all these factories, structures that supports this work. (3:26). to support the ever expanding process. In that process we achieve more and more and it has become one big spiral getting structures in position. I always said, the breakthrough with the KF will come through the space technology. We have a beautiful team in China and AZ, 3 days ago we made a big step. Now we know we can create the massive fields, megawatts and most probably terawatts of energy. We have seen how we managed to bring down the power supply of a city. Now we have to harvest it, to ofld it in. It's oflding in that energy, and stop that silver (ball) car to be created, instead it will ofld in and create the structure (of the SS). Our job now is to, how to reverse the process of sucking everything in instead of going up to the sky and creating so much problem with the electricity and the naval and air force. It would be very interesting to ask the people who run the space agencies or the satellites what happened in China at that time from the satellites. How did we hit them, did they get hit by it and were there glitches in their systems. It's very interesting. .. it's not all space I hope we taught a little bit more, now you can see the application of it, and how it can change the life as we see with

Naomi and the others. (3:28). Thank you very much, and may the soul be the protector of your life.

END

235th Knowledge Seekers Workshop - Thursday, Aug 2, 2018 (,)

(:02). Video: The Formation of the Universal Council.
(:12). Mr. Keshe's 60th birthday. .. it's not easy it has been a rough ride. Many changes in the last year, the STM has decided on the path of peace. A year ago we had a lot of disturbances, war in Syria with possible invasion, North Korea, and America threatening to withdraw from Iran treaty 5 plus 1, these were flashing points. ... (:14). In the last 72 hours a change by the American president to accept the meet the Iranians anywhere unconditionally to start peace negotiations. This has all been well planned by his Excellency President Xi of China. For those with diplomacy background will know, some months ago president Xi invited Iranian president to China, and gave clear indication Iran will be protected by China, and the Europeans accepted and supported China so the way was cleared. ... Rick reads the text, announcement ... (:16). We'll meet without any preconditions, any place any time. Okay we invite the American president to Iran, let's see what happens this time. 36

.. In that respect the KF AZ will provide all the facilities and systems to support to give life back to 10 Americans, unconditional, military, private, ?? (:20). It's for the American KF to find (the people) and the gift will be given. I'll supervise the whole process, individually for each case as we did in the case of Naomi. If you look at the pictures of Naomi 2 years ago, on 6/7th July 2016, and we see the video from 2 years ago, this is no life in body. And we received this other video 2 days ago in celebration of 2 years, you see the life. Plays the video of Naomi. (:22). replays it, the wink. This is the gift of life. Many mothers and fathers in America are waiting for this, from those who have been in the land of Coma. We charge nothing, it's a free gift from the KF worldwide to all the people. This is a gift from Iran to the Americans in and for the steps that the American president has taken. In Iran we have a tradition we welcome people of peace with a gift. And this time we give the gift, 10 American lives. You choose, Brat he is a member of the Core Team, he is in AZ. The KF AZ is there to support every need of this move. Everything needed. You don't need to do it in hospital you can do it at home. I have set up a line for those who want to approach the KF direct. It's the responsibility of you Americans to find these people in the next 10 days. A TV announcement will be made worldwide in the next 27 hour to this effect. (:24). Then it can't be one way it has to be equal, we offer the same 10 Coma patients in Theran, Iran. Dr. Alzar has accepted to return to Iran, to see the transition, to over look. The EC member Dr. Paris has accepted to support. If you are Iranian find those 10 lives. The life in America is equal to you. We can't just be one sided and look at one thing. We have to look at the people who supported and brought this position of world disarmament, strengthened power, and that is China. In China we do the same, we offer 10 Coma patients back to life, unconditional.

A number have been found as we have been working on this for some time. That makes 30 lives across East, West, and Middle east. ... Caroline and I would like to support the government of Italy to protect and support us for the past years. I have asked Giovanni that we give the gift of life to 5 Italians. (:26). Giovanni explains, we start to collaborate with the government for the program .... they'll officially monitor it and document the results. This is the first time in Italy for this. (:28). .. this is a very big step for the world. .. this is the first time the doctors are open to this ...
(:30). ... What this means, it brings the KF health application to the mainstream Italian health in a rapid way in the next 12 months, and with it comes the EU. The reason is we have already moved with the medical equipment. ... We have developed a rapid way to reverse Coma. If we can show that we can give a new life to a child, then we can give new life to humanity and we can start fresh with peace. When you see a child moving out of Coma it gives you a lot of peace. Seeing man come out of obscurity of fighting wars after thousands of years, it will give man a new hope. So it is very easy. The American president has put the hand of peace out, we shake the hand, as I did some years ago in Brussels in a little cafe with American officials. (:32). When we shake the hands as peace we do not talk as governments but as One Nation. The invitation with the American government stands as the nation of Iran, and not as the government of Iran. We support the American citizens with life, if we receive more requests, we will not refuse. AZ is well equipped to look after, stage by stage. One of the most competent ?? Coma of the KF is there on hand to see it through. On the other hand we have to be correct, and in that process we are left with 25 more lives we accept anywhere on this planet who would like to give the gift of life back to their loved ones. In the next few days we'll announce the numbers to one of the smallest island. ... We have to be very correct and not get carried away with one thing. Last year in August when we started the process of One Nation, One Planet and sign ourselves to peace. We have seen peace coming and it is coming in a very fast way. We have to be in so many ways, what they call the silent peacemakers but the ones with the power. I ask the members of the EC to draft a letter, (:34). to be sent to the American Ambassadors around the world as a gift to the American nation from Iran in the next 24 hours signed by every member of the EC, that we offer peace and life. I will deliver them personally to the Iranian Ambassador and President. I have direct access. We'll deliver the same to a number of American Embassies that we are in contact with, to encourage peace. No president or ambassador can refuse the gift of life, unless they ?? 60 lives should be the sign of peace, time of change. I have spent a lot of time in China and have become a resident to see the work through. In China there is a saying, ?? bankrupt 60 years and a new life starts. Let that 60 years be today. We live to serve, serve peace to humanity. We are not just talking so and so, we are talking with a lot of strength, we can and we do. I ask all the members of the KF, people who listen to these teachings, find 60 men, (:36). children, adults, even if you have an animal in Coma, it's still a soul, we give the life back,. It's my gift to humanity. I have shown it twice that we can do. The evidence is well in front of us. As the president of the USA says, no precondition. Muslim, Christian, Jew, Buddhist, Yellow, black , white ... If every law of the nations in all the nations of this planet, there is one common law and that is you can do to yourself whatever you like in your home. We did this with the first Coma patient and in so many ways with Naomi. If the doctors and officials refuse to take up the call as it is not an intrusive or invasive process, it is the creation of the fields within the

boundary of the body of the man, you can take your patient home and we operate openly. I guarantee one thing I give life back to every single of the 60 persons. The stage of recovery, loss of memory, we look at the conditions (:38). if and where we accept the conditions we take over, we proceed. Even if part of the brain is missing, no problem. I have done that before. You need a pinhead part of the brain to put within it the whole operation of the body of the man. The size of the brain is too big ?? We can get them walking, talking, the joy of life. It's very strange how the Americans will react to the offer, another advanced technology offered to them. With the advancement of nuclear plasma technology in December 2012, we brought peace 5 plus 1. President Trump wants to play a different game, the Senate will not sign. With the help of our friends in China Americans have found a new way out of the embarrassment of defeat, but it is not a defeat, it is the key to success to show the power of our friendship. We don't look at it as who lost or had to change course, we look that the new course creates and brings a position of peace. ... (:40). Finding them is your job and giving life back is mine and I'll keep to my promise, with one exclusion, the state of Belgium does not operate under this inclusion. We don't accept any Belgium residents or citizens to be included in this part. The exclusion comes from their own doing, and the love we have for the community is not damaged anywhere. The whole process of giving life will be live, as we receive the requests and the families would like to be identified or known, we'll release, if those who want to be kept anonymous not to have the intrusion, we respect that too. We are not here for fame we are here for peace. We are here to create a condition of peace and it needs a lot of strength, correct conduct, and a lot of guts. And I have all of it. Our knowledge is the knowledge of the universe and our power sits with the power of totality of man. When I asked Dr. Alzar the answer was an unconditional yes. Dr. Alzar go back to Theran, please. Find them and we'll support you. KF Europe will provide every single system needed for Iran. (:42). ... The process of giving life back is absolutely free. This is a gift and the beginning of the process. We don't ask any questions about the race, color, religion, position. Last time when the way to bring life back was discovered by the State of Israel, they moved their Prime Minister from the hospital to a private home that it could be done. I ran test with the Jewish scientists from Travil University, with supervision from the scientists from Leaj University Hospital and Cambridge University, to show that the process is correct. Reading the writings of the doctors, they say it is amazing, they don't understand how the part which is supposed to one color, has become the color of life, but they don't know how it has come through. It shows that the process is complete and the Israelis wanted to ?? trash it, but we know what happened with ?? us in that nation. (:44). To support these scientific changes confirmed by the Israelis, Belgium, and Chem University scientists, are a part of our evidence in showing how lies was brought in our case, which stands in Belgium. And now we release these documents to the scientists of the world, that tests done by the world leading scientists in Coma confirms the KF T for the reversal of ?? Coma is 100% correct. 33

(:50). When the 5 plus 1 treaty ran into problems the Americans called me and said, they can't get it though the Senate. I said, leave it to me, and I met with Mike Harris, I want to know which Senator can give up the 10 to 15 million jobs that this peace will bring. 36

.... Many of you want to know what is happening with the Chinese space program. Sometimes in life we do things out of decision making, (:54). an sometimes we do things out of force measure. 04

(1:04). to control the plasma and to convert and divert it back into its base, has been achieved. I know AZ are working very hard to achieve it. I know Chinese people are doing it in the background. I know the Americans are working hard at it. But as you know I will not give the key, but I show the way and then you have to find the key, how to get into the house. All the windows and doors are closed and you can't break in, unless you can find the code, which is the code of peace. In that process again we keep the pressure off the matter state and we bring the co-merger between the both the physicality and the Pl. In the initial time we should be able to invite you to see what we call the magic show. But the biggest magic show of today is to come. The establishment of the UC and what they plan for us as a human race once the technology is shown, once the governments have been reversed, and then you have to understand how we become the leading nation, as One Nation. When you can show all this, people trust and your work and your decision counts. When we can show the space T in its maturity, the reverse of Coma, people will trust us, and our word counts, our word is peace without borders. And it is for the world, what we call leaders, to find a way to accommodate their citizens. We take charge through knowledge, through science, (1:06). and we become part of the structure to lead mankind to peace and the U Community. Now you understand the plan. 12

(4:45). Excerpt from 45th One Nation, One planet, July 3, 2018. ... If the Chinese KF achieves the flight very soon, then this will open mankind to the space and UC. .. it goes according to universal law, we have called for a meeting and that time will be known to mankind very soon. In the past few hours the meeting has been accepted and agreed by the UC. .. we have informed directly to the world leaders, (4:50). in the past days that the final phase is on approach. It all depends on how we break through, if it is complete with the full independence then the process will start. I explained to the world leaders in the past few hours that they will loose control of their nations. there will be no one listening to them, .. it ... .. they were present in top meetings with world leaders that the work of the KF was discussed and is under consideration. The top world leaders have discussed what to do with the development which is coming through the KF, when we asked the question they said we were present so we can tell you exactly what is discussed, in return we told them that the world leaders will loose their control once (4:52). the process starts in the coming days. And once it starts the UC under pre-agreed destination and time will open the space. It's a pleasure and we have to wait to complete it. The Chinese KF even now in the early hours of the morning are still in the last phases. We have set the loading and fueling. It's not talk, now it's a matter how we break through in energy, food, and medicine. These are prerequisites to entering the UC, that a life is sustainable indefinitely in understanding the full ?? consequences of the universe. What we said a couple of weeks ago has now entered into its countdown. I have been in discussions with leaders that they'll loose control of their nations. It's not a cout deta, but it is the maturity of man. We work as one team and one group and at the same time, the second we take off, what Iran has achieved exactly 10 years ago (4:54). in the hands of the K Seekers, the governments and the borders become irrelevant, and this is a mayhem that is already .. we'll finish. We have placed cameras on the flight path, very much the same as we did in the Insano and other researches. Once we start achieving the cameras will go live internationally. We'll carry it on our telephones that we can access it anywhere in the world. If anything happens we can share directly, we've gotten very good at it. We'll do it remtoely so everybody in the world can see it. We hope we can achieve it we'll see what happens. What we said about the interaction of the human race and the UC has already been agreed. Thank you very much. ...

(4:56). Rui. Universal Community. The Universal Council will be the bridge between humanity and Universal Community, ..
(5:00). A transcription of what Mr. Keshe just said about the UC.

(5:05). Final presentation by Carolina.
(5:07). Birthday wishes and declaration of Carolina's love for her husband. (5:09).
(5:10). Happy birthday from Arabic Language.
(5:12). Phtoo of Mr. Keshe as a young man. More phtoos, One of Queen Mary University in London reactor, phtoo 1970 (not Mr. Keshe in phtoo just reactor). Document of the de-

commissioning of the reactor. (5:14). This is why people don't find any information of Queen Mary reactor. ... It brings back beautiful memories, this reactor was moved in 1978 to a new site. (5:16). In 1981 the new site was condemned, there was a lot of opposition to nuclear technologies. It was right in the center of London and nobody knew there was an active nuclear reactor there. They cleverly took this out and moved it into a river, the top of Thames, ?? I started working at the new site, this is the old site (in phtoo), the strange thing is I have a very good memory about this stairs and above it because we had this huge hole in the ground in which nuclear ?? was kept up to then. .. this reactor radiated beyond the boundary of the building in the center of London and there was no choice but to shut down. I did a thesis on showing radiation leakage in 1981. (5:18). part of my final thesis. I t became untenable to keep radioactive material in the center of London. It's a very small reactor ... I used to change the plates. What you see on the floor is the nuclear reactor itself. ... we changed the uranium plates and showed the leakage went beyond the boundary. This is where I learned about the plasma, .. beyond the boundary, because in the final graph in the university papers we showed the peak, it was guessed that the peak was in that square box. But we showed the peak of neutron radiation was literally 10 meters beyond the fence. ... (5:20).
... if they would have kept this reactor, it was one of the best made, it would have been the biggest medical istoope maker. I always said it was the biggest mistake Queen Mary made to de-commission it. ... the hair you see was done to be nice (phtoo) I used to be a hippy with jeans in the 1970's, ... (5:22). ... I became a suit man when I finished university. The professor said, if you didn't have the knowledge I would never let you in this building, you are a disgrace to the department, but you can come. .. in the 1960's we had no understanding of nuclear safety. ..
(5:24).
discusses his background...
(5:26).
(5:28).
(5:30).
(5:32). .. This is where my problem started, I went back to British Nuclear telling them I discovered gravity. I used to be part of the structure. they called me in, they said we have been waiting 20 years for you, we knew you were up to something. They invited me to Manchester. .. after I requested nuclear material to make the first space reactor. ... they said, what do you want? I want nuclear material to test the space reactor. They said we have a small problem, you are too classified, you are very high level, so what do you want, we want to sign a non-disclosure with you. I said, no problem, sign with the ministry of defense. Then a couple of days of later, they come with an affidavit with the minister. I said why am I signing with the Minister and not the Ministry. They said, your T is too classified. Last week we were going through documents and I found that document signed on behalf of the Minister of Defense of UK. (5:34). They considered the T too advanced and they were scared it would go to the Ministry and get opened up to the Americans. They wanted it to be classified and held responsible to the Prime Minister of UK. So I signed this paper. Caroline can you show that paper. From the beginning it was to change this into a war system and I always opposed it. For me it was a nonsense to convert this knowledge that I wanted for peace to a military application. The British government wanted it. The air show in Farnborough ... to make Britain the most

advanced nation in defense. I said I am not interested. My problem started partially for refusing to .. a battle between the British government and Belgium and Americans, and the development of new space reactors. The Belgium's confirmed to the British the T works after 7 years of testing. (5:36). We went for the development
of the space reactor itself, and they confirmed not only it was theoretically correct ..11

(5:40).
(5:44).
(5:50).
(5:52). Reads document ...
(5:54).
(5:58).
(6:00). The man in charge of this reactor was Dr. Shoal and was my personal tutor, he taught me everything, how to shut down, and even run a nuclear reactor without even fuel in it. You can play with it to ?? choose the fuel in it. Or put a lot of fuel in it, but it shows that it is empty. he said to me one day, I took you as my son and I taught you everything I know. You are too young, but I know you are going to use it the right way when it comes to. many times when I build these space reactors, I always remember Dr. Shoal, he used to be absolutely drunk. I could never understand how a doctor in charge of the most advanced prtotoype nuclear reactor in the center of London could be drunk at 8 in the morning at the university. But he was sober, he could work, and by the afternoon I used to leave the nuclear site, somewhere btotles of whiskey were appearing in draws, we just closed our eyes because we had to do a job. I learned a lot and I thank the British education system allowing us to specialize so rapidly in the ?? ... you just need to change one direction of the nuclear and it becomes a weapon. And they pay you millions for it. And they ?? not to do it. It's so strong when you are committed to peace. When they use nationalism it gets worse. Many Iranian nuclear physicists who went back to Iran, they went on the basis of nationalism. (6:02). That Iran becomes a superpower that they can never do, and now we see the ?? superpower in nuclear but we have become a superpower in the plasma nuclear, which is the KF technology. Today we announced that we can change lives. We don't kill anymore, we give life. We give sustenance, and this is supposed to be. KF Supporters have one commitment, making it comfortable, equality brings stagnation, so society has to have that slight difference in respecting knowledge, ?? that it becomes stimulated to develop, reach and receive more knowledge. Instead of using the T for killing as the western Europeans do, encourage the T to become giving and this is what we do with the Chinese. You shouldn't have shown that picture you triggered a lot of things in the back of years of research. ... People should know the history of the work. SP2 and SP3 what you call the diamond structure, what you find in your Gans's , ?? it was confirmed in 2006, that's nearly 20 years ago. (6:04).

... The space reactor that we tested in Iran and now in China, in 1985 we sent to NASA. Caroline will find the document. That's 33 years ago. Maybe the human race was not mature enough at that time to understand. There are different ways to explain this T, we started with the gas one, (6:10). then to the Gans and now the neutron. ... I read you a paper from NASA to see how advanced NASA was on this. You'll understand why they

wanted a one-way ticket (for me) more or less. It says, we'll be honored to have you come to present your propulsion theories. (6:12). It's signed by the head of NASA propulsion chief branch and it was passed by the Homeland Security, and they saw me as a one-way ticket. It's pretty amazing, and it's even signed by the American military. ??? it says, Dear Mr. Keshe I write in response to your letter to the US embassy. ... never the less we would like to accept your generous offer, providing information on the USB stick. I would be happy to meet at the date and time of your convenience. I suggest we meet in Coffee shop, ... in Brussels. I suggest 15:00 on the 15th of November. If that works for you, just let me know. Again my apologies for Mr. Goodman. .. this is when we started the peace talks with Iran and America. And operating today ??? for peace. Is the continuation of the same process. (6:14). (these are confidential letters from the government you have to keep them, those are letters from Obama, he would be really angry if you released those.) All these letters which we show are in a 600 page documentation, registered with notorary and the courts in Belgium, so that no one in the future can say anything, because it's evidence in there. In the future we'll open the archives ...?? .. just to ?? the patent and to kill for it. At least we managed to change a lot of things. ... When I went for my interview to Queen Mary College for a place in the university. I went to the interview with Dr. ?? and others I got to know later on. (6:16). After about 5 minutes Professor Leslie asked me, what do you want to do. You decide for you, as both courses, as a nuclear engineer or Reactor Specialist. I said, I want to go for reactor specialist. He said, we only train one every 5 years, if we do it's a lot of involvement. I said, that's what I want to be. He said, you carry enough knowledge I'll give my ?? you'll do the nuclear reactor technology. I was 17 or 18 when I went for the full interview and I could give them a full data on space reactor on nuclear basis. Dr. Shoal said to me once, I don't know why you have come to the university, we have to come and learn from you. This is how the life is. It's a gift and you have to share it. And know we share it with 60 more lives and hopefully it becomes a standard pattern that no one will loose more then a few hours in a Coma. Very good Mr. Keshe thank you. ... Birthday Card for Mr. Keshe on Facebook.. (6:18). "To a wonderful man,... have touched all the soul on this planet and beyond ... Global KF EC, and UC... Carolina BD card. ... (6:20).

... the farmers are finding out who is using the T because so many bird and animals (insect) are coming to eat. (6:22). I said that when you create more you have to share. When you make the CO2 and ZnO2 connection, when it has Gans in it by mistake, you can't separate it, you create this condition that you link up with the soul of the animals and anyone connected to the AA chain. ... Shall we close for the day. (6:24). Video Happy BD. ... (6:28). 2nd video... Who are we? ... (6:34). It is nice to be alive at this time and position of this planet and people. At least we have matured to understand that we don't need to fight and it's time to move. One of my biggest wishes have been if the governments would spend the money they do on military on the space, man would have been in the space a long time ago. But we didn't have the knowledge, we would have become a slave to others, in a way of himself. Maybe the time was right and is right, that we have the knowledge. And we go to space as equal and not as subordinate, because we saw what happened to the Americans when they received the Africans, and this will never happen to mankind the way I have taught and brought the knowledge. My only wish is that the world leaders start spending the money on development of the new

technologies to improve humanity, then technologies to kill humanity. I think we have seen the early point. The biggest problem is what are we going to do with all these equipments we have made for war and killing. There is a simple answer. Let's start fresh, because we can't do anything, we can't go back because we have made them, ??melt them and use them, or understand the T and add on to them. In a very short time man has moved from the immaturity of science where he thought he knew everything, to understanding the totality of the universe. It's a very hard transition in 5 or 10 years (6:36). to teach and correct what has been done for thousands of years, but as I said before, it was a decision that was made sharp, rapid, conversion, it's better then lasting centuries and getting abused bit by bit. It was a decision that was made by those who run the universes, that this planet has to go through a very sharp rapid change, because this way it will be the minimum suffering to humanity. I remember being present and accepting this job to be able to teach. I remember being told clearly, if anyone can turn the human race around it's you. You have enough experience to do, you carry the soul of the Creator. When I accepted this job it wasn't easy, I jumped it twice. At the age of 19 and 29, and at the age of 39 I couldn't jump it anymore. I was given no alternative, so I had to accept. Since the age of 39 - 40, 21 years ago I started to do it and I started to show the power of what I carry. When you see Carolina writing, I love you or whatever she has written there, she was one of my biggest, what you call problems. I remember we used to live in Belgium, she put a candle weighing about a kilogram in front of me, (6:38). against the door and she was trying to convince me that this doesn't have to be. She said, concentrate on the light, don't concentrate on the back handle. In one second I said, "I am the Light" , I don't need, and the candle just flew across the room. And that was the end of discussions. In so many ways, we still carry that candle in our hearts when we try to teach it, but the knowledge of the candle ?? that is written in mankind with this technology with this knowledge will change our course. 44

236th Knowledge Seekers Workshop - Thursday, August 9, 2018 (,)

(:15). Thanks to the UC last weeks' presentation. (:18). ... A lot of people want to know how it's going in China with the SS. It's not as well, after the problem, but it is good. ... bend the fields for the first time for control. We set our reactors at a high level and we tried to see if we can bend it in. The last time we had an incident, was that the fields bent away from the top reactor and all the energy was released into the atmosphere and it caused the problem we had. One of the biggest difficulties is to be able to create a rotational field back down from the top. One of the ?? is the reduction in the speed of the top core which means G pull from the lower reactors, pull put pressure on and bend the fields in. There is a limit to ... those of you who tried to match and run the space reactors, to run about 2060 to run about 2700 (rpm) that you can start creating a condition that Pl has to become matter state condition of manifestation, or at least plasmatic matter state, which is like the skin of the man. (:20). In the future when mankind understands more of

this knowledge he'll even understand how his own skin ?? speed it is created, what MG field creates that what we call, the illusive body of the man which we think is some sort of solid, but in fact it is totally plasmatic. In a forest I said, if you look at the skin and the skin of a tree, it looks about the same color, because we all carry the AA, but they are slightly different. If you have what we call slight skin disease, you have seen how you flake and the skin grows on top of each other, go close and look at a pine tree, it's exactly the same process. It piles up, it becomes what we call the skin of the trunk. If in reality you understand the difference between what we spoke about, salinity and condition of the ?? floor and Gans state of the matter, then you can even understand how you can create wood strength, or vegetation strength or any other condition which we might feel (we need) in the U. We understand that it is how we dictate the outer layer, it doesn't matter what we put inside the layer, then the inside layer dictates its own shape, its own destiny, what it can hold. If we understand the difference between the skin of man and that of a tree, or what we call the bark of the tree, there is no difference. We live through the confirmation of the 3 layers, top, middle and bottom layer of the skin of the man and the rest of it is contained by its field forces. (:22). The same is (true) for the bark of a tree. But we have to understand how those 3 layers become solid and how the other 3 layers in the lungs becomes soft, and what we call, ?? herbs take a very soft stem to itself. We come to one conclusion and that is, it's the atmospheric condition which dictates the manifestation of the existence. In the time when we come to the point to understand this, there is something that will become very apparent to mankind and that is the structure of the shape of the spaceship, or whatever you create is unique in the U. It means all the members of the universal family followed the same pattern of existence, because the interaction of the layers of the fields are the same, so consequently and relatively creates the same color. It goes back to what a famous man said when he created the Ford car, he said, you can have it any color as long as it's black. It might look different colors in different dimensions in the space but in reality it is exactly the same thing. It has not changed, how it interacts with the environment of itself, it manifests itself in different color or shapes. One of the things we will try to go into today is, environmental condition, because it is important in the space flight how we reach that, how we get there, and how we create the environments and what they mean to us. In the last couple of teachings I touched on it, very softly, in what we call salinity. But how the salinity dictates the conditions of the environment. These all count and are part of the process of the creation and conversion of the matter state of (:24). everything that exists on this planet. Before we go there, there is an important issue that we started last week, actually we discussed it last week and it has to understood by many of us. We touched on it, it's political, geopolitics and somehow we are good at it to get ourselves in it. And sometimes we do good by it and we have seen results with it. In that process we saw president Trump declare he'll at any time anywhere without condition. We made an offer to the president of the US, Theran is the best place to meet, because the conditions are no conditions. In return we return life back to 10 US citizens who are in Coma that it shows the power of the T. The last time with the Americans we showed the power of the space development of Iran with the capture of the American drone. This time we show the saving of a life and this is more important. In that process we are aware, in communication and understand that the Iranian government has shown indications that they are prepared to talk but they don't trust it will lead anywhere because of what stands

on "5 plus 1" American negotiations pulling out. But Americans are getting pushed into withdrawing sanctions or a lot of other things, which we don't think is necessary because what is coming from international economical point of view, there are a lot of governments trying to override the sanctions because jobs, security and a lot of other things involved. (:26).

(:30). ... Ella reads Mr. Keshe's letter to Trump about Iran peace talks. .,... (:39). It will be the end of many conflicts and wars. 06

... The opening of the American Embassy in Theran will be the flagship of this trip. (:46). To se the opening of dialog on a direct open basis, not on accusations. We need to oversee and overlook, those of you who are KF supporters who live in Washingotn, as you did before deliver these directly to the Whitheouse. You did it last time you can do it this time. If you are American and live 1 to 2 hours drive get a beautiful golden envelop and hand deliver it to WH or by post. It's different when they receive it in their hand then they have to read then something ?? The last time our Washingotn supporters delivered directly to the WH and they have to respond. There is a procedure followed and it will be received. ... (:48).

... this is diplomacy we stay in it to bring peace. This will bring in a new environment for humanity. (:52). Once the man stops war and fear of war he will start investing in science and technology, and that technology will change the atmosphere of this planet. It will change a lot of things, it goes back to the knowledge and science of space T as we said, change, condition of change. If we run a single reactor and we see that a plant grows better, can you imagine millions of souls radiating the same wave across this planet. If one SF or one cup of Gans water has allowed your plant to grow bigger or greener or you found a space you can live in peace, can you imagine what 1 or 2 billion souls can do on this planet, with so many dynamic reactors running. We just have to learn it, to yearn for peace and use the energy within our soul to create that condition of peace. As a ?? presence on this planet I have done everything possible I will not stop until the last breath. But we have to understand what the condition brings. What will the maturity of man bring us. It's not only the STM which elevates, it's the ??(e)motion of the existence of the STM will also change this planet. What is important for all of us, (:54). is that, as part of the teaching, an important part of the teaching from now on, is not that look only at what a single reactor does, what a cup of Gans does on the shelf, but to look beyond it to what environment it creates, to what level and what distance does it change things. One KF researcher was showing me, that the reactor he was running in the research center was showing alkalinity in the whole area, moving to over PH 8 plus, and we can go so far and it is still there. I thought, my god, if one ?? small reactor with limited capability can cover the whole area with an alkalinity field, in the hills and mountains, can you imagine what the strong wish in the STM can do across this planet. It's the change of the environment. If a core can create such a change to 8 plus alkalinity, which means more or less, zero possibility of cancer do to emotional condition, not accidental or evolution, then you can imagine what can be done with the STM. We create the condition, (:56). the environment. We have to create a position for our existence on this

planet that by learning it we can do the same in the depths of the space. At the end and the totality of the teachings is the position of the man in space. The position of man understanding the position of his soul to confirm his position in the depth of the U. What does this mean, how do we create these conditions? We have to understand that the creation of the conditions is what creates the confirmation of existence. We want to show ourselves. I am sure if we jump in the melting lava there will not be much of us showing because we didn't dress properly for it, and I am sure if we jump in the icebox of the North Pole and don't wear the right clothing we'll not do much either. But the reality is if man in time learns how to operate the existence of his soul in respect to his physicality, he can jump into the lava, it doesn't matter how hto it is, because he has prepared his soul. The condition of the environment that he allows to exist in that temperature. The temperature of lava on this planet is nothing compared to the heat that happens in the depth and explosion of the stars. But in those situations life still exists because the soul has evolved to the condition, to exist within that condition. If you remember until very recently until about 20 years ago we couldn't imagine, (:58). they said there is no life in the depth of the seas and oceans, but as we had the tools and we could in those depths we saw more animals, at the positions where there is heat coming up, at high temperatures of hundreds of degrees, there are shrimps, lives, animals. How could they stand this, was it the physicality that changed in them or is it the dimension of the soul of the animal which has conditioned the physicality to be able to stand it. This is what we have to pick up. A further point is why can't we create these conditions ourselves? Why can't we create a condition on this planet that it changes everything? It doesn't have to be with the Gans water, but it is the atmosphere we can change. It's the condition that the environment changes what manifests itself in the matter state, and not that the matter state appeared out of nowhere. This is part of the teaching we give even in our research to develop and to exercise. Look at the conditions of where you live and what is needed there, what do you want to change, what are the assets or facets of what you are doing and where you live. You live in a dry place and you want more rain, but when you want it, but it doesn't change the environment of it. This is part of the condition of the evolution of the science that many governments will try to abuse. the governments will try to change the deserts into a living place, and change places to be able to start growing and doing things. (1:00). But the ecology of this planet depends on the totality of the structure of its atmosphere. If you change a desert, the condition for the layer that needs to evolve around this planet will change. Where's the change, what's it going to be, who is going to stop the rain in one place, and not knowing. On the other hand deserts might change, but what about the neighboring position. Isn't it correct that we have to understand how to create a condition that not only the desert stands, but were you are stands for itself ?? on condition that you change the receipts of the material in the position of the acceptance of the fields by the planet. Understand the terminology. You create a condition, but what you create, the atmosphere, the interaction with the field of that area of the planet has to accept and see what it can produce. Many of you have started testing and I have seen some pictures coming through on the .. is this gold, I have something else there, what happened to it, is this Gans, I had CO2 and something else there. Ask yourself one simple question, what atmospheric conditions did I change, what did the interaction of all these Gans's lead to? Is it only the cup that was next to it that creates this or is it the totality of the fields in that room. And if you move a cup 10 meters away, you find out .. I used to

create a gold ?? here, it doesn't happen anymore. The fact is, every field together gives you that result. You might or might not be able to dictate the conditions for it, (1:02). you might be able to hold conditions for it. I have asked on of the researchers who was involved in the production of the materials, to start commercializing systems that can produce matter state. Very shortly you'll see through the Italian KF systems that you can buy and then load and then you can make your gold and what you like. This is a request I put to the research center and I am sure in the next few weeks you'll see matter production systems coming from KF. You'll be able to exercise, test and show how you can create an atmospheric condition, which in a given controlled condition can lead to production of matters. In the beginning it will be interesting and exciting, it's like when you bake a cake and make the recipe a little different, this time it becomes a biscuit, next time it burns and becomes something else, and another time it becomes a cake, that is a little uncooked but at the end you eat it because you cooked it. Many of you will start testing. We have seen to this and hopefully if you get materials and want to se what they are, we have found a friend who might be able to help you. You get in touch with the KF and our friend said, you have to pay for their time to see what you are creating. The samples will go to Malta and he will test it for you. There is a fee that we have to agreed on for the lab if they do it, what they can do, and or other places. (1:04). As we have seen in one of our research centers you produced such a minute amount that they can't even test it. Or what is it? We had a discussion and arguments before the communications started today that somebody is claiming to make gold and another claiming to make something else. Yes, but please video these conditions and take a video of the whole surroundings. Was the cat sitting under the table and it happened to pass somewhere and it was a gold dust and you pick it up, but next time the cat isn't there and then the gold dust won't be in the pocket. Because don't forget, remember the orange and the Gans water and how you got the transfer of the energy into ... the taste of the orange, now this time it's the cat and the gold. You have to be part of it and understand exactly the whole situation. In one of the research centers they have made a box that they can keep everything controlled and under control. We made this box in Berleta where we put things inside this box that nothing can touch it. We covered it with Nano coated materials, which means it will be continuous balanced fields, which means whatever you make is in there. But it has a problem. It has to have a MG field above what Nano coating you have put on it because now that is the filter, but you can penetrate it. then you condition purity with what we call restriction and filtering. Then you say it produces with or without. Start understanding the application of the fields of the Pl. In the present discussions in the past few months we went from the Gans to plasmas (1:06). and condition and creation of the plasma, then we brought what is known as, because you are all physical people and have to have something in your hand, we couldn't see the Pl, we showed you how to create a neutron. A neutron is created out of the condition of the interaction of the materials, and it can be any material, if you can find a material that you can create a condition of interface between another material, whatever is a residue it will give you a neutron, but have you created a condition that the neutron itself converts itself back to another matter, or becomes a collective effect of the matter, this is another part. If you go to high level, what we call heavy elements, what we call with a huge number of neutrons, you can do the same, if you done the same thing between H and Deuterium and Tritium and you extracted 1 neutron, if you are knowledgeable and you can make the

Gans of, you put such an element with 20 more neutrons then another element but equal number of electrons and protons, what are you gong to get as surplus, this time 20 neutrons. But you have to understand what happens to these neutrons. On the stability of nuclear decay which comes from the essence of the creation of a neutron, brings you another dilemma. What does a neutron do? Respect to the condition it is, a condition and a position which other neutrons take to itself, it converts itself automatically, those who are on the giving pressure to a neutron and an electron, what are you going to end up with? Another 10 electrons, 10 protons, and 10 neutrons. What is 10? This becomes your new element. You have to understand conversion, the position of the conversion. (1:08). What is a neutron, it doesn't stay there as a neutron, until the cows come home. They interact, they radiate. The most unstable nuclear reaction in the U is the existence of the neutron because it gives so much that it splits. It's very much like a seam of a trousers, if you take enough thread out the trousers fall apart in 2 halves. In reality this is what you have to understand. I hear a lot of people who start to play with neutrons are disappointed, ah, it was yellow and now it's changed to orange. Of course it does, because some of your neutrons, in loosing their energy, in trying to keep their conformity, and all the other neutrons in the MG field strength have lost their energy, what is going to happen. It becomes an electron and a proton, and you have a free neutron, what are you going to get? You end up with Deuterium, but it is in a condition of the conversion of the fields, especially the presence of the conversion of the neutrons and the amount of the field strength collectively released, creates a condition of 2 neutrons and an electron and proton to create the balanced field, of what we call very much like Helium, so what are you going to end up with, is D. I made a neutron but how come I am ending up with Tritium? Very simple, you loose some energy, or you can put them on the M field strength, or through a plasma transition field, and then you get what you want to get. In the coming teachings many of you will learn, if you remember I explained about the magnets, but go back to your teaching and what you understood, back to the science of the conversion of the fields. (1:10). Now if you had that neutron, the bucket of the yellow things you created and you know very soon it's going to change itself to T and some D because it is dividing, and it's a natural process of linking up. Then what's going to happen, by what you put in the boundary of that system, the you did with another prtoein box, you decide how the neutron will take shape, will it become gold or Cu. Would I change it to water, the field of the water, you create the condition that converts the neutron in the condition of space into water, at least the energetic water, that when you gets in, or comes near your body, it absorbs and converts it to the liquid you call water or blood. This is how environmental conditions comes into existence and plays into the life of the man in the space. Don't forget man is not the only one, billions of other races have already done so, so it doesn't have novelty that it becomes something else, man is not the only race that carries fluid like a blood. Many races in the U do. Man is not the only race that can have emotion and everything else. every race in the U has the same emotion. Now that man joins the UC, the uniqueness doesn't exist, it's in fact, understanding the totality which gives the man the knowledge of understanding, it's part of the creation, repetition of the same process and there is no uniqueness to it. Maybe the red color, yes, but there are other red colored blood races in the U. You are not the only one, I can take you to many. We have all colors of blood in the races in the U, (1:12). transparency and manifestation. It's not just the Fe that makes the red color, in the

condition of the interaction of the prtoein there are other liquid that have the same capabilities of doing the same. What environmental condition you create dictates what you are going to get. The purpose of the teachings today is the creation of the conditions of the environment. Many of you, this is typical of the way I teach, and you lot like a lamb to the slaughter house follow it and then don't think any more, as I call it, copycat good job, is, you just all made the neutrons. What's the next step, why not you decide the environment that the neutron doesn't convert into He or O. You want direct property of the water to be there to be absorbed, but do you need to manifest it first in the liquid form that it be there, or can you stand next to it, hold it and see that you never go thirsty. Because you become again, do you remember the cup and the orange, now the neutron is the orange and you are the cup. If you manage to transfer the water through it to a plasmatic condition, that is a neutron itself, then you achieve it yourself. This is the beauty of the process and you need to understand. You can create a condition anywhere in the U that if it fits the life of man on this planet. But what do you need to exist? It's not just the O or H, it's the totality of what you take in. Man always looks and says, Oh, i am breathing O, my .. dream. (1:14). No way! When you breath you inhale the gold which is in the air coming down to be the silver, to the odor of the cow which makes some gases in the US, or the god knows someone else who sits in Theran and does something else. We are part of the multi-structured MG field forces of gases and it fills the whole of the U. A couple of decades ago the scientists did a very interesting test and I have talked about the this before. If you haven't heard it you'll hear it again until you understand exactly what it is. They say the worst thing to do is to keep your totohbrush where your toilet is. You say what does the Totohbrush have to do with the toilet? Read the documentary, they say when you flush ?? percent has gone down as part of the odor in the atmosphere of the bathroom and you can find it on your totohbrush. Scientists have proven it. Can you imagine if you are in the desert and you do the same job (toilet) and where does it go? inevitably if it starts in AZ it will end up in Saudi Arabia, and if in Saudi Arabia it lands in the US, because this time the container is not the wall of the bathroom, but the atmosphere of this planet. Now you can see how racism on this planet has such a little meaning, because all of us are at it and we are all sharing each other, and yet we say we are this and that. Now you understand because it is the condition of the atmospheric condition of this planet, which is on the MG field of the Gans and not the matter state, (1:16). and at the same time it is the conversion of it. If this has been very hard for you because you were taught that you always absorb matter state, then you have a long way to come because it is the conversion of the field forces of the gases has forced us to live under these conditions that we absorb fields of the gases, and the field comes only when it is in the plasma condition, in the matter state it is very hard to use. So when it comes to that you want to produce materials, now you have learn about the plasma (Pl) before and the fields it produces, and now you learn about what I call the neutrons, you have to be able to contain the plasmas, and make a containment for the neutron by the plasmas and then you can decide what containment of the plasmatic you can create that, that neutron will change to the matter state or the energy state that you want to convert it to. If the MG field of the atmospheric you create around your system is of gold, then the neutron will convert itself to gold ?? value element. As ?? these kind of technology , we need to understand the reality. So that now we become in charge of the totality. Many scientists have been yearning to understand how to make water. I could make it before

but not now. Those who understood and start understanding the process of the creation of the Gans's which created the field and now they can produce the neutrons, very easily should be able to produce any matter at any point in the U. The conversion between the fields of the environment and the existence of the package of the fields. (1:18). If you look at it, it's an envelop and what you put in it. But this time whatever you put (in it), the envelop converts it to what you wish. You put a neutron in the bucket and then you put your hand in, if your wish is that you have gold, you'll come out with gold. Because you create through your wish the conditions, environmental condition that the energies of the fields of the neutron convert themselves, in addition together to the strength MG field of gold. Many of you will learn. The magicians tried to show this but they could not, and many people made (gold) but they could not explain it. Now scientifically you can set out to do it, and if you are pure enough to do it, you will see it. You can do it. But you wanted the gold on the table, you got it, you got it wrong, it appears somewhere on the floor in the corner. Which means you still created the fields but the intention was not there, you added the soul to it, ?? added the mixture of understanding to the mixture of the totality. Now that you have started playing with Gans's and their fields, and then now with the neutrons and you think you really got it this time. Now you can go and start making whatever you like, because you have the "dough" and Gans plasmatic field is the oven, how do you want it to be, do you want a bread or a cake or a biscuit. It's the same flour. It depends on what condition of fields you create and what condition you enforce for it to be created, (1:20). that it converts, in a way, what it needs extra to become part of the fields of it, to the matter state that you need. Those of you who understood what I just said, you'll be running to your lab and say, oh my god now I know how to make dinner tonight I don't need to eat. But you try to explain it to your husband that this is the energy of fish and chips, not the fish and chips, and you have to put the emotion in the brain that it tastes so nice. And you say, um, such a beautiful fish and chips. It's very easy to do when you understand. I know a guy who is dying to show us his neutron creation, but in fact, if you do the neutron conversion and you know how to play, then you should be able to create any matter state, material state, from every single neutron you have created. Armand do you want to make a comment I heard you are very eager to talk about this. Armand says he is not eager. He is at Tiahuana, Mexico the KF headquarters. (1:22). ... (1:24). ... From your teachings in the Insano with the gas reactors we have a plasmatic condition inside, to activate we needed a radioactive material, but with Gans we don't need that. To release the energy of any Gans we don't need that strength, you talked about it many times, but we never could see it, that we have to MIX IT, to release the field. Each has a package of energy and each has a different strength. But they are in balance even when not rtoated, when not mixing it, not whipping it. many times you talked about the mixer. So to release the energy of the neutron in a salt condition we just have to whip it. (1:26). This is what I wanted to explain, the way I understand it. This whip just has to covered with N material. Just wrap it up with N material. And the effect will be different. Any comments Mr. Keshe. No, my microphone was off. We know this the past 5 years. I know. I know you just realized, don't tell anyone let them work on it for 5 years. No, why? So tell them, how do you do it. (1:28). (help him connect his video). Some people have a very nice teaching room in Mexico. ... Shows video. The mixer blade is wrapped in N material. I don't know why my motor stopped at high speed. That's normal because you have created a field, it happens to a lot of people who use

Gans in high speed rotation with motors. (1:30). It's not just your motor stops and starts again. A lot of household things you are using ... oh, it started again (surprised). Yeah, the field is back again, we took a lot of energy from it. I just let it stand for awhile and it's back. Armen mixes the Gans mixture with high speed motor and N blade. Then he let's it settle. So what are we looking at. You are looking at the conversion of the energy of the Gans into the water, rapidly. It's like in Homeopathic you have to hit (the btotle) several times to divide. Yes, I know that, we have been teaching that for a long time. So what are we learning from this, Armenjan. That in this water you have created the ?? field. (1:32). This water is now energized with neutrons ?? because it is a rapid release. Any comments Mr. Keshe? No, we are still seeing the Gans's you have created. There is not much I can tell you. You have gone through the whole process of teachings from A to Z. But the question is, is this plasma the same as the plasma that went in? No. How is it different? Now we add all the fields, whatever we have in the Gans state. Because the strength, each one is different. I have a Zn, CO2, CH3.Correct Mr. Keshe? Yes, there is nothing wrong with it. What are you going to do with it? Now, (1:34). if I take this water I can create ... Whatever you like. But you have to create the environmental condition outside it to be able to get what you want. I understand. So put a cup on top of it and put another blender you might get some water. I know John has done some experiments about this which we talked some time ago and he sent me a video, he is trying to do it. That is increasing the field forces by blending it, of the Gans's. So maybe if we connect that to this one we might learn something more advanced. We talked with John a few days ago. Yeah, but not in this teaching, I never saw you teaching it. ... This is part of understanding the space T, how you can change .. how you can homogenize. Yes, now if I use this water in patches, the environment I'll create is high energized. I can have my combination of what I need, (if) I need to give or take. (1:36). ?? environments. I can make another environment and see what I bring in. What about if you put it in a double walled jars with 2 gaps in it. That's what I am saying. ... if you have a space you can bring a third one in and see what you get in between. I think this is how you can create matter. Who is expert in this? Rick says he can add something. I looked up micro bubbles implosion, because that is similar to what you are doing. The article says, breaking 100 megavolt barrier for proton acceleration ... (1:38). ... We are going to sued again ... Okay, let me explain something. The reality is a lot of us don't consider these things, what holds, what complies with the rules and regulations and what you call universal work. (1:40). If you look at some of the space reactors which are not working, and some that are, in their design these things have not been considered. But on the other hand you can convert it to a single Gans. This is adding to the knowledge. So these micro bubbles, which you call them, which exist are collectiveness of the energy which is in the container. You can't pick them up and say this is a neutron. The totality is absorbing and releasing. Mr. Keshe if you notice that some of the Gans (in the mixed jar) are rotating, they are in movement. They have been moving for a long time. these are MG positioning themselves in respect to all those pieces at the bottom. (yeah, in the environment). Yeah. You see how you have a central position when you have a huge amount of energy, and if you look at the rest of it on the top with all the bits, it's like a galaxy and universe. Depending on the strength from the universe you are ?? distancing yourself and rotating, dynamic in 3 positions while you are under the influence of ?? earth's field. (these are dynamic if you look). Yeah, of course they are. (1:42). That's earth rotating under its

own volition. Now you understand how the creation of the fields of position of motion is created. Now it goes back to what I usually ask the people when I do a lab presentation, I ask how fast have you traveled in your life, they say, oh in a plane I think I went 900 kmh. Then as usual we'll see what conditions are created. If you very closely look at your box you'll the density is very much different from the bottom to the top. But if you look the shape and the patterns are nearly enough the same. You see a repetition. We reproduce these things, we have been at this for god knows how many years, but bringing these fields to concentrate, to ofcus on one point that they release their energy ?? still is a mystery. And it shouldn't be. Because the reality is what we said, the creation of conditions, creation of conditions, creation of conditions. What do you create? If you put Mg on one side and Ca on one side and Cu on the other, exactly the amount from which you can from, (1:44). You would ?? get what you created. (yeah, you'll ?? add on, it will be a totally different fields). yeah, (so how could it be the same?) It could never be the same. The strangest thing is, many of you are testing developing, seeing things, but you are so ofcused to see what you want to see, that you don't know what it is showing to you. I have seen this many, many times. You are so ofcused to get to the Gans guy, that you forget that in that process you had some matter, where is the matter. Where is the gaseous stage of it. Why do we get this material condensing so much on top of each other. It doesn't stop. (it's a condition what we created things ??) So you can extract from it what you need. In the future man will hold a lot of Gans's in their refrigerators and freezers and everything else, I need this and that, for every application. But you can't find any place for it because your body is still in the matter state of the atmosphere here on this planet. (1:46). Is john around? I am here. Hi, do you want to show your mixer now that Armen has showed his. My mixer is Armen's idea, we shared the ideas. I used different materials. Now the mixer market should go very big because all the KF supporters will be getting one, .. to what they can mix .. the "dough". But the thing is, what can we do, what do we understand from this. .. you have put it in there and mixed it, you homogenized the field strength, and then you do nothing with it. (Mr. Keshe I just mixed it today, to do something with it is the next step). yeah, but, what are you going to do with it? If I were you I would create children with it. ?? how to create children with it. Do you want to know? (in time I would) . Well would you like gold? (sure). .. You see these fields, how you tap into it, will give you a lot. (How you cut in?) How you tap into it. You create the condition of a bandwidth extraction of fields and in that bandwidth, in the Pl condition will give you, say, Cu, it's no use having gold when you can't use it, you can use a Cu ring. What are you going to do with it? We have seen for years people making things. (1:48). Oh, they show this ... what is next? What can you do? You have CH3, H2, H3 in there, what happened, you mixed them, you energized it. (you can use it in health, it depends where you want to direct it) In the space we'll learn something very quickly, and that is the conversion of the fields themselves, are the source of energy. You don't need to take energy from electrons or protons. The neutron in its conversion has released so much energy at such a specific bandwidth that it fits everything. And man doesn't use it. he stays around it, what we call the atmosphere of it. (we have to understand how to use it, that's where we are getting to Mr. Keshe) Are we going to see a flying cow next week? (for you it's easy to say, you are a nuclear physicist and you know everything about) I have taught everything ... the layman, ??? a 5 year old child in China makes it in a small room. We have to see what we want. We keep on making things, but we don't

actually put it into use. (that is what I am going to do) Yes. People have to start seeing things which manifest themselves. (1:50). The understanding of this science, ... people are so physical. The Italian KF will release systems which make whatever you need. It's a creation of conditions, and they fix it. We need it. It is time for it to come out. We had the Gans machines and everybody bought these Gans Boxes and were doing this. Now we have to put what you call these ?? particle machines and see what comes out of it. Suddenly you create a condition and a genie appears in the cup. Where did the genie come from? You brought the man from planet Zeus in because you create the environment for him, ?? but you wanted to create gold. The conversion of fields to matter is something that man has never seen. It's a part of the evolution of the science, what we call, transmutation of elements. It's actually transmutation of fields, conversion to matter state or whatever state. This is part of what the teaching is, it's just that what you want is there. Convert it, Gans it, matter it, whatever you like. You have to create the condition for what you want to reach. Many KF people have jars and buckets of every Gans you can imagine from metals to beetles and whatever else they could get their hands on to Gans, but what are you going to do with it. Or is it just a hobby. (No, it's the part we need the understanding of how to deal with it. Now we know we are dealing with the fields we need to know how to cut. If you ask me how to bake a cake I will do and give it to you). (1:52). Can I have a cake please, I haven't yet had my birthday cake. ... But can I imagine I had a cake using the field strength of my soul? (sure). All the fields of every cake all the way down the road baking. (the field my baking is going to be different then whatever you imagine). We aren't giving you any almonds, just forget about them. The creation of the condition is the confirmation of manifestation. We are expecting, if our team gets it right by reducing their speeds to come down to whatever, and then they go back up again, but they can control it to come down, they understand why they went up and why they come down, and they achieved below 2.9, 2.7, and if the condition of the second field is good enough they'll see interaction with their own system, otherwise Papa sitting in the corner can watch your body, but you can't see it. It's time to as I said before, mix the Gans's and become a creator, it's time to elevate. How many of you can make a system that can extract a cancer from your body without you knowing and nobody else knew you had a cancer. It's all in there (mixture on the screen). It's how we apply it, how we interpret and how we develop our interpretation to become a reality in science. (1:54). In some parts of the U, the UC had to interfere and this is part of man when he opens up to the UC you'll see and read about the history of creation in the U. We create what is known as the beacon of control, what it means, we don't interfere, but we know certain places, or certain conditions in the U leads to certain kinds of, let's say, behavior. We don't wait for that behavior to manifest itself, we change, what we call the conditions of the whole environment, sometimes huge parts of the galaxies or universes to create a condition of peacefulness. Creating a condition of having what you need that it leads to what you call love and generosity, whatever you call it. These beacons, or whatever you call it, carry a spectrum of fields which meets the demand of the need of the soul of the creation, not the physicality of it. The man when he goes to space will see huge amounts of these in some places. It's been done by the UC very much like, we don't interfere, but we allow the fields to be disbanded that it doesn't allow such a thing to happen. We have the same position here, something very interesting that we came across in the past couple of years, those who start using Gans's in different ways and then they found out they went

through the craziness of it, but the cats and dogs went through the same craziness. (1:56). Because it touches the soul which is all of the same strength. This is how we have to understand it, and then we created conditions for it that it doesn't happen. This goes back to the teachings of today and what I said. The collective consciousness, as we call it, will lead us to understanding and change and conversion of the man and the rest of the animals on this planet to a peaceful nature. Because we created it and we know it's there and we want to create out of it, what we want. We converted the thing to a Gans and then we converted it to the fields of it, then we put the field of the Gans of Zn and something else together and we create, let's say Cu, or Al, but how come part of it we don't understand, that we can do the same and touch the STM and change the behavior of the ttoal planet. Because we come from that field strength we should be able to create the condition, to be able to force the condition to be changed. This is part of the new teaching, that we create the condition of the environment of peace. It's very much (like) the letter of today, what is it. It's very much a bunch of words, but what has arisen, the soul of consciousness, and with it, 'I can do', you wish for peace and I can send something, the others send, (1:58). and who gets trapped in between it on this planet. The fields are moving, how come if in the summer or winter and you put the Gans on one wall and another Gans on another wall, you kept the room temperature constant, and the field moving from one to another gave you the feeling of warmth or cold, so is it the same with the man. You are on one side of the planet and I am on the other side, I wish peace and you wish peace and between us sits president Trump. Where do you think it's going to go? With a lot of love and care. This is what we see in the environment of the life of the man and we never understood it, now we do and we can do something about it. You don't need to touch to understand, you can feel it and understand it, because you have to have the sight, the vision, and understanding. And understand how the fields work, how you create the condition with the fields you create. Yesterday we had a gentleman with us, 6 weeks ago he was highly diabetic, his eyelids dropped and were closed for 2 to 3 months. He was going through the process of diabetic blindness. What that is, is the eye shuts and over a period of time, gradually as the sugar in the whole structure, it's like a curtain that looses its string it just drops all the way down, (2:00). then the neural system of the eye shuts down because there is no light coming through it, no vision needed. Gradually you go blind and like the amputation of the leg, they remove the eyeball and the rest of it. It happens many times to people who go through this cycle. What we did about 6 weeks ago, I saw him, I said I know what this is and how I can help him, for 3 months he couldn't see with his eyes. We can release his pictures covering his face or whatever. A couple of weeks ago he sent us his picture that his eyelid is opening which means reverse of diabetic. It has never been done before. He was with us yesterday and his eye was opening but he was closing it because he was seeing with one eye because he was seeing double vision. Because in those 3 months when the eye was shut the degeneration and nerves are setting themselves to go blind, has created a double vision. I said, just wait a minute. We made him 2 patches. One of the reasons he was closing his eyes so as to not have double vision, because when he was moving from one angle to another he was seeing people with a new double vision. In a matter of minutes, understanding the conversion of the fields in the brain, I made him 2 small patches and he sat there, and now the double vision was gone. He said he could see 80% better then 85%, then 97%, (2:02). and all this is understanding, even the sight of a man who is

going blind is ?? , is a gift I carry with me. The gift of life is one of the facets of my ?? . And very easy, a man goes through amputation, loss of sight through diabetic, and there was not cure for it. Now we can do because we understand, because if it was you what would you do. Would you wait until the man looses his sight, this is what is happening in the world of medicine today. He couldn't touch any carbohydrate, he denied himself everything, and now he eats rice and whatever else and even takes some alcohol because now the diabetes is in the back fire. Yesterday he walked out of here with full eyesight. If we had never met him most probably in the next 12 months what would happen? A man becomes blind, then another eye, then a leg an arm. Now we see man, he is part of the bigger family of KF. He is one of our staff. He is not a stranger, but if you don't understand this knowledge how can you help a man. It's not the first time I have given sight back. Because I didn't go and make Gans's, ?? I created an environment, and my wish and my will (2:04). to give a gift of sight, is for him to receive it and replacing it within minutes. You go to any eye scientists or surgeons they'll say, it's craziness, impossible. This is having confidence in the knowledge you carry. This is understanding the totality of the science. You create these things, but what do you do with them. How do you an environment that what you have created has an application. It doesn't have to be for show, but when you need it you show the application. The more you ofcus to show something the less you'll be able to show it, because life has to be free. It's not the time and the place for, don't touch, you don't need to touch, you feel the soul, the Qi, the life, you feel everything. You feel the essence of existence, you interact. Any of you understanding this T, the creation of space, matter, and energy the creation of the fields, because you carry in your package, every single one of you made Gans's, you carry the package of life. It's inevitable, 100%. It doesn't matter how many times you washed your Gans's you carry a drop of AA which was created on the surface. It's in there. It carries the imprint. All of you keep on saying I created CH3. (2:06). There is no way that you create the CH3 without, without, without the presence of Hemoglobin. the orange color of CH3 is because of the presence of Hemoglobin, and what is it, it's your blood. Why does CH3 effectively transfers energy to the blood, why do we use it that way. As we said last week, if you make any patches understand the totality, the salt, the ratio, you create the conditions. None of you creates the matter. You create the conditions for the matter to move or to appear. Then you can influence the physicality through the fields. Many of you when you do the medical or whatever testing you do, you make these physical balls. How many of you know where to start with. I say, 100% of the doctors around the KF have no clue what they are doing most of the time. Because there is one thing you don't understand, you make a patch that works, you have to understand is it within the field of the structure of the STM or the physicality soul of the man. You put a patch on the heart and they tell you if they feel better or worse. It's the only way you can directly know if the patch is working for your patient or not. (2:08). When I make a patch without anybody knowing I test it. I don't need to bring it, but you test it to see if it matches. People say, since you gave me the patch I fall asleep. You fall asleep because you create an environment that your body is creating new cells and they need energy and that needs rest so you sleep more. But do we create an environment that is part of the totality of the creation of the man. At the same time this goes back to what we said, you create the environment, why did I start the teachings of today by creating environment, because we are getting to the point that we need to create an environment to be able to

welcome the 'beings of the universe'. You can't put a live fish on the table when it isn't in a tank of water. The part of the teaching that is leading man, what we are trying to explain, is you want to create a condition to invite the UC to teach you to understand the creation of the U. Create the invitation of the place and welcome. This is what we did in the letter to president Trump, we create the condition of environment that he feels at home. In the coming time when you start making these dynamic fields and reactors, when you run into multiple fields, you start creating conditions the same as you brought the orange in the cup, now the field is the cup and the orange is the passengers of the U. (2:10). Do not be surprised if you see things, and say, oh, I saw something. You invited it, you created it. I sat with the space reactors with the Chinese community watching it, and I could see things, but I thought if I tell these guys they'll say you're a lunatic. They don't have the eye to see. I watched the presence of members of the UC, they are there, because the field has created that condition. But our guys are totally blind to the reality of what's in front of them. It's part of the tests, the way I set it up, knowing the work of the U, I wanted to know if it there. We hear voices, noises, but where does the noise come from? Not from the machine, it's the presence of the existence, because we created that condition. The team doesn't understand. They don't have the eye to see, or the knowledge of what to look for. It doesn't have to have 2 arms and 2 legs and laugh. Go back to what I reported a few weeks ago, that we hear noises, but where does it come from, how does it change from one thing to another. Part of it is a mechanical sound, but the other part you see the entity. This is why I start teaching to understand the environmental conditions. Many of you are going into multiple reactors, before you created the cup and put the water in it, the orange on it, and you tasted it. Now you are creating fields, interaction of the fields create that cup. And if the field you create is of a specific order and existence, (2:12). you get the orange. This time it's existence. This is how we create the condition, we don't make a trap, we make a welcome home. The same thing applies to the man, in the space, if they create an environment that it is conducive to the existence of the man, then he can manifest himself the same as he is on this planet. This is the reason for part of the teaching today, creating of the environment. Why do we need to create the environment. And what does it lead (to) when we do these things. What do we expect. Many of you will start running these dynamic systems for space flight and the rest, and you have 2 and 3 of them. In between 2 and 3 you have created a dynamic field. Many of people .. even in my own SF, you are looking for, you don't see, but if you look deep enough you understand the conversion of energy within the triangles, many times you have had visitors, but you never understood. Because the field interaction creates that environment. You know, when you go for a night walk you don't see anything, but just by accident you bought yourself a night vision glasses, now it's a different world isn't it. It's the same with the new T, you need Pl vision that you can see what is inside. (At first we need to understand what we have created, what we want to create). You don't know what you created, you don't have an alphabet of the god knows T on this planet, (2:14). how do you expect to ?? of the universe. The man from the Mars comes and goes and you don't see it because you don't have the field of it. We have to understand that this is what mankind is facing with this development. This is part of the development of the T. You have to understand how I am teaching and developing the science. This is part of very softly, bringing you in. I sat and watched and I have a camera which continuously watches the operation of the Chinese system even if I am in bed, it's there it's running. I

see things because I see the conditions, but our team is only interested if the thing is going to fly. As long as you want it to fly, it won't fly because you don't create the condition for it. What is the condition for it to be? We set, as I said, the umbrella, I was explaining what happened to us in the first test when we lost it. We lost all our fields and we damaged our system. It's very much like what I was explaining to our scientists in Malta, last weekend when I was there with them, I said, it's like an umbrella. (2:16). It's like you are holding an umbrella very tight walking in the wind. And it is holding, and you are holding to it with your life that it doesn't do (blow away). This is our reactor we built it. It's pressurizing. You create a sudden surge that what happens like a wind, it goes under the umbrella and it flops open, and the whole thing goes and it's upside down. All the energy which was pushing from inside has bent it over and it's released. This is what happened to us in the space flight 2 - 3 weeks ago. We created so much field force, that once the plasmatic field above our atmosphere reached a point, our umbrella opened up. We lost everything. With that rush of loosing most of the reactors had to be dismantled and put back together again. Because we created such conditions trying to get it back in order, it's gone, ?? repairs, conversion and trying to see what we can salvage from the system until we get the umbrella back together again. It has taken 3 weeks, but now we are holding. In that atmospheric condition in which we are holding the umbrella down, which are the dynamic field pressures of it, is creating a condition environment that can fit any creature of the universe. It's not just a field for me, it is a plasmatic field. As our colleague said to us very recently in one of the field trials we have a problem, since we started testing these materials in the fields we have never seen so many birds, they're all coming for food. Because we have changed the whole environment. (2:18). It's not anymore, I'll water the plants and that's it. We change the conditions of the environment and if that field can bring so many birds to be fed, can you imagine what it does in the space of the U. Where do the birds see this that they come? It's a complaint we have, even in the discussions of the past 3 days. 'Yeah, it's good but we are feeding the birds'. I said, you increased the harvest by double, you give 10% to birds. This is the balance of the universe. If you agree to keep a 100% you can't have, you loose. It's not that you loose the matter, you lost the energy, how to protect it, so let it go, why do you spend so much money .. you already know you spent 10 Euro to protect 5 and 5 is lost. This is why in the olden days the farmers left a piece of land, the harvest, for the nature. They understood. Man has forgotten the balance. Many of you, even if you are in a neighborhood and another friend, 10 km away is running the same thing trying to beat you into the space race that he flies first, and you are doing the same thing, and you both bought the Cu from the same shop or by accident it came from the same mine in the middle of New Jersey or wherever, with that friend 10 km away you create a field in between, maybe halfway between the 2 you create the conditions for the presence of a creature. And somebody passes by and says, 'Did you see it, somebody passed by on the road something was moving'. But did it come on its own or was it the interaction of the fields you created, 100% interaction with the fields you created. Or they create that condition for themselves to manifest. (2:20). We have to mature. And part of the teaching, the conversion, the knowledge is understanding the creation of the environment, not only for this planet. Now that we are going dynamic, remember I said, 3 - 4 times today, your space reactors, in the original teachings, Armen can tell you, we call it the FP point, where the fields of the base and the top come together. Do you remember Armen?

Yes. So that FP condition can be conditioned for manifestation of the man from planet Zeus with a child in his hands and his dog. What do you do? Do you stand there and watch it, or you switch it off and he falls on the ground. No, you reduce, diminish the ?? size and he goes somewhere else that suits him because he carries it through his soul, not his Swiss bank account. It's time to understand and as part of what is becoming the joining of the UC that man understand we are in that phase. We have to start building a home for the passengers of the U, by understanding and creating the conditions, and not imprisoning the way we have done to the fish, dog and the birds. Because you have to remember that this time this animal has the intelligence of the soul. When you start putting these things together and dynamic systems together, and start making conditions and you say, this patch I was making gold and the other one is there, have a look at what is sitting behind it. What stands behind it. Creating conditions of existence is cornerstone of manifestation (2:22). of creation in the U. And if you don't learn it you can't manifest yourself, and you can't manifest those who you want to be your guest. It's very much like what I said, we manifest our love to the president of the US, as a love of the nation of Iran. We don't tell him to come here, we show you. We say, you come here we give you the love of a nation. And this is how it should be. from now on it's not just making Gans's it's what conditions we create and what it leads to. If you create the right conditions you can create the liver and kidney that was missing, as we said last time. As it can do that and you have seen that it can do many things, now you have to understand that if the kidney had that condition and position. If I make the salt of the existence of the planet Zeus, I'll have guests from there, what am I going to feed them, fish and chips. This is where the knowledge and its extension comes in, and we have to learn it. Because I brought you to the point of seeing it, making it and if you have the wisdom and knowledge of seeing it, and in the future you start making these plasma vision glasses, then you'll see creatures, how are you going to speak to them. You can see, I have already brought the UC to your homes, but you don't have the sense and the vision to see them. You created it, not us. It doesn't need to be dynamic, if you put a glass of Mg in one place and something somewhere else, and between the glass on one side of the room and (2:24). a jar of whatever on the bottom cabinet and another on top of the roof for ?? , here is a condition that gives rise to manifestation of an entity whose field strength is that environment, you'll it. You aren't seeing ghosts anymore. Now the knowledge brings us the friends from the U and in time when man matures he'll understand more. We have to listen, to see, as I said, I carried this for the past few weeks with me when I used to sit in front of the Chinese space system. And many times I looked at 3 or 4 people around me, I said, they don't see do they? They are looking to fly, and I am looking to see what conditions I am creating with the matters of this planet and leads to the manifestation of what members of the UC. I am not making a ?? I am adding to the knowledge, so that in the future when I explain to you what comes, what has been, and what you get. The team in China are looking to fly but the time is not right yet, because you have to learn that when you fly what are you going to do with your visitors. Feel the presence, feel to understand what you have created, if you don't see them, how are you going to fly, are you going to bump into them, are you going to kill them? Or are you going to create a field that it takes their soul. We are at not even the nursery of the knowledge of the U, and we can't create damages. When you sit, as I said, that are alotgether something like 300 plus cores running in these systems. (2:26). They create a combination of fields. And

our team is just wishing to fly. It won't happen yet because you haven't seen what you are creating. It's no use running a car and handling it when there are 200 people standing on the ?? bumper. You are creating an environment. What happens if you put an empty jar in that glass which is in front of you(on the screen), and dynamically as you are creating the field you see something and you call it a genie. Or is it the way, if you understand this process you create a condition of transmutation. If you make this jar big enough that it can carry the size of the body of the man, or small enough that it carries the strength of the STM, you can manifest the man. But you don't see it, because the knowledge of the man is not at that point. How do you think we travel in the depth of the U? Back to the Future car? No way. Understanding the transmutation of the Pl, yes. This is the only way. And many of you are creating it. Now you are running into problems. Not us, you are running into it as the human race. Now you'll start seeing too many genies and what you call ghosts, but there are no ghosts. You create the condition, it's like you walk in the dark you don't see, you have a torch, when you turn it on you see someone standing in front of you. Because now you have the light to shine on them. The creation of that dynamic environment is that light, it shines in the presence of the ?? And you have to learn. And man, where we are taking you to, has no choice. (2:28). You have no choice. You thought I am going to bring you on a SS top, you have to make the condition that when you invite those, in the SS, can be manifested, and that you have a place to host them, and that you can control it. They do the same for you. If you think you travel the depth of the U in the body of the man, as I said, you are quite welcome. It means you haven't understood even a percent of the teachings. You create conditions, understand what you create. I looked at the new medical systems which are getting developed at ?? , I said, my god these guys don't even understanding what they are hitting at. And now what they want is to fill it in with neutrons. My god, understand what you are doing because while you are putting it together somebody must be sitting in there that you were not expecting, what are you going to do, 'beam me up Sctotie'. The tests which are getting done in China are not expectations of understanding, it's understanding the field strength and gradually the team understands seeing what they see. They tell me I am crazy seeing things. No, you create the conditions, you have to educate people. I was watching for a few seconds maybe 10 - 15 minutes on the camera and I could see things, and these standing there and not even seeing what I see, and I see them on camera directly. They don't come and move a chair for you to say that they exist, because in their dimension of physicality (2:30). a chair has not tangibility. It's like putting your hand through fresh air. With tests like this, people want to make dynamic systems, put 10 of these different mixers together and see what you make. You don't need to have space labs, and god knows CERN to speed up the electrons or whatever, accelerators. These are your best accelerators. These are the best systems you can create to create conditions of, what you call, existence. Man will learn this. And don't expect all the guests to be midgets because you put them in there. We are entering a new phase of teaching and understanding the totality. This is part of the reality that you have to accept. If you are running a SF and you wake up in the night and your wife says, I think there is someone in the basement. Of course there is, but they aren't from this planet are they. I told you to switch the machine off, you should have done that. It's someone from planet Zeus hanging around, you created the condition and he came to have a look. But he doesn't have an eye, you see a face, a mirage or image, because he sees through his soul. Don't expect to see people with

eyes and noses and everything else just because it suits what you have on. This is part of understanding and we have to. And I have to bring you so fast forward, (2:32). that mankind has to mature to it. This is part of the process and understanding and we have no choice because now we set our systems to meet, now we have no choice. Switch off you dynamic and MaGrav systems and don't ever switch them on. Because in a way I have headed you that way, I am a very clever guy. You haven't walked into a trap, you have walked into the knowledge of creation and you have to educate yourself very fast. One of the reasons we use neutrons because partially it is the food of the U. So you always have something to give, to confirm and be able to sustain life. It's part of the process. You came here today, now you see you have become a host. What are you going to give your guest. In Iran we are offering the gift of life. I wonder what AZ has seen up to now that they haven't seen before. (2:34). Because they were looking so amused to see where the field goes they don't remember, they have seen that they have made a pool of life. It's very interesting when you sit in front of the Chinese (system), and I can't say because they don't see, I see and I know what is there and what is to do. John comes on. It's interesting you brought this up. From my stand point and others in the factory that there is a palpable change in let me say, a peacefulness factor. At times I am overwhelmed with peacefulness in my own body and I know it's from being within the fields that are going on at the factory. The other day a gentlemen who is a friend of the KF and he is energy sensitive and sees fields, and when he came into the environment, it almost took his breath away (2:36). ... He saw sparks of light coming from certain sections. . ... when delivery people come in they say, hey what's going on in here, because they notice something different. You see you are in advantage point of research because you have made a launch pad with your MaGrav systems which is fixed, it's not dynamic, but the interaction of the fields are fixed base with your dynamic base, 3 base reactors and the top, creates a constant, (2:38). field strength. If you change some of your Gans's in your cores or you might change something in one of the launch pad bases, or call it your 18 reactors. You might create a condition that in that position you see things, or that there is a manifestation. We always say, we think that from here to the moon that there is nothing, just empty space, my god it's full, nowhere in the U is there an empty space of fields. And how do they react and interact. 48 .. ... I think what Armen said is correct that when we mix the Gans we energize it. So if we put our CO2 in the mixer before putting it in the lake if you will, by putting it in the blender I believe it would carry a lot more energy. My god, since when did you wake up John, go back to last year we spoke about the ?? can do it. This is what we taught a year ago. What I am trying to tell the Health people is that they can put it through the mixer and it will make it stronger. (2:40). We are actually going to take our Gans material that we had in our reactors and homogenize it and put them back into the reactors and see if it is enough to boost this up a little bit. I want to get into something about our frequencies as human beings. A lot of times our frequencies have been dumb down by the foods and meats that we consume. We have kind of done it unknowingly to ourselves, while all of the elites if you will, eat and drink what they call the monatomic to elevate their souls. I believe that some of the Gans waters can help us elevate the soul so that it can become the vessel that will allow us to see these beings and interact and ?? the fields of the SS we are creating. (2:42). Perhaps the time is getting close when we can open up the umbrella. ... John shows 23 second video of blending CH3 and tritium Gans with Nano blender to energize the Gans. ... What

are we supposed to see in that? That was energized H3. What does it do? That's what we are going to be putting in our reactors. The Chinese space test they took the neutron or maybe the H, and they left it in the sun for a day or whatever to energize it, and it changed color if I remember correctly. So you don't need to blend it, if you can put it directly to absorb the plasmatic field (2:44). of the U is much easier because it's made for that. Here you extend the physical or mechanical matter side of it, but there you strengthen the plasma side of it. If you know what you are doing or you understand it, when you have a H and you add energy to it in the right way, the way you put a neutron, it will end up to be Tritium, and it changes to the color of T, if you don't understand it, you can blend it and get there faster, some of it, but some of it if you can understand the process of it, converts itself to a C and you can get a crystal from it. Q: We also tried drying in the sun, in fact all of our dried Gans is from the sun, whether it's the salt.) What happened ... John let me explain it, I think I didn't explain it in the right way. You put your Gans in a sealed ball it can't dry, it can only transmute. Bahuala said, 'the maturity of the man comes when he understands the process of transmutation of elements'. We passed that, because man is so mature in understanding ?? field of the U. So if you dry it and open a space of matter, yes. But what about what the Chinese did? They sealed the ball and let it to increase the energy. Armen can tell about what you are talking about if you go back to the Iranian nuclear reactor space one, (2:46). the energy reactor we made in Italy coming form Rouge in Belgium, they all have wings on them, like ear, what for do you think, exactly what you are doing. Mixing it ?? Do you remember Armen? Yes. So why do you think you are coming to it, you are showing it in a different form. (We did this 2 years ago, we had a bowl with a mixer in it) Yes, I know. Now you know why you have to mix. Part in a way what is missing in the Chinese reactor design. Armen shows his reactor with the N mixer inside. You took everything with you? Yes. Even the dogs. .. This is the process and now we understand how to use it. The knowledge has been sitting there. If you have that mixer, especially in the Chinese space reactors (2:48). flight is imminent. Homogenous structures ... (not clear..) Remember I told you there are a couple of faults with the reactors, but it is part of the learning , it has to be there. If you make multi-cores, just give an edge that it has a wing on it. Everyone, every layer will create its own homogenous fields. Space flight is imminent. If you look at the Iranian space reactors, especially the one that flew, I deliberately made that kind of ??? on the button. If you remember, you seen it, N material glued on top of it, inside, those are the wings. We are coming to the point of understanding what we knew. This is part of the process of the evolution of the knowledge. Armen turns it on. If you understand what you have in there you can fly that machine. (slowly but surely). (2:50). You have something called the neutron there. Choose a neutron from Tritium and one from H, ?? base ?? balance, and mix them in that mixer and you'll have 2 different types of H, neutrons. You have to realize the neutron which comes from the work of the Tritium and Deuterium is different then the neutron that comes from H and Deuterium, even though they are both neutrons, and if you can get the right ratio of the 2 in the ball, and if ?? yourself ?? stand there and can be brought in at a higher order of magnitude, you don't need the walls of the reactor to be built and have separate. The neutron energy balance will create MG field of the U. Then the use of the 3 gives you the dimension of the reality of the existence within one reactor. very, very old spaceships were built this way. And they are very safe, (barking), you see even the dog says yes. This is the understanding of the knowledge.

Why these reactors are safe is because if you get the ratio balance, it's like the top, middle and 3rd layer of the skin, they will exist. They can't diminish because it's dynamic they transfer energy between one and the other and the ratio balance just moves. (2:52). The Deuterium in time will become the Tritium and the T moves back into the bottom and become the H, because they give the energy to take the energy. You have a dynamic system just by the Deuterium, because this is what I have a problem, I don't have a problem in time, when somebody writes a scientific paper about it, Now Mr. So and So discovered this, oh, but it was said before, ... a famous expression in Farsi, whoever has a mustache is not your uncle. So just because you created the neutron out of between Deuterium or Tritium or H, it doesn't mean they are the same. If they were the same they would have taken position in the other one. You can use the energy difference in balance in the neutron to create the same dynamic flow. You don't need 3 elements. This is where you have to expand the knowledge of the space T. If you put 3 different neutrons, 1 from T, 1 D, and 1 comes from a neutron from conversion of between Plutonium and Uranium and put it on the other side of the room, that you create a space gap cage, you might find that the space gap allows you to see into the depth of the U. You don't need to be there. We make visual manifestation in SS this way. As you can manifest the images of entity, (2:54). you can manifest the same, the visualization of the depth of the U in presence zero time. If it is hard for you to understand, what do you think, you just drank the orange in the water, or was the shape of the orange in part of the structure you ate, why did you feel the texture? Man when he understands time travel, understanding to what ?? you can't send a camera to watch and take 20 minutes for the light to get there and come back. When the knowledge of the man matures he will create what we call, visualization of understanding of the depth of the travel in the depth of the space, through understanding of this process. You have a lot to learn yet. 45

(3:02).

(3:05).

(3:08).
END

237th Knowledge Seekers Workshop - Thursday, August 16, 2018 (,)

(:15). (:18). (:20).

(:24). we go to the next phase of what we call, human, motors, engines system and to create a dimensional motion. In due course we will teach this, how it done, achieved. But as we said in our dynamic reactors, 2 days ago, we still see creation of plasmas in the reactors, which means we don't need the motors to run the plasma to create a condition of dynamic Pl system. On one of the biggest things we are learning is that we can start forecasting what the situation with the reactors could be. We had a beautiful setting up the system for the last few days in China, we could see reduction in the reactors coming

down to the matter state, and suddenly we saw a change in direction in the fields where the motors were running out of control, they were speeding up. Ask one simple question, what is the weather condition? It was obvious that there was a typhoon coming in. We know from the experience of 4 weeks ago when we lost all the reactors that the weather condition drains and pull s the fields away from the MG fields of the earth. Therefore we decided immediately to shut all the reactors down to auxiliary matter level that means that they can't be exposed to what we call, opening of umbrella, that we add into that ?? so that we don't have what we had a few weeks ago. In that process we have learned for our team (:26). that any abnormality in the expansion, in the speed of the motors, then we have to step down. This is important as part of the teaching, if you go to part of the patents and development of the space T reactors, this kind of phenomena for creation of directional motion is very important. It means the fields open up into the direction of the motion of the much stronger field, adn you get pulled in. You literally loose your M shielding and in that process you are opened, anything can happen to the space reactor. One of the things that are important in this process of expansion or increase in the Pl fields if you run the motors at a higher speed than you set, which means you have opened yourself to a stronger M field, you are taking direction of motion. If this reactor was not on the ground, most probably the space will move in the direction of the center of the typhoon. Therefore it is part of the learning process that how and in which direction, which one of the reactors are speeding up. When we look at the data we received over the testing, we see the direction of the motion (break ...) ?? direction sits with 1 reactor, reduction in M or G field flow, as we shut down our launch pad. These data are very valuable, in way of understanding, because once we create a dimension we see one of the base 3 reactors show increase in the speed or reduction in the speed, we can dictate the direction which the field flow of the environment is pressurizing on the reactors on the flight system, and this is important. (:28). of.. (:30). .. we have to accept calls from the governments, as long as somebody doesn't reject peace talks you can always talk, and both sides are prepared to talk. It's fantastic to listen to, the ambassadors, and see that we are still in the course and talking. ... (:32). In diplomacy, unless they tell you they are not prepared to negotiate, we are negotiating. The calls from the embassies shows that the nations are prepared to talk. When they call it means the path is open. We should pray for both nations and see if we get both ambassadors and world leaders in the track. It's a huge risk for world leaders to meet especially when there is conflict. It's been done before and we can do it again. Anyway, going back to what we were talking about in respect to the flight system, in the process of the expansion of the fields, many of you have tested a lot but you look at figures in one position. When you test especially like in AZ and others and the government scientists in the background copying the systems and doing it. It's a teaching for you, not for those who just test something on a simple reactor. In these processes you have to look at the ttoal dimension of the field flow. You have 4 basic cores, these cores, each one has a meaning. When you see changes in data. This goes especially to our team in AZ and another position which are testing these flight systems, or they are trying to create flight. When you have a space top reactor, and bottom 3 reactors. (:34). You have seen numbers change. Let's say you start with 6,000 (on the top) and 5,000 (on the bottom). Or you start the other way. You have to understand this system flow is dangerous, because to keep the flow going you have to feed in this direction (from the bottom to the top). In normal Pl the higher always goes towards the

lower to feed it and bring a balanced creation. So if you put the top at 6,000 the bottom has to be 2,000 extra, so you follow the pattern of the field flow. Another thing that will come in your test flight is the fluxuation in the top reactor, .. it's part of the structure of the flight. If this is going down or up (top). If this goes down which one of these reactors are holding steady? All 3 keep around the same speed. When you see a drop in this one (a bottom reactor), it means you have an increase in ???? you have a decrease in the top and on the side. What does it mean? That the G field forces are pressurizing in this direction , sometimes you get ... you get one dropping and one increasing. This shows environmental pressure on your system. (:36). Something on this side is pushing or on that side pulling. the structure until you achieve a full flow, or the shape of your SS, you are at the mercy of your environment. One of the ways you achieve solidification, when you become matter state with the plasma, as we taught last time, somewhere around 2,500 to 2,800 depending on what you have loaded, maybe 3,000 (rpm) or so is your matter state, you have to push the speed with change the configuration 54

... you have to be able to achieve harmony balance flow in your base and at the same time in totality. If you achieve the figures then you see the tangibility. these kinds of configurations, processes are not easy, because you have to understand that there are a number of factor (:40). in the design when you put motors which changes this. All of you have these dynamic small motors, so your matter magnetic magnets dictates changes continuously so it dictates the field, then it's how you pull these fields to the top. How do you force the fields which are coming in, and how much can you absorb on the boundary that you can dictate the condition. Until the moment that you don't make a full cell, that now the system takes over it's impossible to control. As I said last night we saw a very clear indication, it was a single question to ask, what is the weather condition, we had 5,000 increasing to 6,000, and one of the base reactors is increasing in the speed. It's running away, it's getting faster. And there is only one way, why is it faster. Which means we have not managed to create the cell, and in that process, in this setup, the field flow of the clouds above us which carries a plasmatic MG field flow, this is something in which the scientific world has to extend the knowledge to, is that the clouds do not carry electric current, they carry plasmatic current, until they come in touch with, or are reduced into the matter state, this is why our reactors interact with cloud energy pattern, because it's of the same process, and the beauty or the problem with it is our plasma reactors at this moment in time are made of water, so we have 2 similar entities interacting with each other, this is why we effectively, (:42). if you look at you reactors we are connected. We carry the same moisture H20. Energy fields within this core already has a common denominator matter state of the plasma in connection. So it's very easy to download. If we go back on the same principle, as we said, that the strongest feeds the weakest you ... (break up) ... our reactors downloaded into the cloud, which means the MG field plasmatic condition in such a small reactors are so much higher that they downloaded to the storms, clouds and we think they deliver millions of megawatts, in fact if the clouds would have downloaded to us we would have seen the compression in the fields, we should have gone directly to less than 2,000 , 1,800 or whatever. But what happens the umbrella opens which means we are producing massive amounts of energy in these small reactors, we are releasing neutron energy balance, which those of us

who understand atomic consideration ?? energy in what we call a plasmatic condition to deliver into the cloud and create such a huge conversion of energy that we hit the transformers, then you can see how powerful these reactors are. If we get hit, if the clouds download to us we should see an explosion of our reactors. that doesn't happen, we see the opening of the umbrella which means the speed goes up, we are opening into direction so we are feeding into it. We are not getting striped , we are getting opened up. (:44). And in that process, why we are saying we are not getting striped or getting opened up that we loose our Pl, is because the other 2 reactors hold on to their speed, in the same speed, or same combination of the speed. It means that the energy produced in these small space reactors is at the neutron level, because the reactor especially in China works totally and purely on the conversion of the neutron. It's not H or Tritium. It's pure, the way we designed it, we only consume, only use when the neutron is created. Neutron energy, even in a single neutron is so huge, and then we create these conditions, but the conversion of it is the biggest problem. We have to be able to contain it, to sustain it. Those of you who are now testing in different space centers especially governmental research teams who we know are working in the background on this level, you have to convert the neutron energy into be able to control it. One big fundamental principle, and that is if you have 3 reactors that can tame the top reactor, and hold it, and reduce its speed and rotation, but when you have an external entity like a typhoon, or high clouds you create, then it means the power of the 3 base reactors must be much more powerful then the clouds. This explains if you understand, nuclear atomic energy, (:46). plasma transfer energy, it gives you a lot of insight. A huge insight into full understanding of the Pl in the space travel, in creating of the shields, in dynamic flow, and in the process of transportation and transmutation of elements. Because you can create conditions that this plasma flow from the top to the 3 base, you cut it up and take what you like from it to create O, H, and everything else. So you don't need to go outside. You created the condition which the cloud created outside to pull, you pull in to the conditions of what you need to create, H, water or whatever. Establishment of the ?? salt, what we call SF systems internally to create matter or materials becomes part of the structure of the understanding of the process. When we look at the field flow in the dynamic system like the space reactors, this must be so powerful that it can withstand MG field forces of the planet. So why don't we, and how do we fly? The process is very simple, you have to create the plasma shielding that you become independent cell that from there on we call always the soul of the system, or the FP condition dictates its position in respect to earth. Last night in the test it become very clear that we are loosing .. I can read some of the writings from the space people who are on the site. that we are loosing, (motors) are speeding, it's becoming irrelevant ?? ways increasing in the speed. And very simply, (:48). all we had to do was to understand why, because there was no reason for such a move, and we just asked one single question, what's the air condition, is it raining, and the answer was we have a typhoon. The position is, as we ask now, what was the pattern of typhoon, was it supposed to pass over the test center. Why do we get so many heavy rain typhoon over the space center? Are we dealing to creation, are we absorbing to be there, are we pulling such a vast amount of energy that creates these conditions. Then the question comes, in the space can we create a condition that we can protect ourselves by absorption of the fields internally within the reactors of the system, or what we call shielding. Many of you in the process of, most probably looking on the Internet or

looking at different peoples report, you see UOF's appearing out of clouds, or are in the clouds. They create that cloud. As you have seen we reported 4 weeks ago in the South China Sea, and again yesterday. You should be able, to create a condition, as we explained 2 weeks ago, the creation of water in certain position of the reactors it's in reality, we have learned how to create clouds that can lead to creation of rain. What does this mean, in the space T in the coming time ... (break). (:50). ... what happens is it comes to the point ... people say UOF comes out of the cloud. They don't hide behind the clouds, they create the clouds. Then in a given condition in a drought, or in huge fires, can we create a condition that we move clouds over that it creates rain. These are the knowledge that has to be gained and used whenever for mankind. These are the things we'll see in the development of the T in the coming time. We know and understand the process. Now it's time to be able to expand, as I say something and in a few months or weeks some of you will start testing and say, oh, this is what I have achieved, but if you go back to the teaching, you understand it, you expanded and we got that. In the tests, now again in a short time we have seen the creation of massive clouds, we can create, was it us. But don't forget there are a number of KF supporters who have reported such things that they have created or they can move typhoons or whatever. We can't interfere in the process of the life of a planet. (:52). But in certain positions, in running our systems we create local conditions, which we can and will effect. We come to the next step in the knowledge of understanding and that is, can we create a condition that using our transportation in new ways of creating flight systems, we can control rain. We can control forests. Many of you write us whether we can devise a system that can stop forest fires. You can do, now you see it. But if you do it is the biggest mistake because you change the dimensions of the life on this planet. Forest fires are part of the structure of the life on this planet. The deserts are part of the structure of this planet. We can change harvests. we can change goods. We can change it, everything, but we have to understand what is the reason we are doing it. What is the principle behind the reason we are doing it. Are we doing it for short term or are we there to see it change. Can we use the motion and movement of the desert, but at the same time create a condition at the boundary of the desert, that we can halt it. But what will happen in 100,000 or 1,000 years when the energy of the desert which is supposed to move, has been stagnated. It's still there, we can't stop it. We can put a fence in front of it, it's like a dam, at a point sometime in the future, this dam will break. In a understanding of the ttoal cosmology and the understanding of what we call the geology of this planet, we'll find out that whatever we do, now that we have gained this new knowledge, will have effects on something somewhere else. (:54). Or is it, 'I am okay Jack', forget about what happens to my next door neighbor. Because becoming One Nation, the next door neighbor is part of One Nation, a part of us. These technologies and the others which are coming, these are the test results coming in, and 2 test results, we have to understand what we are creating. In a process of teaching we refer to creation of the neutron. How you created the atomic and molecular structure, or you create an atomic structure in a Nano condition in a Gans of the plasma and you lead to the creation of new dimension. But now this new dimension will be called the Pl of the neutron, can be used directly itself. How do you load this that you can create the condition. How can you transfer loads from what we call, from G to M. If you look into the structure, those of you who work in the space level, very simple and that is, if you look into your reactors the same process follows. He draws 1 circle

inside another. If your ratio in respect to your reactors, is understood, you create the field. If your ratio mass is this way, (outward) you create G, or if it is this way (inward) you create M. Then you only need 1 reactor, 1 fuel. (:56). But there are further steps in the knowledge of the space T that you can't keep on carrying neutrons with you. We go into the next level of understanding in the space T, which is the free energy, the origin of the creation of life. Which means you have to find a way that you take advantage of the fields and not the neutrons. Fields technology transfer, the origin of the creation of life, has its balance according to the process of understanding. Remember you came from Gans's and you produced the neutrons, now you have to use the neutrons to create the condition of FP, and that FP in the condition of understanding of the field forces of the ..... of the creation of the structure, it will not interact with the neutron but with the field plasma, which is the creation of his own soul. If you go back in the teachings of 3 - 4 years ago, we called this in a simple way a Free Plasma position (in between the 3 base and top reactors). Now that you have started creating neutron reactors, very simply this is what we have been teaching you from the beginning. Creation of the plasma without containment. Creation and control of the Pl without containment. Because what happened, it goes back to the origin of life. (:58). We put an egg and sperm together and from it we created the STM and through it we created the dimension of creation. Now you put the neutrons together, you create the condition of the fields what we call the FP. But up to now you were in the matter state, now you come into the condition of the FP state, which means no containment. What you'll see in the dimension of the development of the reactors, as you remember you had the 4 reactors, 3 base and 1 top, each one of these has created its own FP, and the interaction of the 3 has created the condition of the creation of the Pl itself. Because you have to see what you have, (draws the triangles) each segment created its own FP and the totality has created a top FP. Now your control system sits in this ( ). If the knowledge of man increases in the coming time, what you'll do, you use the motors, the neutrons, the cores, to create the fields of the FP, and once you tap into the FP without matter construction, then you create the totality. This is what you see in the SS, in UOF's when you look underneath (a SF). You don't see any containment, you see reactors without containment. You see the light. Then this process leads to the creation of the totality. A few weeks ago (1:00). I explained that there is another step in the process, in understanding the process of the teaching. In that process now we achieve non-tangibility through tangibility, and then from it we increase the understanding of the ttoal system. Then we become independent of the matter, ?? plasma and the creation between the all fields on the Pl on their own leads to creation of new life. We do not need to be tangible. The field plasma in theory, ... becomes part of understanding of the new science. Then we can do without any motors any reactor, any physical, tangible understanding. Then you understand the soul of the captain, when we explained, be it non-tangible, will become part of the process. I always said, when somebody goes in the direction, we always explain to everyone the same, is that what you'll see the size of the SS depends on the number of the souls, entities with souls which (it) carries. So as you add more passengers, the size grows. When you see a SS thousands of kilometers in diameter you can imagine what it carries. With this kind of dimensions you do not build reactors with just 1 piece or 2 pieces and you get another bar and sheet of metal and build it. (1:02). Going back to the basic understanding of the space T and the M field interaction, you go back to one principle, again do you remember the
